SPECIAL NOTICE

FOREIGN TECHNOLOGY INDEX IN THIS ISSUE

Documents referred to in this bibliography whose country of intellectual origin is other than the United States are listed in the Foreign Technology Index (see page D-1).

A great deal of excellent scientific and technical work is done throughout the world. To the extent that U.S. researchers, engineers, and industry can utilize what is done in foreign countries, we save our resources. We can thus increase our country's productivity.

We are testing out this approach by helping readers bring foreign technology into focus. We would like to know whether it is useful, and how it might be improved.

Check below, tear out, fold, staple, and return this sheet.

Foreign Technology Index:

- ☐ Isn't useful, so should be discontinued.
- ☐ Is useful, but other sources can be used.
- ☐ Is useful and should be continued.
- ☐ Suggestions for improvements to future issues:

SPECIAL NOTICE

The abstract sections of the monthly supplements of *Aeronautical Engineering* can be bound separately. Individual abstracts can be located readily by means of the page numbers given at each entry, e.g., p 543 N84-23654. To assist the user in binding Supplements SP-7037(171) through SP-7037(182), a title page is included in the back of this Cumulative Index.

**A CUMULATIVE INDEX
TO
A CONTINUING BIBLIOGRAPHY ON

AERONAUTICAL ENGINEERING**

This Cumulative Index supersedes the indexes contained in supplements [SP-7037(171) through SP-7037(182)] published by NASA during 1984.

INDEX

This index is available as NTISUB/141/093 from the National Technical Information Service (NTIS), Springfield, Virginia 22161 at the price code of \$10.00 domestic; \$20.00 foreign.

INTRODUCTION

WHAT THIS CUMULATIVE INDEX IS

This publication is a cumulative index to the abstracts contained in NASA SP-7037(171) through NASA SP-7037(182) of *Aeronautical Engineering: A Continuing Bibliography*, NASA SP-7037, and its supplements have been compiled through the cooperative efforts of the cooperative efforts of the American Institute of Aeronautics and Astronautics (AIAA), and the National Aeronautics and Space Administration (NASA). Entries prepared by the two contributing organizations are identified as follows:

1. NASA entries by their *STAR* accession numbers (N84-10000 series).
2. AIAA entries by their *IAA* accession numbers (A84-10000 series).

HOW THIS CUMULATIVE INDEX IS ORGANIZED

This Cumulative Index includes a subject, personal author, and corporate source index.

HOW TO USE THE SUBJECT INDEX

Two types of cross-references appear in the subject index:

1. Use (U) references indicate that the subject term is not "postable," i.e., not a valid term, and that the following term or terms are used instead. For example:

AIRCRAFT PROTUBERANCES
U PROTUBERANCES
FLIGHT PERFORMANCE
U FLIGHT CHARACTERISTICS

2. Narrower Term (NT) references refer the user to more specific headings in the same subject area, under which additional material on the subject may be found. For example:

FLOW RESISTANCE
NT AERODYNAMIC DRAG
NT FRICTION DRAG
NT SUPERSONIC DRAG

In addition, a searcher may use the title or title and title extension in the index to narrow further his quest for particular items, this is because subject terms can readily include more than one class of document. For example:

AIRLINE OPERATIONS

All-weather operations, including pilot role, instrument landing systems and guidance aids.

Airport congestion as constraint on air travel, considering runway capacity and adjusted demand.

illustrates a case where two references on different topics are listed under the same subject term.

HOW TO USE THE PERSONAL AUTHOR INDEX

All personal authors used in the abstract-section citations in the individual Supplements appear in the index. Differences in translation schemes may require multiple searching of the index for variants of an author's name. For example:

EMELIANOV, M. D.
and
YEMELYANOV, M. D.

HOW TO USE THE CORPORATE SOURCE INDEX

The corporate source index entries are abridged versions of the corporate sources used in the abstract-section citations in the individual Supplements. The corporate source supplementary (organizational component) does not appear in the index. For example:

BOEING CO., SEATTLE, WASH. MILITARY AIRCRAFT SYSTEMS DIV. (Source citation entry)

BOEING CO., SEATTLE, WASH. (Source index entry)

HOW TO USE THE CONTRACT NUMBER INDEX

All contract numbers that are identified in the abstract-section citations in the individual Supplements appear in this index. Changes by agencies in the style in which contract numbers are presented may require multiple searching for variants. For example:

AF 33(615)-71-C-1758

F33615-71-C-1758

HOW TO USE THE REPORT/ACCESSION NUMBER INDEX

All report numbers that have been assigned by the corporate source, monitoring agency or cataloging activity appear in this index. Variations in initial cataloging may result in different report number series. For example:

TP-924

ONERA-TP-924

IDENTIFICATION OF DESIRED SUPPLEMENT

The abstract and descriptive cataloging for any accession number selected from the indexes may be found in the appropriate Supplement. The page-number range of each Supplement appears on the inside front cover of this index. Once the range of page numbers containing the selected accession number is located in the second column, the desired Supplement number will be found in the first column. For example:

Page 948 will be found in Supplement 182.

AVAILABILITY OF DOCUMENTS

Information concerning the availability of documents announced in *Aeronautical Engineering* supplements is found in the Introduction to the most currently issued supplement.

TABLE OF CONTENTS

	<i>Page</i>
Subject Index	A-1
Personal Author Index	B-1
Corporate Source Index	C-1
Foreign Technology Index	D-1
Contract Number Index	E-1
Report Number Index	F-1
Accession Number Index	G-1

PUBLIC COLLECTIONS OF NASA DOCUMENTS

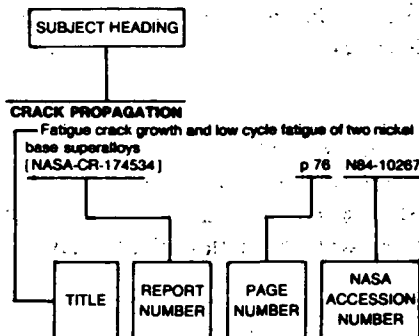

DOMESTIC: NASA and NASA-sponsored documents and a large number of aerospace publications are available to the public for reference purposes at the library maintained by the American Institute of Aeronautics and Astronautics, Technical Information Service, 555 West 57th Street, 12th Floor, New York, New York 10019.

EUROPEAN: An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England for public access. The British Library Lending Division also has available many of the non-NASA publications cited in *Star*. European requesters may purchase facsimile copy or microfiche of NASA and NASA-sponsored documents, those identified by both the symbols # and * from ESA - Information Retrieval Service European Space Agency, 8-10 rue Mario-Nikis, 75738 Paris CEDEX 15, France.

FEDERAL DEPOSITORY LIBRARY PROGRAM

In order to provide the general public with greater access to U.S. Government publications, Congress established the Federal Depository Library Program under the Government Printing Office (GPO), with 50 regional depositories responsible for permanent retention of material, inter-library loan, and reference services. Over 1,300 other depositories also exist. A list of the regional GPO libraries appears on the inside back cover.

Typical Subject Index Listing

The subject heading is a key to the subject content of the document. The title is used to provide a description of the subject matter. When the title is insufficiently descriptive of the document content, the title extension is added, separated from the title by three hyphens. The (NASA or AIAA) accession number and the page number are included in each entry to assist the user in locating the abstract in the abstract section. If applicable, a report number is also included as an aid in identifying the document. Under any one subject heading, the accession numbers are arranged in sequence with the AIAA accession numbers appearing first.

A

A-10 AIRCRAFT

- Flight test and evaluation of the A-10 single-seat night attack avionics [AIAA PAPER 83-2767] p 37 A84-12352
- A-10 DCAS proven through realistic simulation [AIAA PAPER 83-2721] p 135 A84-13380
- Preliminary design of a digital command augmentation system for the A-10 aircraft [AIAA PAPER 83-2490] p 135 A84-13391
- A-10 single seat night attack p 190 A84-15978
- Evaluation of benefits of the A-10/TF34 Turbine Engine Monitoring System Squadron Integration Program [AIAA PAPER 84-1414] p 603 A84-35208
- TEMS/CEMS IV - An advanced on-condition maintenance concept undergoing evaluation on the A-10/GE TF34-100 [AIAA PAPER 84-1413] p 635 A84-36977
- Effects of gun gas ingestion on engine performance p 888 A84-44456
- Low altitude simulator training: A-10 aircraft [AD-A130794] p 73 N84-10106

A-300 AIRCRAFT

- Change regarding the camber of the wing of the Airbus A300-600 p 11 A84-10563
- Investigations of the flight characteristics of airliners with reduced static longitudinal stability [DGLR PAPER 82-091] p 62 A84-10566
- The aerodynamic design of the Airbus A300-600 [DGLR PAPER 83-123] p 436 A84-29683
- Long term in-service evaluation of CFRP components (spoilers) on Airbus A300, phase 1 [BMFT-FB-W-83-028] p 353 N84-18344
- Access to maintenance via Aircraft Integrated Data System (AIDS): Future aspects of the expanded AIDS p 691 N84-26567
- Analysing redundant flight path data on two Airbus A-300 aircraft p 692 N84-26577

A-4 AIRCRAFT

- Over simplification can sometimes be hazardous to your health - The XA4D Skyhawk story p 192 A84-16164

A-6 AIRCRAFT

- All-weather attack for the next century p 866 A84-43911
- Development of lateral-directional equivalent system models for selected U.S. Navy tactical aircraft [AD-A141672] p 790 N84-28810

A-7 AIRCRAFT

- A fatigue life tracking program for an aluminum wing p 347 A84-23504
- Development and flight test evaluation of an analytical model of the air-to-air tracking task [AD-A138058] p 464 N84-21555
- Reconfigurable digital control laws for the A-7D DIGITAC 2 aircraft with failed primary control surfaces [AFIT/GE/EE/82D-59] p 610 N84-24535
- Development of lateral-directional equivalent system models for selected U.S. Navy tactical aircraft [AD-A141672] p 790 N84-28810

ABLATION

- The role of thermal motions of particles in gases of fireballs p 248 A84-19274
- Asymmetric blowing model design and testing p 368 A84-25219
- Hypersonic flow past evaporating bodies at angles of attack p 404 A84-27062
- Transient ablation of blunt bodies at angles of attack p 716 A84-36555
- A method for solving the unsteady heat transfer and ablation problem for a body p 716 A84-37067

ABLATIVE MATERIALS

- Nonlinear modeling and initial condition estimation for identifying the aerothermodynamic environment of the Space Shuttle Orbiter [AD-A136928] p 372 N84-18391

ABLATIVE NOSE CONES

- Hypersonic flow of a viscous gas at the surface of a blunt cone with strong injection near the blunt section p 264 A84-21133

ABORTED MISSIONS

- Exploration of dose-response techniques with some applications to a simulation problem [AD-A138029] p 492 N84-22252

ABRASION

- Spraying for time - Abradable seals the key p 382 A84-26074
- Impact dynamics research on composite transport structures p 802 N84-29975

ABRASION RESISTANCE

- Fiber metal abradable seals [ASME PAPER 84-GT-67] p 1001 A84-46914
- The wiper abrasion and rain erosion resistance of transparent materials and coatings for aircraft glazing [AD-P003227] p 713 N84-26640
- Effects of surface flaws on impact resistance of uncoated polycarbonate [AD-A141364] p 800 N84-28998

ABRASIVES

- The reduction of life-cycle costs through continuing acrylic maintenance [AD-P003224] p 637 N84-26637

ABSORBERS (MATERIALS)

- Sound-absorbing composite structures for gas-turbine engines p 58 A84-11347

ABSORPTANCE

- Comparison of JFTOT (Jet Fuel Thermal Oxidation Tester) and absorbance methods for determining jet fuel thermal stability [AD-A138673] p 616 N84-24825

ABSORPTION SPECTRA

- Applications of photoacoustic techniques to the study of jet fuel residue [NASA-CR-173322] p 375 N84-18420

ABSORPTION SPECTROSCOPY

- Optical gas temperature measurement in gas turbines [PNR-90174] p 538 N84-22572

ABSTRACTS

- The Shock and Vibration Digest, volume 18, no. 3 [AD-A139707] p 560 N84-22976

- Bibliography of Supersonic Cruise Research (SCR) program from 1980 to 1983 [NASA-RP-1117] p 665 N84-27674

AC GENERATORS

- Electrically compensated aircraft alternator drive of passenger aircraft p 216 A84-16535
- Three-phase, high-voltage, high-frequency distributed bus system for advanced aircraft p 79 N84-10058

ACCELERATED LIFE TESTS

- Accelerated corrosion testing of fuselage components of passenger aircraft p 397 A84-27864
- Designing for durability in fighter engines [ASME PAPER 84-GT-164] p 973 A84-46968
- Long term evaluation of the effects of shale oil produced JP-4 on aircraft construction materials [AD-A131665] p 123 N84-12161
- Simulation of exposure of aircraft transparencies to flight line environment [AD-P003212] p 685 N84-26625

ACCELERATION (PHYSICS)

- Feasibility of using longitudinal acceleration (Nx) for monitoring takeoff and stopping performance from the cockpit p 192 A84-16166
- Visualization of accelerating flow around an airfoil at high angles of attack p 261 A84-19592
- Attitude and acceleration performance in the flight control system p 456 A84-26730
- Velocity estimation on a dual-spin spacecraft p 795 A84-42386

- Design of a lateral ride comfort control system for STOL aircraft [UTIAS-TN-247] p 292 N84-16165

- Statistical review of counting accelerometer data for Navy and Marine fleet aircraft from 1 January 1962 to 31 December 1982 p 292 N84-16169

- Effects of motion base and g-seat cueing of simulator pilot performance [NASA-TP-2247] p 350 N84-18189

- The cumulative exceedance distribution for accelerations due to turbulence encountered by a CT/4A air trainer [AD-A135640] p 363 N84-18211

- The Shock and Vibration Bulletin. Part 1: Welcome, keynote address, invited papers, pyrotechnic shock, and shock testing and analysis [AD-A134452] p 387 N84-19866

- Acceleration to a steady state for the Euler equations [NASA-CR-172396] p 758 N84-29852
- An investigation of a new flight test method for measuring the performance of general aviation aircraft p 880 N84-32375

ACCELERATION PROTECTION

- The high acceleration cockpit (HAC) - A technology base overview [AD-A145439] p 770 A84-41697
- Design and development of an automatically controlled variable-load energy absorber [AD-A142683] p 774 N84-29868

ACCELERATION STRESSES (PHYSIOLOGY)

- Between ejection and injury p 24 A84-10747

ACCELEROMETERS

- Laser accelerometers in aerial gravimetry systems p 775 A84-40869
- Utilization of double integration methodology to determine an aircraft's vertical displacement [AD-P002681] p 447 N84-20818
- Subharmonic vibrations of rotor mounted in rolling bearings p 725 N84-26943

ACCEPTABILITY

- Physiological acceptability tests of the modified SJU-5/A ejection seat for the F-18 aircraft [AD-A139416] p 518 N84-23614

- Aircraft transparency testing methodology [AD-P003213] p 685 N84-26626

ACCESSORIES

- All-electric accessory drive systems: Implications on engine design and performance p 132 N84-12184

ACCIDENT INVESTIGATION

- Controls, Displays, and Information Transfer for General Aviation IFR Operations [NASA-CP-2278] p 86 N84-12029

Aircrew Automated Escape Systems (AAES) In-service Usage Data Analyses, volume 2
[AD-A134834] p 281 N84-17155

ACCIDENT PREVENTION

Convective violence and humility — aircraft accidents caused by meteorological conditions p 26 A84-11615

Anatomy of a helicopter accident p 26 A84-11616

Accident survival - The airport and the aircraft p 26 A84-11617

Traffic-Watch — cockpit displays for pilots p 38 A84-11621

Analysis of incorrect human behavior in flight accidents and possibilities for influencing this behavior p 108 A84-15418

Reduction of military high-altitude parachute entanglement using the controlled alternating parachute exit system p 278 A84-20295

A review of the new ICAO Accident Prevention Manual p 417 A84-28256

Recommendations for coping with microburst wind shear - An aviation hazard p 669 A84-36943

Advanced composite elevator for Boeing 727 aircraft, Volume 1: Technical summary [NASA-CR-3290] p 688 N84-27722

Integrated Application of Active Controls (IAAC) technology to an advanced subsonic transport project: Final ACT configuration evaluation [NASA-CR-3519] p 689 N84-27723

Configuration design studies and wind tunnel tests of an energy efficient transport with a high-aspect-ratio supercritical wing [NASA-CR-3524] p 740 N84-28727

Results of design studies and wind tunnel tests of high-aspect-ratio supercritical wings for an energy efficient transport [NASA-CR-159332] p 754 N84-28735

Pressure distribution data from tests of 2.29-meter (7.5-ft.) span EET high-lift research model in Langley 4-by 7-meter tunnel [NASA-TM-83111] p 754 N84-28739

Nacelle Aerodynamic and Inertial Loads (NAIL) project [NASA-CR-3585] p 772 N84-28777

Integrated Application of Active Controls (IAAC) technology to an advanced subsonic transport project-demonstration act system definition [NASA-CR-165920] p 789 N84-28804

Energy efficient engine program contributions to aircraft fuel conservation [NASA-TM-83741] p 783 N84-29876

ACEE Composite Structures Technology: Review of selected NASA research on composite materials and structures [NASA-CP-2321] p 801 N84-29969

Residual-strength tests of L-1011 vertical fin components after 10 and 20 years of simulated flight service p 801 N84-29970

ACOUSTIC ATTENUATION

Sound-absorbing composite structures for gas-turbine engines p 58 A84-11347

Influence of a parabolic-velocity profile on the acoustic attenuation in a lined rectangular duct p 494 A84-28149

Noise transmission characteristics of advanced composite structural materials p 735 A84-37938

Active sound reduction systems — headsets [IZF-1983-8] p 496 N84-22371

Measurement of the absorption coefficient using the sound-intensity technique [NASA-CR-173848] p 941 N84-32115

Study of double wall panels for use in propeller driven aircraft [NASA-CR-173847] p 941 N84-32116

ACOUSTIC DUCTS

A mapped factored implicit scheme for the computation of duct and far field acoustics [AIAA PAPER 84-0501] p 254 A84-18134

Acoustic power dissipation on radiation through duct terminations - Experiments p 321 A84-21272

A wave envelope finite element scheme for acoustical radiation p 394 A84-25863

Influence of a parabolic-velocity profile on the acoustic attenuation in a lined rectangular duct p 494 A84-28149

Investigation of a silencer for the powerplant of a modern jet aircraft p 449 A84-28820

Propagation and radiation of sound from flanged circular ducts with circumferentially varying wall admittances. I Semi-infinite ducts. II - Finite ducts with sources p 631 A84-34746

Experiments on sound radiation from a duct with a circumferentially varying liner p 735 A84-36488

An acoustic evaluation of circumferentially segmented duct liners p 938 A84-44631

ACOUSTIC EMISSION

AE source identification by frequency spectral analysis for an aircraft monitoring application p 237 A84-15909

Acoustic emission in aircraft structural integrity and maintenance programs p 238 A84-15928

In-flight acoustic emission monitoring of a wing attachment component p 189 A84-15935

Effect of crack presence on in-flight airframe noises in a wing attachment component p 189 A84-15936

Sound emission from an unsteady boundary layer p 495 A84-28813

Sound emission during the scattering of Tollmein-Schlichting waves in a boundary layer on a nonuniform surface p 478 A84-28815

Acoustic emission due to crack growth, crack face rubbing and structural noise in the CC-130 Hercules aircraft p 804 A84-40678

Acoustic emission: A brief introduction to some of its uses in the aero engine industry [PNR-90172] p 536 N84-22571

ACOUSTIC EXCITATION

Excited annular jets of large inner diameter p 265 A84-21206

Tone generation by rotor-downstream strut interaction p 298 A84-22174

Formation of coherent structures in a turbulent wake under acoustic excitation p 378 A84-23319

Acoustic emission of structures excited by a turbulent boundary layer - Influence of excitation-field modeling p 494 A84-28150

Aeroacoustic characteristics of acoustically excited jets p 494 A84-28804

Large deflection multimode response of clamped rectangular panels to acoustic excitation, volume 1 [AD-A139622] p 624 N84-25107

ACOUSTIC IMPEDANCE

The effect of tangential flow velocity on the impedance of a hole in a body in a flow p 495 A84-28817

Propagation and radiation of sound from flanged circular ducts with circumferentially varying wall admittances. I Semi-infinite ducts. II - Finite ducts with sources p 631 A84-34746

Experimental study of noise transmission into a general aviation aircraft [NASA-CR-172357] p 820 N84-30888

ACOUSTIC INSTABILITY

Experimental studies of spontaneous and forced transition on an axisymmetric body [AIAA PAPER 84-0008] p 155 A84-17829

Interactions of unsteady acoustic and vortical oscillations in axisymmetric cylindrical cavity [AIAA PAPER 84-1635] p 844 A84-46116

ACOUSTIC LEVITATION

Development of the sonic pump levitation [NASA-CR-161963] p 929 N84-32749

ACOUSTIC MEASUREMENT

Instrumentation for in-flight acoustic measurements in an engine intake [AIAA PAPER 83-2733] p 56 A84-12326

Helicopter noise certification and sensitivity studies along the procedural lines of the new ICAO Annex 16/Chapter 8 regulations p 277 A84-19620

Method for investigating unsteady aerodynamic pressure pulsations on rotating fan blades p 495 A84-28819

Acoustic measurements in high-speed subsonic jets p 735 A84-36483

Acoustic wave propagation through shear layer of the German-Dutch open jet wind tunnel (DNW) [NLR-MP-83003-U] p 497 N84-22379

Nondestructive Evaluation Technology Working Group report (IDA/OSD R and M (Institute for Defense Analyses/Office of the Secretary of Defense Reliability and Maintainability study) [AD-A139484] p 563 N84-23919

Experimental investigation of shock-cell noise reduction for dual-stream nozzles in simulated flight comprehensive data report. Volume 1: Test nozzles and acoustic data [NASA-CR-168336-VOL-1] p 567 N84-24323

Acoustic measurements of a full-scale rotor with four tip shapes. Volume 1: Text, appendices A and B [NASA-TM-85878-VOL-1] p 567 N84-24327

Estimation of the flight parameters of low flying aircraft using the radiated noise [LFD-211] p 595 N84-24569

Area equivalent method VISICALC (trade name). Users' guide [AD-A141430] p 814 N84-29572

NASA/Army supported noise source/noise reduction programs at Langley p 817 N84-29669

Instrumentation for in-flight acoustic measurements in an engine intake [NLR-MP-83060-U] p 820 N84-30898

Measurement of the absorption coefficient using the sound-intensity technique [NASA-CR-173848] p 941 N84-32115

Prediction of light aircraft interior sound pressure level using the room equation [NASA-CR-173840] p 941 N84-32117

ACOUSTIC NOZZLES

Jet noise modification by the 'whistler nozzle' p 393 A84-23355

On the propagation of sound in nozzles of variable cross-section containing low Mach number mean flow p 630 A84-34718

ACOUSTIC PROPAGATION

Effects of boundary layer refraction and fuselage scattering on fuselage surface noise from advanced turboprop propellers [AIAA PAPER 84-0249] p 253 A84-17976

A mapped factored implicit scheme for the computation of duct and far field acoustics [AIAA PAPER 84-0501] p 254 A84-18134

Acoustic power dissipation on radiation through duct terminations - Experiments p 321 A84-21272

Recovery of burner acoustic source structure from far-field sound spectra [AIAA PAPER 83-0763] p 566 A84-32609

Reduction of propeller noise by a reflecting rubber layer — ship propellers [FOA-C-20506-E4] p 323 N84-18025

ADDITIVES

Electron-beam weld solidification structures and properties in Al-3Li-X alloys p 996 A84-48766
The use of fuel additives to control plume opacity of turbine engine test cells
[AD-A130777] p 78 N84-10339
The relationship between electrical conductivity and temperature of aviation turbine fuels containing static dissipator additives
[AD-A135751] p 375 N84-18421
Fire-retardant decorative inks for aircraft interiors
[NASA-TM-85876] p 378 N84-18475
Organic azides as jet fuel additives: Synthesis of azides and micro-explosion characteristics of droplets
p 801 N84-29963
Investigation of thermal coking rates of Air Force jet fuels
[AD-A144421] p 999 N84-34631

ADHESION

A fundamental approach to the sticking of insect residues to aircraft wings
[NASA-CR-173721] p 688 N84-27717
Rigid closed-cell polyimide foams for aircraft applications and foam-in-place technology
[NASA-CR-171805] p 916 N84-32535

ADHESIVE BONDING

Moisture transport in composites during repair work
p 233 A84-17121
Evaluation of a primary anticorrosion surface treatment for adhesively bonded aluminum structure
p 234 A84-17180
Bonded repair center — aircraft adhesive structural bonding
p 148 A84-17192
Adhesive bonded orthotropic structures with a part-through crack p 378 A84-23374
Adhesion between metals and nonmetals - Long applied, but still not understood p 380 A84-24683
Methods for investigating polymer/metal bonded layers p 374 A84-24685
Some effects of alloying elements on the performance of bonded aluminum alloy joints p 470 A84-26825
Repair of cracked or defective metallic aircraft components with advanced fibre composites - An overview of Australian work p 501 A84-31785
Citation III bonded structure
[AIAA PAPER 84-2244] p 837 A84-39287
Weldbond production process technology
p 918 A84-42761
Void formation in adhesive bonds p 912 A84-42765
Metal bonding slowly winning over reluctant designers
p 923 A84-46484
Repeatability of mixed-mode adhesive debonding
[NASA-TM-85753] p 378 N84-19565
Moisture transport in composites during repair work
[AD-A138658] p 550 N84-22703
Swedish research in high-temperature ceramics, superalloys p 916 N84-33142
The use of adhesive-bonded rivets to lessen the reductions in fatigue life caused by rivet holes
[ARL-STRUC-REPT-399] p 999 N84-34617

ADHESIVES

A second generation modified bismaleimide resin with Tg of 570 F — adhesives for aircraft engines
p 234 A84-17156
Evaluation of the AF-10 adhesive, sealing system for use on the C-130 aircraft p 234 A84-17171
Off-optimum cure conditions for structural adhesives - Some effects on performance p 797 A84-11854
Long term evaluation of the effects of shale oil produced JP-4 on aircraft construction materials
[AD-A131865] p 123 N84-12181
High temperature adhesives for structural applications: A review — aircraft engines p 551 N84-22767
[PNR-90171] p 551 N84-22767
High performance composites and adhesives for V/STOL aircraft
[AD-A139168] p 552 N84-23702
Method of making compartmented, filament wound, one-piece aircraft fuel tanks
[AD-D011144] p 880 N84-32376

ADIABATIC CONDITIONS

The Britalux Brayton cycle engine
[ASME PAPER 84-GT-258] p 1015 A84-47031

ADIABATIC FLOW

Hot-wire investigation of an unseparated shock-wave/turbulent boundary-layer interaction
p 508 A84-32602

AERATION

Computer program for prediction of the deposition of material released from fixed and rotary wing aircraft
[NASA-CR-3780] p 409 N84-20482
Numerical studies of the deposition of material released from fixed and rotary wing aircraft p 410 N84-20491

AERIAL EXPLOSIONS

Effects of airblast atomizer design upon spray quality
p 622 N84-24744

AERIAL PHOTOGRAPHY

Terrain analysis procedural guide for built-up areas (report no. 13 in the ETL (Engineer Topographic Laboratories) series on guides for Army terrain analysts)
[AD-A142918] p 932 N84-31768

AERIAL RECONNAISSANCE

AN/USD-501 and AN/USD-502 airborne surveillance drones p 430 A84-27250
Reconnaissance system maintainability from concept to deployment p 474 A84-27252
Design of a remotely controlled hovercraft vehicle for spill reconnaissance
[PB84-124084] p 305 N84-17187
Achievements of Kamov helicopter design bureau p 638 N84-26653
Airship proof-of-concept evaluation
[AD-A141759] p 757 N84-28753

AERIAL RUDDERS

Determination of elevator and rudder hinge forces on the Learjet model 55 aircraft p 247 N84-15604
Space Shuttle Orbiter rudder/speed brake actuation system p 372 N84-18461

AEROACOUSTICS

Effect of edge-tone noise on supercritical airfoil data
p 82 A84-10145
Lateral attenuation of aircraft noise
p 83 A84-11045
In-flight acoustic testing techniques using the YO-3A acoustic research aircraft
[AIAA PAPER 83-2754] p 50 A84-12342
A comparison with theory of peak to peak sound level for a model helicopter rotor generating blade slap at low tip speeds p 84 A84-15201
Effects of airplane flight speed on the turbulence and noise generation in jets p 144 A84-15858
Effects of boundary layer refraction and fuselage scattering on fuselage surface noise from advanced turboprop propellers
[AIAA PAPER 84-0249] p 253 A84-17976
The role of Helmholtz number in jet noise
[AIAA PAPER 84-0403] p 253 A84-18069
A flight study of tone radiation patterns generated by inlet rods in a small turbofan engine
[AIAA PAPER 84-0499] p 253 A84-18132
A mapped factored implicit scheme for the computation of duct and far field acoustics
[AIAA PAPER 84-0501] p 254 A84-18134
Pressure field induced on an airfoil by an unsteady flow
p 261 A84-19623
Progress in rotor broadband noise research
p 320 A84-19899
Measurement and analysis of acoustic flight test data for two advanced design high speed propeller models
[AIAA PAPER 84-0250] p 320 A84-20049
Controlled suppression or amplification of turbulent jet noise
[AIAA PAPER 84-0401] p 320 A84-20050
On linear acoustic solutions of high speed helicopter impulsive noise problems p 320 A84-21212
Propeller tone bursts p 320 A84-21213
Scattering of sound by an elastic plate with flow
p 320 A84-21216
Correction of fan noise for effects of forward flight
p 297 A84-21217
Separated flow noise of a flat plate at large attack angles p 321 A84-21221
Jet noise at low Reynolds number
p 321 A84-21504
Prediction of sources moving at high speed as applied to helicopter and propeller noise
[AIAA PAPER 84-0251] p 321 A84-21858
Tone generation by rotor-downstream strut interaction
p 298 A84-22174
Aeroacoustics of turbulent shear flows
p 321 A84-22584
Weak spherical shock-wave transitions of N-waves in air with vibrational excitation p 379 A84-23871
The flow development in a shielding jet
p 332 A84-25416
Broadband noise of turbofan compressors - Potential role of inertial waves due to rotating flows — French thesis p 393 A84-25816
Acoustic emission of structures excited by a turbulent boundary layer - Influence of excitation-field modeling
p 494 A84-28150
The acoustics of turbulent flow p 494 A84-28802
Aeroacoustic characteristics of acoustically excited jets p 494 A84-28804
The effect of initial outflow conditions on the aeroacoustic characteristics of a jet p 494 A84-28805
Shear-stress pulsations on a plate surface
p 478 A84-28809
The effect of external boundary layer flow on jet-noise characteristics p 495 A84-28811
Sound emission from an unsteady boundary layer
p 495 A84-28813

SUBJECT INDEX

- Investigation of the characteristics of the sound field of a moving source, with application to the analysis of aircraft noise p 495 A84-28814
- The effect of tangential flow velocity on the impedance of a hole in a body in a flow p 495 A84-28817
- Modified shielding jet model for twin-jet shielding analysis [ASME PAPER 83-WA/NCA-2] p 565 A84-30648
- The acoustic analogy - Thirty years on p 566 A84-30912
- On the propagation of sound in nozzles of variable cross-section containing low Mach number mean flow p 630 A84-34718
- Aerodynamic performance of acoustically suppressed exhaust nozzles [AIAA PAPER 84-1173] p 696 A84-36954
- Frequency dependence of coherent structures in a Mach number 0.6 jet [AIAA PAPER 84-1657] p 719 A84-38039
- Suppression of the acoustic environment in an irregularly shaped cavity with an opening exposed to subsonic flow p 735 A84-38882
- Acoustic prediction methods for the NASA generalized advanced propeller analysis system (GAPAS) [AIAA PAPER 84-2243] p 700 A84-39286
- Sound generated aerodynamically revisited - Large-scale structures in a turbulent jet as a source of sound p 815 A84-40599
- Comment on 'Derivation of the fundamental equation of sound generated by moving aerodynamic surfaces' p 815 A84-40852
- Pulse-related increase in connection with the evaluation of flight noise p 815 A84-41038
- Wave models of turbulent flow over compliant surfaces p 805 A84-41129
- The influence of surface compliance on the production of sound by a turbulent boundary layer p 816 A84-41130

New digital-RF technology aids airborne weather radar p 519 N84-31167

RF subsystems for precision DME p 520 N84-32335

Precision distance measuring equipment for the microwave landing system p 521 N84-32340

Redundant color coding on airborne CRT displays p 599 N84-35899

A 60 GHz collision warning sensor for helicopters p 600 N84-36262

Airborne Self Protection Jammer - ASPJ/ALQ-165 p 592 N84-36266

Depolarisation properties of airborne radomes p 592 N84-36281

New results of airborne measurements with a sensitive, high resolution 90 GHz radiometer - First results for an equivalent 140 GHz system p 600 N84-36287

The development of airborne pulse Doppler radar p 675 N84-36915

Calculation of the detection range of pulse-Doppler airborne radar systems p 763 N84-40384

Laser accelerometers in aerial gravimetry systems p 775 N84-40869

A statistical analysis of gravity-induced errors in airborne inertial navigation [AIAA PAPER 84-1877] p 855 N84-43433

Optimal guidance for airborne cable pickup system - for payload retrieval from hostile environment by use for aircraft-pulled towed vehicle [AIAA PAPER 84-1893] p 851 N84-43443

Analysis of a control concept for ejection seats [AIAA PAPER 84-1894] p 864 N84-43444

An airborne wind shear detection system [AIAA PAPER 84-1918] p 882 N84-43454

Avionics requirements from the FAA viewpoint p 858 N84-44734

Airborne systems requirements in the evolving National Airspace System p 858 N84-44736

Detection range of an airborne pulse-Doppler radar using medium and high pulse frequencies p 880 N84-45134

Operation of a single-channel, sequential Navstar GPS receiver in a helicopter mission environment p 862 N84-48350

Microwave airborne telemetry - Unusual problems, unusual hardware p 970 N84-49193

An airborne color video insetter [AD-A132183] p 127 N84-13185

Mathematical and physical scaling of triggered lightning - lightning effects on aircraft circuitry [DE84-002480] p 249 N84-14646

SUBJECT INDEX

Critical factors and operational research in tactical fighter avionics system development p 214 N84-15062

Minimum operational performance standards for airborne radio communications equipment operating within the radio frequency range 117.975 - 137.000 MGZ [RTCA/DO-188] p 482 N84-20734

Comparison of airborne turbulence-indicating doppler radar systems with ground-based doppler radar systems [AD-A141474] p 807 N84-29043

A 60 GHz pulse radar for detection of high voltage power lines [BMFT-FB-W-84-013] p 807 N84-29077

Future requirements for airborne simulation [AGARD-AR-188] p 909 N84-32401

Evaluation of airborne lidar wind measurements p 1013 N84-34865

AIRBORNE INTEGRATED RECONNAISSANCE SYSTEM

Reconnaissance (RECCE) under control --- airborne photoreconnaissance control system p 490 N84-27241

AIRBORNE RADAR APPROACH

A novel 35 GHz 3-D radar for flight assistance p 34 N84-10833

Development and flight test of an X-band precision approach concept for remote-area rotorcraft operations p 420 N84-26707

A 60 GHz obstruction warning radar for helicopters p 775 N84-40393

Development and flight test of an X-band precision approach concept for remote-area rotorcraft operations [NASA-TM-84398] p 41 N84-10041

AIRBORNE SURVEILLANCE RADAR

The automatic track while scan system used within the Searchwater airborne maritime surveillance radar p 32 N84-10793

95 GHz airborne tracking radar p 426 N84-28448

Simulation of airborne pulse Doppler radars, taking into consideration ground clutter p 762 N84-40011

Digital SLAR of the DFVLR - System concept and results p 763 N84-40381

Mode S and T.CAS - The French design and program p 882 N84-43500

Inexpensive multipurpose airborne surveillance radar p 861 N84-45909

AIRBORNE/SPACEBORNE COMPUTERS

Avionics analysed. V - Aircraft brain power p 36 N84-11504

Digital simulation of an optimal flight guidance and control computer system p 36 N84-11918

The ONI-7000 airborne Loran-C system p 41 N84-12461

CAML - Digital avionics in a real-time application --- Cargo Aircraft Mine Laying p 120 N84-15624

Avionics/navigation architectural design considerations p 113 N84-15625

Avionic architectures for fly-by-wire aircraft p 136 N84-15652

Implementing microprocessor technology in aircraft electrical power generating system control p 216 N84-16536

Standard Central Air Data Computer (SCADC) into production p 206 N84-16549

A digital display and control system for modern fighter aircraft p 207 N84-16560

Speech technology for avionic computers p 208 N84-16573

B-1B central integrated test system optimization p 209 N84-16608

Distributed avionics processing using ADA p 250 N84-16647

Lockheed Airborne Data System advances test technology p 210 N84-16698

Precision landing guidance for advanced V/STOL [AIAA PAPER 84-0338] p 188 N84-18031

Safety in numbers. VI - Avionics analysed --- computerized flight control systems p 284 N84-21550

Flight management computer systems p 354 N84-23850

Digital Avionics Systems Conference, 5th, Seattle, WA, October 31-November 3, 1983, Proceedings p 439 N84-26701

Advanced avionics system for an aerospace plane p 469 N84-26703

The missing link for advanced avionics systems executives --- computer program design specification for military standards p 487 N84-26704

Tomorrow's flight controls - Helicopter fly-by-light p 455 N84-26705

Conceptual design of a digital avionics suite for LHX --- Army's light helicopter program p 420 N84-26706

DO-178 - Its history and purpose --- of digital avionics software development p 488 N84-26711

Implementation of DO-178 in commercial airborne software design p 488 N84-26712

Software control and system configuration management - A process that works p 488 N84-26713

Avionics software management and control p 488 N84-26714

Experience with the F/A-18 digital flight control system p 455 N84-26721

Development and certification of the 757/767 autopilot Flight director system p 455 N84-26723

A310 slat and flap control system management and experience p 455 N84-26724

Fault tolerant flight control avionics integration using MIL-STD-1553B p 456 N84-26744

Multi-Microprocessor Flight Control System, 1982 p 456 N84-26746

Development and simulation testing of an integrated sensory subsystem (ISS) for advanced aircraft (Phase III) p 440 N84-26748

The application of multiple speed data rate transmission to a MIL-STD-1773 data bus structure --- avionic network control via fiber optical transmission p 441 N84-26751

Validated results from an integrated communications modem --- for Naval aircraft p 422 N84-26755

Operational flight software techniques for on-aircraft testing and maintenance p 489 N84-26769

Integrated testing and maintenance technologies --- for airborne weapon systems p 442 N84-26770

Fault, detection, isolation, and recovery techniques for fault tolerant digital avionics p 442 N84-26771

Critical issues in the design of a reconfigurable flight control computer p 442 N84-26773

Effects of near-coincident faults in multiprocessor systems --- reliability engineering for commercial aircraft flight control p 489 N84-26776

A generic approach to simulation/support facility design --- for aircraft weapon systems p 466 N84-26778

Development of threat logic for airborne TCAS --- Traffic Alert and Collision Avoidance System p 423 N84-26790

Processor monitoring and self-test in the Boeing 767/757 Flight Control Computer p 490 N84-26795

Advanced autopilot-flight director system computer architecture for Boeing 737-300 aircraft p 443 N84-26799

A310/A300-600 electronic flight instrument system p 443 N84-26800

Redundancy in cockpit digital mode panels p 443 N84-26802

Reconnaissance (RECCE) under control --- airborne photoreconnaissance control system p 490 N84-27241

Fly-by-light sensors p 456 N84-27266

[AD-A140174] p 625 N84-25920

Revisions to the PETROS 4 shell response code
[AD-A140268] p 628 N84-26059

On improving the fatigue performance of a double-shear lap joint
[VFW-29/83-O] p 628 N84-26431

Successful utilization of economic, light aluminum-casted structures in airplane construction
[VFW-31/83-O] p 599 N84-26439

New high performance windshield/canopy materials
[AD-P003199] p 685 N84-26612

An industry test program for interlayer equivalency
[AD-P003200] p 723 N84-26613

Fluorepoxy and fluoroacrylic transparencies
[AD-P003201] p 712 N84-26614

Polycrystalline MgAl₂O₄ spinel for high performance windows
[AD-P003202] p 712 N84-26615

An improved acrylic sheet material with enhanced craze resistance
[AD-P003203] p 712 N84-26616

Protective linear materials for transparent plastics
[AD-P003204] p 712 N84-26617

Specialty coatings for increased service life of acrylic aircraft transparencies, part 2
[AD-P003206] p 713 N84-26619

In-flight measurement of pressure distribution over T-38 student canopy
[AD-P003207] p 660 N84-26620

Swedish Air Force maintenance programme for aged transparent enclosures for jet trainer and jet fighter aircraft
[AD-P003208] p 637 N84-26621

Optical effects of F-16 Canopy-HUD (Head-Up Display) integration
[AD-P003222] p 736 N84-26635

Lufthansa German Airlines experience with cabin and cockpit windows of Boeing 707, 727, 737, 747, Douglas DC10 and Airbus A300
[AD-P003226] p 686 N84-26639

Windshield problems on UK operated transport sized jet aircraft 1976 to 1982
[AD-P003228] p 686 N84-26641

Evaluation of an improved flame resistant aircraft window system
[FAA-CT-83-10] p 674 N84-26680

USSR report: Transportation
[JPFR-UTR-84-005] p 638 N84-27668

Theoretical and experimental results of dynamic behavior of periodically stiffened cylindrical shell
p 690 N84-27731

Hygrothermal effects in continuous fibre reinforced composites. Part 1: Thermal and moisture diffusion in composite materials
[AD-A128228] p 714 N84-27837

SPF/DB primary structure for supersonic aircraft (T-38 horizontal stabilizer)
[NASA-CR-163114] p 714 N84-27860

An investigation into the probabilistic combination of quasi-static and random accelerations
[NASA-TM-82584] p 729 N84-28111

Flexible manufacturing line for aircraft structures of sheet metal
[BMFT-FB-W-84-011] p 740 N84-28731

Aeroelastic problems caused by tornados and their successful treatment with technologies that result from experiences of precedent intensive technologic modernizing
[MBB-FE-294/S/PUB/110] p 809 N84-29253

USAF durability design handbook: Guidelines for the analysis and design of durable aircraft structures
[AD-A142424] p 774 N84-29866

Stress-corrosion crack-growth study of titanium alloy Ti-6Al-4V exposed to Freon PCA and nitrogen tetroxide MON-1
p 801 N84-29923

ACEE Composite Structures Technology: Review of selected NASA research on composite materials and structures
[NASA-CP-2321] p 801 N84-29969

Residual-strength tests of L-1011 vertical fin components after 10 and 20 years of simulated flight service
p 801 N84-29970

Worldwide flight and ground-based exposure of composite materials
p 802 N84-29971

Prediction of light aircraft interior sound pressure level using the room equation
[NASA-CR-173840] p 941 N84-32117

Development and flight evaluation of an augmented stability active controls concept with a small tail
[NASA-CR-173880] p 903 N84-32395

Rigid closed-cell polyimide foams for aircraft applications and foam-in-place technology
[NASA-CR-171805] p 916 N84-32535

The need for biaxial fatigue testing at A.R.L.
[AD-A143203] p 931 N84-32878

AIRCRAFT SURVIVABILITY

Air mobility and the Agusta A-129 'Mongoose'
p 47 N84-11070

Low level delivery test program - Correlation of wind tunnel/sled track test separation results
[AIAA PAPER 83-2761] p 72 N84-12347

Modular fighter/high sortie rates and mission flexibility
[AIAA PAPER 83-2568] p 117 N84-13394

TORNADO autopilot measures to ensure survivability after failures
[MBB-FE-325/PUB/TOR/007] p 135 N84-15193

The trajectory generator for tactical flight management
p 224 N84-16683

Surviving airliner crashes - The record improves, but more research is needed
p 517 N84-30949

Future combat environments - Implications for the engine development process
[AIAA PAPER 84-1339] p 605 N84-35659

Impact of flying qualities on mission effectiveness for helicopter air combat
[AIAA PAPER 84-2106] p 787 N84-42354

Evaluation of singularly perturbed pursuit-evasion games
p 935 N84-44940

Lessons learned in the development of the F-16 flight control system
p 229 N84-15092

Tornado autopilot measures to ensure survivability after failures
p 229 N84-15094

Increased aircraft survivability using direct voice input
p 204 N84-15100

Technical information support for survivability
p 396 N84-19868

Aircraft survivability
p 354 N84-19869

Crew survivable helicopter undercarriage
[AD-A137770] p 438 N84-20517

Survivability design guidelines for Fly-By-Wire Flight Control Systems development
[AD-A138211] p 464 N84-21557

Educational aids in aircraft combat survivability
[AD-A139090] p 528 N84-22556

Application of multifunction strapdown inertial system
p 594 N84-25698

Aircraft seat fire blocking layers. Effectiveness and benefits under various scenarios
[AD-A140796] p 674 N84-26681

A simulation model to evaluate aircraft survivability and target damage during offensive counterair operations
[AD-A141324] p 689 N84-27728

The effect of component redundancy upon aircraft combat survivability
[AD-A141815] p 773 N84-28784

AIRCRAFT TIRES

Cockpit CRT display tyre pressure indicating system
p 56 N84-11625

Selection of efficient landing gear arrangements for heavy aircraft based on concrete runways
p 118 N84-14267

Experimental stress analysis of a thin walled pressurized torus loaded by contact with a plane — dynamic response of aircraft tires
p 239 N84-17443

Aircraft tires - Some design aspects
p 431 N84-29400

High speed braking of an aircraft tire on grooved wet surfaces
p 870 N84-44969

FOD (Foreign Object Damage) generation by aircraft tires — probability of engine ingestion and airfield surface movements
[AD-A133319] p 205 N84-15146

AIRCRAFT WAKES

Nonlinear computation of wing-body-vertical tail-wake flows at low supersonic speeds
[AIAA PAPER 84-0427] p 268 N84-21871

An investigation of civil transport aft body drag using a three-dimensional wake survey method
[AIAA PAPER 84-0614] p 331 N84-24198

Experimental documentation of the lifting surface wakes of a canard and forward swept wing configuration
p 655 N84-38418

Estimation of wake rollup over swept wings
[AIAA PAPER 84-2174] p 746 N84-41339

Application of panel method to wake vortex/wing interaction and comparison with experiment
[AIAA PAPER 84-2182] p 827 N84-44194

Full-scale studies of structure and development of a vortex wake of a medium trunk-route aircraft in the atmospheric boundary layer
p 852 N84-45066

On the influence of atmospheric disturbances on aircraft aerodynamics
p 845 N84-46191

Motion of aircraft trailing vortices near the ground
p 963 N84-49089

Experimental vortex analyzer
[NLR-MP-82006-U] p 22 N84-11151

The effect of wing tip devices on the far-field wake of a Paris Aircraft
p 103 N84-12131

Wake vortices and their aerodynamic alleviation: A review of the literature
[DFVLR-MITT-83-07] p 272 N84-16154

Wake visualization
[BU-282] p 581 N84-24542

Installation noise measurements of model SR and CR propellers
[NASA-TM-85790] p 631 N84-25425

Noise generated by a propeller in a wake
[NASA-TM-85794] p 631 N84-26382

A numerical simulation of the dispersal of aerial sprays
[NASA-CR-165816] p 808 N84-29151

Wake profile measurements of fixed and oscillating flaps
[NASA-CR-166602] p 967 N84-34428

AIRDROPS

Adaptation of a 15-ft-dia ribbon parachute and a 73-ft cross main recovery parachute for cargo delivery from high altitude
[AIAA PAPER 84-0790] p 415 N84-26559

Retrorocket-Assisted Parachute Inflight Delivery (RAPID) system study
[AIAA PAPER 84-0805] p 415 N84-26570

The Naval Weapons Center's SQUAREX canopy design - A new parachute concept
[AIAA PAPER 84-0806] p 416 N84-26571

AIRFIELD SURFACE MOVEMENTS

ASMI-18X an airport surface surveillance radar
p 33 N84-10805

ARSSR civil aviation chief on Aerflot's work in Armenia
p 949 N84-34423

AIRFOIL PROFILES

Time-dependent finite-difference simulation of unsteady interactive flows
p 4 N84-10077

A calculation method of leading edge separation bubbles
[ONERA, TP NO. 1983-10] p 7 N84-10093

Measurements of attached and separated turbulent flows in the trailing-edge regions of airfoils
p 7 N84-10097

Lifting aerofoil calculation using the boundary element method
p 12 N84-11174

Numerical solution of the Euler equations on body-conforming curvilinear grids
p 13 N84-11590

Time-split finite element method for compressible aerofoil trailing-edge flows
p 89 N84-13281

A computer-aided study of errors in discrete representations of an airfoil profile
p 91 N84-14255

Computations of unsteady transonic aerodynamics using prescribed steady pressures
[AIAA PAPER 82-0956] p 92 N84-14736

Calculations of two-dimensional unsteady transonic flows over airfoils
p 94 N84-15260

Profile design for wings and propellers
p 95 N84-15411

Numerical solution of the Euler equations for flow past an airfoil in ground effect
[AIAA PAPER 84-0051] p 156 N84-17847

Clark-Y airfoil performance at low Reynolds numbers
[AIAA PAPER 84-0052] p 157 N84-17848

Airfoil optimization
[AIAA PAPER 84-0053] p 157 N84-17849

Transonic airfoil and wing flowfield measurements
[AIAA PAPER 84-0100] p 159 N84-17882

- Experimental investigation of a simulated compressor airfoil trailing edge flowfield
[AIAA PAPER 84-0101] p 159 A84-17883
- Second order composite velocity solution for large Reynolds number flows
[AIAA PAPER 84-0172] p 162 A84-17930
- Transonic solutions for a multielement airfoil using the full-potential equation
[AIAA PAPER 84-0300] p 165 A84-18007
- Calculation of steady and oscillating airfoil flow fields via the Navier Stokes equations
[AIAA PAPER 84-0525] p 168 A84-18150
- Numerical analysis of rain effects on an airfoil
[AIAA PAPER 84-0539] p 169 A84-18158

SUBJECT INDEX

Aeroprojekt Institute's work in aviation facility design p 992 N84-33370

Airport safety technology: Washington National Airport
[GPO-34-406] p 993 N84-33423

ARSSR civil aviation chief on Aerflot's work in Armenia p 949 N84-34423

Introduction to the airport improvement program [AD-A144556] p 994 N84-34454

AIRSHIPS

Thrust vector control of a V/STOL airship p 609 A84-34458

The future of the dirigible p 635 A84-37036

Fly-by-light controls --- airship active control by flight computer controlled electric actuators via fiber optic transmission cables p 702 A84-37923

Skyship demonstration between Paris airports p 669 A84-37924

Airship requirements for the US services p 670 A84-37925

World and United States aviation and space records, as of June 1, 1983 p 3 N84-10009

Some trends in airship technology developments [AGARD-R-717] p 86 N84-12050

Aerodynamic forces on an airship hull in atmospheric turbulence [UTIAS-277] p 516 N84-23604

System safety and the Coast Guard lighter-than-air system project [AD-A139807] p 588 N84-24564

Airship proof-of-concept evaluation [AD-A141759] p 757 N84-28753

AIRSPACE

Flight test airspace - A vital part of the plan [AIAA PAPER 83-2711] p 3 A84-12316

Australian airspace management p 571 A84-35377

Toward the twenty-first century - Modernization of the National Airspace System p 784 A84-41075

The FAA (Federal Aviation Administration) air traffic activity, fiscal year 1982 p 43 N84-10048

[PB83-228460] p 136 N84-12035

Aircraft over Steinberg (West Germany) [REPT-5/1982] p 345 N84-19316

Airfield delay simulation model (ADSIM) users guide [PB84-171552] p 707 N84-28715

National Airspace Review: Implementation plan [AD-A145379] p 863 N84-31107

AIRSPEED

Airspeed and wind shear measurements with an airborne CO2 CW laser p 55 A84-11622

Effects of airplane flight speed on the turbulence and noise generation in jets p 144 A84-15858

Omnidirectional air data system for helicopters in the 80's and 90's p 206 A84-16550

Airspeed measurements p 206 A84-16552

Rate of climb for light propeller powered airplanes p 429 A84-26960

Forecasting maximum speed of aeroplanes - A case study in technology forecasting p 813 A84-40766

Optimum design cruise speed for an efficient short haul airliner p 873 A84-45033

Time controlled descent guidance algorithm for simulation of advanced ATC systems [NASA-TM-84373] p 42 N84-10043

Aircraft hazard assessment from a clear-air radar and meteorological tower study of gravity wave events --- effect on airspeed p 249 N84-14650

[PB83-257139] p 446 N84-20520

An automated stall-speed warning system [NASA-TM-84917] p 677 N84-27716

Regression analysis technique for air data sensor calibration with an inertial navigation system [DFVLR-MITT-84-03] p 965 N84-33379

An experimental and theoretical investigation of deposition patterns from an agricultural airplane [NASA-TP-2348] p 1011 N84-34417

Using an airborne CO2 CW laser for free stream airspeed and wind shear measurements p 1011 N84-34417

ALCOHOLS

Statistical review of alcohol-involved aviation accidents [NTSB-SS-84-03] p 589 N84-25681

ALGEBRA

PASCAL-MP: A language for the algebraic and numerical manipulation of polynomials [INPE-3057-PRE/477] p 1014 N84-34183

ALGORITHMS

(Why?) A finite element algorithm for the parabolic Navier-Stokes equations p 5 A84-10085

Automatic target recognizer evaluation method p 209 A84-16576

Comparison of full-potential and Euler solution algorithms for transonic flowfield computations [AIAA PAPER 84-0118] p 173 A84-19234

A track correlation algorithm for multi-sensor integration p 421 A84-26741

Algorithm implementation in a tactical communication brassboard processor p 421 A84-26742

The modal approach to structural modification p 524 A84-31308

Analysis of inviscid and viscous flows in cascades with an explicit multiple-grid algorithm [AIAA PAPER 84-1663] p 652 A84-38043

The CEMS (Comprehensive Engine Management System) IV OAP (Oil Analysis Program) algorithm [AD-A131055] p 60 N84-10072

Application of an adaptive blade control algorithm to a gust alleviation system [NASA-TM-85848] p 64 N84-10079

The use of an adaptive grid in a solution of the Navier-Stokes equations for incompressible flow p 20 N84-11139

Application of computational procedures in aerodynamic design p 121 N84-12078

Progress on ultrasonic flow sizing in turbine-engine rotor components: Bore and web geometries [DE83-018081] p 130 N84-12167

A comparison of two position estimate algorithms that use ILS localizer and DME information. Simulation and flight test results [NASA-TP-2281] p 285 N84-17165

An investigation of new possibilities to simplify the standard supersonic area rule [AD-A137018] p 341 N84-19297

Automated en route air traffic control algorithmic specifications. Volume 3: Flight plan conflict probe [AD-A136795] p 346 N84-19319

Automated en route air traffic control algorithmic specifications. Volume 4: Sector workload probe [AD-A136796] p 346 N84-19320

Automated en route air traffic control algorithmic specifications. Volume 2: Airspace probe [AD-A136850] p 346 N84-19324

Automated en route air traffic control algorithmic specifications. Volume 5: Data specification [AD-A136851] p 346 N84-19325

Automated en route air traffic control algorithmic specifications. Volume 1: Trajectory estimation [AD-A137088] p 346 N84-19328

An open loop missile evasion algorithm for fighters [AD-A136834] p 352 N84-19339

The Shock and Vibration Bulletin. Part 1: Welcome, keynote address, invited papers, pyrotechnic shock, and shock testing and analysis [AD-A134452] p 387 N84-19886

Mixing 4D-equipped and unequipped aircraft in the terminal area p 427 N84-20577

Eigenspace design techniques for active flutter suppression p 462 N84-20581

Algorithms for output feedback, multiple-model, and decentralized control problems p 462 N84-20583

Placing hidden surface removal within the CORE graphics standard: An example [AD-A138239] p 493 N84-22266

Analysis of inviscid and viscous flows in cascades with an explicit multiple-grid algorithm [NASA-TM-83636] p 502 N84-22527

Quantification of subjective ratings through conjoint measurement analysis [AD-A138810] p 528 N84-22554

Numerical analysis of an unsteady shock in an inlet diffuser p 512 N84-22686

Numerical predictions of residence times behind a rearward facing step with transverse injection p 512 N84-22687

Minimum operational performance standards for traffic alert and collision avoidance system (TCAS) airborne equipment, volume 1 [RTCA/DO-185-VOL-1] p 593 N84-25685

Minimum operational performance standards for traffic alert and collision avoidance system (TCAS) airborne equipment, volume 2 [RTCA/DO-185-VOL-2] p 593 N84-25686

Advances in strapdown inertial systems: Introduction and overview p 593 N84-25692

Application of multifunction strapdown inertial system p 594 N84-25698

Structural sizing of a solar powered aircraft [NASA-CR-172313] p 598 N84-25702

A quasi-simultaneous calculation method for strongly interacting viscous flow around an infinite swept wing [NLR-MP-83001-U] p 683 N84-26672

Study of NOAA (National Oceanic and Atmospheric Administration) WP-3D terminal navigation errors based on navigators logbooks: 1977-1983 [PB84-155738] p 677 N84-26692

Application of supercomputers to computational aerodynamics [NASA-TM-85965] p 666 N84-27680

ALTIMETERS

Multivariable digital flight control design of the X-29A [AD-A140983] p 704 N84-27745

Narrowband (LPC-10) vocoder performance under combined effects of random bit errors and jet aircraft cabin noise [AD-A141333] p 728 N84-27967

Algorithms for zonal methods and development of three dimensional mesh generation procedures [AD-A141692] p 815 N84-29592

Stall delay by boundary layer blowing and/or suction p 846 N84-31086

A fully vectorized numerical solution of the incompressible Navier-Stokes equations p 964 N84-33375

Refinement and evaluation of helicopter real-time self-adaptive active vibration controller algorithms [NASA-CR-3821] p 964 N84-33378

Unsteady viscous-inviscid interaction procedures for transonic airfoil flows [AD-A143764] p 966 N84-33390

ALIGNMENT

An all-purpose inertial navigation concept for tactical missile systems p 40 A84-12451

Simulator scene display evaluation [NASA-CASE-ARC-11504-1] p 307 N84-16221

ALKANES

Liquid and solid phase compositions in a partially frozen JP-5 fuel low in n-alkanes [AD-A143390] p 916 N84-32553

ALL-WEATHER AIR NAVIGATION

Air Force Air Weather Service's requirements for global meteorological data p 931 A84-43653

Air force technical objective document fiscal year 1985 [AD-A136724] p 396 N84-20471

Ministry official on improving all-weather aviation capabilities p 523 N84-23552

ALL-WEATHER LANDING SYSTEMS

Effort and benefit connected with a bad weather landing p 282 A84-19573

Tether guides helicopter to landing on tossing ship p 419 A84-29571

Tactical battlefield aircraft still lack all weather landing systems p 591 A84-35863

Ruggedized military ATC display requirements - The U.S. Marine Corps solution p 859 A84-44746

Ministry official on improving all-weather aviation capabilities p 523 N84-23552

Development and flight test of a helicopter compact, portable, precision landing system concept [NASA-TM-85951] p 592 N84-24566

Investigation of the technology of the microwave landing system Time Reference Scanning Beam (TRSB) [BMFT-FB-W-84-008] p 766 N84-28774

ALLENDE METEORITE

The nature and origin of refractory inclusions in the Allende meteorite p 945 N84-33318

ALLOYS

Composites or metals (Tomorrow's aircraft - black or silver) p 550 A84-32977

Materials in aeronautical research p 710 A84-37040

High temperature erosion study of metals used in turbomachinery [ASME PAPER 84-GT-168] p 1004 A84-46972

Evaluation of fatigue-creep crack growth in an engine alloy [AD-A136956] p 376 N84-19536

Journal of aeronautical materials (selected articles) [AD-A140181] p 572 N84-25611

ALPHA JET AIRCRAFT

The performance of a subsonic combat aircraft with transonic wing and maneuver flaps [DGLR PAPER 82-101] p 45 A84-10570

Determination of the air flight fitness of carbon fiber-reinforced structural components using the Alpha jet horizontal stabilizers and elevators as an example [DGLR PAPER 83-080] p 472 A84-29653

The Dornier Flight Test Centre p 706 A84-38619

Alpha jet pylon p 503 N84-23556

ALPHANUMERIC CHARACTERS

Enhanced character sizes for the VDM-1 video display board p 57 N84-11101

The effects of character stroke width on the visibility of a head-coupled display [AD-A132046] p 127 N84-13183

Some mathematical tools for a modeller's workbench p 491 N84-22204

ALTIMETERS

The accuracy of altimetric surfaces p 1012 A84-46814

Test operations procedure: Absolute altimeters [AD-A131746] p 126 N84-12165

Interpretation of a SAR (Synthetic Aperture Radar) image of the Bay of Biscay [AD-A135981] p 383 N84-18517

ALTITUDE

Sensor noise and Kalman filter for aided inertial navigation system
[AD-A143360] p 863 N84-32372

ALTITUDE

Analysis of AFGL aircraft icing data
[AD-A137197] p 390 N84-20087

ALTITUDE CONTROL

Flight test validation of a design procedure for digital autopilots p 136 N84-12036
Fixed-base simulator investigation of Display/SCAS requirements for army helicopter low-speed tasks
[AD-A134123] p 211 N84-14140

ALTITUDE TESTS

The extension of the Stuttgart altitude-test chamber for an enlarged flow rate
[DGLR PAPER 83-099] p 468 N84-29663

ALUMINATES

Polycrystalline MgAl₂O₄ spinel for high performance windows
[AD-P003202] p 712 N84-26615

ALUMINUM

New technology expands uses of a precision cast-machined aluminum plate p 235 N84-17196
A fatigue life tracking program for an aluminum wing p 347 N84-23504

Adhesion between metals and nonmetals - Long applied, but still not understood p 380 N84-24683
Methods for investigating polymer/metal bonded layers p 374 N84-24685

An experimental method for determining the dynamic contact law p 475 N84-27426
Impact dynamics research on composite transport structures p 802 N84-29975

ALUMINUM ALLOYS

Flight simulation behaviour of aramid reinforced aluminum laminates (ARALL) p 232 N84-16337
Powder metallurgy (P/M) aluminum alloys for aerospace use p 233 N84-17130

Inhibition of stress corrosion cracking in the design of aircraft structures p 195 N84-17170
Evaluation of a primary anticorrosion surface treatment for adhesively bonded aluminum structure p 234 N84-17180

Hot isostatic pressing of aluminum castings p 235 N84-17195

The cyclic fracture toughness of pressed panels of D16chT and V95pchT2 alloys in liquid media p 308 N84-19582

A study of creep crack growth in 2219-T851 aluminum alloy using a computerized testing system p 308 N84-20278

Life distribution under various operating conditions of random cyclic loads --- fatigue strength of aircraft construction elements p 309 N84-22407

Superplastic forming, an economical sheet-forming process [MBB-BB-555-83-OE] p 314 N84-22851

Fatigue crack initiation in aluminum alloys under programmed block loading p 374 N84-24963

Some effects of alloying elements on the performance of bonded aluminum alloy joints p 470 N84-26625

Experimental investigations of fiber composite reinforcement of cracked metallic structures p 470 N84-27361

Accelerated corrosion testing of fuselage components of passenger aircraft p 397 N84-27864

Elevated temperature aluminum alloys for aerospace applications [SAE PAPER 831441] p 435 N84-29633

Advanced, high-strength aluminum castings for airframe construction [DGLR PAPER 83-79] p 481 N84-29652

Structural potential of superplastic formed aluminum [AIAA PAPER 84-0935] p 548 N84-31678

Singular propagation behavior of cracks in stiffened cylindrical shells p 558 N84-32624

Age hardening behavior of Al-Li-(Cu)-(Mg)-Zr P/M alloys p 549 N84-32858

Crack propagation behavior in plated sheet metal consisting of AlCuMg(2) and AlZnMgCu(1.5) in the case of dynamic stresses [MBB-VFW-44-83-OE] p 558 N84-33144

Comparative investigations involving aircraft structural components produced by different procedures from high-strength aluminum materials [MBB-VFW-42-83-OE] p 550 N84-33146

Crack resistance of pressed and rolled semifinished products from aluminum alloys used in load-bearing units in aircraft wings p 614 N84-35724

Lightweight aluminum-lithium alloys poised for takeoff p 710 N84-36800

Fracture toughness acceptance testing of aluminum alloys for aircraft applications p 711 N84-39212

Crack closure and overload effects in fatigue p 721 N84-39218

Use of 'marker blocks' as an aid in quantitative fractography in full-scale aircraft fatigue testing - A case study p 721 N84-39267

Lighter aluminum alloy development progresses p 797 N84-40791

Case study of corrosion failure of an aluminide coating in a gas turbine p 799 N84-42664

Development of a new hybrid material (ARALL) for aircraft structures --- aramid reinforced aluminum laminate p 913 N84-42866

Short cracks and crack closure in Al 2024-T3 p 913 N84-45015

Cycle counting for fatigue crack growth analysis p 996 N84-48713

Electron-beam weld solidification structures and properties in Al-3Li-X alloys p 996 N84-48766

Metal matrix composite structural panel construction [NASA-CASE-LAR-12807-1] p 77 N84-11214

Fatigue behavior of long and short cracks in wrought and powder aluminum alloys [AD-A131324] p 81 N84-11517

The effect of superposing ripple loading of maneuver load cycles [AD-A132653] p 205 N84-15148

Investigation of fatigue crack-growth resistance of aluminum alloys under spectrum loading [AD-A133206] p 237 N84-15251

Friction and wear behavior of aluminum and composite airplane skins [NASA-TP-2262] p 294 N84-17175

The use of interference-fit bolts or bushes and hole cold expansion for increasing the fatigue life of thick-section aluminum alloy bolted joints [AR-002-973] p 384 N84-18676

Fatigue crack growth in aluminum alloy sheet material under constant amplitude and simplified flight simulation loading [VTH-LR-381] p 376 N84-19561

The corrosion-fatigue cooperative testing programme p 473 N84-21497

Clarification of environmental effects in stress corrosion cracking [AD-A138581] p 550 N84-22737

Prediction of fatigue crack-growth patterns and lives in three-dimensional cracked bodies [NASA-TM-85787] p 561 N84-22979

Corrosion and load transfer effects on fatigue of mechanically fastened joints. Fatigue of zero load transfer specimen [AD-A139042] p 561 N84-22985

The application of cold worked holes (in aircraft structures) [NLR-TR-81120-U] p 561 N84-22990

Statistical and vibratory fatigue limit characteristics of aluminum cast alloys p 561 N84-23558

Welding of components made of the aluminum cast alloy A357 p 561 N84-23561

Aluminum precision forging components p 562 N84-23563

The use of Arall in fuselage skins [AD-B080831] p 596 N84-24572

Characterization of a sample of aluminum alloy longeron in 7050 T73652 of Alcoa origin. Summary of test number MO 570300 p 690 N84-27729

The use of novel processing procedures for improving the overall fatigue resistance of high strength aluminum alloys [AD-A141107] p 800 N84-28966

Fatigue behavior of long and short cracks in wrought and powder aluminum alloys [AD-A142609] p 802 N84-30024

Influence of temperature on the Delta K_{sub th} and da/dN of LY-12CS aluminum alloy p 803 N84-30067

Flight service evaluation of two aluminum-brazed titanium spoolers [NASA-CR-172371] p 915 N84-31343

Coating developments to restrict strategic materials usage p 997 N84-33483

Engineering property comparisons of Powder Metallurgy (PM) alloy X7901-T7E69 and Ingot Metallurgy (IM) alloy forgings [NLR-MEMO-SM-83-050-U] p 998 N84-33583

The use of adhesive-bonded rivets to lessen the reductions in fatigue life caused by rivet holes [ARL-STRUC-REPT-399] p 999 N84-34617

ALUMINUM COATINGS

A study of the fatigue strength of heat-resistant nickel alloys with coatings p 711 N84-39497

Vapor phase aluminizing to protect turbine airfoils p 798 N84-42653

Erosion of corrosion resistant coatings for jet engine compressors [NLR-MP-83010-U] p 455 N84-21550

AMBULANCES

A new concept for a rescue helicopter to meet the needs of emergency medicine, based on the BK-117 p 25 N84-11067

Regulations and the air ambulance p 395 N84-24961

AMMUNITION

An overview of munition decelerator technology with recent applications at Honeywell [AIAA PAPER 84-0780] p 398 N84-29969

Numerical investigation of the aerodynamics and stability of a flared afterbody for axisymmetric projectiles at supersonic speeds [AD-A136826] p 339 N84-19289

AMPHIBIOUS AIRCRAFT

Development and flight testing of a new amphibian technology demonstrator p 869 N84-44956

World and United States aviation and space records, as of June 1, 1983 p 3 N84-10009

AMPHIBIOUS VEHICLES

Hovercraft heave stability p 1017 N84-46810

AMPLIFICATION

High-gain error actuated flight control systems for continuous linear multivariable plants [AFIT/GAE/EE/82D-1] p 610 N84-24534

AMPLIFIER DESIGN

Automatic gain ranging amplifier --- for military aircraft p 978 N84-46635

AMPLITUDE MODULATION

Cepstrum analysis of the vibrations of rotor machines p 481 N84-29728

Interface control document for AN/ARC-186 VHF-AM/FM radio [AD-A136939] p 386 N84-19679

AMPLITUDES

Progress on ultrasonic flaw sizing in turbine-engine rotor components: Bore and web geometries [DE83-018081] p 130 N84-12167

The effect of superposing ripple loading of maneuver load cycles [AD-A132653] p 205 N84-15148

Unsteady laminar boundary-layer calculations on oscillating configurations including backflow. Part 2: Airfoil in high-amplitude pitching motion. Dynamic stall [NASA-TM-84319-PT-2] p 581 N84-24537

The influence of a moving suspension on the behaviour of modelled helicopter underslung loads [BU-288] p 596 N84-24573

Radio frequency distribution assembly, operations and maintenance manual [AD-A143864] p 1009 N84-33649

ANALOG COMPUTERS

Development of dynamic simulation of TF34-GE-100 turbofan engine with post-stall capability [AIAA PAPER 84-1184] p 887 N84-44178

Development of dynamic simulation of TF34-GE-100 turbofan engine with post-stall capability [NASA-TM-83660] p 608 N84-25712

Flight testing a digital flight control system: Issues and results p 990 N84-34403

ANALOG SIMULATION

Analog-digital simulation of variable time lag p 1014 N84-47545

ANALOG TO DIGITAL CONVERTERS

Heads up display [NASA-CASE-LAR-12630-1] p 694 N84-27733

ANALOGIES

The acoustic analogy - Thirty years on p 566 N84-30912

ANALYSIS (MATHEMATICS)

A numerical simulation of three-dimensional flow in an adaptive wall wind tunnel [NASA-TP-2351] p 756 N84-28750

ANALYZERS

A portable x-ray analyzer for wearmetal particles in lubricants p 240 N84-17543

Experimental vortex analyzer [NLR-MP-82006-U] p 22 N84-11151

ANEOCHIC CHAMBERS

R-F anechoic chamber test facilities p 991 N84-46846

The Technical University of Denmark (TUD)-ESA spherical near field antenna test facility, Lyngby, Denmark [ESA-BR-19] p 794 N84-29890

Experimental investigation of shock-cell noise reduction for single-stream nozzles in simulated flight, comprehensive data report. Volume 3: Shadowgraph photos and facility description [NASA-CR-168234-VOL-3] p 942 N84-33150

ANEMOMETERS

Rotating-boom facility for evaluation of wind characteristics approaching a wind-turbine blade [DE83-013117] p 73 N84-10107

Particle sizing in a fuel rich airbreathing engine combustor p 547 N84-22634

ANGLE OF ATTACK

- Time-marching transonic flutter solutions including angle-of-attack effects p 78 A84-11038

Experimental evaluation of the spherical near field test range — for high gain aircraft antennas

p 856 A84-43617

A physically small dual circular microstrip antenna — for mounting in radome of target drone aircraft

p 969 A84-46604

Analysis of airborne antenna pattern and mutual coupling and their effects on adaptive array performance

p 243 N84-14416

Radiation patterns of an antenna mounted on the mid-section of an ellipsoid

[AD-A133203] p 244 N84-15365

Radio frequency distribution assembly, operations and maintenance manual

[AD-A143864] p 1009 N84-33649

ANTENNAS

An experimental investigation of the improvement in the reception of TM (Transverse Magnetic)-polarized LF (Low-Frequency) waves with a two-element spaced array

[AD-A142478] p 809 N84-30159

ANTHROPOMETRY

Efforts to assure anthropometric cockpit compatibility in Navy aircraft

[SAE PAPER 831455] p 432 A84-29493

Aircraft Automated Escape Systems (AAES) In-service Usage Data Analyses, volume 1

[AD-A134833] p 281 N84-17154

ANTICIPATING ADDITIVES

Anticipating fuel additives and their effect on the properties of aviation kerosene

p 308 A84-22326

ANTIMISSILE DEFENSE

V/STOL for sea control

[AIAA PAPER 83-2436] p 85 A84-13389

Tactical uses of imaging radars

p 344 A84-23896

Black Hawk hover infrared suppressor subsystem

p 767 A84-40788

ANTIMISSILE MISSILES

High altitude maneuver control test in the NSW hypervelocity tunnel

[AIAA PAPER 84-0616] p 369 A84-25732

A new concept for guiding missiles with an application to the ground-air system

p 910 N84-31253

ANTIMISTING FUELS

Feasibility of a full-scale degrader for antimisting kerosene

p 548 A84-30807

An assessment of the use of antimisting fuel in turbofan engines

[NASA-CR-168081] p 76 N84-10332

Antimisting kerosene: Base fuel effects, blending and quality control techniques

[NASA-CR-174509] p 309 N84-16351

Atomization and combustion performance of antimisting kerosene and jet fuel

[NASA-CR-174507] p 309 N84-16353

Antimisting fuel breakup and flammability

[NASA-CR-174508] p 310 N84-16354

Characterization and degradation studies on synthetic polymers for aerospace application

[NASA-CR-166597] p 914 N84-31284

ANTIOXIDANTS

Perfluoroalkylether substituted phenyl phosphines

[AD-D011122] p 915 N84-32529

ANTISHIP MISSILES

Sea Eagle — British antiship missile program

p 947 A84-48250

ANTISKID DEVICES

757/767 brake and antiskid system

p 870 A84-44968

ANTISUBMARINE WARFARE

LITT - An implementation for ASW flight stimulation

[AIAA PAPER 84-0518] p 149 A84-18146

Use of helicopters to develop operational concepts for V/STOL (vertical and short takeoff and landing) aircraft in naval missions

[AD-A139354] p 529 N84-23624

Flight test techniques employed in the Nimrod MR MK 2 weapon system performance trials

p 977 N84-34410

APERTURES

Optimising the integration aperture for a high PRF CW surveillance radar — Pulse Repetition Frequency

p 31 A84-10776

APPLICATIONS PROGRAMS (COMPUTERS)

Computer assisted analysis of aircraft: Performance stability and control — Book

p 901 A84-45900

APPROACH

Axisymmetric approach and landing thrust reversers for single engine fighters

[AIAA PAPER 84-1214] p 604 A84-35652

Tandem fan applications in advanced STOVL fighter configurations

[AIAA PAPER 84-1402] p 777 A84-40245

Simulator study of flight characteristics of a large twin-fuselage cargo transport airplane during approach and landing

[NASA-TP-2183] p 137 N84-12190

A comparison of two position estimate algorithms that use ILS localizer and DME information. Simulation and flight test results

[NASA-TP-2281] p 285 N84-17165

Tandem fan applications in advanced STOVL fighter configurations

[NASA-TM-83689] p 605 N84-24579

Cleared for the visual approach: Human factor problems in air carrier operations

[NASA-CR-166573] p 674 N84-26679

Selected advanced aerodynamic and active control concepts development

[NASA-CR-3469] p 666 N84-27683

Investigation of the technology of the microwave landing system Time Reference Scanning Beam (TRSB)

[BMFT-FB-W-84-008] p 766 N84-28774

APPROACH CONTROL

In-flight investigation of large airplane flying qualities for approach and landing

p 225 A84-17364

An active control system for aircraft during landing approach in wind shear

[AIAA PAPER 84-0239] p 226 A84-17968

Approach and landing aerodynamic technologies for advanced STOL fighter configurations

[AIAA PAPER 84-0334] p 197 A84-18027

New ICAO obstacle clearance requirements

p 278 A84-20077

Off-shore helicopter radio navigation using DME-based positioning system

p 521 A84-32337

Simulator evaluation of a remotely piloted vehicle lateral landing task using a visual display

[AIAA PAPER 84-2095] p 771 A84-42348

An in-flight investigation of pilot-induced oscillation suppression filters during the fighter approach and landing task

p 897 A84-44471

Landing approach handling qualities of transport aircraft with relaxed static stability

p 899 A84-44978

Sensitivity analysis of helicopter IMC decelerating steep approach and landing performance to navigation system parameters — Instrument Meteorological Conditions

p 862 A84-46352

The FAA (Federal Aviation Administration) air traffic activity, fiscal year 1982

[PB83-228460] p 43 N84-10048

Lateral runway approach guidance using Lorán-C

p 57 N84-11105

General aviation single pilot IFR autopilot study

p 136 N84-12035

A simulator evaluation of an automatic terminal approach system

p 114 N84-12037

Advanced symbology for general aviation approach to landing displays

p 125 N84-12039

Simulation analysis and derivation of accuracy requirements for future terminal area navigation. Part 1: Single aircraft analysis

[BMFT-FB-W-83-035-PT-1] p 428 N84-21535

Simulation analysis and derivation of accuracy requirements for future terminal area navigation. Part 2: Multi aircraft analysis

[BMFT-FB-W-83-036-PT-2] p 428 N84-21536

FAA (Federal Aviation Administration) air traffic activity FY 1983

[AD-A142493] p 766 N84-29861

APPROACH INDICATORS

Two suggestions of approach and landing method by visual display

p 860 A84-45063

Advanced symbology for general aviation approach to landing displays

p 125 N84-12039

APPROPRIATIONS

National Aeronautics and Space Administration Authorization Bill, 1984

[S-REPT-98-455] p 569 N84-24506

National Aeronautics and Space Administration Authorization Act

[S-REPT-98-455] p 569 N84-24507

National Aeronautics and Space Administration Report of accomplishments under the airport improvement program

[AD-A142444] p 794 N84-29889

APPROXIMATION

An engineering approximation of supersonic flutter for overall missile configuration

p 382 A84-25999

The optimal thermal gasdynamic design of gas turbine engines on the basis of the characteristics of part prototypes. II

p 532 A84-30415

Approximate Factorisation methods — for computational fluid dynamics

p 640 A84-37056

The role of aeroelasticity in the preliminary design of helicopter rotors

p 52 N84-11130

Progress on ultrasonic flow sizing in turbine-engine rotor components: Bore and web geometries

[DE83-018081] p 130 N84-12167

A lifting surface computer code with jet-in-crossflow interference effects. Volume 1: Theoretical description

[NASA-CR-166524] p 271 N84-16147

Aircraft generation equipment emissions estimator (AGEEE)

[AD-A136829] p 390 N84-20031

Entropy condition satisfying approximations for the full potential equations of transonic flow

[NASA-TM-85751] p 410 N84-20485

Conical flows with leading edge vortices

p 623 N84-25013

BGRID: A block-structured grid generation code for wing sections

[NASA-CR-166317] p 1014 N84-34187

ARCHITECTURE (COMPUTERS)

Distributed asynchronous microprocessor architectures in fault tolerant integrated flight systems

[AIAA PAPER 83-2342] p 54 A84-10017

Scientific data processor - Telemetry preprocessing in the real-time flight test environment

[AIAA PAPER 83-2755] p 50 A84-12343

Avionics/navigation architectural design considerations

p 113 A84-15625

Avionic architectures for fly-by-wire aircraft

p 136 A84-15652

A distributed microprocessor system architecture for implementing maintenance trainers with 3-D simulation

p 249 A84-16615

Distributed mini/microprocessor architecture for avionics systems maintenance trainers

p 250 A84-16616

The digital flight control and active control systems on the L-1011

p 456 A84-26745

A new bus architecture for distributed avionic systems

p 441 A84-26752

Directions in avionic data distribution systems

p 441 A84-26753

Broad range of programmable fault tolerance in transition machine computer architectures

p 490 A84-26796

Advanced autopilot-flight director system computer architecture for Boeing 737-300 aircraft

p 443 A84-26799

Modernization of the Breguet low-speed wind tunnel at Velizy

[AAAF PAPER NT 83-11] p 544 A84-32481

Review of aircraft-engine links as a consequence of engine digital control

p 890 A84-44991

Integrated powerplant control systems and potential performance benefits

p 129 N84-12063

High dynamic global positioning system receiver

[NASA-CASE-NPO-16171-1-CU] p 115 N84-12151

A microcomputer program package of the USAF stability and control DATCOM

[AD-A132143] p 138 N84-13199

Advanced Concepts for Avionics/Weapon System Design, Development and Integration

[AGARD-CP-343] p 150 N84-15034

System architecture: Key to future avionics capabilities

p 211 N84-15035

Certification experience of the Jaguar fly-by-wire demonstrator aircraft integrated flight control system

p 229 N84-15095

A study of optimal computer network architecture for digital avionics systems

[AD-A138151] p 448 N84-21545

Dynamic spacecraft simulators in military space ground systems

[AD-P002159] p 547 N84-23825

Fault tolerant architectures for integrated aircraft electronics systems, task 2

[NASA-CR-172282] p 694 N84-27734

Integrated Application of Active Controls (IAAC) technology to an advanced subsonic transport project-demonstration act system definition

[NASA-CR-165920] p 789 N84-28804

Integrated Computer-Aided Manufacturing (ICAM) architecture. Part 3, volume 4: Composite information model of design product (DES 1)

[AD-A142447] p 815 N84-30774

A common 1553B I/O channel for the F-16

[AD-P003546] p 883 N84-31150

Standards and integrated avionic digital system architecture

[AD-P003561] p 936 N84-31166

PAVE PILLAR: A maturation process for an advanced avionics architecture

[AD-P003568] p 884 N84-31173

Advanced cockpit-systems integration

[AD-P003569] p 880 N84-31174

Defense industry attitudes about AF interface standards report of an electronics industries association survey

[AD-P003570] p 937 N84-31175

- Initializations for numerical weather prediction based on finite element method
p 389 A84-25676

Form drag instability and multiple equilibria in the barotropic case p 486 A84-26603
Effects of aircraft and flight parameters on energy-efficient profile descents in time-based metered traffic

[NASA-CR-172338] p 676 N84-26685

ATMOSPHERIC COMPOSITION

Airborne tunable diode laser system for trace gas measurements p 881 A84-43305
Simultaneous cabin and ambient ozone measurements on two Boeing 747 airplanes. Volume 2: January to October 1978

[NASA-TM-81733] p 498 N84-22488

ATMOSPHERIC DENSITY

Investigation of the external flow analysis for density measurements at high altitude — shuttle upper atmosphere mass spectrometer experiment

[NASA-CR-173881] p 849 N84-32352

System for indicating fuel-efficient aircraft altitude

[NASA-CASE-NPO-15351-2] p 980 N84-34443

ATMOSPHERIC EFFECTS

The effect of the atmospheric droplet size distribution on aircraft ice accretion

[AIAA PAPER 84-0108] p 181 A84-17888

Numerical analysis of rain effects on an airfoil

[AIAA PAPER 84-0539] p 169 A84-18158

Ballistic orbital motion in a rotating atmosphere

[AAS PAPER 83-416] p 547 A84-30593

Effects of aircraft and flight parameters on energy-efficient profile descents in time-based metered traffic

[AIAA PAPER 84-1915] p 864 A84-43452

Influence of the environment on the application and drying quality of organic paints — aircraft structures

[SNIAAS-832-551-102] p 617 N84-25833

ATMOSPHERIC ELECTRICITY

International Aerospace Conference on Lightning and Static Electricity, Oxford University, Oxford, England, March 23-25, 1982, Proceedings. Volumes 1 & 2

p 149 A84-18508

Correlated airborne and ground measurement of lightning

p 248 A84-18513

Electrostatic autoplots

p 784 A84-40644

A systematic characterization of the effects of atmospheric electricity on the operational conditions of aircraft

p 228 N84-15088

Spacecraft-aided aerial studies of atmosphere's electrostatic zones

p 731 N84-28184

Nighttime observations of thunderstorm electrical activity from a high altitude airplane

[NASA-TM-86455] p 926 N84-31597

ATMOSPHERIC ENTRY

An experimental investigation of surface pressure measurements on an advanced winged entry vehicle at Mach 10

[AIAA PAPER 84-0308] p 165 A84-18012

The role of thermal motions of particles in gases of fireballs

p 248 A84-19274

Aerothermodynamic environment and thermal protection for a Titan aerocapture vehicle — Saturn satellite atmospheric entry

[AIAA PAPER 84-1714] p 660 A84-39371

Numerical techniques for high incidence reentry aerodynamics

[AD-A134178] p 271 N84-16149

Nonlinear modeling and initial condition estimation for identifying the aerothermodynamic environment of the Space Shuttle Orbiter

[AD-A138928] p 372 N84-19391

ATMOSPHERIC MODELS

The icing of an unheated, nonrotating cylinder. I - A simulation model

p 389 A84-23647

Modeling clear-air turbulence with vortices using parameter-identification techniques

[AIAA PAPER 84-2083] p 806 A84-42338

Preliminary study for the modeling of an artificial icing cloud

[AD-A135717] p 389 N84-18813

A spatial model of wind shear and turbulence for flight simulation

[NASA-TP-2313] p 564 N84-24044

A method for three-dimensional modeling of wind-shear environments for flight simulator applications

[NASA-TM-85969] p 761 N84-29857

ATMOSPHERIC MOISTURE

Aircraft icing in a clear sky

p 730 A84-38670

ATMOSPHERIC OPTICS

The determination of visibility conditions at the final portion of a descent glide

p 628 A84-35250

ATMOSPHERIC PRESSURE

Investigation into the internal aerodynamic design and associated errors in a fast descent ducted sonde for the measurement of atmospheric pressure and temperature (AMPARS phase 2)

[AD-A143189] p 933 N84-32969

ATMOSPHERIC TEMPERATURE

Temperature histories of commercial flights at severe conditions from GASP data

[NASA-CR-168247] p 28 N84-11152

Analysis of AFGL aircraft icing data

[AD-A137197] p 390 N84-20087

In-flight atmospheric and fuel tank temperature measurements

p 552 N84-23843

Revised Uniform Summary of Surface Weather Observations (RUSSWO). Parts A-E: Clark AFB, Philippines

[AD-A141228] p 731 N84-28342

System for indicating fuel-efficient aircraft altitude

[NASA-CASE-NPO-15351-2] p 980 N84-34443

ATMOSPHERIC TURBULENCE

Effects of atmospheric turbulence on a quadrotor heavy lift airship

p 118 A84-14735

Performance of a quantitative jet stream turbulence forecasting technique - The Specific CAT Risk (SCATR) index

[AIAA PAPER 84-0271] p 248 A84-17990

Turbulence detection using weather radar

p 283 A84-20083

Atmospheric turbulence: Models and methods for engineering applications — Book

p 487 A84-28006

Analysis of the nature and cause of turbulence upset using airline flight records

p 851 A84-44468

Modification of pitching stability by an atmospheric wave

p 900 A84-45596

On the influence of atmospheric disturbances on aircraft aerodynamics

p 845 A84-46191

Doppler lidar signal and turbulence study

[NASA-CR-170976] p 318 N84-17574

A spatial model of wind shear and turbulence for flight simulation

[NASA-TP-2313] p 564 N84-24044

ATOMIC CLOCKS

Precision oscillators and their role and performance in navigation systems

p 40 A84-12456

ATOMIZERS

Alternative fuels use in a vehicular gas turbine

p 615 N84-24741

ATOMIZING

Effects of airblast atomizer design upon spray quality

p 622 N84-24744

ATTACK AIRCRAFT

A fixed-beam multilateration radar system for weapon impact scoring

p 30 A84-10772

Helicopters adapt to multiple battlefield needs

p 524 A84-31334

An investigation of large amplitude wing-rock

p 542 A84-32788

Hind - Overpowering or overrated?

p 526 A84-32875

Agusta - Fulfilling da Vinci's dreams

p 825 A84-46520

Messerschmitt-Bolkow-Blohm - A commitment to the future

p 825 A84-46521

Quiang 5 attack aircraft of the PRC

[AD-A131058] p 53 N84-11161

A nonlinear control law for piloting aircraft in the air-to-ground attack phase

p 137 N84-12071

Secondary power supplies for a small single engine combat aircraft

p 131 N84-12175

Computer aided construction of ground attack mission profiles over European terrain

p 202 N84-15060

Survivability design guidelines for Fly-By-Wire Flight Control Systems development

[AD-A138211] p 464 N84-21557

DARPA (Defense Advanced Research Projects Agency) air vehicles technology office technical task order contract

[AD-A138887] p 529 N84-23625

Study of aerodynamic technology for single-engine V/STOL fighter/attack aircraft

[NASA-CR-166270] p 754 N84-28738

Study of aerodynamic technology for single-engine V/STOL fighter/attack aircraft

[NASA-CR-166269] p 765 N84-28767

Weapons file

[AD-A142508] p 774 N84-29867

ATTENUATION

Radio frequency distribution assembly, operations and maintenance manual

[AD-A143864] p 1009 N84-33649

ATTENUATION COEFFICIENTS

Measurement of the absorption coefficient using the sound-intensity technique

[NASA-CR-173848] p 941 N84-32115

ATTITUDE (INCLINATION)

Calculation for attitude angles of an all attitude aeroplane strapdown system

p 380 A84-23910

Using the Peripheral Vision Horizon Display

[SAE PAPER 831473] p 446 A84-29505

V/STOL (Vertical/Short Takeoff and Landing) low speed and transition equivalent systems analysis

[AD-A131855] p 122 N84-12156

Orientation and calibration of three-dimensional tachometer with aid of available angle data

p 725 N84-26954

ATTITUDE CONTROL

Attitude and acceleration performance in the flight control system

p 456 A84-26730

Twenty-five years of handling qualities research

[AIAA PAPER 82-1353] p 540 A84-30801

Geometric methods for multibody dynamics

[AIAA PAPER 84-1022] p 547 A84-31751

Distributed parameter system theory of autopilot design of slender vehicle

p 704 A84-39740

Instrument failure detection and isolation in a system with variable plant parameters

[AIAA PAPER 84-1856] p 934 A84-43420

Tentative STOL (short-takeoff-and-landing) flying qualities criteria for MIL standard and handbook

[AD-A132857] p 201 N84-14138

Multivariable control laws for the AFTI/F-16

[AD-A135870] p 363 N84-18210

Aircraft control position indicator

[NASA-CASE-LAR-12984-1] p 447 N84-20522

Multivariable control laws for the AFTI/F-16

[AFIT/GE/EE/83S-4] p 609 N84-24531

A piloted simulator investigation of decoupling helicopters by using a model following control system

[AD-A139976] p 611 N84-24598

Multivariable digital control laws for the UH-60A black hawk helicopter

[AD-A141046] p 705 N84-27748

Development of lateral-directional equivalent system models for selected U.S. Navy tactical aircraft

[AD-A141672] p 790 N84-28810

Computer program to simulate the lateral-directional response of a high performance aircraft digital electronic flight control system

[AD-A144480] p 991 N84-34447

ATTITUDE INDICATORS

Pilot-aircraft interaction concerning a wind shear indication system

p 693 N84-26586

AUDIO FREQUENCIES

Propeller tone bursts

p 320 A84-21213

AUDIOLOGY

Activities report of the Institute of Sound and Vibration Research

p 820 N84-29693

AUDITORY PERCEPTION

Accuracy and speed of response to different voice types in a cockpit voice warning system

[AD-A135595] p 383 N84-18503

AUDITORY TASKS

Frequency encoded auditory display of the critical tracking task

[NASA-TM-85869] p 531 N84-22558

AUGMENTATION

A piloted simulator investigation of side-stick controller/stability and control augmentation system requirements for helicopter visual flight tasks

p 906 A84-46370

Proposed revisions to MIL-F-8785C related to flight safety of augmented aircraft. Volume 1. Section 1 - 7

[AD-A131414] p 29 N84-11153

Proposed revisions to MIL-F-8785C related to flight safety of augmented aircraft. Volume 2. Appendices A - F

[AD-A131415] p 29 N84-11154

Proposed revisions to MIL-F-8785C related to flight safety of augmented aircraft. Volume 3. Appendix G. Pilot comments

[AD-A131416] p 29 N84-11155

NASA Aircraft Controls Research, 1983

[NASA-CP-2296] p 461 N84-20567

Flying qualities criteria for supersonic aircraft

p 461 N84-20569

Large aircraft handling qualities

p 461 N84-20570

A summary of rotorcraft handling qualities research at NASA Ames Research Center

p 461 N84-20571

Implications of control technology on aircraft design

p 461 N84-20573

Design of a complete multivariable digital flight control system

[AFIT/GE/EE/82D-18] p 810 N84-24532

Optimal cooperative control synthesis applied to a control-configured aircraft

[NASA-CR-170411] p 610 N84-24593

AUSTENITIC STAINLESS STEELS

Fracture temperature and flaw growth in nitronic 40 at cryogenic temperatures

[NASA-TP-2312] p 552 N84-23750

AUSTRALIA

Australian airspace management

p 571 A84-35377

AUTOCCLAVING

- Autoclave - Curing of extremely thin HM CFC-skins --- for fabrication of fiber composite aerospace structures [MBB-UD-409-83-OE] p 622 A84-35921

AUTOMATED EN ROUTE ATC

- Development of threat logic for airborne TCAS --- Traffic Alert and Collision Avoidance System

- p 423 A84-26790
The pilot's role in the automated ATC system p 739 A84-41066
The role of NEXRAD in aircraft navigation and flight safety enhancement p 932 A84-44150
Air traffic control improvements in the Republic of China p 858 A84-44741
Electronic tabular display subsystem (ETABS) for flight plan data p 859 A84-44744
Automated en route air traffic control algorithmic specifications. Volume 3: Flight plan conflict probe [AD-A136795] p 346 A84-19319

AUTOMATED PILOT ADVISORY SYSTEM

- Development of threat logic for airborne TCAS --- Traffic Alert and Collision Avoidance System

- p 423 A84-26790
Experimentation for flight service systems p 852 A84-44740

AUTOMATED RADAR TERMINAL SYSTEM

- DERD-MC - A modular, distributed-processing ATC system p 37 A84-12187
Selective-interrogation SSR - A future technique for automating ATC p 763 A84-40048

AUTOMATIC CONTROL

- Automated measurements of atmospheric visibility p 78 A84-12196
Integrated systems for the automatic control of aircraft powerplants --- Russian book p 297 A84-21579
American Control Conference, San Francisco, CA, June 22-24, 1983, Proceedings. Volumes 1, 2 & 3 p 390 A84-25451
Models and analysis for twin-lift helicopter systems p 362 A84-25553
Synthesis of a controller of simple structure for a multilink system stable in the case of infinite gain factors p 490 A84-27873
Automation of small-scale machine-shop production and the product quality --- Russian book p 717 A84-37523
The role of pilots and automation in future transport flight stations p 768 A84-41059
Robust back-up stabilization for artificial-stability aircraft p 899 A84-45049
Systems of terminal control --- Russian book p 935 A84-45647
Synthesis of an optimal on-board electric power distribution system for aircraft using computer-aided design p 986 A84-47584
Start automated traffic control system operational at Krasnodar p 41 A84-10004
Gust alleviation --- numerical analysis p 69 A84-11180
Flight-test of the glide-slope track and flare-control laws for an automatic landing system for a powered-lift STOL airplane [NASA-TP-2128] p 138 A84-13198
The integrated manual and automatic control of complex flight systems [NASA-CR-173308] p 362 A84-18207
Automated en route air traffic control algorithmic specifications. Volume 4: Sector workload probe [AD-A136796] p 346 A84-19320
HP-85/Mini-Ranger navigation system p 785 A84-28770
Solid state power controller fuse development program [AD-A142118] p 807 A84-29118
Design and development of an automatically controlled variable-load energy absorber [AD-A142683] p 774 A84-29868
Energy management for crew escape systems p 762 A84-29945

AUTOMATIC FLIGHT CONTROL

SUBJECT INDEX

AXIAL FLOW

- Investigation of the conical flowfield around external axial corners p 329 A84-23357
- Distributions of intensity and scale of turbulence around rotor blades (in connection with turbulent noise from a fan) p 508 A84-32585
- Buffeting of a slender circular beam in axial turbulent flows p 558 A84-32617
- Efficient method for calculating the axial velocities induced along rotating blades by trailing helical vortices p 574 A84-34462
- Influence of a periodical fluctuation on a profile loss of a cascade. I - Determination of the total pressure loss coefficient. II - Behavior of a boundary layer p 653 A84-38082
- Performance of a high-work low aspect ratio turbine tested with a realistic inlet radial temperature profile [AIAA PAPER 84-1161] p 777 A84-40239
- Theoretical analysis of diffuser performance with axial flow and swirling flow p 836 A84-45039
- Velocity and temperature characteristics of two-stream, coplanar jet exhaust plumes [AIAA PAPER 84-2205] p 891 A84-46106
- Computation of potential flow on S2 stream surface for a transonic axial-flow compressor rotor [ASME PAPER 84-GT-30] p 951 A84-46894
- A discussion of the factors affecting surge in centrifugal compressors [ASME PAPER 84-GT-194] p 1005 A84-46992
- Aerodynamics of advanced axial-flow turbomachinery [AD-A131360] p 60 N84-10073
- On the structure of the turbulent vortex p 99 N84-12102
- Performance of a high-work low aspect ratio turbine tested with a realistic inlet radial temperature profile [NASA-TM-83655] p 607 N84-24589
- The boundary layer on compressor cascade blades [NASA-CR-173514] p 623 N84-25001
- Cold-air performance of compressor-drive turbine of department of energy upgraded automobile gas turbine engine. 3: Performance of redesigned turbine [NASA-TM-83627] p 585 N84-25644
- Velocity and temperature characteristics of two-stream, coplanar jet exhaust plumes [NASA-TM-83730] p 781 N84-28790
- Stator blade row geometry modification influence on two-stage, axial-flow compressor aerodynamic performance [AD-A141793] p 782 N84-28797
- Aerodynamic design and performance of a two-stage, axial-flow compressor (Baseline) p 782 N84-28798
- [AD-A141796] p 782 N84-28798
- Blade endwall flows in an axial flow compressor stage p 893 N84-31209

- Investigation of aerodynamics of non axisymmetric projectiles [AD-A139107] p 517 N84-23609
- Base pressure measurements on a projectile shape at Mach numbers from 0.91 to 1.20 [AD-A141341] p 669 N84-27699

BATHYMETERS

- An optimally integrated track recovery system for aerial bathymetry p 205 A84-16120

BAYS (STRUCTURAL UNITS)

- Mach 0.6 to 3.0 flows over rectangular cavities [AD-A134579] p 272 N84-16153

BEACON COLLISION AVOIDANCE SYSTEM

- Traffic alert and collision avoidance system (TCAS): A functional overview of active TCAS I [AD-A132281] p 115 N84-13171

BEAMS (RADIATION)

- Laser beam duct pressure controller system [AD-D011102] p 929 N84-32811

BEAMS (SUPPORTS)

- An experimental method for determining the dynamic contact law p 475 A84-27426
- Buffeting of a slender circular beam in axial turbulent flows p 558 A84-32617
- Nonlinear bending and collapse of long, thin, open section beams and corrugated panels [ASME PAPER 84-APM-4] p 622 A84-36160
- Design considerations for bearingless rotor hubs [AD-A131660] p 123 N84-12162
- Analysis of lateral and torsional vibration characteristics of beams and shafts with end located rotational masses [NASA-TM-84593] p 727 N84-27065

BEARING (DIRECTION)

- Maneuvering target tracking using bearing measurements p 186 A84-16580

BEARING ALLOYS

- Status of understanding for bearing materials p 616 N84-25060

BEARINGLESS ROTORS

- Aeromechanical aspects in the design of hingeless/bearingless rotor systems [MBB-UD-403-83-OE] p 525 A84-32471
- Structural and dynamic tailoring of hingeless/bearingless rotors [MBB-UD-404-83-OE] p 525 A84-32474
- Wind tunnel test of a soft/stiff inplane bearingless rotor p 677 A84-36524
- Measured and calculated inplane stability characteristics for an advanced bearingless main rotor p 875 A84-46341
- Design considerations for bearingless rotor hubs [AD-A131660] p 123 N84-12162

BEARINGS

- The vibrational behavior of a multi-shaft, multi-bearing system in the presence of a propagating transverse crack [ASME PAPER 83-DET-82] p 480 A84-29110
- Analysis of the response of a multi-rotor-bearing system containing a transverse crack in a rotor [ASME PAPER 83-DET-84] p 480 A84-29111
- A blade loss response spectrum for flexible rotor systems [ASME PAPER 84-GT-29] p 1001 A84-46893
- Effects of bearing deadbands on bearing loads and rotor stability [NASA-CR-170986] p 387 N84-19814
- Prediction of critical speeds, unbalance and nonsynchronous forced response of rotors p 388 N84-19918
- Status of understanding for bearing materials p 616 N84-25060
- A rear engine without joints and pillows [MBB-UD-383-83-O] p 628 N84-26441
- Subharmonic vibrations of rotor mounted in rolling bearings p 725 N84-26943
- Current status of an organic Rankine cycle engine development program p 731 N84-28230
- Mode 2 fatigue crack growth specimen development [NASA-TM-83722] p 809 N84-29248
- Summary of drive-train component technology in helicopters [NASA-TM-83726] p 810 N84-30294

BEECHCRAFT AIRCRAFT

- Airborne laboratory measurement of aircraft performance and stability and control for light aircraft. Supplement [AD-A131457] p 69 N84-11179
- Aircraft accident report. Midair collision: McDonnell-Douglas F-4C Beech D-55 Baron, Cherry Point, North Carolina, 9 January 1983 [PB84-910407] p 854 N84-32368

BEHAVIOR

- Fatigue behavior of long and short cracks in wrought and powder aluminum alloys [AD-A131324] p 81 N84-11517

BELL AIRCRAFT

- Anatomy of a helicopter accident p 26 A84-11616
- Flight service evaluation of composite components on Bell 206L and Sikorsky S-76 helicopters p 710 A84-36521
- Automated coordinate measuring machine to measure twist and contour of main rotor blades at Bell Helicopter Textron p 923 A84-46347

BENDING

- Frequency determination techniques for cantilevered plates with bending-torsion coupling p 378 A84-23368
- Nonlinear bending and collapse of long, thin, open section beams and corrugated panels [ASME PAPER 84-APM-4] p 622 A84-36160
- Aeroelastic design considerations in the development of helicopters p 52 N84-11126

BENDING FATIGUE

- A probability study of the fatigue life of the compressor blades of gas-turbine engines p 216 A84-16964
- Fatigue crack initiation in aluminum alloys under programmed block loading p 374 A84-24963
- Bending fatigue of electron-beam-welded foils. Application to a hydrodynamic air bearing in the Chrysler/DOE upgraded automotive gas turbine engine [NASA-TM-83539] p 316 A84-16589

BENDING MOMENTS

- A theoretical and experimental investigation of the bending-rolling process applied to sheets to form conical aircraft parts p 553 A84-30418
- Body-freedom flutter of a 1/2-scale forward-swept-wing model, an experimental and analytical study [NASA-CR-172324] p 464 A84-21553
- Improved compliant hydrodynamic fluid journal bearing [NASA-CASE-LEW-13670-1] p 560 A84-22959

BENDING VIBRATION

- An actuator disc analysis of unsteady supersonic cascade flow p 265 A84-21189
- Investigation of random vibrations of aircraft engine blades p 298 A84-22410
- Analysis of the response of a multi-rotor-bearing system containing a transverse crack in a rotor [ASME PAPER 83-DET-84] p 480 A84-29111
- Blade bending flutter in started supersonic flow p 720 A84-38095
- Helicopter individual-blade-control and its applications p 901 A84-46378
- Investigation of the effect of blade sweep on rotor vibratory loads [NASA-CR-166526] p 351 A84-18196

BERYLLIUM

- Materials research for advanced inertial instrumentation. Task 2: Gas bearing material development [AD-A130471] p 42 A84-10044

p 231 A84-17408
- Nonlinear computation of wing-body-vertical tail-wake flows at low supersonic speeds
[AIAA PAPER 84-0427] p 268 A84-21871
- Configuration development of a highly-maneuvrable research aircraft with forward swept surfaces
p 682 A84-38416
- Theoretical prediction of roll moment on wing-controlled missile
[AIAA PAPER 84-2148] p 745 A84-41328

SUBJECT INDEX

- The aerodynamics of some guided projectiles
[AIAA PAPER 84-2097] p 752 A84-42373
- Two-dimensional gas-particle flow past thin bodies
p 962 A84-47777
- Wind tunnel investigations of glider fuselages with different waistings and wing arrangements
p 177 N84-15116
- New investigation of short wings with lateral jets
[NASA-TM-77347] p 178 N84-15124
- Fuselage and nozzle pressure distributions of a 1/12-scale F-15 propulsion model at transonic speeds. Effect of fuselage modifications and nozzle variables
[NASA-TP-2333] p 850 N84-32354
- ### BOY-WING CONFIGURATIONS
- Transonic flowfield computation using a modified shock-point operator
p 8 A84-10105
- The use of computational fluid dynamics in the solution of a number of aerodynamic transonic flow problems
p 15 A84-11855
- A subdomain decomposition technique as an alternative for transonic potential flow calculations around wing-fuselage configurations
[ONERA, TP NO. 1983-124] p 91 A84-13639
- Calculation of transonic flows around wing-fuselage combination by a subdomain decomposition approach
p 95 A84-15855
- Aerodynamics of very slender rectangular wing bodies to high incidence
p 153 A84-17407
- Algebraic grid generation for wing-fuselage bodies
[AIAA PAPER 84-0002] p 154 A84-17826
- A block-structured finite element grid generation scheme for the analysis of three-dimensional transonic flows
[AIAA PAPER 84-0004] p 155 A84-17827
- A numerical procedure to predict the effects of Reynolds number and trip strip variation on three-dimensional wing lift and pitching moment
[AIAA PAPER 84-0255] p 163 A84-17978
- Treatment of supersonic configurations by an updated low-order panel method
p 429 A84-26952
- Slender body theory and optimization procedures for transonic lifting wing bodies
p 429 A84-26956
- The separate spatial extents of the trailing horseshoe root vortex legs from a wing and plate junction
[AIAA PAPER 84-1526] p 646 A84-37952
- Experimental study of the behavior of 3D-turbulent boundary layer in a simplified wing/body junction
[AIAA PAPER 84-1529] p 647 A84-37954
- Aspects of the aerodynamic design of a thin supercritical, forward swept wing for a combat aircraft
p 654 A84-38414
- The flying wing reconsidered
p 683 A84-38486
- A transonic wing-body flowfield calculation with improved grid topology and shock-point operators
[AIAA PAPER 84-2157] p 828 A84-44196
- Three-dimensional computational methods applied to aerodynamic analysis of transonic flows past a wing-body configuration
[ONERA, TP NO. 1984-92] p 831 A84-44944
- Analysis of transonic and supersonic flows around wing-body-combinations
p 831 A84-44945
- Validation of a transonic analysis code for use in preliminary design of advanced transport configurations
p 832 A84-44971
- Aerodynamic characteristics of wing-body-combinations at high angles of attack
p 834 A84-45011
- Effects of engine nacelles on transonic flow around airplane configurations, calculations by TSP-method
p 837 A84-45055
- Investigation of flow in the wake of a high-aspect-ratio wing and the nonlinear moment characteristics of a wing-fuselage model at large angles of attack
p 840 A84-45719
- Calculation of inviscid transonic flow past a wing-fuselage combination
p 840 A84-45720
- Method of uniformly precise approximation and its application to the calculation of the aerodynamic interaction of a wing-fuselage combination and a body of revolution at supersonic flight speeds
p 840 A84-45721
- Flow past wing-body junctions
p 843 A84-46023
- Separated flow around a conic combination of a low-aspect-ratio wing and a nonsymmetrical fuselage
p 957 A84-47051
- A comparison of the weight ratios of the airframe designs of aircraft with a cantilever wing and with a closed wing system
p 973 A84-47076
- Numerical simulation of wing-fuselage aerodynamic interaction
p 962 A84-48126
- Transonic wing and wing/body flow computations on non-surface-conforming grids
p 963 A84-49107
- Body and canard effects on an attached-flow maneuver wing at Mach 1.62
[NASA-TP-2249] p 335 N84-18163
- Development of a computer code for 3-dimensional higher order panel method for subsonic potential flow
[FFA-138] p 338 N84-18180

- Surface grid generation for wing-fuselage bodies
p 491 N84-22186
- Visualisation of the vortex dominated flow around a delta wing-body combination using a water tunnel
[BAE-821/RES/6631] p 559 N84-22904
- Flight mechanical analysis of dynamic derivatives of the Dornier variation wind tunnel model
[DFVLR-FM-83-38] p 581 N84-24541
- The study of an idealized wing/body junction
[AD-A139933] p 583 N84-24559
- Safety recommendations A-84-1 through -3
p 588 N84-25673
- Configuration design studies and wind tunnel tests of an energy efficient transport with a high-aspect-ratio supercritical wing
[NASA-CR-3524] p 740 N84-28727
- Results of design studies and wind tunnel tests of high-aspect-ratio supercritical wings for an energy efficient transport
[NASA-CR-159332] p 754 N84-28735
- Transonic interference flow-field analysis for wing-body-pylon-store
[AD-A141811] p 757 N84-28754
- Active suppression of aeroelastic instabilities for forward swept wings
[AD-A141739] p 773 N84-28783
- Transonic equivalence rule with lift
[AD-A143591] p 966 N84-33389
- ### BOEING AIRCRAFT
- Application of laser inertial technology to commercial airplanes
p 424 A84-26801
- Service experience with composites on Boeing commercial aircraft
p 864 A84-42751
- Productivity improvements through the use of CAD/CAM
p 918 A84-45048
- ### BOEING 707 AIRCRAFT
- Vertical drop test of a transport fuselage center section including the wheel wells
[NASA-TM-85706] p 142 N84-12531
- ### BOEING 727 AIRCRAFT
- Advanced composite elevator for Boeing 727 aircraft. Volume 1: Technical summary
[NASA-CR-3290] p 688 N84-27722
- ### BOEING 737 AIRCRAFT
- Advanced autopilot-flight director system computer architecture for Boeing 737-300 aircraft
p 443 A84-26799
- Investigation of control law reconfigurations to accommodate a control element failure on a commercial airplane
p 542 A84-33136

BORON

BORON

Materials research for advanced inertial instrumentation.
Task 2: Gas bearing material development
[AD-A130471] p 42 N84-10044

BORON NITRIDES

Economic use of CBN grinding tools in the production of jet turbine components
[CSIR-TRANS-1736] p 928 N84-32561

BORON REINFORCED MATERIALS

Nondestructive evaluation of boron-carbide-coated, boron-fiber-reinforced titanium p 470 A84-28240

BORON-EPOXY COMPOUNDS

Effects of service environment on the boron/epoxy skins of the F-15 horizontal stabilizer p 864 A84-42749

BOUNDARIES

Numerical determination of the effects of boundary conditions on the instability of composite panels with cutouts
[AD-A136772] p 388 N84-19931

Exact solution to problem of interaction between wedge moving at supersonic velocity and interface of two gaseous media p 512 N84-22780

BOUNDARY ELEMENT METHOD

Lifting aerofoil calculation using the boundary element method p 12 A84-11174

Three-dimensional grid generation using elliptic equations with direct grid distribution control p 378 A84-23358

A numerical analysis of unsteady separated flow by discrete vortex model using boundary element method p 382 A84-25882

Extension of boundary elements to lifting compressible aerodynamics p 333 A84-25883

Fundamental solutions and numerical methods for flow problems p 475 A84-27423

The boundary element method in an industrial environment p 564 A84-30701

A boundary element technique in transonic flow p 644 A84-37901

Nonlinear Structural Analysis
[NASA-CP-2297] p 927 N84-31688

Three-dimensional stress analysis using the boundary element method p 927 N84-31700

BOUNDARY INTEGRAL METHOD

Two recent extensions of the vortex method
[AIAA PAPER 84-0343] p 174 A84-19249

A survey on boundary integral methods p 641 A84-37064

Requirements and developments shaping a next generation of integral methods — for computational fluid dynamics p 641 A84-37065

Transonic full potential solutions by an integral equation method p 655 A84-38829

Axial compressor performance restoration by blade profile control
[ASME PAPER 84-GT-232] p 983 A84-47012

The 'close' problem method and its application to the St. Venant torsion problem for a rod p 1007 A84-47092

Some new developments in exact integral equation formulations for sub- or transonic potential flow
[NLR-MP-82024-U] p 252 N84-15860

Development of a computer code for 3-dimensional higher order panel method for subsonic potential flow [FFA-138] p 338 N84-18180

Multigrid methods for boundary integral equations
[NLR-MP-82059-U] p 392 N84-19011

BOUNDARY LAYER COMBUSTION

Full coverage discrete hole wall cooling - Cooling effectiveness
[ASME PAPER 84-GT-212] p 1005 A84-47001

BOUNDARY LAYER CONTROL

Investigation of tangential blowing applied to a subsonic V/STOL inlet p 12 A84-11042

Cloud particle effects on laminar flow and instrumentation for their measurement aboard a NASA LFC aircraft
[AIAA PAPER 83-2734] p 56 A84-12327

Analytical and experimental studies on natural laminar flow nacelles
[AIAA PAPER 84-0034] p 156 A84-17839

Effects of local boundary layer suction on shock-boundary layer interaction and shock-induced separation
[AIAA PAPER 84-0098] p 159 A84-17880

Effect of sidewall suction on flow in two-dimensional wind tunnels
[AIAA PAPER 84-0242] p 162 A84-17970

Sidewall effects on airfoil tests p 306 A84-21521

Technology developments for laminar boundary layer control on subsonic transport aircraft p 432 A84-29473

Fresh attack on laminar flow p 407 A84-29577

Technology developments for laminar boundary layer control on subsonic transport aircraft p 527 A84-33137

The active and passive influencing of shock boundary layer interference at supercritical aircraft wings
[DGLR PAPER 83-059] p 509 A84-33150

Fluid dynamics of airfoils with circulation control for V/STOL application
[AIAA PAPER 84-2090] p 750 A84-42343

Analytical study of suction boundary layer control for subsonic V/STOL inlets
[AIAA PAPER 84-1399] p 827 A84-44187

Transonic shock-boundary layer interaction control p 832 A84-44961

The interaction of a shock wave and a turbulent boundary layer and its control
[ONERA, TP NO. 1984-27] p 837 A84-45177

An investigation of a method for controlling a three-dimensional separation zone p 841 A84-45730

Design integration of laminar flow control for transport aircraft p 874 A84-45964

A study of a flow control device in the form of a circular groove in the casing of a compressor p 986 A84-47572

A flight test of laminar flow control leading-edge systems
[NASA-TM-85712] p 149 N84-14110

Investigation to optimize the passive shock wave-boundary layer control for supercritical airfoil drag reduction
[NASA-CR-173276] p 269 N84-16135

Analytical study of blowing boundary-layer control for subsonic V/STOL inlets
[NASA-TM-83576] p 270 N84-16141

Design of transonic compressor cascades for minimal shock losses and comparison with test results p 300 N84-16192

Airframe technology for aircraft energy efficiency — economic factors
[NASA-TM-85749] p 328 N84-18154

Experimental investigation of tangential blowing applied to a subsonic V/STOL inlet
[NASA-TP-2297] p 411 N84-20493

Aerodynamic design of the contoured wind-tunnel liner for the NASA supercritical, laminar-flow-control, swept-wing experiment
[NASA-TP-2335] p 964 N84-33377

BOUNDARY LAYER EQUATIONS

Calculation of the boundary layer of profiles for flows with laminar and turbulent zones p 92 A84-14264

Supersonic compressive ramp without laminar boundary-layer separation p 153 A84-17429

Evolution of the discontinuity of a vortex sheet p 334 A84-26333

Separation criteria for three-dimensional boundary-layer calculations p 474 A84-27145

Boundary-layer calculations in the inverse mode for incompressible flows over infinite swept wings p 638 A84-38476

The theoretical determination of the damping coefficients of the surrounding medium by means of the aerodynamical boundary-layer theory p 718 A84-37724

A procedure for solving the compressible interacting boundary-layer equations for subsonic and supersonic flows
[AIAA PAPER 84-1614] p 650 A84-38008

Determination of the parameters of a boundary layer on a rotating axisymmetric cone p 752 A84-42526

Subsonic/transonic viscous interactions p 95 N84-12075

Interacting boundary-layer solutions for laminar separated flow past airfoils
[NASA-CR-172287] p 270 N84-16140

Design of single component airfoils using an inverse boundary element method
[REPT-83-A2-SER-A] p 413 N84-21512

Transonic flow around protruding corner with free streamline p 513 N84-22796

Wave drag of elongated astroid bodies at moderate supersonic flight velocities p 513 N84-22797

Stall delay by boundary layer blowing and/or suction p 846 N84-31086

Simulation of transonic separated airfoil flow by finite difference viscous-inviscid interaction
[NASA-TM-85980] p 850 N84-32358

Transonic viscous-inviscid interaction using Euler and inverse boundary-layer equations p 964 N84-33376

C-135 AIRCRAFT

KC-135R DT&E — Developmental Test and Evaluation for re-engined aircraft p 192 A84-16163
Dynamic stability analysis of hose/drogue refueling system p 683 A84-38902

Multiple input - multiple output flight control design with highly uncertain parameters; application to the C-135 aircraft [AD-A138011] p 464 N84-21554

KC-135 Winglet Program Review [NASA-CP-2211] p 667 N84-27686
KC-135 winglet program overview p 667 N84-27687

KC-135 wing and winglet flight pressure distributions, loads, and wing deflection results with some wind tunnel comparisons p 667 N84-27688

In-flight lift and drag measurements on a first generation jet transport equipped with winglets p 667 N84-27689

Measurements of the fuel mileage of a KC-135 aircraft with and without winglets p 687 N84-27690

Comparison of flight measured, predicted and wind tunnel measured winglet characteristics on a KC-135 aircraft p 667 N84-27691

KC-135A winglet flight flutter program p 668 N84-27692

Digital multivariable tracker control laws for the KC-135A [AD-A141118] p 776 N84-28786

Development of the sonic pump levitation [NASA-CR-161963] p 929 N84-32749

C-140 AIRCRAFT

Acoustic flight testing of advanced design propellers on a JetStar aircraft p 736 N84-27661

C-141 AIRCRAFT

Demonstration of electromechanical actuation technology for military air cargo transport p 193 A84-16532

Airborne far-infrared and submillimeter spectroscopy p 499 A84-29259

Extending the lifetime of operational systems through corrosion tracking and prediction [AD-A133931] p 149 N84-14112

Proceedings of the Workshop on Multivariable Control Systems [AD-A139050] p 571 N84-24529

Digital multivariable tracker control laws for the C-141-A Starlifter aircraft p 610 N84-24533

A SLAM (Simulation Language for Alternative Modeling) airfield model for airlift operations [AD-A141106] p 761 N84-28762

C-15 AIRCRAFT

YC-15 EBF (Externally-Blown Flap) STOL (Short Takeoff and Landing) airplane fuselage and interior noise environment [AD-A131462] p 54 N84-11184

C-2 AIRCRAFT

Navy evaluation of C-2A aerial refueling p 190 A84-15980

C-5 AIRCRAFT

The giants of Georgia — development of C-5B aircraft p 290 A84-21549

A SLAM (Simulation Language for Alternative Modeling) airfield model for airlift operations [AD-A141106] p 761 N84-28762

C-9 AIRCRAFT

Ozone survey of C-9A [AD-A130632] p 51 N84-10052

CABIN ATMOSPHERES

Trade-off considerations for Environmental Control System on board of helicopters p 287 A84-19648

Simultaneous cabin and ambient ozone measurements on two Boeing 747 airplanes. Volume 2: January to October 1978 [NASA-TM-81733] p 498 N84-22488

System for the removal of airborne contaminants from aircraft environmental control systems [AD-D011172] p 1008 N84-33615

CABLES (ROPES)

Electrostatic hazards in helicopter search and rescue operations p 182 A84-18539

Optimal guidance for airborne cable pickup system — for payload retrieval from hostile environment by use of aircraft-pulled towed vehicle [AIAA PAPER 84-1893] p 851 A84-43443

CALCULATORS

Computer program for preliminary helicopter design [AD-A136026] p 351 N84-18197

CALENDARS

Calendar of selected aeronautical and space meetings [AGARD-CAL-83/2] p 499 N84-21490

CALIBRATING

Issues in calibrating infrared seekers at low energy levels p 474 A84-27180

Rotating-boom facility for evaluation of wind characteristics approaching a wind-turbine blade [DE83-013117] p 73 N84-10107

Calibration of air-data systems and flow direction sensors. AGARD Flight Test Techniques Series, volume 1 [AGARD-AG-300-VOL-1] p 246 N84-15530

Simulator scene display evaluation [NASA-CASE-ARC-11504-1] p 307 N84-16221

Hot wire in low Reynolds number flow p 324 N84-18087

Flow behavior in the Wright Brothers Facility [WBWT-TR-1187] p 307 N84-18088

Some aspects of the compatibility between strain gauge readout equipment and multi-component wind tunnel balances [ARL-AERO-NOTE-417] p 384 N84-18606

Evaluation of instrument landing system DDM (Difference in Depth of Modulation) calibration accuracies [AD-A138301] p 428 N84-21533

Civil turbofan propulsion system integration studies using powered testing techniques at ARA, Bedford [ARA-MEMO-248] p 535 N84-22561

Aeroacoustic noise measurements in wind tunnel p 567 N84-23584

Aerodynamic forces on an airship hull in atmospheric turbulence [UTIAS-277] p 516 N84-23604

V/STOL wind-tunnel testing [NASA-TM-85936] p 571 N84-24528

Regression analysis technique for air data sensor calibration with an inertial navigation system [DFVLR-MITT-84-03] p 677 N84-27716

Stores weight and inertia system update: Cable attachment redesign, flexible length parameter calibration, data sheet revision [AD-A141087] p 773 N84-28781

Results of the first complete static calibration of the RSRA rotor-load-measurement system [NASA-TP-2327] p 879 N84-31111

Calibration of CT-4A fatigue test article, March 1983 [AD-A142880] p 879 N84-31115

Air data position-error calibration using state reconstruction techniques [NASA-TM-86029] p 887 N84-32384

General Integrated Multipurpose Inflight Calibration System (GIMICS) p 979 N84-34420

CALIFORNIA

Helicopter noise survey performed at Parker Center, Pasadena, and Anaheim, California, on February 10-14, 1983 [AD-A130962] p 83 N84-11887

Aircraft traffic density in the Los Angeles basin [AD-A141435] p 765 N84-28768

CAMBER

Vane stagger angle and camber effects in fan noise generation p 779 A84-40833

A general iterative method to design Karman-Trefftz and Joukowski airfoils p 826 A84-43339

Modification of wing design to increase lift for future Airbus derivatives (NEW) [BMFT-FB-W-83-005] p 54 N84-11167

Delta wings with shock-free cross flow [NASA-CR-172297] p 338 N84-19282

Investigation of effects contributing to dynamic stall using a momentum-integral method [AD-A136897] p 339 N84-19291

Numerical analysis of a variable camber rotor blade as a lift control device [NASA-CR-173452] p 439 N84-21538

CAMBERED WINGS

Unsteady pressure on a cambered blade under periodic gusts (Comparison with the experiments) p 12 A84-10899

Engineering analysis of drooped leading-edge wings near stall p 575 A84-34468

Mission adaptive wing advanced research concepts [AIAA PAPER 84-2088] p 771 A84-42371

Variable wing camber control for civil transport aircraft p 869 A84-44955

Body and canard effects on an attached-flow maneuver wing at Mach 1.62 [NASA-TP-2249] p 335 N84-18163

Wind tunnel tests on an outer wing segment of the ASW-19X sailplane [VTH-LR-369] p 342 N84-19305

VORCAM: A computer program for calculating vortex lift effect of cambered wings by the suction analogy [NASA-CR-165800] p 966 N84-33387

CAMERAS

Visual aids for future helicopters p 210 A84-18375

CAMOFLAGE

Cleaning compound efficiency; test method for aircraft surface cleaners [AD-A138515] p 399 N84-21504

CANADA

Air navigation 1950-1980 - Canada's contribution p 283 A84-19674

Aircraft design in Canada from Silver Dart to Challenger and Dash 8 p 947 A84-46807

Guide to Canadian aerospace related industries [AD-A140606] p 638 N84-26650

CANADIAN AIRCRAFT

The damage tolerance approach to the Canadair CL-600 p 288 A84-19672

CANADIAN SPACE PROGRAMS

Research activities at the Institute for Aerospace Studies, 1982 p 498 N84-22492

CANADIAN SPACECRAFT

Oscar satellites, amateur radio in space p 995 A84-48416

CANARD CONFIGURATIONS

High angle-of-attack aerodynamics of a strake-canard-wing V/STOL fighter configuration [AIAA PAPER 83-2510] p 12 A84-10574

A fundamental comparison of canard and conventional configurations p 46 A84-11050

An analytical study of the induced drag of canard-wing-tail aircraft configurations with various levels of static stability p 63 A84-11170

Aircraft that fly backwards? - The application of forward swept wings p 47 A84-11172

3-dimensional grid generation with applications to high performance aircraft p 14 A84-11597

Aerodynamic canard/wing parametric analysis for general aviation applications [AIAA PAPER 84-0560] p 169 A84-18164

Were the Wrights right? — canard configuration applications to fighter aircraft p 258 A84-20991

Close-coupled canard-wing vortex interaction p 268 A84-22169

Aerodynamic design optimization trim analysis of canard conventional configurations p 347 A84-24104

Problems in the longitudinal dynamics of a flight vehicle in a bounded flow p 702 A84-37234

Theoretical investigation into forward swept wings p 682 A84-38411

Experimental documentation of the lifting surface wakes of a canard and forward swept wing configuration p 655 A84-38418

Transonic aerodynamic computations for a canard configuration [AIAA PAPER 84-2158] p 745 A84-41333

Aerodynamic characteristics of two general aviation canard configurations at high angles of attack [AIAA PAPER 84-2198] p 866 A84-44190

Wing design for delta-canard configuration p 835 A84-45014

Wake characteristics and interactions of the Canard/wing lifting surface configuration of the X-29 forward-swept wing flight demonstrator [AD-A133188] p 179 N84-15126

Control definition study for advanced vehicles [NASA-CR-3738] p 304 N84-16212

Body and canard effects on an attached-flow maneuver wing at Mach 1.62 [NASA-TP-2249] p 335 N84-18163

CANONICAL FORMS

Nonlinear transform [NASA-CR-166506] p 252 N84-15877

CANOPIES

Unassisted through canopy ejection experience p 23 A84-10728

Ejection through a reinforced canopy transparency p 23 A84-10730

Fragilization systems for aircraft canopies p 23 A84-10731

An investigation of the fatality rates for different canopy modes of ejection p 23 A84-10738

A canopy module escape system for future tactical aircraft p 291 A84-22400

Numerical prediction of deployment, initial fill, and inflation of parachute canopies [AIAA PAPER 84-0787] p 400 A84-26557

A method for calculating the pressure field about a ribbon parachute canopy in steady descent [AIAA PAPER 84-0794] p 400 A84-26562

Vortex lattice theory applied to parachute canopy configurations [AIAA PAPER 84-0795] p 401 A84-26563

Parachute canopy dimpling collapse mode [AIAA PAPER 84-0796] p 401 A84-26564

Pressure distributions on parachute ribbon shapes [AIAA PAPER 84-0815] p 402 A84-26579

Steady state stresses in ribbon parachute canopies [AIAA PAPER 84-0816] p 416 A84-26580

Axisymmetric-parachute theory with a consideration of fabric deformability p 417 A84-28060

Parachute theory accounting for the canopy fabric structure p 501 A84-31762

- Numerical solution of viscous flow around arbitrary airfoils in a straight cascade
p 579 N84-35340

SUBJECT INDEX

Performance investigation of a fan thrust reverser for a high by-pass turbofan engine p 696 A84-36956
[AIAA PAPER 84-1178]

Redesign and cascade tests of a supercritical controlled diffusion stator blade-section p 639 A84-36960
[AIAA PAPER 84-1207]

Analysis of inviscid and viscous flows in cascades with an explicit multiple-grid algorithm p 652 A84-38043
[AIAA PAPER 84-1663]

Compressor cascade optimization based on inverse boundary layer method and inverse cascade method. I - An inverse cascade method for incompressible two-dimensional potential flow p 653 A84-38081

Influence of a periodical fluctuation on a profile loss of a cascade. I - Determination of the total pressure loss coefficient. II - Behavior of a boundary layer p 653 A84-38082

Improved design of subcritical and supercritical cascades using complex characteristics and boundary-layer correction p 656 A84-38839

Calculation of transonic flow in a linear cascade [AIAA PAPER 84-1301] p 742 A84-40241

Base flow measurements in a transonic cascade using a laser transit anemometer p 744 A84-40862

Influence of dihedral on the secondary flow in a two-dimensional compressor cascade [ASME PAPER 83-GT-12] p 748 A84-41632

On the theory of the Wells turbine [ASME PAPER 84-GT-5] p 748 A84-41636

Application of streamline iteration and relative flow field methods to the calculation of the subsonic flow field of S1 stream surface of turbomachinery p 826 A84-43316

The time-dependent finite element method for calculating transonic flow field in turbomachinery cascade p 826 A84-43317

Viscous-inviscid interactive procedure for rotational flow in cascades of airfoils p 830 A84-44639

Transonic cascade flow analysis using viscous/inviscid coupling concepts p 843 A84-46103
[AIAA PAPER 84-2159]

Experimental study of the flow field behind an annular turbine nozzle guide vane with and without downstream rotor [ASME PAPER 84-GT-15] p 950 A84-46884

Computation of transonic flows in and about turbine cascades with viscous effects [ASME PAPER 84-GT-18] p 950 A84-46885

Numerical flow analysis of fully three-dimensional turbine cascades [ASME PAPER 84-GT-19] p 950 A84-46886

Design of highly loaded blade profiles using an iterative inverse-direct computational procedure [ASME PAPER 84-GT-22] p 950 A84-46887

Transonic cascade flow solved by separate supersonic and subsonic computations with shock fitting [ASME PAPER 84-GT-24] p 951 A84-46889

Preliminary study on forward loaded cascades designed with inverse method for low pressure turbine [ASME PAPER 84-GT-65] p 952 A84-46912

Recent progress in the understanding of basic aspects of secondary flows in turbine blade passages [ASME PAPER 84-GT-78] p 952 A84-46921

Use of an inverse method for the design of high efficiency compressor and turbine blades with large change in radius [ASME PAPER 84-GT-167] p 953 A84-46971

Holographic measurements and theoretical predictions of the unsteady flow in a transonic annular cascade [ASME PAPER 84-GT-174] p 953 A84-46976

An investigation of the transverse velocity profile in the case of internal viscous aerodynamic problems [ASME PAPER 84-GT-218] p 955 A84-47004

The use of tandem ejector pumps in an intermittent blowdown tunnel [ASME PAPER 84-GT-226] p 992 A84-47006

Mass flow limitation of supersonic blade rows due to leading edge blockage [ASME PAPER 84-GT-233] p 956 A84-47013

The effects of freestream turbulence on the profile boundary layer and losses in a compressor cascade [ASME PAPER 84-GT-242] p 956 A84-47019

Extima-2, an explicit time-marching method to calculate transonic turbomachinery cascade flow [ASME PAPER 84-GT-243] p 957 A84-47020

Comparison of controlled diffusion airfoils with conventional NACA 65 airfoils developed for stator blade application in a multistage axial compressor [ASME PAPER 84-GT-246] p 957 A84-47023

Compressor cascade optimization based on inverse boundary layer method and inverse cascade method. II - An inverse boundary layer method and wind-tunnel tests of optimized compressor cascade with high loading p 961 A84-47132

A combined method for solving the direct problem of the hydrodynamics of the airfoil cascades of turbomachines p 1007 A84-48000

The calculation of steady and unsteady transonic flow in cascades [CUED/A-TURBO/TR-118] p 17 N84-10016

Application of an inviscid-viscous interaction method to transonic compressor cascades p 300 N84-16190

A viscous inviscid interaction procedure for two dimensional cascades p 300 N84-16191

Design of transonic compressor cascades for minimal shock losses and comparison with test results p 300 N84-16192

Aerodynamic computation method of airfoil cascades subjected to viscous flow p 300 N84-16198

Secondary flows and losses in a turbine cascade p 301 N84-16203

Report of tests of a compressor configuration of DCA blading [AD-A133350] p 316 N84-16501

Potential flow through a cascade of alternately displaced circular bodies: The rod-wall wind tunnel boundary conditions [NASA-TM-85750] p 410 N84-20487

Analysis of inviscid and viscous flows in cascades with an explicit multiple-grid algorithm [NASA-TM-83636] p 502 N84-22527

Redesign and cascade tests of a supercritical controlled diffusion stator blade-section [NASA-TM-83635] p 510 N84-22533

Calculation of apparent masses in blade ring p 538 N84-22793

Calculation of transonic flow in a linear cascade [NASA-TM-83697] p 581 N84-24539

Behavior of cascaded airfoils under conditions of high mean loading and flow unsteadiness [AD-A139799] p 607 N84-24592

The method of complex characteristics for design of transonic compressors p 661 N84-26659

Energy efficient engine: Low-pressure turbine subsonic cascade component development and integration program [NASA-CR-165592] p 701 N84-27738

Energy efficient engine high-pressure turbine subsonic cascade technology report [NASA-CR-165567] p 701 N84-27739

Aeroelasticity in turbomachine-cascades [AD-A141905] p 784 N84-29880

Two-dimensional and quasi three-dimensional experimental standard configurations for aeroelastic investigations in turbomachine-cascades [AD-A141904] p 810 N84-30297

Unsteady transonic flow in cascades [NASA-TM-83780] p 849 N84-32351

Report of tests of a compressor configuration of CD (Controlled Diffusion) blading [AD-A143499] p 930 N84-32832

CASCADES

Axial flow compressor performance deterioration [AIAA PAPER 84-1208] p 601 A84-35133

Optimization and mechanisms of mistuning in cascades [ASME PAPER 84-GT-196] p 983 A84-46993

CASING

A study of a flow control device in the form of a circular groove in the casing of a compressor p 986 A84-47572

Dual clearance squeeze film damper [NASA-CASE-LEW-13506-1] p 535 N84-22562

CAST ALLOYS

Advanced, high-strength aluminum castings for airframe construction [DGLR PAPER 83-79] p 481 A84-29652

MRCA run-in floors p 503 N84-23557

Statistical and vibratory fatigue limit characteristics of aluminum cast alloys p 561 N84-23558

Economic riveting: Different bore qualities, fittings, connection elements p 561 N84-23560

Welding of components made of the aluminum cast alloy A357 p 561 N84-23561

Successful utilization of economic, light aluminum-casted structures in airplane construction [VFW-31/83-O] p 599 N84-26439

Gas turbine engine design considerations as related to alloys of high critical element content p 989 N84-33470

CASTING

New technology expands uses of a precision cast-machined aluminum plate p 235 A84-17196

Composite casting/bonding construction of an air-cooled, high temperature radial turbine wheel [SAE PAPER 831519] p 480 A84-29462

Advanced, high-strength aluminum castings for airframe construction [DGLR PAPER 83-79] p 481 A84-29652

CDC CYBER 170 SERIES COMPUTERS

CASTINGS

Hot isostatic pressing of aluminum castings p 235 A84-17195

Advancements in titanium castings p 235 A84-17206

Alpha jet pylon p 503 N84-23556

CATALYTIC ACTIVITY

Clean catalytic combustor program [NASA-CR-168323] p 220 N84-15151

Diesel engine catalytic combustor system -- aircraft engines [NASA-CASE-LEW-12995-1] p 1010 N84-33808

CATAPULTS

Optimal catapult impulse shaping for ejection seats [AIAA PAPER 84-1895] p 864 A84-43445

Propulsion in a life-saving role for ACES 2 p 762 N84-29942

The Stencel S4S ejection seat: A study in new pyrotechnic developments p 762 N84-29943

Crest: Crew escape technologies for the 1990's p 762 N84-29944

CATHODE RAY TUBES

Cockpit CRT display tyre pressure indicating system p 56 A84-11625

Characterization of CRT resolution --- in display systems for air to air combat p 207 A84-16563

Performance of a five-inch by five-inch very high-resolution, full-color avionic CRT display p 210 A84-16686

CRT displays in air transport cockpits - Experience to date p 443 A84-26805

Redundant color coding on airborne CRT displays p 599 A84-35899

Color CRT displays - A new standard for flight instrumentation? p 776 A84-41069

Manufacturing Methods and Technology (MM and T) specifications for miniature cathode ray tube [AD-A132797] p 243 N84-14439

Color display technology in advanced fighter cockpits p 214 N84-15061

CAUCHY PROBLEM

A new and improved computational technique for two-dimensional, unsteady, compressible flows p 639 A84-36484

Application of Riemann problem solvers to wave machine design p 721 A84-38853

Numerical solution of the Cauchy problem for generalized equations of aeroelasticity p 1000 A84-46875

CAUSES

Investigation, reporting and analysis of US Army aircraft accident p 184 N84-15077

McCauley Aviation, Inc. Mitsubishi MU-2B, N72B near Jeffersonville, Georgia, March 24, 1983 aircraft accident report [PB84-910401] p 674 N84-27702

CAVITATION FLOW

Suppression of the acoustic environment in an irregularly shaped cavity with an opening exposed to subsonic flow p 735 A84-38882

The Shock and Vibration Bulletin. Part 2: Fluid-structure dynamics and dynamic analysis [AD-A134453] p 387 N84-19881

A study of pump cavitation damage --- space shuttle main engine high pressure oxidizer turbopump [NASA-CR-170992] p 483 N84-20783

CAVITIES

Pulsations in the interaction of a supersonic jet with a cavity p 333 A84-25615

Detection of cavities under concrete pavement [AD-A131851] p 142 N84-12331

Analysis of electromagnetic backscatter from an inlet cavity configuration [AD-A133626] p 242 N84-14400

Mach 0.6 to 3.0 flows over rectangular cavities [AD-A134579] p 272 N84-16153

The use of interference-fit bolts or bushes and hole cold expansion for increasing the fatigue life of thick-section aluminum alloy bolted joints [AR-002-973] p 384 N84-18676

The aerodynamic effects of cavities in a body [BU-289] p 582 N84-24547

Supersonic jet-cavity interaction pulsation p 848 N84-32089

CAVITY RESONATORS

End effects in coupled rectangular resonators in unilateral fin line p 475 A84-27985

Periodic flow noise reduction using flow-excited resonators: Theory and application --- centrifugal fans [DFVLR-FB-83-29] p 245 N84-15409

CDC CYBER 170 SERIES COMPUTERS

XSECT: A computer code for generating fuselage cross sections - user's manual [NASA-TM-83218] p 668 N84-27696

CEILINGS (ARCHITECTURE)

Computer modeling of aircraft cabin fires
[PB84-101153] p 282 N84-17162

CELESTIAL GEODESY

Gravity field products from ocean altimeter data
[AIAA PAPER 84-1875] p 931 A84-43431
The accuracy of altimetric surfaces
p 1012 A84-46814

CELLS

Operation and performance measurement on engines
in sea-level test facilities: Introduction and general
survey p 612 N84-25724

CENTAUR LAUNCH VEHICLE

A high energy stage for the National Space
Transportation System
[NASA-TM-83795] p 912 N84-32411

CENTER OF GRAVITY

Realization of reduced stability in a modern transport
aircraft by controlling the center of gravity
[DGLR PAPER 82-092] p 62 A84-10567
Robust back-up stabilization for artificial-stability
aircraft p 899 A84-45049
Reduced stability in a modern commercial aircraft and
center of gravity control
[MBB-UT-22-82-OE] p 228 N84-14156
Weight and balance for the air mass incorporated
sunburst model C ultralight
[NASA-CR-175358] p 292 N84-18183

CENTER OF MASS

The influence of different inflow models on the coupled
flapping and torsion of helicopter rotor blades
p 303 A84-19651

CENTER OF PRESSURE

The center of pressure of pyramidal bodies — flight
vehicle design p 90 A84-13405
Position of the center of pressure on a delta wing in
nonequilibrium hypersonic air flow p 959 A84-47081

CENTERBODIES

Shear layer development in an annular jet
[AIAA PAPER 84-0400] p 168 A84-18068

CENTRAL PROCESSING UNITS

Processor monitoring and self-test in the Boeing
767/757 Flight Control Computer p 490 A84-28795

CENTRIFUGAL CASTING

Centrifugal scaling laws for ground launch cruise missile
shelter
[AD-A141572] p 793 N84-28818
Low cost thermal protection system processing
[AD-D011142] p 915 N84-32434

CENTRIFUGAL COMPRESSORS

Possibilities of raising the efficiency of the compression
process in a centrifugal compressor rotor
p 287 A84-20869

Experimental study of centrifugal impeller discharge flow
in vaneless and vanned diffusers p 505 A84-31290
On the evaluation of Reynolds number and relative
surface roughness effects on centrifugal compressor
performance based on systematic experimental
investigations p 533 A84-31291

Design and test of two 8:1 pressure ratio single stage
centrifugal compressors of different flow size
p 699 A84-38482
Static pressure recovery characteristics of some radial
vaneless diffusers p 720 A84-38484

Compressor response to periodic transients
[ONERA, TP NO. 1984-94] p 890 A84-44992

An experimental investigation of oil-buffered shaft seal
flow rates
[ASME PAPER 84-GT-9] p 1001 A84-46880

Performance characteristics of shrouded and
unshrouded impellers of a centrifugal compressor
[ASME PAPER 84-GT-48] p 1001 A84-46905

The influence of different geometries for a vanned diffuser
on the pressure distribution in a centrifugal compressor
[ASME PAPER 84-GT-68] p 952 A84-46915

Flow in the inducer of a centrifugal compressor
measured with a laser velocimeter
[ASME PAPER 84-GT-74] p 1002 A84-46919

A computer aided design method for vanned diffusers
in centrifugal compressors
[ASME PAPER 84-GT-83] p 1002 A84-46925

Prediction of stiffness and damping coefficients for
centrifugal compressor labyrinth seals
[ASME PAPER 84-GT-88] p 1002 A84-46928

Centrifugal compressor surge behaviour
[ASME PAPER 84-GT-91] p 1002 A84-46933

Flow in a centrifugal fan impeller at off-design
conditions
[ASME PAPER 84-GT-182] p 1005 A84-46983

A discussion of the factors affecting surge in centrifugal
compressors
[ASME PAPER 84-GT-194] p 1005 A84-46992

A theoretical model for rotating stall in the vaneless
diffuser of a centrifugal compressor
[ASME PAPER 84-GT-204] p 955 A84-46997

Seal oil degassing in gas turbine centrifugal
compressors

[ASME PAPER 84-GT-214] p 1005 A84-47002

Flow at the tip of a forward curved centrifugal fan
[ASME PAPER 84-GT-222] p 955 A84-47005

The effects of Reynolds number of the efficiency of
centrifugal compressor stages
[ASME PAPER 84-GT-247] p 984 A84-47024

Experience with an integrated centrifugal compressor
design procedure
[ASME PAPER 84-GT-249] p 957 A84-47025

Validation of flow coefficients measurement by laser
velocimeter in straight-through labyrinth seal models with
full size test rig results
[ASME PAPER 84-GT-280] p 1006 A84-47040

Periodic flow noise reduction using flow-excited
resonators: Theory and application — centrifugal fans
[DFVLR-FB-83-29] p 245 N84-15409

A viscous inviscid interaction procedure for two
dimensional cascades p 300 N84-18191

Flow generation in a novel centrifugal diffuser test
device
[AD-A136874] p 388 N84-19754

Prediction of critical speeds, unbalance and
nonsynchronous forced response of rotors
p 388 N84-19918

Centrifugal-reciprocating compressor
[NASA-CASE-NPO-14597-2] p 728 N84-28081

An improved method for the prediction of centrifugal
compressor rotational-tone noise
[DE84-013345] p 930 N84-32842

CENTRIFUGAL PUMPS

Determination of the angular rotor speed during the
computer-aided design of a volute pump
p 357 A84-25570

An improved method for the prediction of centrifugal
compressor rotational-tone noise
[DE84-013345] p 930 N84-32842

CENTROIDS

New centroid algorithm based upon amplitude-angle
signature — for tracking radar p 29 A84-10518

CEPSTRAL ANALYSIS

Cepstrum analysis of the vibrations of rotor machines
p 481 A84-29728

CERAMIC COATINGS

Ceramic composite liner material for gas turbine
combustors
[AIAA PAPER 84-0363] p 238 A84-18044

Phase analysis of plasma-sprayed zirconia-yttria
coatings p 308 A84-19781
Mechanical and physical properties of plasma-sprayed
stabilized zirconia p 308 A84-19786

Degradation mechanisms of ceramic thermal barrier
coatings in corrosive environments p 799 A84-42668

High performance ceramics for heat engine
applications
[ASME PAPER 84-GT-92] p 995 A84-46934

Development of strain tolerant thermal barrier coating
systems, tasks 1 - 3
[NASA-CR-168251] p 140 N84-12312

Sputter-deposited metallic and ceramic coatings for heat
engines
[DE84-011401] p 803 N84-30030

CERAMICS

Compression structured ceramic turbine rotor concept
p 58 A84-11668

The first all composite firewall as developed and
designed for the Lear Fan 2100 p 234 A84-17191

The effect of the microstructure on slow crack
propagation and the mechanical properties of hot-pressed
silicon nitride between room temperature and 1500 C —
German thesis p 308 A84-22237

Ceramic components for the AGT 100 engine
p 315 A84-22878

Ceramic application in gas turbine engines
[SAE PAPER 831520] p 451 A84-29463

Ceramic components for the AGT 100 engine
[ASME PAPER 84-GT-81] p 1002 A84-46924

Characterization of ceramic vane materials for 10KW
turboalternator
[AD-A132505] p 134 N84-13196

Advanced Gas Turbine (AGT) technology
development
[NASA-CR-168235] p 246 N84-15554

Status, needs, and opportunities for structural ceramics
in advanced heat engines
[DE84-003307] p 375 N84-18413

Ceramic coatings for heat engine materials: Status and
future needs
[DE84-003401] p 377 N84-19590

Advanced Gas Turbine (AGT) Technology Project
[NASA-CR-174629] p 729 N84-28089

Swedish research in high-temperature ceramics,
superalloys p 916 N84-33142

CERMETS

Coating with overlay metallic-cermet alloy systems
[NASA-CASE-LEW-13639-2] p 714 N84-27855

CERTIFICATION

Closing the loop with a flight test customer - Management
and follow-up techniques for vendor or customer flight
testing
[AIAA PAPER 83-2743] p 118 A84-13383

The problems of type certification p 120 A84-15410
Research towards and development of aerospace
vehicle noise certification with emphasis on propeller
aircraft and helicopters
[AIAA PAPER 84-0247] p 149 A84-17974

The liability of the United States for negligent inspection
1983 p 323 A84-20454

Environmental testing for civil certificate of composite
propellers p 358 A84-25588

Development and certification of the 757/767 autopilot
Flight director system p 455 A84-26723

Helicopter performance evaluation for certification
[MBB-UD-401-83-OE] p 525 A84-32473

The impact of automation on flight test
p 768 A84-41080

Certification problems for composite airplane
structures p 824 A84-44975

Testing the new Boeing twinjets p 871 A84-44985

A310 structural testing for certification philosophy and
application to meet current durability and damage tolerance
requirements p 872 A84-45000

Research towards and development of aerospace
vehicle noise certification with emphasis on propeller
aircraft and helicopters p 150 N84-15026

Certification experience with methods for minimum crew
demonstration p 204 N84-15101

Study of noise-certification standards for aircraft
engines. Volume 3: Selection and evaluation of
engine-noise-certification concept
[AD-A137805] p 454 N84-20583

Field evaluation of proposed ICAO annex 16 takeoff
noise certification procedure for propeller-driven airplanes
not exceeding 5700 kg p 496 N84-22378

Safety study: Airport certification and operations
[PB84-917002] p 760 N84-28761

An extended real-time microwave airplane position
system p 972 N84-34419

CESSNA AIRCRAFT

Citation III bonded structure
[AIAA PAPER 84-2244] p 637 A84-39287

CESSNA 210 AIRCRAFT

Extinguisher agent behavior in a ventilated small
aircraft
[FAA-CT-83-30] p 280 N84-18158

CH-47 HELICOPTER

Chinook's trial by ice p 588 A84-35359

A composite rotor shaft for the Chinook
p 771 A84-42278

Design on digital flight-mode control systems for
helicopters with non-linear actuators p 899 A84-44990

CHAMBERS

Diffuser/ejector system for a very high vacuum
environment
[NASA-CASE-MRS-25791-1] p 708 N84-27749

CHANNEL CAPACITY

The application of multiple speed data rate transmission
to a MIL-STD-1773 data bus structure — avionics network
control via fiber optical transmission p 441 A84-26751

CHANNEL FLOW

Numerical study of self-similar problems concerning
viscous compressible gas flow in channels
p 172 A84-19004

An approximate analytical solution of incompressible
potential flow around a circular cylinder between two
parallel flat plates p 578 A84-35023

Prediction of turbulent flows in combustor by using
Reynolds-stress closure
[AIAA PAPER 84-1494] p 620 A84-35237

Numerical design of plane and axisymmetric supersonic
nonequilibrium-flow channels for obtaining nonuniform
output characteristics p 742 A84-40799

Contouring of two-dimensional and axisymmetric
supersonic channels realizing discontinuous parameters
at the outlet and flow leveling p 753 A84-42538

Preliminary study on forward loaded cascades designed
with inverse method for low pressure turbine
[ASME PAPER 84-GT-65] p 952 A84-46912

CHANNEL NOISE

Use of forward error correction in a
ground-to-air-telemetry and control links
p 969 A84-46614

CHANNELS

Plane, rectangular, axisymmetric convergent channels
p 842 A84-45738

CHANNELS (DATA TRANSMISSION)

- A new approach to recording MIL Standard 1553B aircraft bus data p 110 A84-13388
 [AIAA PAPER 83-2792]
 An integrated voice-data communication system for VHF links p 114 A84-15835
 Implementation of broadcast messages and aperiodic data transfer techniques in a multibus based avionics system p 187 A84-16605
 Evolution of the digital avionics bus p 440 A84-26733
 Fault tolerant flight control avionics integration using MIL-STD-1553B p 456 A84-26744
 The application of multiple speed data rate transmission to a MIL-STD-1773 data bus structure --- avionics network control via fiber optical transmission p 441 A84-26751
 A new bus architecture for distributed avionics systems p 441 A84-26752
 Interfaces to telemetry systems --- for connection to digital multiplex data bus in avionics subsystems integration p 521 A84-32405
 Using the STD bus for encoder/decoder systems aboard a high-altitude balloon platform p 970 A84-46670
 The relations between the numerical control of the engine and other aircraft functions p 136 A84-12062
 Effects of integrated maintenance on the definitions of onboard equipments --- Mirage 2000 aircraft p 121 A84-12068
 General Purpose Bus Interface Unit (GPBIU) system test software design [AD-A138005] p 447 A84-21543
 Multibus Avionic Architecture Design Study (MAADS) [AD-A138226] p 448 A84-21546
 A common 1553B I/O channel for the F-16 [AD-P003546] p 883 A84-31150
 Advanced cockpit-systems integration [AD-P003569] p 880 A84-31174
 Proceedings of the 2nd AFSC (Air Force Systems Command) Avionics Standardization Conference. Volume 4: Tutorial: MIL-STD-1553 multiplex data bus [AD-A142779] p 885 A84-31202
- CHARACTER RECOGNITION**
 The effects of character stroke width on the visibility of a head-coupled display [AD-A132046] p 127 A84-13183
- CHARACTERISTICS**
 Energy efficient engine fan component detailed design report [NASA-CR-165466] p 701 A84-27737
- CHARGE DISTRIBUTION**
 Local charge distribution and development on insulating surfaces --- of fiber reinforced plastics and aluminum used for aircraft parts p 236 A84-18542
- CHARGE TRANSFER**
 CXR testing of box IEMP effects due to charge transfer --- Continuous X-Ray Internal Electromagnetic Pulse p 312 A84-20725
 A laboratory study of aircraft precipitation static charging [AD-A142561] p 933 A84-31848
- CHECKOUT**
 Advanced Ultra-Violet (UV) aircraft fire detection system. Volume 3: Ground Support Equipment (GSE) for system check-out [AD-A130298] p 28 A84-10039
 Avionics fault tree analyzer p 213 A84-15053
 Operational experience with the National Transonic Facility p 545 A84-23565
- CHEMICAL ANALYSIS**
 A gas turbine combustor test facility for fuel composition investigations [AD-A132479] p 140 A84-13201
- CHEMICAL CLEANING**
 Cleaning compound efficiency; test method for aircraft surface cleaners [AD-A138515] p 399 A84-21504
- CHEMICAL COMPOSITION**
 Effects of flame temperature and fuel composition on soot formation in gas turbine combustors p 298 A84-22747
 A statistical examination of the effect of composition on the freezing points of hydro-carbon mixtures [AD-A131000] p 77 A84-11321
 A gas turbine combustor test facility for fuel composition investigations [AD-A132479] p 140 A84-13201
 Properties of aircraft fuels and related materials [AD-A141068] p 801 A84-29019
- CHEMICAL ENGINEERING**
 Validated Engineering Data Index, 1983 - 1984 p 485 A84-21758
- CHEMICAL EQUILIBRIUM**
 Local viscous chemically nonequilibrium flows p 752 A84-42533

CHEMICAL EXPLOSIONS

- Organic azides as jet fuel additives: Synthesis of azides and micro-explosion characteristics of droplets p 801 A84-29963

CHEMICAL FUELS

- Alternative fuels use in a vehicular gas turbine p 615 A84-24741

CHEMICAL LASERS

- Multiple ducted streams with a periodic or a steady supersonic driver flow [AIAA PAPER 84-0350] p 166 A84-18042

CHEMICAL PROPERTIES

- Low temperature behavior of fuels in simulated aircraft tanks [AD-A130267] p 76 A84-10336
 Aviation-fuel property effects on combustion [NASA-CR-168334] p 310 A84-17407
 Properties of fuels employed in a gas turbine combustor program [AD-A136663] p 377 A84-19600
 Overview of zirconia with respect to gas turbine applications [NASA-TP-2286] p 473 A84-21740
 Influence of fuel chemical properties on gas turbine combustors p 538 A84-23634
 Fuel property effects on USAF gas turbine engine combustors and afterburners p 539 A84-23635
 Fuel property effects on USN gas turbine combustors p 539 A84-23636
 Properties of aircraft fuels and related materials [AD-A141068] p 801 A84-29019
 Aviation fuels, 1983 [DE84-011823] p 803 A84-30106

CHEMICAL REACTIONS

- Chemical mechanisms and reaction rates for the initiation of hot corrosion of IN-738 [NASA-TP-2319] p 799 A84-28958

CHEMICAL REACTORS

- Turbulent combustion zone in a tubular reactor p 471 A84-28393
 A study of the fundamental problems of combustion in the combustion chambers of turbojets using a tubular reactor p 616 A84-24759

CHIPS (ELECTRONICS)

- The role of materials and processes in high density electronic packaging p 918 A84-42757
 Kevlar epoxy substrate for interconnecting leadless chip carrier p 912 A84-42776
 MIL-STD-1553B Marconi LSI chip set in a remote terminal application [AD-P003538] p 924 A84-31142
 Third generation MIL-STD-1553B LSI chip set [AD-P003542] p 924 A84-31146
 MIL-STD-1750A microprocessor chip set development [AD-P003548] p 936 A84-31152

CHROMATOGRAPHY

- Carbon-13 and proton nuclear magnetic resonance analysis of shale-derived refinery products and jet fuels and of experimental referee broadened-specification jet fuels [NASA-CR-174761] p 916 A84-32552

CHROMIC ACID

- Evaluation of a primary anticorrosion surface treatment for adhesively bonded aluminum structure p 234 A84-17180

CHROMIUM

- Substitution and conservation technology for chromium p 997 A84-33473

CHROMIUM ALLOYS

- Behavior of Ni-Cr-Si coating alloys in Na₂SO₄, V₂O₅ and mixed salt hot corrosion [DE84-012386] p 915 A84-31363

CHROMIUM STEELS

- Problems of failure analysis, taking into account the example of a destroyed axial-flow compressor p 722 A84-39498

CIRCUIT BOARDS

- The role of materials and processes in high density electronic packaging p 916 A84-42757
 Kevlar epoxy substrate for interconnecting leadless chip carrier p 912 A84-42776
 Advanced application of the printed circuit board testability design and rating system [AD-A141147] p 728 A84-27989

CIRCUIT DIAGRAMS

- RF front end interface and AGC modification p 43 A84-11102

CIRCUIT PROTECTION

- Transistor devices for switching and shielding in dc aircraft circuits p 142 A84-15768
 Studies of lightning-attachment testing using aircraft models p 198 A84-18532
 Mushrooming vulnerability to EMP p 917 A84-44046

- Laboratory evaluation of lightning induced transients in aircraft electrical wiring [ONERA, TP NO. 1984-51] p 874 A84-45192

CIRCUITS

- Circuits and devices in aircraft electrical equipment systems --- Russian book p 554 A84-30850

CIRCULAR CONES

- Stability of shock waves attached to wedges and cones p 90 A84-13565
 Hypersonic similarity in the flow past a combination of a circular cone and delta wing p 580 A84-35742
 Optimization of waverider configurations generated from non-axisymmetric flows past a nearly circular cone p 176 A84-15108
 Supersonic flows around a circular cone with or without blowing on the surface [AD-A143258] p 851 A84-32362

CIRCULAR CYLINDERS

- Flow past a rotating and a stationary circular cylinder near a plane screen. I - Aerodynamic forces on the cylinder p 154 A84-17707
 Flow and heat transfer around a heated circular cylinder in a rarefied gas p 554 A84-31119
 Buffeting of a slender circular beam in axial turbulent flows p 558 A84-32617
 On vortex shedding from circular cylinder with step p 509 A84-32756
 Aerodynamics of pointed forebodies at high angles of attack p 574 A84-34461
 An approximate analytical solution of incompressible potential flow around a circular cylinder between two parallel flat plates p 576 A84-35023
 Computation of compressible flow around a circular cylinder [AIAA PAPER 84-1631] p 651 A84-38020
 Flow past rotating and stationary circular cylinders near a plane screen. II - Characteristics of flow past a stationary cylinder p 721 A84-38674
 Flat spin of circular cylinders induced by artificial roughness p 749 A84-42248
 Active control of asymmetric vortex effects in circular cylinder [AIAA PAPER 84-2101] p 751 A84-42351
 Thermofluiddynamic experiments with a heated and rotating circular cylinder in crossflow p 922 A84-46320

- Stability of a pair of stationary vortices in the leeward side of a cylinder in a potential flowfield [AD-A131917] p 98 A84-12095

- Heat transfer distributions around nominal ice accretion shapes formed on a cylinder in the NASA Lewis icing research tunnel [NASA-TM-83557] p 243 A84-14483

- Effect of a rotor wake on heat transfer from a circular cylinder [NASA-TM-83613] p 485 A84-21832

- Aeroacoustic noise measurements in wind tunnel p 567 A84-23584

- Water-tunnel study of transition flow around circular cylinders [NASA-TM-85879] p 516 A84-23606

- Investigation of the effects of pressure gradient, temperature and wall temperature ratio on the stagnation point heat transfer for circular cylinders and gas turbine vanes [NASA-CR-174667] p 539 A84-23649

- First stage of equipment for aircraft Do 28 of DFVLR as a research aircraft for icing and first research results [DFVLR-FB-83-40] p 596 A84-24571

- Mathematical modeling of transient separation flow around circular cylinder p 724 A84-26916

- A review of some Reynolds number effects related to bodies at high angles of attack [NASA-CR-3809] p 848 A84-31097

CIRCULAR PLATES

- Vibration and flutter of mistuned bladed-disk assemblies [NASA-TM-83634] p 563 A84-23923

CIRCULAR POLARIZATION

- Double-polarisation radar measurements p 856 A84-43742

CIRCULAR SHELLS

- Aeroelastic optimization of axisymmetric circular cylindrical shells for supersonic flow p 619 A84-34722

CIRCULAR TUBES

- Propagation and radiation of sound from flanged circular ducts with circumferentially varying wall admittances. I Semi-infinite ducts. II - Finite ducts with sources p 631 A84-34746

- Turbulent heat transport in circular ducts with circumferentially varying heat flux p 622 A84-36151

CIRCULATION

- Numerical predictions of residence times behind a rearward-facing step with transverse injection p 512 A84-22687

CIRCULATION CONTROL AIRFOILS

- NOTAR - NO TAIL Rotor (circulation control tail boom)
p 191 A84-15995
- Circulation controlled STOL wing optimization
p 268 A84-22173

p 967 N84-34426

CLASSIFICATIONS

- Classification of fuels and lubricating materials for aviation equipment p 548 A84-31123
- Determination of the Pavement Classification Number (PCN) of airfields [ISBN-3-67977-0530] p 74 N84-11185

CLAYS

- Determination of boundary layer transition and separation on double circular arc compressor blades in a large subsonic cascade [AD-A137550] p 484 N84-20786
- The performance of civil airport pavement with lime-cement-flyash base course [FAA-PM-84-10] p 792 N84-28815

CLEAR AIR TURBULENCE

- Detection of hazardous meteorological and clear-air phenomena with an air traffic control radar p 33 A84-10806
- The analysis and prediction of clear air turbulence at Western Airlines [AIAA PAPER 84-0269] p 248 A84-17988
- Identification of vortex-induced clear-air turbulence using airline flight records [AIAA PAPER 84-0270] p 248 A84-17989
- Performance of a quantitative jet stream turbulence forecasting technique - The Specific CAT Risk (SCATR) index [AIAA PAPER 84-0271] p 248 A84-17990
- Clear air turbulence avoidance using an airborne microwave radiometer [AIAA PAPER 84-0273] p 210 A84-17991
- Modeling clear-air turbulence with vortices using parameter-identification techniques [AIAA PAPER 84-2083] p 806 A84-42338
- Aircraft hazard assessment from a clear-air radar and meteorological tower study of gravity wave events - effect on airspeed [PB83-257139] p 249 N84-14650

CLEARANCES

- A study of the prediction of tip and seal clearances and their effects in gas turbine transients [ASME PAPER 84-GT-245] p 984 A84-47022
- Oxidizing seal for a turbine tip gas path [NASA-CASE-LEW-14053-1] p 535 N84-22563
- Blade endwall flows in an axial flow compressor stage p 893 N84-31209
- Aircraft tests in the clearance program for the use of a combat aircraft from a runway after damage repair p 977 N84-34404

CLIMATE

- Climatic publications [AD-A136021] p 390 N84-18816

CLIMATOLOGY

- Climatology of ozone at altitudes from 19,000 to 59,000 feet based on combined GASP and ozonesonde data [NASA-TP-2303] p 933 N84-31865

CLIMBING FLIGHT

- Beyond V1 - The dangers of high speed aborted take-offs p 278 A84-20081
- Rate of climb for light propeller powered airplanes p 429 A84-26960
- Climb speed and rating optimisation p 874 A84-45045
- Energy state revisited p 291 N84-16118
- Lecture notes on the principles and practice of airplane performance prediction. Part 2: Point-performance in steady symmetric and unsymmetric flight [VTH-LR-385-VOL-2] p 353 N84-19346

CLOSED CYCLES

- Heat-powered environmental control systems for fighter aircraft [SAE PAPER 831104] p 430 A84-29039

CLOSURE LAW

- A new turbulence closure model for boundary layer flows with strong adverse pressure gradients and separation [AIAA PAPER 84-0175] p 313 A84-21854
- Theoretical analysis of aircraft afterbody flow [AIAA PAPER 84-1524] p 743 A84-40814

CLOUD COVER

- Cloud particle effects on laminar flow and instrumentation for their measurement aboard a NASA LFC aircraft [AIAA PAPER 83-2734] p 56 A84-12327

CLOUD GLACIATION

- The effect of the atmospheric droplet size distribution on aircraft ice accretion [AIAA PAPER 84-0108] p 181 A84-17886
- Ice formation in aircraft p 179 N84-15130

CLOUD PHYSICS

- A new characterization of supercooled cloud design criteria for aircraft ice protection systems below 10,000 feet AGL [AIAA PAPER 84-0182] p 247 A84-17935
- Status for knowledge: Meteorological affected icing on aircraft in clouds [DFVLR-MITT-83-12] p 319 N84-17763

Preliminary study for the modeling of an artificial icing cloud

COMBINED CYCLE POWER GENERATION

Turbomachines and MHD generators of gas-turbine and combined power plants — Russian book
p 477 N84-28670

COMBINED STRESS

Frequency determination techniques for cantilevered plates with bending-torsion coupling
p 378 N84-23368

COMBUSTIBLE FLOW

Numerical solution of combustor flowfields - A simple approach
p 58 N84-11866

Design of a reverse-flow combustion chamber for small gas turbines
[ONERA, TP NO. 1983-129] p 128 N84-15074

Multidimensional turbulent combustion - Analysis, applications and limitations
[AIAA PAPER 84-0477] p 296 N84-19891

Numerical calculations of pressure oscillations in a side-dump ramjet engine
[AIAA PAPER 84-0365] p 297 N84-21297

Velocity characteristics in the turbulent near wakes of confined axisymmetric bluff bodies
p 403 N84-26883

Turbulent combustion zone in a tubular reactor
p 471 N84-28393

Dynamic effects of combustion
p 472 N84-29128

Time-resolved density measurements in premixed turbulent flames
p 548 N84-32612

The supersonic flow around a conic nozzle
p 574 N84-34347

Swirl flows — Book
p 717 N84-37298

COMBUSTION

Combustion jet ignition
p 133 N84-12188

AGARD highlights
[AGARD-HIGHLIGHTS-83/1] p 399 N84-21493

Assessment of Alternative Aircraft Fuels
[NASA-CP-2307] p 538 N84-23630

NASA broad-specification fuels combustion technology program
p 551 N84-23637

NASA/General Electric broad-specification fuels combustion technology program
p 551 N84-23638

Analytical fuel property effects: Small combustors
p 539 N84-23639

Gasdynamic study of model with combustion in shock tunnel
p 907 N84-32061

An experimental investigation of gas jets in confined swirling air flow
[NASA-CR-3832] p 988 N84-33412

A theoretical model for the cross spectra between pressure and temperature downstream of a combustor
[NASA-TM-83671] p 1016 N84-34231

COMBUSTION CHAMBERS

Combustor development for automotive gas turbines
p 78 N84-10499

Numerical solution of combustor flowfields - A simple approach
p 58 N84-11866

Design of a reverse-flow combustion chamber for small gas turbines
[ONERA, TP NO. 1983-129] p 128 N84-15074

Ceramic composite liner material for gas turbine combustors
[AIAA PAPER 84-0363] p 236 N84-18044

Lateral jet injection into typical combustor flowfields
[AIAA PAPER 84-0374] p 242 N84-19251

Multidimensional turbulent combustion - Analysis, applications and limitations
[AIAA PAPER 84-0477] p 296 N84-19891

Synthetic fuel character effects on a rich-lean gas turbine combustor
p 309 N84-22594

A study of fuel evaporation in the precombustion chamber
p 357 N84-25564

Determination of the dependence of soot formation in a premixed fuel-air combustion chamber on the combustion process variables
p 358 N84-25573

An INCOLOY alloy MA 956 combustor component for a Westinghouse Canada Inc. industrial gas turbine
p 476 N84-28327

Preliminary correlation of fuel effects on ignitability for gas turbine engines
[ASME PAPER 83-JPGC-GT-8] p 450 N84-28981

NASA advanced low emissions combustor program
[ASME PAPER 83-JPGC-GT-10] p 450 N84-28982

Ramjet rumble - The low-frequency instability mechanism in coaxial dump combustors
p 453 N84-29791

Calculation of wall temperatures of afterburners with convective and film cooling
p 533 N84-31778

Demonstration of a new body-fitted coordinate code for modeling gas-turbine combustor flows
[AIAA PAPER 84-1381] p 603 N84-35199

Prediction of turbulent flows in combustor by using Reynolds-stress closure
[AIAA PAPER 84-1494] p 620 N84-35237

Preliminary investigation of a two-zone swirl flow combustor
[AIAA PAPER 84-1169] p 695 N84-36951

Experimental investigation of the low NO_x vortex airblast annular combustor
[AIAA PAPER 84-1170] p 695 N84-36952

Design and performance evaluation of a two-position variable geometry turbofan combustor
[AIAA PAPER 84-1171] p 695 N84-36953

Internal flow field calculations for annular combustion configurations
[AIAA PAPER 84-1168] p 697 N84-37627

A review of internal combustion engine combustion chamber process studies at NASA Lewis Research Center
[AIAA PAPER 84-1316] p 804 N84-40242

The influence of blade wakes on the performance of combustor shortened prediffusers
p 889 N84-44505

An experimental study of the thermal state of the walls of a combustion chamber with flame tubes under service conditions
p 921 N84-45822

Combined film-and convection-cooling in a gas turbine combustor
p 892 N84-46411

Combustor performance with alternative fuels
p 892 N84-46412

Shear layer mixing for low emission gas turbine primary zones
[ASME PAPER 84-GT-13] p 980 N84-46883

A new gas turbine combustor alloy
[ASME PAPER 84-GT-70] p 995 N84-46917

Fuel effects on gas turbine combustion - Ignition, stability, and combustion efficiency
[ASME PAPER 84-GT-87] p 981 N84-46929

Some practical aspects of staged premixed, low emissions combustion
[ASME PAPER 84-GT-88] p 981 N84-46930

NO_x abatement via water injection in aircraft-derivative turbine engines
[ASME PAPER 84-GT-103] p 981 N84-46941

A design approach for a practical turbojet engine combustor diffuser system
[ASME PAPER 84-GT-104] p 981 N84-46942

The effect of fuel composition on hot section performance of a gas turbine engine
[ASME PAPER 84-GT-105] p 982 N84-46943

Full load operation of a gas turbine combustor with acoustically controlled dilution-air mixing
[ASME PAPER 84-GT-106] p 982 N84-46944

The effect of oxygen concentration on ignition of fuel spray in low pressure air flow
[ASME PAPER 84-GT-147] p 982 N84-46958

Experiments in dilution jet mixing
p 1007 N84-48140

Flame radiation in gas turbine combustion chambers
p 996 N84-49444

Linear theory of pressure oscillations in liquid fueled Ramjet engines
[AD-A130882] p 60 N84-10071

Analytical design of a liquid hydrogen fueled turbofan-ramjet engine for flight Mach numbers zero to five
p 133 N84-12187

A theoretical and experimental study of turbulent particle-laden jets
[NASA-CR-168293] p 133 N84-13187

Flame radiation and liner heat transfer in a tubular-can combustor
[NASA-TM-83538] p 133 N84-13188

A gas turbine combustor test facility for fuel composition investigations
[AD-A132479] p 140 N84-13201

An experimental investigation of soot behavior in a gas turbine combustor
[AD-A132210] p 140 N84-13202

A review of NASA combustor and turbine heat transfer research
[NASA-TM-83541] p 218 N84-14146

Turbulent mixing and combustion of multi-phase reacting flows in ramjet and ducted rocket environment
[AD-A133802] p 219 N84-14152

Clean catalytic combustor program
[NASA-CR-168323] p 220 N84-15151

Aerothermal modeling. Executive summary
[NASA-CR-168330] p 220 N84-15152

Aerothermal modeling, phase 1. Volume 1: Model assessment
[NASA-CR-168296-VOL-1] p 220 N84-15155

Effects of broadened property fuels on radiant heat flux to gas turbine combustor liners
[NASA-TM-83537] p 315 N84-16494

Dynamic gas temperature measurement system, volume 1
[NASA-CR-168267-VOL-1] p 316 N84-16529

Properties of fuels employed in a gas turbine combustor program
[AD-A136663] p 377 N84-19600

Error reduction program: A progress report
p 454 N84-20536

Numerical modeling of turbulent flow
p 482 N84-20538

Liner environment effects study
p 454 N84-20556

Fuel effects on gas turbine engine combustion
[AD-A138385] p 474 N84-21753

Preliminary investigation of a two-zone swirl flow combustor
[NASA-TM-83637] p 535 N84-22565

Experimental investigation of the low NO_x vortex airblast annular combustor
[NASA-TM-83615] p 536 N84-22567

The design and development of a low emissions Transply combustor for the civil Spey engine
[PNR-90198] p 537 N84-22582

La Recherche Aérospatiale, Bimonthly bulletin, number 1983-4, 215/July-August
[ESA-TT-823] p 545 N84-22589

Particle sizing in a fuel rich airbreathing engine combustor
p 547 N84-22634

Influence of fuel chemical properties on gas turbine combustors
p 538 N84-23634

Fuel property effects on USN gas turbine combustors
p 539 N84-23638

Analytical fuel property effects: Small combustors
p 539 N84-23639

The NASA broad specification fuels combustion technology program at Pratt and Whitney
p 551 N84-23640

Combustor liner construction
[NASA-CASE-LEW-14035-1] p 605 N84-24577

Combustor technology for broadened-properties fuels
p 615 N84-24736

Fuel effects on gas turbine combustion systems
p 615 N84-24737

Fuel character effects on performance of small gas turbine combustion systems
p 607 N84-24738

Alternative fuels use in a vehicular gas turbine
p 615 N84-24741

Detailed fuel spray analysis techniques
p 622 N84-24747

The design and development of a low emissions transply combustor for the civil Spey engine

COMMUNICATION
Network communications for a distributed avionics system
p 213 N84-15052

Integrated CNI (Communication Navigation and Identification) avionics and future standardization
[AD-P003580] p 885 N84-31185

Modernization of the US national airspace system. Foundation for the future
[AD-A144332] p 972 N84-34435

COMMUNICATION CABLES
Cable radar for intruder detection p 34 A84-10826

COMMUNICATION EQUIPMENT
The full scale development of US Navy DTDMA JTIDS integrated communication - Navigation-identification terminals - Distributed Time Division Multiple Access Joint Tactical Information Distribution System
p 39 A84-12441

CONTRAN-UNIT - The elimination of conflicting and unintentional transmissions
p 426 A84-28260

Ground-based air traffic control communication equipment
p 520 A84-32328

Integration of ICNIA into advanced high performance fighter aircraft
p 214 N84-15059

COMMUNICATION NETWORKS
Using MT-DARC and FAA radars for mission management at the AFFTC - Mosaic and Tracking Direct Access Radar Channel
[AIAA PAPER 83-2781] p 38 A84-12361

National airspace data interchange network (NADIN)
p 141 A84-13329

Distributed estimation in the MIT/LL DSN testbed - Distributed Sensor Networks
p 345 A84-25462

Operational characteristics of the dispersed sensor processor mesh - for avionics
p 440 A84-26737

Design of an adaptive high-frequency data link
p 971 A84-49285

Specialized common carriers: Long distance alternatives for military installations
[AD-A140596] p 725 N84-26967

Study of the FAA (Federal Aviation Administration) program to modernize maintenance operations
[AD-A142295] p 741 N84-29848

COMMUNITIES
The fallacy of using NII in analyzing aircraft operations - Noise Impact Index
p 280 A84-22176

Community reaction to impulsive noise: A 10-year research summary
[AD-A141762] p 812 N84-29369

COMPARISON
Comparison between measured turbine stage performance and the predicted performance using quasi-3D flow and boundary layer analyses
[AIAA PAPER 84-1299] p 696 A84-36972

Application of an optimization method to high performance propeller designs
[AIAA PAPER 84-1203] p 888 A84-44181

Comparison between measured turbine stage performance and the predicted performance using quasi-3D flow and boundary layer analyses
[NASA-TM-83640] p 535 N84-22564

A comparison of measured take-off and flyover sound levels for several general aviation propeller-driven aircraft
[AD-A139901] p 631 N84-25429

Application of an optimization method to high performance propeller designs
[NASA-TM-83710] p 572 N84-25607

COMPATIBILITY
Improved acrylic systems for rapid runway repair
[AD-A130389] p 73 N84-10103

Airport noise and land use compatibility at downstate Illinois airports
[PB84-177377] p 708 N84-26716

Aircraft multiplexing system architecture and stores compatibility
[AD-P003530] p 883 N84-31134

COMPENSATORS
Active flutter control using discrete optimal constrained dynamic compensators
p 361 A84-25528

Practical aspects of digital implementation of control laws
p 67 N84-10101

Apparatus for and method of compensating dynamic unbalance
[NASA-CASE-GSC-12550-1] p 729 N84-28082

COMPENSATORY TRACKING
Toward a unifying theory for aircraft handling qualities
[AIAA PAPER 84-0236] p 197 A84-17966

Multivariable control laws for the AFTI/F-16
[AIAA PAPER 84-0237] p 227 A84-19246

VTOL aircraft control output tracking sensitivity design
p 541 A84-32291

Redundant color coding on airborne CRT displays
p 599 A84-35899

Effects of time delays on systems subject to manual control
p 900 A84-45580

COMPETITION
Competitive assessment of the U.S. Civil aircraft industry
[PB84-154913] p 632 N84-25525

COMPIERS
The use of high order languages in digital flight control systems
p 469 A84-26725

COMPLEX SYSTEMS
Aerospace engineering design by systematic decomposition and multilevel optimization
p 872 A84-45020

COMPONENT RELIABILITY
How Lockheed cut avionics failures
p 36 A84-10890

Reliability analysis for paired main wing components
p 347 A84-23905

Reliability with imperfect diagnostics - flight-maintenance sequence
p 474 A84-26765

An advanced maintenance recorder
p 531 A84-31309

Fatigue reliability of gas turbine engine components under scheduled inspection maintenance
[AIAA PAPER 84-0850] p 533 A84-31670

Fracture toughness acceptance testing of aluminum alloys for aircraft applications
p 711 A84-39212

Manufacturing procedures and their relation to failures in landing gear components
p 304 A84-40804

Application and integration of design allowances to meet structural-life requirements
p 873 A84-45028

First level integrated maintenance in weapons systems
p 202 N84-15054

Sortie duration and helicopter component failures (an empirical study)
[AD-A134745] p 260 N84-17122

Engine cyclic durability by analysis and material testing
[NASA-TM-83577] p 385 N84-18683

Flight service evaluation of composite components on the Bell helicopter model 206L, flight service report
[NASA-CR-172296] p 376 N84-19479

Engineering and technical services to improve reliability and maintainability of instrument landing system components
[DOT/FAA/PM-84/77] p 427 N84-20503

Safety recommendations A-84-8 and -9, and A-84-17 through -20
p 589 N84-25675

Safety recommendations A-84-14 and -15
p 589 N84-25678

Advanced Gas Turbine (AGT)
[NASA-CR-174694] p 821 N84-29805

COMPOSITE MATERIALS
Composites/computer combo spawns jumbo fuel sponsons
p 46 A84-10889

Experiences in the use of composite material for a wing skin
p 46 A84-11040

757 lightning protection
p 194 A84-16541

Repair of post-buckled advanced composite fuselage structure
p 148 A84-17119

Moisture transport in composites during repair work
p 233 A84-17121

ACAP - A giant step towards low cost composite aircraft - Advanced Composite Airframe Program
p 195 A84-17205

Environmental and high strain rate effects on composites for engine applications
p 236 A84-17444

Ceramic composite liner material for gas turbine combustors
[AIAA PAPER 84-0363] p 236 A84-18044

Companies expanding composite uses - for U.S. Army's light rotorcraft (LHX) and Joint Services Advanced Vertical Lift Aircraft (JVX)
p 289 A84-20141

Frequency determination techniques for cantilevered plates with bending-torsion coupling
p 378 A84-23368

Environmental testing for civil certificate of composite propellers
p 358 A84-25598

ACAP - Dawn of a new era
p 350 A84-26319

Thermography - Applications to the manufacture and nondestructive characterization of composites
p 477 A84-28639

New fireworthy composites for use in transportation vehicles
p 472 A84-28873

Supersonic radomes in composite materials
p 550 A84-32980

The mechanised laying of composite materials into curved mould tools - for helicopter rotors
p 558 A84-32997

Noise transmission characteristics of advanced composite structural materials
p 735 A84-37938

Flight service of composite structure on McDonnell Douglas commercial airplanes
p 683 A84-39030

Composite materials response under low-velocity impact
p 797 A84-40374

Flight service experience with composite helicopter components
p 863 A84-42747

Service experience with composites on Boeing commercial aircraft
p 864 A84-42751

Ballistic testing of composite materials
p 913 A84-43893

Lightning and composite materials
p 852 A84-44950

Some trends in airship technology developments
[AGARD-R-717] p 86 N84-12050

Estimating the cost of composite material airframes using the Rand Corporation Development and Procurement Costs of Aircraft parametric model (DAPCA III)
[AD-A134993] p 259 N84-17120

Composite structural materials
[NASA-CR-173259] p 310 N84-17293

POSTOP: Postbuckled open-stiffener optimum panels, user's manual
[NASA-CR-172260] p 384 N84-18682

Applications of composite materials in helicopter construction
[AD-A136678] p 352 N84-19336

Structural composites technology working group report IDA/OSD R and M (Institute for Defense Analyses/Office of the Secretary of Defense Reliability and Maintainability) study
[AD-A137331] p 387 N84-19829

Flywheel rotor and containment technology development
[DE84-005742] p 484 N84-20864

AGARD bulletin: Meetings, publications, membership
[AGARD-BUL-84/1] p 569 N84-24527

Nondestructive testing of composite structures
[SNIAS-832-210-108] p 627 N84-26045

A principal rotor without joints and pillows, made of fiber materials, for dynamic systems of future helicopters
[MBB-UD-384-83-O] p 628 N84-26440

Interlaminar fracture of composites
[NASA-TM-85768] p 714 N84-27835

Hygrothermal effects in continuous fibre reinforced composites. Part 1: Thermal and moisture diffusion in composite materials
[AD-A128228] p 714 N84-27837

Report of an overseas visit to the USA, part 2
[AD-A142054] p 740 N84-28729

ACEE Composite Structures Technology: Review of selected NASA research on composite materials and structures
[NASA-CP-2321] p 801 N84-29969

Worldwide flight and ground-based exposure of composite materials
p 802 N84-29971

Comparison of toughened composite laminates using NASA standard damage tolerance tests
p 802 N84-29972

Impact dynamics research on composite transport structures
p 802 N84-29975

Studies of noise transmission in advanced composite material structures
p 802 N84-29977

Electropositive bivalent metallic ion unsaturated polyester complexed polymer concrete
[DE84-011080] p 802 N84-29979

Modern structure materials: Present situation and evolution perspectives - aircraft construction materials
[SNIAS-841-551-103] p 879 N84-31118

Flight service evaluation of Kevlar-49 epoxy composite panels in wide-bodied commercial transport aircraft
[NASA-CR-172344] p 914 N84-31287

Graduate engineering research participation in aeronautics
[NASA-CR-173849] p 944 N84-32220

Temperature and heat-flux distributions in a strip-heated composite slab
[DE84-006016] p 998 N84-33529

COMPOSITE STRUCTURES
Manufacture of a composite main rotor blade
p 118 A84-13808

Repair investigation for bismaleimide structure
p 147 A84-17118

Manufacture of the Army/Bell advanced composite helicopter airframe
p 148 A84-17149

Development of an advanced composites forward fuselage for a fighter aircraft
p 195 A84-17207

Generic approach to determine optimum aeroelastic characteristics for composite forward-swept-wing aircraft
p 239 A84-17442

Northrop's lightning laboratory and test techniques on composites and radomes for an advanced fighter aircraft p 198 A84-18529

Design testing of composite main rotor blades for lightning protection p 198 A84-18530

Design and development of the Sea King composite main rotor blade p 286 A84-19636

Composite part production techniques reviewed p 379 A84-23901

Near real-time automated inspection and evaluation system (AIES) — of graphite structures in aircraft p 477 A84-28501

A unified flutter analysis for composite aircraft wings [AIAA PAPER 84-0908] p 556 A84-31692

Composites or metals (Tomorrow's aircraft - black or silver) p 550 A84-32977

Survey of quality results obtained in serial production of aerospace composite structures p 558 A84-32993

Composite propeller blades for commuter aircraft p 534 A84-32995

Optimization of large composite structures with strength and local stability restrictions p 621 A84-35535

Use of composite materials for fabricating the anisotropic structure of a swept-forward wing required by aeroelasticity and strength considerations p 621 A84-35537

Survey lecture and special experiences in FRG — carbon fiber composite structures for aerospace application [MBB-UD-410-83-OE] p 614 A84-35920

Autoclave - Curing of extremely thin HM CFC-skins — for fabrication of fiber composite aerospace structures [MBB-UD-409-83-OE] p 622 A84-35921

Wind tunnel test of a soft/stiff inplane bearingless rotor p 677 A84-36524

Improved high temperature resistant matrix resins [NASA-CR-168210] p 800 N84-28995

Fatigue and Fracture Branch: A compendium of recently completed and on-going research projects [NASA-TM-85825] p 811 N84-30331

Composite structure repair [AD-A141456] p 914 N84-31300

Design of a composite wing extension for a general aviation aircraft [NASA-CR-173832] p 880 N84-32377

COMPOSITION (PROPERTY)

Status of understanding for seal materials p 624 N84-25062

COMPRESSED AIR

A quasi-continuous transonic wind tunnel for cryogenic operation [ROLLAB-MEMO-RM-096] p 232 N84-15161

The start-up of a gas turbine engine using compressed air tangentially fed onto the blades of the basic turbine [NASA-TM-77021] p 316 N84-16563

COMPRESSIBILITY

On the method of pseudo compressibility for numerically solving incompressible flows [AIAA PAPER 84-0252] p 262 A84-19889

Computer programs for helicopter high speed flight analysis [AD-A136376] p 350 N84-18191

COMPRESSIBILITY EFFECTS

The effect of gas compressibility on the characteristics of flow in the vicinity of the separation point of a laminar boundary layer p 841 A84-45738

Laser velocimetry study of compressibility effects on the flow field of a delta wing p 100 N84-12108

The compressible aerodynamics of rotating blades based on an acoustic formulation [NASA-TP-2197] p 144 N84-13923

COMPRESSIBLE BOUNDARY LAYER

The effect of a short region of concave curvature on a supersonic turbulent boundary layer [AIAA PAPER 84-0169] p 161 A84-17927

On the breakdown of the Crocco temperature-velocity relationship and the law of the wall in compressible two-dimensional turbulent boundary layers p 170 A84-18351

Calculations of viscous transonic flow over airfoils p 266 A84-21506

Instability of compressible boundary layers along curved walls with suction or cooling p 266 A84-21507

The method of successive approximations in calculating the interaction of a supersonic gas flow with a laminar boundary layer in the presence of a separation zone p 507 A84-32158

Theory of similarity and the profile of the mean density distribution of hypersonic boundary layer p 645 A84-37906

Hybrid approach to steady transonic normal-shock compressible laminar boundary-layer interactions over airfoils [AIAA PAPER 84-1561] p 648 A84-37973

A procedure for solving the compressible interacting boundary-layer equations for subsonic and supersonic flows [AIAA PAPER 84-1614] p 650 A84-38008

Goertler instability of compressible boundary layers p 962 A84-48127

COSAL: A black-box compressible stability analysis code for transition prediction in three-dimensional boundary layers [NASA-CR-165925] p 728 N84-28002

COMPRESSIBLE FLOW

Time-split finite element method for compressible aerofoil trailing-edge flows p 89 A84-13281

Investigation of supersonic separated flow in a compression corner by laser Doppler anemometry p 94 A84-15080

Supersonic compressive ramp without laminar boundary-layer separation p 153 A84-17429

Rule of forbidden signals in a two-dimensional supersonic compressor cascade p 154 A84-17455

Computational analysis of the flow field in an engine test cell [AIAA PAPER 84-0285] p 217 A84-17999

Supersonic viscous compressible gas flow past conically blunted cylinders at low Reynolds numbers p 171 A84-19002

Numerical study of self-similar problems concerning viscous compressible gas flow in channels p 172 A84-19004

Comparison of experimental and computational compressible flow in a S-duct [AIAA PAPER 84-0033] p 172 A84-19228

Blade-to-blade calculation by finite element - Comparison of various approaches p 333 A84-25870

Extension of boundary elements to lifting compressible aerodynamics p 333 A84-25883

Vortex motion in axisymmetric piston-cylinder configurations p 474 A84-27137

Computation of inviscid transonic internal flow p 578 A84-35317

Euler solutions as limit of infinite Reynolds number for separation flows and flows with vortices p 579 A84-35344

Numerical solution of the Euler equation for a compressible flow problem p 579 A84-35354

A new and improved computational technique for two-dimensional, unsteady, compressible flows p 639 A84-36484

The connected problem of flexible wing oscillations in a compressible flow p 641 A84-37070

Numerical simulation of compressible, viscous flow using an implicit, bi-diagonal method p 718 A84-37702

Compressible potential flows in arbitrary two-dimensional and axially symmetric slender nozzles p 645 A84-37905

Compressibility correction for flow about wing surfaces p 645 A84-37926

A computational study of complex three-dimensional compressible turbulent flow fields [AIAA PAPER 84-1556] p 648 A84-37970

Computation of compressible flow around a circular cylinder [AIAA PAPER 84-1631] p 651 A84-38020

Efficient methods for predicting compressible inviscid flows [AIAA PAPER 84-1648] p 719 A84-38034

Turbulence measurements in a compressible reattaching shear layer p 656 A84-38830

The Baldwin-Lomax turbulence model for two-dimensional shock-wave/boundary-layer interactions p 656 A84-38834

A real-time interferometer technique for compressible flow research [AIAA PAPER 84-1600] p 722 A84-39309

A hybrid explicit-implicit numerical algorithm for the three-dimensional compressible Navier-Stokes equations p 743 A84-40831

Second-order accurate boundary conditions for compressible flows p 830 A84-44630

Investigation of the particle transport in compressible vortices produced by shock diffraction p 831 A84-44936

Propellers in compressible flow p 834 A84-45005

A sub-domain approach for the computation of compressible inviscid flows [ONERA, TP NO. 1984-61] p 919 A84-45202

Separated flow of a compressible gas past a finite-aspect-ratio wing with a strake p 841 A84-45732

Calculation of trailing vortex sheet and downwash field behind a sweptback wing p 842 A84-46007

A finite element computer code to calculate full 3-D compressible potential flow in turbomachinery [ASME PAPER 84-GT-238] p 956 A84-47016

Rotordynamic forces developed by labyrinth seals [AD-A136217] p 384 N84-18599

The compressible aerodynamics of rotating blades using an acoustic formulation p 587 N84-25670

Transonic panel method for the full potential equation applied to multi-component airfoils [NLR-MP-83030-U] p 663 N84-26674

Immersion of disk in compressible fluid at angle to free surface p 724 N84-26930

Three-dimensional turbulent boundary layers at bielliptical bodies in stream of compressible gas at some angle of attack p 725 N84-26936

Solution of 3-dimensional time-dependent viscous flows. Part 2: Development of the computer code [NASA-CR-166565-PT-2] p 726 N84-27002

Solution of 3-dimensional time-dependent viscous flows. Part 1: Investigation of candidate algorithms [NASA-CR-166565-PT-1] p 733 N84-27503

SUBJECT INDEX

A source-equality Kutta condition for panel methods
p 744 A84-40846

Transonic aerodynamic computations for a canard configuration
[AIAA PAPER 84-2158] p 745 A84-41333

Evaluation of a velocity-split solution of the Navier-Stokes equations for fighter forebodies
[AIAA PAPER 84-2160] p 745 A84-41334

Assessment of preliminary prediction techniques for wing leading-edge vortex flows at supersonic speeds
[AIAA PAPER 84-2208] p 747 A84-41353

A study of axial turbine loss models in a streamline curvature computing scheme p 748 A84-41633

An approximate solution of aircraft lateral-directional limit cycle oscillation induced by aerodynamic hysteresis
p 785 A84-41777

Modeling of the aerodynamic response to arbitrary aircraft maneuvers - A numerical validation
[AIAA PAPER 84-2079] p 750 A84-42335

Computational-experimental pressure distributions on a transonic, low-aspect-ratio wing
[AIAA PAPER 84-2092] p 750 A84-42345

Calculations of viscous supersonic flow over finned bodies using a 'thin-fin' approximation
[AIAA PAPER 84-2114] p 751 A84-42359

An evaluation of a parabolized Navier-Stokes (PNS) code for cone-cylinder-flared configurations
[AIAA PAPER 84-2116] p 751 A84-42361

Experimental heating distributions for biconics at incidence in Mach 10 air and comparison to prediction
[AIAA PAPER 84-2119] p 751 A84-42363

Inviscid multiple zone calculations for supersonic tactical missiles
[AIAA PAPER 84-2099] p 752 A84-42374

Determination of the parameters of a boundary layer on a rotating axisymmetric cone p 752 A84-42526

Variation of the parameters of a supersonic flow with transverse injection p 753 A84-42542

Hypersonic flow past a delta wing at large angles of attack p 753 A84-42554

Application of streamline iteration and relative flow field methods to the calculation of the subsonic flow field of S1 stream surface of turbomachinery
p 826 A84-43316

The time-dependent finite element method for calculating transonic flow field in turbomachinery cascade p 826 A84-43317

A simple method for solving three-dimensional inverse problems of turbomachinery flow and annular constraint condition p 827 A84-43346

The National Transonic Facility - A research perspective
[AIAA PAPER 84-2150] p 904 A84-44189

Validation of a wall-interference assessment/correction procedure for airfoil tests in the Langley 0.3-meter Transonic Cryogenic Tunnel
[AIAA PAPER 84-2151] p 905 A84-44191

Flow simulations for nacelle-propeller configurations using Euler equations
[AIAA PAPER 84-2143] p 827 A84-44192

Numerical optimization of circulation control airfoil at high subsonic speed p 828 A84-44198

Computational flow simulation - Aerospace's CAE middleman p 866 A84-44314

The use of multipoles for calculating the aerodynamic interference between bodies of revolution
p 829 A84-44509

Effects of viscosity on transonic-aerodynamic and aeroelastic characteristics of oscillating airfoils
p 830 A84-44513

Subsonic airfoils with a given pressure distribution
p 830 A84-44626

Second-order accurate boundary conditions for compressible flows p 830 A84-44630

Viscous-inviscid interactive procedure for rotational flow in cascades of airfoils p 830 A84-44639

Investigation of the triplet concept using a higher-order supersonic panel method p 831 A84-44931

Advanced numerical methods for analysis and design in aircraft aerodynamics p 831 A84-44932

Three-dimensional computational methods applied to aerodynamic analysis of transonic flows past a wing-body configuration
[ONERA, TP NO. 1984-92] p 831 A84-44944

Analysis of transonic and supersonic flows around wing-body-combinations p 831 A84-44945

A fast viscous correction method for full-potential transonic wing analysis p 831 A84-44946

Computation of supersonic flow about complex configurations p 832 A84-44958

Numerical solutions of the Euler equations governing axisymmetric and three-dimensional transonic flow
p 832 A84-44959

The structural modelling of rotating blades
p 889 A84-44963

Validation of a transonic analysis code for use in preliminary design of advanced transport configurations
p 832 A84-44971

A kinematic approach to unsteady viscous flows
p 833 A84-44983

Computation of prop-fan engine installation aerodynamics p 833 A84-44994

Relaxation and approximate factorization methods for the unsteady full potential equation p 833 A84-44995

Mathematical of linear unsteady aerodynamics of whole aircraft p 834 A84-44996

Propellers in compressible flow p 834 A84-45005

Indicial aerodynamic coefficients for trapezoidal wings
p 834 A84-45009

Airfoil optimization p 835 A84-45023

Experimental and computational investigation of the vortex flow over a swept wing
[ONERA, TP NO. 1984-93] p 835 A84-45025

Numerical simulation of unsteady flow in a ramjet inlet
p 836 A84-45038

Numerical computation of transonic flow past an axisymmetric nacelle
[ONERA, TP NO. 1984-91] p 837 A84-45052

A sub-domain approach for the computation of compressible inviscid flows
[ONERA, TP NO. 1984-81] p 919 A84-45202

Analysis on an implicit Euler solver --- for steady transonic flow computation
[ONERA, TP NO. 1984-62] p 838 A84-45203

Calculation of inviscid transonic flow past a wing-fuselage combination p 840 A84-45720

Method of uniformly precise approximation and its application to the calculation of the aerodynamic interaction of a wing-fuselage combination and a body of revolution at supersonic flight speeds
p 840 A84-45721

Supersonic flow in the corner formed by two intersecting wedges with slip p 840 A84-45722

A numerical solution to the problem of flow past a plate with a jet flap of finite width for various Bernoulli numbers p 840 A84-45728

An analysis of flow past axisymmetric intakes at low velocities p 841 A84-45731

Calculation of trailing vortex sheet and downwash field behind a sweptback wing p 842 A84-46007

A combined direct/inverse three-dimensional transonic wing design method for vector computers
[AIAA PAPER 84-2156] p 843 A84-46102

Transonic cascade flow analysis using viscous/inviscid coupling concepts
[AIAA PAPER 84-2159] p 843 A84-46103

The application of a low-order panel method - program VSAERO to powerplant and airframe flow studies
[AIAA PAPER 84-2178] p 843 A84-46104

Computation of transonic viscous airfoil, inlet, and wing flowfields
[AIAA PAPER 84-1551] p 844 A84-46111

Laminar separation from airfoils beyond trailing-edge stall
[AIAA PAPER 84-1612] p 844 A84-46115

Calculation of turbulent flow about missile afterbodies containing an exhaust jet p 844 A84-46117

Unsteady vortical wakes over a prolate spheroid
[AIAA PAPER 84-0419] p 845 A84-46120

Computer simulation of non-potential flows around wings p 845 A84-46189

The aerodynamics and aeroacoustics of rotating transonic flow fields p 940 A84-46364

Quasi-three-dimensional flow of a gas in the blade ring of a turbomachine p 950 A84-46850

Computation of transonic flows in and about turbine cascades with viscous effects
[ASME PAPER 84-GT-18] p 950 A84-46885

Numerical flow analysis of fully three-dimensional turbine cascades
[ASME PAPER 84-GT-19] p 950 A84-46886

Design of highly loaded blade profiles using an iterative inverse-direct computational procedure
[ASME PAPER 84-GT-22] p 950 A84-46887

Solution of transonic S1 surface flow by successively reversing the direction of integration of the stream function equation
[ASME PAPER 84-GT-23] p 950 A84-46888

Transonic cascade flow solved by separate supersonic and subsonic computations with shock fitting
[ASME PAPER 84-GT-24] p 951 A84-46889

A quasi-three-dimensional turbomachinery blade design system. I - Throughflow analysis
[ASME PAPER 84-GT-26] p 951 A84-46891

A quasi-three-dimensional turbomachinery blade design system. II - Computerized system
[ASME PAPER 84-GT-27] p 951 A84-46892

Computation of potential flow on S2 stream surface for a transonic axial-flow compressor rotor
[ASME PAPER 84-GT-30] p 951 A84-46894

COMPUTATIONAL FLUID DYNAMICS

A numerical study of three-dimensional flow separation and wake development in an axial compressor rotor
[ASME PAPER 84-GT-34] p 951 A84-46898

An inviscid blade-to-blade prediction of a wake-generated unsteady flow
[ASME PAPER 84-GT-43] p 952 A84-46904

Calculation of the three-dimensional, steady, inviscid flow in a transonic axial turbine stage
[ASME PAPER 84-GT-76] p 952 A84-46920

A three-dimensional Euler solver for turbomachinery blade rows
[ASME PAPER 84-GT-79] p 952 A84-46922

Use of an inverse method for the design of high efficiency compressor and turbine blades with large change in radius
[ASME PAPER 84-GT-167] p 953 A84-46971

Quasi-three-dimensional and full three-dimensional rotational flow calculations in turbomachines
[ASME PAPER 84-GT-185] p 954 A84-46986

A simple method for solving three-dimensional inverse problems of turbomachinery flow and the annular constraint condition
[ASME PAPER 84-GT-198] p 954 A84-46994

Investigation of the three-dimensional flow field within a transonic fan rotor - Experiment and analysis
[ASME PAPER 84-GT-200] p 955 A84-46995

Common misconceptions in the calculation of transonic full potential flows
[ASME PAPER 84-GT-211] p 955 A84-47000

Accuracy and convergence characteristics of steady transonic potential flow solutions
[ASME PAPER 84-GT-227] p 956 A84-47007

A finite element computer code to calculate full 3-D compressible potential flow in turbomachinery
[ASME PAPER 84-GT-238] p 956 A84-47016

Calculation of horseshoe vortex flow without numerical mixing
[ASME PAPER 84-GT-241] p 956 A84-47018

Extima-2, an explicit time-marching method to calculate transonic turbomachinery cascade flow
[ASME PAPER 84-GT-243] p 957 A84-47020

Computation of secondary flows in an axial flow compressor including inviscid and viscous flow computation
[ASME PAPER 84-GT-244] p 957 A84-47021

Simplified method for flow analysis and performance calculation through an axial compressor
[ASME PAPER 84-GT-250] p 957 A84-47026

A method for the experimental investigation of plane and axisymmetric nonswirling flows by means of a cylindrical pressure head over a wide range of Mach numbers p 958 A84-47058

A more accurate calculation of the induced drag of a wing in subsonic flow using the method of discrete vortices p 958 A84-47069

The method of separation of variables in a problem concerning three-dimensional flow of an ideal fluid near a sharp corner of a thin wing p 959 A84-47080

Theoretical and experimental studies of gas flow in collectors (nozzles) at low subsonic velocities
p 960 A84-47082

An approximate determination of the critical Mach number from the calculated pressure distribution
p 960 A84-47086

The perturbation method in the nonlinear problem of supersonic flow past delta wings p 960 A84-47098

Calculation of three-dimensional turbulent jet propagation from a lobe nozzle in a slipstream
p 961 A84-47554

Mathematical modeling of the operation of gas turbine engines under transient conditions p 986 A84-47576

A combined method for solving the direct problem of the hydrodynamics of the airfoil cascades of turbomachines p 1007 A84-48000

Supersonic axisymmetric flow over boattails containing a centered propulsive jet p 962 A84-48129

Numerical simulation of near-critical and unsteady, subcritical inlet flow p 962 A84-48131

An automatic adaptive numerical method for lifting surface theories p 962 A84-48132

Structure of lift-generated rolled-up vortices
p 962 A84-48083

The role of computational fluid dynamics in aeropropulsion ground testing p 992 A84-49084

High-lift airfoil design from the hodograph
p 993 A84-49086

PAN AIR applications to mutual interference effects --- computer program for subsonic and supersonic flow calculation about complex aircraft configurations
p 963 A84-49093

Evaluation of NCOREL, PAN AIR, and W12SC3 for supersonic wing pressures --- computer programs
p 963 A84-49095

A new aircraft design tool - Computational fluid dynamics
p 963 A84-49389

Numerical computation of base flow for a projectile at transonic speeds p 18 N84-10027
 [AD-A130293] p 18 N84-10027
 Introduction to computational aerodynamics p 19 N84-10031
 [AD-A130717] p 19 N84-10031
 Transonic configuration design (fighter) p 122 N84-12082
 Simulation of turbulent flows with a point vortex method p 101 N84-12119
 Numerical solutions of the Euler equations simulating vortex flows around wings p 101 N84-12120
 The treatment of convected vortices in compressible potential flow p 102 N84-12121
 A contribution to the problem of vortex breakdown p 102 N84-12125
 XTRAN2L: A program for solving the general-frequency unsteady transonic small disturbance equation [NASA-TM-85723] p 105 N84-13150
 Three-dimensional wake of a swept wing p 245 N84-15458
 Three-dimensional flow calculations on a hypothetical steam turbine last stage p 248 N84-15481
 Computational aerodynamics and supercomputers [NASA-TM-85887] p 270 N84-18139
 Mach 0.6 to 3.0 flows over rectangular cavities [AD-A134579] p 272 N84-16153
 Viscous Effects in Turbomachines [AGARD-CP-351] p 300 N84-16188
 Aerodynamic computation method of airfoil cascades subjected to viscous flow p 300 N84-16198
 Computing the three dimensional boundary layer in a compressor p 301 N84-16200
 Viscous effects and heat transfer in a calculation method for axisymmetric flow in multistage turbomachines using the stream function p 301 N84-16201
 Experimental verification of an endwall boundary layer prediction method p 302 N84-16211
 Computation of potential flows with embedded vortex rings and applications to helicopter rotor wakes [NASA-CR-166542] p 317 N84-17526
 Unsteady viscous transonic flow computations using LTRAN2-NLR code coupled with Green's lag-entrainment method [NLR-MP-82052-U] p 338 N84-18181
 Reattachment of a three-dimensional, incompressible jet to an adjacent axisymmetric inclined surface [AD-A136288] p 383 N84-18584
 Rotordynamic forces developed by labyrinth seals [AD-A136217] p 384 N84-18599
 Multigrid methods for boundary integral equations [NLR-MP-82059-U] p 392 N84-19011
 Civil component program Integrated Wing-Engine-System (IFAS), phase 1 — computational methods [BMFT-FB-W-83-018] p 353 N84-19343
 Simulation applications at NASA Ames Research Center [NASA-TM-85846] p 371 N84-19362
 An infrastructure for computational fluid dynamics for computer aided design [NLR-MP-82046-U] p 387 N84-19774
 Combustion Fundamentals Research [NASA-CP-2309] p 454 N84-20525
 A computational method for predicting the effects of varying Reynolds number and dynamic pressure on flexible wings at transonic speeds p 412 N84-21508
 Inlet flowfield investigation. Part 2: Computation of the flow about a supercruise forebody at supersonic speeds [NASA-CR-172315] p 413 N84-21516
 Application of computational procedures in aerodynamic design [NLR-MP-83012-U] p 414 N84-21521
 Computational vortex flow aerodynamics [NLR-MP-83017-U] p 414 N84-21522
 Computational methods for subsonic and transonic aerodynamic design [AD-B079994] p 414 N84-21524
 Transonic flow calculations using triangular finite elements p 509 N84-22529
 More precise numerical simulation of transonic flow through passages in turbomachines p 512 N84-22786
 Turbulent diffuser flow studies related to the design of the ETW diffuser p 562 N84-23572
 Ground/flight test techniques and correlation p 528 N84-23574
 Numerical aerodynamic analysis of a free falling autorotating plate [AD-A138900] p 517 N84-23612
 Navier-Stokes calculations for the vortex of a rotor in hover [NASA-TM-85894] p 581 N84-24540
 Conical flows with leading edge vortices p 623 N84-25013

Calculation of aerodynamic characteristics of wings with thickness and camber by a new method based on the modified vortex lattice method [TAE-493] p 584 N84-25640
 Numerical aspects of unsteady flow calculations p 626 N84-25968
 Computational Fluid Dynamics, volume 2 [VKI-LS-1984-04-VOL-2] p 627 N84-25986
 Implicit time dependent methods for the solution of the Euler equations. Part 2: Application to transonic flows p 627 N84-25990
 The method of complex characteristics for design of transonic compressors p 661 N84-26659
 Aerodynamic design using numerical optimization [NASA-TM-85550] p 662 N84-26661
 Method of calculating strong viscous interaction at delta wing p 664 N84-26918
 Computation of imaginary-side pressure distributions over the flexible walls of the test section insert for the 0.3-M transonic cryogenic tunnel [NASA-CR-172363] p 666 N84-27678
 Configuration design studies and wind tunnel tests of an energy efficient transport with a high-aspect-ratio supercritical wing [NASA-CR-3524] p 740 N84-28727
 PAN AIR summary document (version 1.0) [NASA-CR-3250] p 755 N84-28741
 A practical adaptive-grid method for complex fluid-flow problems [NASA-TM-85989] p 755 N84-28745
 Numerical simulation of boundary-layer transition [NASA-TM-85984] p 756 N84-28746

COMPUTATIONAL GRIDS

A multigrid strongly implicit procedure for transonic potential flow problems p 9 A84-10126
 Adaptive grid relocation algorithms for transonic full potential calculations using one-dimensional or two-dimensional diffusion equation p 13 A84-11581
 A chimera grid scheme — multiple overset body-conforming mesh system for finite difference adaptation to complex aircraft configurations p 13 A84-11582
 Application of a two-dimensional grid solver for three-dimensional problems — of flows around aircraft configurations p 13 A84-11588
 Numerical solution of the Euler equations on body-conforming curvilinear grids p 13 A84-11590
 Hybrid C-H grids for turbomachinery cascades — parabolic and Cartesian coordinates p 13 A84-11591
 Mesh generation for wing-body-tail configurations p 14 A84-11592
 Grid generation in three dimensions by Poisson equations with control of cell size and skewness at boundary surfaces p 14 A84-11594
 Grid generation for wing-tail-fuselage configurations p 14 A84-11595
 Efficient turbomachinery grid generation using Traupel's conformal mapping p 14 A84-11596

3-dimensional grid generation with applications to high performance aircraft p 14 A84-11597
 An orthogonal coordinate grid following the three-dimensional viscous flow over a concave surface p 14 A84-11598
 Grid merging approaches for JTIDS Stage One operation p 39 A84-12442
 Algebraic grid generation for wing-fuselage bodies [AIAA PAPER 84-0002] p 154 A84-17826
 A block-structured finite element grid generation scheme for the analysis of three-dimensional transonic flows [AIAA PAPER 84-0004] p 155 A84-17827
 Efficient grid generation for axial turbomachinery cascades [AIAA PAPER 84-0071] p 157 A84-17859
 Multigrid solution of the Euler equations for aircraft configurations [AIAA PAPER 84-0093] p 158 A84-17876
 A natural formulation for numerical solution of the Euler equations [AIAA PAPER 84-0163] p 241 A84-17922
 A conservative treatment of zonal boundaries for Euler equation calculations [AIAA PAPER 84-0164] p 161 A84-17923
 A mapped factored implicit scheme for the computation of duct and far field acoustics [AIAA PAPER 84-0501] p 254 A84-18134
 A comparative study of the parabolized Navier-Stokes code using various grid-generation techniques [AIAA PAPER 84-0459] p 266 A84-21302
 Three-dimensional grid generation using elliptic equations with direct grid distribution control p 378 A84-23358
 Design and implementation of a multigrid code for the Euler equations p 380 A84-24726
 Demonstration of a new body-fitted coordinate code for modeling gas-turbine combustor flows [AIAA PAPER 84-1381] p 603 A84-35199
 Mesh generation strategies for CFD on complex configurations p 578 A84-35328
 Noniterative grid generation using parabolic difference equations for fuselage-wing flow calculations p 579 A84-35334
 Orthogonal grid generation [AIAA PAPER 84-1248] p 622 A84-35654
 Developments in coordinate systems for flow field problems p 640 A84-37055
 Internal flow field calculations for annular combustion configurations [AIAA PAPER 84-1168] p 697 A84-37627
 Applications of a conservative zonal scheme to transient and geometrically complex problems — in solving supersonic flow over double-airfoil configuration [AIAA PAPER 84-1532] p 647 A84-37955
 An adaptive grid scheme applied to two-dimensional airfoil problems [AIAA PAPER 84-1608] p 649 A84-38003
 Dynamic response of shock waves in transonic diffuser and supersonic inlet - An analysis with the Navier-Stokes equations and adaptive grid [AIAA PAPER 84-1609] p 650 A84-38004
 Grid generation and flow calculations for complex aircraft geometries using a multi-block scheme [AIAA PAPER 84-1665] p 653 A84-38044
 Prediction of the flow over supercritical high-lift configurations by a multigrid algorithm [AIAA PAPER 84-1664] p 659 A84-39317
 A transonic wing-body flowfield calculation with improved grid topology and shock-point operators [AIAA PAPER 84-2157] p 828 A84-44196
 Transonic wing and wing/body flow computations on non-surface-conforming grids p 963 A84-49107
 An application of the finite element method to the solution of low Reynolds number, incompressible flow around a Joukowski airfoil, with emphasis on automatic generation of grids [AD-A133008] p 176 N84-14127
 The effect of the artificial far field boundary on a finite different approximation of the Navier-Stokes equations for a compressible fluid p 317 N84-17536
 A cooperative program to stimulate student involvement through the MIT Undergraduate Research Opportunity Program [NASA-CR-173300] p 324 N84-18086
 Calculating C-grids with fine and embedded mesh regions [CFDL-TR-83-7] p 319 N84-18090
 Multigrid methods for boundary integral equations [NLR-MP-82059-U] p 392 N84-19011
 Adaptive grid generation for numerical solution of partial differential equations [AD-A136985] p 392 N84-20289
 Surface grid generation for wing-fuselage bodies p 491 N84-22186

[NASA-TM-83545] p 144 N84-13812
- CADAS: A computer aided design tool for avionic systems
p 214 N84-15065
- A dynamic approach to military avionics systems testing
p 215 N84-15075
- TAS: A Transonic Aircraft/Store flow field prediction code
[NASA-CR-3721] p 177 N84-15114
- Aerothrust modeling. Executive summary
[NASA-CR-168330] p 220 N84-15152
- The linear vortex distribution using the alternative approach
[NIAST-82/80] p 269 N84-16133
- A lifting surface computer code with jet-in-crossflow interference effects. Volume 1: Theoretical description
[NASA-CR-166524] p 271 N84-16147
- Digital computer program for generating dynamic turbofan engine models (DIGTEM)
[NASA-TM-83446] p 299 N84-16185
- Computer modeling of aircraft cabin fires
[PB84-101153] p 282 N84-17162
- Computer program for preliminary helicopter design
[AD-A136026] p 351 N84-18197
- Automated en route air traffic control algorithmic specifications. Volume 5: Data specification
[AD-A136851] p 346 N84-19325
- Automated en route air traffic control algorithmic specifications. Volume 1: Trajectory estimation
[AD-A137088] p 346 N84-19328
- Numerical determination of the effects of boundary conditions on the instability of composite panels with cutouts
[AD-A136772] p 388 N84-19931

COMPUTER PROGRAMS

- Historical inflation program. A computer program generating historical inflation indices for Army aircraft
Revision
[AD-A137670] p 398 N84-20474
- A method for computing the leading-edge suction in a higher-order panel method
[NASA-CR-3730] p 409 N84-20479
- Computer program for prediction of the deposition of material released from fixed and rotary wing aircraft
[NASA-CR-3780] p 409 N84-20482
- Progress toward the development of an aircraft icing analysis capability
[NASA-TM-83562] p 410 N84-20490
- Numerical studies of the deposition of material released from fixed and rotary wing aircraft
p 410 N84-20491
- Implications of control technology on aircraft design
p 461 N84-20573
- Tools for active control system design
p 462 N84-20582
- Development of a simplified procedure for cyclic structural analysis
[NASA-TP-2243] p 484 N84-20878
- Static and dynamic structural-sensitivity derivative calculations in the finite-element-based Engineering Analysis Language (EAL) system
[NASA-TM-85743] p 485 N84-20880
- Design of single component airfoils using an inverse boundary element method
[REPT-83-A2-SER-A] p 413 N84-21512
- Inverse transonic airfoil design methods including boundary layer and viscous interaction effects
[NASA-CR-173449] p 413 N84-21514
- Evaluation of 3-D graphics software: A case study
p 492 N84-22222
- Using a commercial CAD system for simultaneous input to theoretical aerodynamic programs and wind-tunnel model construction
p 492 N84-22223
- Analysis of inviscid and viscous flows in cascades with an explicit multiple-grid algorithm
[NASA-TM-83636] p 502 N84-22527
- The design and operational development of self-streamlining 2-dimensional flexible walled test sections
[NASA-CR-172328] p 510 N84-22534
- ALESEP: A computer program for the analysis of airfoil leading edge separation bubbles
[NASA-CR-172310] p 510 N84-22537
- Three-dimensional nonequilibrium viscous shock-layer flows over complex reentry vehicles
p 511 N84-22543
- Comparison between measured turbine stage performance and the predicted performance using quasi-3D flow and boundary layer analyses
[NASA-TM-83640] p 535 N84-22564
- Nonlinear/transient rotor dynamics analysis
p 560 N84-22977
- Acoustic environmental accuracy requirements for response determination
[NASA-CR-171003] p 568 N84-23234
- Further development of XTRAN3S computer program
[NASA-CR-172335] p 516 N84-23608
- A model for reaction rates in turbulent reacting flows
[NASA-TM-85746] p 540 N84-23650
- Calculation of transonic flow in a linear cascade
[NASA-TM-83697] p 581 N84-24539
- Study of aerospace materials, coatings, adhesions and processes. Aircraft icing processes
[AD-A139743] p 583 N84-24557
- The influence of a moving suspension on the behaviour of modelled helicopter underslung loads
[BU-288] p 596 N84-24573
- Highly integrated digital engine control system on an F-15 airplane
[NASA-TM-86040] p 606 N84-24587
- Advanced combustor liner cooling concepts
p 608 N84-24758
- An analytical method to predict efficiency of aircraft gearboxes
[NASA-TM-83716] p 572 N84-25606
- An investigation of aerodynamic characteristics of wings having vortex flow using different numerical codes
[NASA-CR-173596] p 584 N84-25639
- A theoretical analysis of the aerodynamic and structural forces associated with a ribbon parachute canopy in steady descent
p 587 N84-25671
- Minimum operational performance standards for traffic alert and collision avoidance system (TCAS) airborne equipment, volume 2
[RTCA/DO-185-VOL-2] p 593 N84-25686
- Emulation of a voice interactive Doppler navigation set
[AD-A140204] p 593 N84-25687
- Computer program to simulate digital computer based longitudinal flight control laws in a high performance aircraft
[AD-A140143] p 611 N84-25719

- NERF: A computer program for the numerical evaluation of reliability functions-reliability modeling, numerical methods and program documentation
[AR-00-984] p 627 N84-26048
- Validation of the MAGNA (Materially and Geometrically Nonlinear Analysis) computer program for nonlinear finite element analysis of aircraft transparency bird impact
[AD-P003229] p 723 N84-26642
- MAGNA (Materially and Geometrically Nonlinear Analysis) computer simulation of bird impact on the F-15 aircraft canopy
[AD-P003230] p 733 N84-26643
- Status of new aerothermodynamic analysis tool for high-temperature resistant transparencies
[AD-P003236] p 724 N84-26649
- Transonic aeroelastic stability and response of conventional and supercritical airfoils including active controls
p 661 N84-26655
- Development of a thermal and structural model for a NASTRAN finite-element analysis of a hypersonic wing test structure
p 661 N84-26656
- Calculation of transonic potential flow past wing-tail-fuselage configurations using the multigrid method
p 661 N84-26657
- Advanced prediction technique for the low speed aerodynamics of V/STOL aircraft. Volume 1: Technical discussion
[NASA-CR-166442-VOL-1] p 662 N84-26662
- Advanced prediction technique for the low speed aerodynamics of V/STOL aircraft. Volume 2: User's manual
[NASA-CR-166442-VOL-2] p 662 N84-26663
- Calculation of vertical and ramp-assisted takeoffs for supersonic cruise fighters
[NASA-TM-85818] p 662 N84-26668
- Specialized common carriers: Long distance alternatives for military installations
[AD-A140596] p 725 N84-26967
- Airfield Noise Evaluation Program (ANEP)
[VTH-LR-370] p 730 N84-27342
- STABCAR: A program for finding characteristic root systems having transcendental stability matrices
[NASA-TP-2165] p 733 N84-27461
- XSECT: A computer code for generating fuselage cross sections - user's manual
[NASA-TM-83218] p 668 N84-27696
- Computer analysis of effects of altering jet fuel properties on refinery costs and yields
[NASA-CR-174642] p 715 N84-27908
- COSAL: A black-box compressible stability analysis code for transition prediction in three-dimensional boundary layers
[NASA-CR-165925] p 728 N84-28002
- NEMAR plotting computer program
[NASA-CR-165831] p 734 N84-28516
- Implementation and performance of algorithms on a vector calculator
[SNIAS-832-111-104] p 734 N84-28519
- A three-dimensional transonic, potential flow computer program, its conversion to IBM FORTRAN and utilization
[AD-A140936] p 734 N84-28521
- Aircraft Spare Stockage Methodology (aircraft spares) study
[AD-A142259] p 740 N84-28730
- Study of transonic flow over swept wings
[NASA-CR-173799] p 754 N84-28734
- PAN AIR summary document (version 1.0)
[NASA-CR-3250] p 755 N84-28741
- Three-dimensional transonic potential flow about complex 3-dimensional configurations
[NASA-CR-3814] p 756 N84-28749
- Interactive flight control system analysis program
[NASA-CR-172352] p 789 N84-28807
- Production version of the extended NASA-Langley vortex lattice FORTRAN computer program. Volume 2: Source code
[NASA-TM-83304] p 814 N84-29500
- Rotorcraft noise prediction
p 818 N84-29677
- PURDU-WINCOF: A computer code for establishing the performance of a fan-compressor unit with water ingestion
[NASA-CR-168005] p 783 N84-29875
- A data acquisition and real-time display system for testing a jet engine compressor
[AD-A142696] p 811 N84-30301
- Improvements to software maintenance methods in real time embedded aviation flight systems
[AD-A14949] p 815 N84-30742
- Unsteady transonic aerodynamic and aeroelastic calculations about airfoils and wings
[NASA-TM-85986] p 847 N84-31092
- Comparison of the full potential and Euler formulations for computing transonic airfoil flows
[NASA-TM-85983] p 847 N84-31094

Nonlinear Structural Analysis [NASA-CP-2297] p 927 A84-31688

Calendar of selected aeronautical and space meetings [AGARD-CAL-84/1] p 945 A84-32341

Technical evaluation report on the Fluid Dynamics Panel Symposium on Wind Tunnels and Testing Techniques [AGARD-AR-193] p 909 A84-32402

Twelfth NASTRAN Users' Colloquium [NASA-CP-2328] p 930 A84-32864

Materials Substitution and Recycling [AGARD-CP-356] p 996 A84-33465

Special Course on Stability and Transition of Laminar Flow [AGARD-R-709] p 1009 A84-33757

CONFIDENCE LIMITS

Maximum likelihood algorithm using an efficient scheme for computing sensitivities and parameter confidence intervals [AIAA PAPER 84-2084] p 814 A84-42339

CONFIGURATION INTERACTION

Experimental study of main rotor/tail rotor/airframe interaction in hover p 875 A84-46327

Investigation of operational and design factors resulting from main rotor and tail rotor interactions
[AD-A137710] p 411 N84-20497

CONFIGURATION MANAGEMENT
Software control and system configuration management
- A process that works p 488 A84-26713
Configuration control methodology for system performance enhancement
[AIAA PAPER 84-1942] p 934 A84-43469
A critique of NAVSTAR Global Positioning System, user equipment, configuration control for DoD common and Navy unique items
[AD-A131234] p 43 N84-10047
Integrated Application of Active Controls (IAAC) technology to an advanced subsonic transport project: Final ACT configuration evaluation
[NASA-CR-3519] p 689 N84-27723
Software control and system configuration management: A systems-wide approach
[NASA-TM-85908] p 879 N84-31112
Managing aircraft/simulator concurrency
[AD-P03483] p 944 N84-32240

CONFINEMENT
An experimental investigation of gas jets in confined swirling air flow
[NASA-CR-3832] p 988 N84-33412

CONFORMAL MAPPING
Efficient turbomachinery grid generation using Traupel's conformal mapping p 14 A84-11596

CONGRESSIONAL REPORTS
Air Force and Navy trainer aircraft acquisition programs
[PB83-231076] p 3 N84-10012
Aircraft maintenance and fire
[GPO-24-247] p 4 N84-11112
Joint services advanced vertical wing (JVX) program
[GPO-22-771] p 53 N84-11160
Technology of airport safety
[GPO-24-762] p 74 N84-11183
Aircraft navigation technology and errors
[GPO-26-859] p 115 N84-13170
NASA's five-year plan
[GPO-27-459] p 255 N84-14964
Improving the air traffic control system: An assessment of the National Airspace System Plan
p 285 N84-16160
A review of US international aviation policy
[GPO-18-813] p 324 N84-17070
Improvement needed in the implementation of the United States International Aviation Policy
[GPO-23-934] p 324 N84-17072
Airport and aircraft safety research and technology
[GPO-26-497] p 281 N84-17152
Semiannual report to Congress on the effectiveness of the civil aviation security program
[AD-A134860] p 281 N84-17156
Alternative fuels for general aviation
[GPO-27-618] p 311 N84-17409
Compilation of selected aviation laws
[GPO-99-811] p 498 N84-21438
National Aeronautics and Space Administration Authorization Bill, 1984
[S-REPT-98-455] p 569 N84-24506
National Aeronautics and Space Administration Authorization Act
[S-REPT-98-455] p 569 N84-24507
The 1985 NASA authorization
[GPO-31-453] p 632 N84-25526
Future of aeronautics
[GPO-29-744] p 633 N84-25529
National Aeronautics and Space Administration
p 633 N84-25531
Report of accomplishments under the airport improvement program
[AD-A142444] p 794 N84-29889
The 1985 NASA authorization, volume 2
[GPO-34-202] p 945 N84-33301
Oversight on the Federal Aviation Administration fiscal year 1985 research, engineering and development budget request
[GPO-34-924] p 945 N84-33302
Airport safety technology: Washington National Airport
[GPO-34-406] p 993 N84-33423

CONICAL BODIES
Aerodynamics of a simple cone-derived waverider
[AIAA PAPER 84-0085] p 158 A84-17870
Supersonic viscous compressible gas flow past conically blunted cylinders at low Reynolds numbers
p 171 A84-19002
A theoretical and experimental investigation of the bending-rolling process applied to sheets to form conical aircraft parts
p 553 A84-30416
Aerodynamics of pointed forebodies at high angles of attack
p 574 A84-34461

The three-dimensional turbulence transport properties in the boundary layers of conical body configurations at Mach 3
[AIAA PAPER 84-1528] p 743 A84-40815
The absorption of an entropy layer on a blunted cone in hypersonic flow of a viscous gas
p 839 A84-45703
Theoretical modelling of three-dimensional vortex flows in aerodynamics
p 101 N84-12116
Three-dimensional turbulent boundary layers at bielliptical bodies in stream of compressible gas at some angle of attack
p 725 N84-26936

CONICAL FLOW
Vectorized schemes for conical potential flow using the artificial density method
[AIAA PAPER 84-0162] p 161 A84-17921
The computation of rotational conical flows
[AIAA PAPER 84-0258] p 163 A84-17980
Laminar boundary layer stability experiments on a cone at Mach 8. II - Blunt cone
[AIAA PAPER 84-0006] p 172 A84-19227
Shock fitting in conical supersonic full potential flows with entropy effects
[AIAA PAPER 84-0261] p 174 A84-19247
Geometric characteristics of the separation of a turbulent boundary layer during the interaction with a normal shock in conical flows
p 260 A84-19555
Cylindrical and conical flow regimes of three-dimensional shock/boundary-layer interactions
p 266 A84-21505
Finite area method for nonlinear supersonic conical flows
p 266 A84-21510
Investigation of the conical flowfield around external axial corners
p 329 A84-23357
A new method for calculating supersonic unsteady aerodynamic forces and its application
p 330 A84-23904
Visualization of boundary layer transition on a cone with liquid crystals
p 332 A84-25203
The validity conditions in three-dimensional supersonic linear aerodynamics
p 505 A84-31122
Conical, noncircular, second-order, potential theory of supersonic flow
p 508 A84-32607
Three-dimensional nonequilibrium viscous shock-layer flows over complex geometries
p 639 A84-36482
A numerical computation for the inviscid supersonic flow around bent cone
p 645 A84-37904
Similarity conditions for conical shockwave turbulent boundary-layer interactions
[AIAA PAPER 84-1557] p 657 A84-39301
Entropy corrections to supersonic conical nonlinear potential flows
[AIAA PAPER 84-1683] p 659 A84-39318
Supersonic conical separation due to shock vorticity
p 743 A84-40830
New implicit boundary procedures - Theory and applications
p 743 A84-40836
A numerical determination of the characteristics of supersonic air intakes on the basis of calculations of conical flows of an ideal gas
p 842 A84-45744
A wing concept for supersonic maneuvering
[NASA-CR-3763] p 177 N84-15115
The COREL and W12SC3 computer programs for supersonic wing design and analysis
[NASA-CR-3676] p 273 N84-17130
Conical flows with leading edge vortices
p 623 N84-25013
Supersonic flows around a circular cone with or without blowing on the surface
[AD-A143258] p 851 N84-32362

CONICAL NOZZLES
The density distribution of a supersonic jet issuing into a vacuum from a nozzle with a beveled exit section
p 261 A84-19571
An experimental study of full pressure recovery in a hypersonic wind tunnel with conical and shaped nozzles
p 404 A84-27069
The supersonic flow around a conic nozzle
p 574 A84-34347
Inverted velocity profile semi-annular nozzle jet exhaust noise experiments
[NASA-TM-83525] p 144 N84-13924

CONICAL SCANNING
Tracking radar electronic counter-countermeasures against inverse gain jammers
p 34 A84-10830

CONNECTORS
Connecting elements for glass fiber-reinforced plastics structures - Mechanical connections for highly-stressed structures made of fiber-reinforced plastics
p 314 A84-22475

CONSERVATION EQUATIONS
Behavior of the flow through a numerically captured shock wave
p 153 A84-17451
Entropy condition satisfying approximations for the full potential equations of transonic flow
[NASA-TM-85751] p 410 N84-20485

CONSOLES
Display management in future military aircraft
p 207 A84-16561
Manufacturing Methods and Technology (MM and T) specifications for miniature cathode ray tube
[AD-A132797] p 243 N84-14439
Device 2E6 (ACMS) Air Combat Maneuvering Simulator instructor console review
[AD-A138972] p 544 N84-22587

CONSTANTS
Experimental determination of the inertia constants of an airplane or of a missile
[NASA-TM-77767] p 965 N84-33381

CONSTITUTIVE EQUATIONS
Research and development program for the development of advanced time-temperature dependent constitutive relationships. Volume 2: Programming manual
[NASA-CR-168191-VOL-2] p 80 N84-10614

CONSTRAINTS
Small auxiliary power unit design constraints
p 131 N84-12172
Passive Arm Restraint Curtain (PARC) for Navy aircraft ejection seats
[AD-A139435] p 518 N84-23615
Flight operation manual for the MI-8 helicopter
[AD-A138680] p 976 N84-33407

CONSTRUCTION
Legal protection in the planning of airports - The contestability of the airport construction permit
p 84 A84-11310
Symmetric linear systems -- twin-lift helicopter control models for heavy construction use
p 391 A84-25538
Deputy Minister Svechnikov on civil aviation construction projects
p 72 N84-10003
Uzbek SSR city of Shakhrisabz opens new airport: Tourism planned
p 72 N84-10007
Evaluation of selected commercial construction equipment for bomb damage repair
[AD-A140907] p 707 N84-26714
The performance of civil airport pavement with lime-cement-flyash base course
[FAA-PM-84-10] p 792 N84-28815
More use of helicopters in construction work urged
p 949 N84-34424

CONSTRUCTION INDUSTRY
More use of helicopters in construction work urged
p 949 N84-34424

CONSTRUCTION MATERIALS
Materials properties data base computerization
[SAE PAPER 831443] p 498 A84-29634
Applications of composite materials in helicopter construction
[AD-A136678] p 352 N84-19336

CONSUMERS
Legislation needed to clarify future of consumer protection and federal preemption after the Civil Aeronautics Board sunsets
[PB84-210103] p 854 N84-32371

CONTAINERS
The rise and change in airborne GRP
p 85 A84-13805
Flame radiation and liner heat transfer in a tubular-can combustor
[NASA-TM-83538] p 133 N84-13188

CONTAINMENT
A laboratory test for evaluating the fire containment characteristics of aircraft class D cargo compartment lining material
[DOT/FAA/CT-83/44] p 27 N84-10035
Flywheel rotor and containment technology development
[DE84-005742] p 484 N84-20884

CONTAMINANTS
System for the removal of airborne contaminants from aircraft environmental control systems
[AD-D011172] p 1008 N84-33615

CONTAMINATION
Air-sampling inlet contamination by aircraft emissions on the NASA CV-990 aircraft
[AIAA PAPER 84-0029] p 279 A84-21283

CONTINUOUS WAVE LASERS
Airspeed and wind shear measurements with an airborne CO₂ CW laser
p 55 A84-11622
A CW CO₂ laser rangefinder/velocimeter using heterodyne detection
p 591 A84-36232
Using an airborne CO₂ CW laser for free stream airspeed and windshear measurements
p 1011 N84-34417

CONTINUOUS WAVE RADAR
Optimising the integration aperture for a high PRF CW surveillance radar -- Pulse Repetition Frequency
p 31 A84-10776

CONTINUUM MECHANICS
Asymptotic methods in mechanics
p 732 A84-37226

CONTOURS

- Analytical and experimental investigation of stator endwall countouring in a small axial-flow turbine [NASA-TP-2309] p 893 N84-32388

CONTRACT INCENTIVES

- The design of computer generated images [AIAA PAPER 84-0556] p 936 A84-46122

CONTRACT MANAGEMENT

- The new procurement concept at the USAF Aeronautical Systems Division on aircraft oxygen systems p 83 A84-10711
- Lessons learned—advanced attack helicopter [AD-A135521] p 294 N84-17177
- An automated airframe production cost model [AD-P002787] p 568 N84-23334
- System safety in aircraft acquisition [AD-A141492] p 761 N84-28763

CONTRAROTATING PROPELLERS

- A transmission for the contra-rotating prop-fan powerplant [AIAA PAPER 84-1196] p 698 A84-37632

CONTROL

- Design environments and the user interface for CAD of control systems p 66 N84-10095
- Modeling and simulation techniques p 66 N84-10096
- Implementing microprocessor technology in aircraft electrical power generating system control p 132 N84-12185
- X-29 flight-research program [NASA-TM-86025] p 292 N84-16168
- Experimental and analytical investigation of active loads control for aircraft landing gear p 354 N84-19886
- Integrated Application of Active Controls (IAAC) technology to an advanced subsonic transport project: Current and advanced act control system definition study, volume 1 [NASA-CR-165631-VOL-1] p 789 N84-28802
- Development and flight evaluation of an augmented stability active controls concept with a small horizontal tail [NASA-CR-165951] p 789 N84-28805
- Digital control loading: A microprocessor-based approach [AD-P003483] p 908 N84-32250

CONTROL BOARDS

- New flight deck design in the light of operational capabilities [MBB-FE-301/S/PUB/109] p 119 A84-15191
- Which solution for the low-intensity lighting of aircraft? p 445 A84-28047

CONTROL CONFIGURED VEHICLES

CRITERIA
Flaw detection reliability criteria. Volume 1: Methods and results [AD-A142001] p 811 N84-30320
CRITICAL FLOW
Unsteady quasi-one-dimensional transonic gas flows p 405 A84-27071
Vortex stability and breakdown p 102 N84-12122
Water-tunnel study of transition flow around circular cylinders [NASA-TM-85879] p 516 N84-23606
CRITICAL LOADING
Nondestructive experimental method for determining critical loads of shell structures under external pressure p 379 A84-23906
The effect of cyclic overloads on the long-term strength of a gas-turbine disk alloy p 711 A84-39488
Analysis of the critical stress for local instability by the method of finite strips p 806 A84-41659
Nondestructive test method for determining the critical pressure on the inside panels of a fuselage fuel tank p 917 A84-45001

CRITICAL PATH METHOD

Frequency encoded auditory display of the critical tracking task
[NASA-TM-85869] p 531 N84-22558

CRITICAL POINT

Calculation of a three-dimensional boundary layer in the vicinity of an isolated critical point p 958 A84-47055

CRITICAL PRESSURE

Nondestructive experimental method for determining critical loads of shell structures under external pressure p 379 A84-23906

Nondestructive test method for determining the critical pressure on the inside panels of a fuselage fuel tank p 917 A84-45001

CROCCO METHOD

On the breakdown of the Crocco temperature-velocity relationship and the law of the wall in compressible two-dimensional turbulent boundary layers p 170 A84-18351

CROSS COUPLING

Techniques in the assessment of helicopter flying qualities p 303 A84-19644

CROSS FLOW

Jet trajectories and surface pressures induced on a body of revolution with various dual jet configurations p 12 A84-11049

Effects of viscosity and surface tension on a jet plume in supersonic crossflow p 405 A84-27128

Surface pressures on a flat plate with dual jet configurations p 646 A84-37932

An analytical model for the vorticity associated with a transverse jet p 652 A84-38042

Wave interactions in swept-wing flows p 659 A84-39320

Supersonic conical separation due to shock vorticity p 743 A84-40830

Thermofluiddynamic experiments with a heated and rotating circular cylinder in crossflow p 922 A84-46320

Re-examination of the maximum normalized vortex-induced side force --- for aerodynamic design p 964 A84-49503

Heat transfer distributions around nominal ice accretion shapes formed on a cylinder in the NASA Lewis icing research tunnel p 243 N84-14463

A lifting surface computer code with jet-in-crossflow interference effects. Volume 1: Theoretical description [NASA-CR-166524] p 271 N84-16147

Body and canard effects on an attached-flow maneuver wing at Mach 1.62 p 335 N84-18163

Delta wings with shock-free cross flow p 338 N84-19282

An investigation of the interaction between multiple dilution jets and combustion products p 616 N84-24758

Fluid forces on a rigid cylinder in turbulent crossflow [DEBA-006384] p 623 N84-25012

An analysis of wave interactions in swept-wing flows [NASA-CR-173723] p 666 N84-27681

Real jet effects on dual jets in a crossflow [NASA-CR-173817] p 808 N84-29161

CRUCIFORM WINGS

Solar powered aircraft [NASA-CASE-LAR-12615-1] p 122 N84-12154

CRUDE OIL

Assessment of Alternative Aircraft Fuels [NASA-CP-2307] p 538 N84-23630

The effect of property changes on jet fuel producibility and cost p 551 N84-23632

CRUISE MISSILES

Tomahawk test program [AIAA PAPER 83-2683] p 48 A84-12302

Application of in-flight thrust determination uncertainty [SAE PAPER 831439] p 432 A84-29453

Investigation of water rotor turbofans for Cruise Missile engines, volume 2 p 62 N84-11173

Investigation of wave rotor turbofans for Cruise Missile engines, volume 1 p 62 N84-11174

DARPA (Defense Advanced Research Projects Agency) air vehicles technology office technical task order contract p 529 N84-23625

Centrifugal scaling laws for ground launch cruise missile shelter [AD-A141572] p 793 N84-28818

Pivotal mono wing cruise missile with wing deployment and fastener mechanism [AD-D011192] p 977 N84-34436

CRUISING FLIGHT

Exhaust system for combat aircraft optimized for supersonic cruise p 574 A84-34172

Classical and neo-classical cruise-dash optimization [AIAA PAPER 84-2125] p 771 A84-42366

Optimum design cruise speed for an efficient short haul airliner p 873 A84-45033

Joint services advanced vertical wing (JVX) program [GPO-22-771] p 53 N84-11160

Engine/airframe interference drag at cruise conditions, using propulsion simulation p 98 N84-12098

Range and endurance of jet-engined airplanes at constant altitude [REPT-83-A1-SER-A] p 124 N84-13175

Helicopter rotor wake geometry and its influence in forward flight. Volume 1: Generalized wake geometry and wake effect on rotor airloads and performance [NASA-CR-3726] p 275 N84-17149

Trending of cruise drag --- aircraft performances [NLR-TR-82078-U] p 351 N84-18200

Measurements of the fuel mileage of a KC-135 aircraft with and without winglets p 687 N84-27690

CRYOGENIC COOLING

Analysis of a high-frequency Stirling Cycle compressor for cryogenic cooling in space p 247 N84-15555

CRYOGENIC EQUIPMENT

Transonic cryogenic test section for the Goettingen tube facility [NASA-TM-77050] p 307 N84-16219

CRYOGENIC FLUIDS

US energy: Aviation perspective [AD-A137766] p 715 N84-27910

CRYOGENIC WIND TUNNELS

Pre-existing seed particles and the onset of condensation in cryogenic wind tunnels [AIAA PAPER 84-0244] p 231 A84-17972

Progress towards large wind tunnel magnetic suspension and balance systems [AIAA PAPER 84-0413] p 231 A84-18075

Cryogenic wind-tunnel model technology development activities at the NASA Langley Research Center [AIAA PAPER 84-0586] p 364 A84-24178

A study of dynamic measurements made in the settling chamber of the Langley 0.3-meter transonic cryogenic tunnel [AIAA PAPER 84-0596] p 365 A84-24186

Investigation of sidewall boundary layer removal effects on two different chord airfoil models in the Langley 0.3-meter Transonic Cryogenic Tunnel [AIAA PAPER 84-0598] p 365 A84-24187

Application of laser anemometry to cryogenic wind tunnels p 368 A84-25226

Cryogenic methods in wind tunnels [AAAF PAPER NT 83-08] p 544 A84-32479

Cryogenic wind tunnels for high Reynolds number testing p 904 A84-42900

Validation of a wall-interference assessment/correction procedure for airfoil tests in the Langley 0.3-meter Transonic Cryogenic Tunnel [AIAA PAPER 84-2151] p 905 A84-44191

Developments in research stimulated by cryogenic wind tunnel construction planning and projects p 991 A84-46764

First cryogenic tests of an airfoil in ONERA/CERT T2 wind tunnel p 949 A84-46767

Video model deformation system for the National Transonic Facility [NAS 1.15:85681] p 81 N84-11457

La Recherche Aerospaciale, Bimonthly Bulletin, no. 1982-2, 207/March-April 1982 p 88 N84-13143

Aerodynamic force measurements with a strain-gage balance in a cryogenic wind tunnel [NASA-TP-2251] p 107 N84-13162

A quasi-continuous transonic wind tunnel for cryogenic operation [ROLLAB-MEMO-RM-096] p 232 N84-15161

The European Transonic Windtunnel (ETW) p 545 N84-23566

The T2 cryogenic wind tunnel with self-adaptable walls at ONERA/CERT p 545 N84-23567

The cryogenic wind tunnel Cologne p 545 N84-23568

Producing a cryogenic gust in an Eiffel type atmospheric wind tunnel with short gust p 545 N84-23569

Prediction of condensation onset and growth in the European Transonic Wind Tunnel (ETW) p 562 N84-23578

Nonadiabatic model wall effects on transonic airfoil performance in a cryogenic wind tunnel p 562 N84-23579

Computation of imaginary-side pressure distributions over the flexible walls of the test section insert for the 0.3-M transonic cryogenic tunnel [NASA-CR-172363] p 666 N84-27678

Technical evaluation report on the Fluid Dynamics Panel Symposium on Wind Tunnels and Testing Techniques [AGARD-AR-193] p 909 N84-32402

Cryogenic wind tunnel technology. A way to measurement at higher Reynolds numbers [NASA-TM-77481] p 993 N84-34451

CRYOGENICS

Study of a LH2-fueled topping cycle engine for aircraft propulsion [AIAA PAPER 83-2543] p 129 A84-15207

High Reynolds number tests of the cast 10-2/DOA2 transonic airfoil at ambient and cryogenic temperature conditions p 514 N84-23575

CRYSTAL OSCILLATORS

Precision oscillators and their role and performance in navigation systems p 40 A84-12456

CRYSTALS

USSR report: Physics and mathematics [JPRS-UPM-84-005] p 941 N84-32081

CUBIC EQUATIONS

Application of the quadrature formula of cubic splines to calculate potential flow past a system of aerodynamic profiles p 89 A84-13404

CUES

Effects of motion base and g-seat cueing of simulator pilot performance [NASA-TP-2247] p 350 N84-18189

A pilot/vehicle model analysis of the effects of motion cues on Harrier control tasks [AD-A136291] p 363 N84-18209

Low-Altitude Database Development Evaluation and Research (LADDER) [AD-P003468] p 944 N84-32243

CUMULATIVE DAMAGE

Fatigue crack initiation in aluminium alloys under programmed block loading p 374 A84-24963

Reliability with imperfect diagnostics --- flight-maintenance sequence p 474 A84-26765

Hot isostatic pressing for the repair of hot section turbine parts p 710 A84-38808

Improved damage-tolerance analysis methodology p 817 A84-44516

A310 structural testing for certification philosophy and application to meet current durability and damage tolerance requirements p 872 A84-45000

CURING

Development and applications of fast-sensitive magnetic rubber inspection formulations p 720 A84-38111

Off-optimum cure conditions for structural adhesives - Some effects on performance p 797 A84-41854

Ultraviolet curable resin system for rapid runway repair [AD-A130364] p 73 N84-10104

High-performance, low-energy-curing resins [AD-A141524] p 800 N84-29000

Low cost thermal protection system processing [AD-D011142] p 915 N84-32434

CURRENT AMPLIFIERS

Evaluation of the variable reluctance transducer/carrier amplifier method of measuring low pneumatic pressures in aerodynamic and propulsion testing [AD-A130695] p 79 N84-10546

CURTAINS

Passive Arm Restraint Curtain (PARC) for Navy aircraft ejection seats [AD-A139435] p 518 N84-23615

CURTISS-WRIGHT AIRCRAFT

Were the Wrights right? --- canard configuration applications to fighter aircraft p 258 A84-20991

CURVATURE

Experimental investigation of curvature effects on ventilated wall jets p 10 A84-10131

A lifting line theory for curved helicopter blades in hovering and axial flight p 261 A84-19655

A calculation of internal flows in a rotating fluid with curved streamlines of relative motion p 721 A84-38671

Film cooling on a gas turbine blade near the end wall [ASME PAPER 84-GT-42] p 980 A84-46903

A conformal mapping technique for nonsymmetric potential flows with separation p 20 N84-11138

Potential flow through a cascade of alternately displaced circular bodies: The rod-wall wind tunnel boundary conditions [NASA-TM-85750] p 410 N84-20487

Film cooling on a gas turbine blade near the end wall [AD-A138794] p 536 N84-22569

A universal 3-dimensional wall pressure correction method for closed rectangular subsonic wind tunnel test sections (displacement, downwash, streamline curvature) [ESA-TT-800] p 545 N84-22588

NASA-FAA helicopter Microwave Landing System curved path flight test [NASA-TM-85933] p 523 N84-23617

Development of temperature, velocity, and concentration profiles in a curved combustor p 608 N84-24757

CURVED PANELS

Nondestructive experimental method for determining critical loads of shell structures under external pressure p 379 A84-23906

Comment on 'Noise transmission into semicylindrical enclosures through discretely stiffened curved panels' p 393 A84-24570

Nonlinear response and failure characteristics of clamped internally pressurized graphite-epoxy cylindrical panels [AIAA PAPER 84-0955] p 555 A84-31680

Nonlinear bending and collapse of long, thin, open section beams and corrugated panels [ASME PAPER 84-APM-4] p 622 A84-36160

Large deformation behavior of long shallow cylindrical composite panels [NASA-CR-173288] p 560 N84-22975

CUSHIONS

A nonlinear analysis of the cushion stability of slowly oscillating ACV's p 646 A84-37941

Optimization of aircraft seat cushion fire blocking layers [NASA-TM-85430] p 28 N84-10037

Correlation of laboratory-scale fire test methods for seat blocking layer materials with large-scale test results [AD-A131666] p 109 N84-12138

Fire blocking systems for aircraft seat cushions [NASA-CASE-ARC-11423-1] p 968 N84-33394

CUTTERS

T-700 blisk/impeller cutter life improvement program p 923 A84-46346

Rapid runway repair program subtask 1.07 - rapid concrete cutting [AD-A131771] p 139 N84-12195

Economic roughing and finish milling with end mills made of high speed tool steel class HSS-E: High cobalt alloyed p 383 N84-18442

Tubing and cable cutting tool [NASA-CASE-LAR-12786-1] p 729 N84-28085

CUTTING

Rapid runway repair program subtask 1.07 - rapid concrete cutting [AD-A131771] p 139 N84-12195

Tubing and cable cutting tool [NASA-CASE-LAR-12786-1] p 729 N84-28085

CV-990 AIRCRAFT

Experimental determination of the boundary layer at air-sample inlet positions on the NASA CV 990 aircraft [AIAA PAPER 84-0028] p 265 A84-21282

Air-sampling inlet contamination by aircraft emissions on the NASA CV-990 aircraft [AIAA PAPER 84-0029] p 279 A84-21283

CYCLIC LOADS

Fracture, longevity, and damage tolerance of graphite/epoxy filamentary composite material p 236 A84-17411

Calculation of the life of a wing panel element p 242 A84-19183

Life distribution under various operating conditions of random cyclic loads - fatigue strength of aircraft construction elements p 309 A84-22407

Thermoelastic limit cycling of zippered cross section spacecraft booms [AIAA PAPER 84-1065] p 613 A84-34915

Crack closure and overload effects in fatigue p 721 A84-39218

The effect of cyclic overloads on the long-term strength of a gas-turbine disk alloy p 711 A84-39488

Cycle counting for fatigue crack growth analysis p 996 A84-48713

The effect of superposing ripple loading of maneuver load cycles [AD-A132653] p 205 N84-15148

Fatigue crack growth in aluminum alloy sheet material under constant amplitude and simplified flight simulation loading [VTH-LR-381] p 376 N84-19561

Development of a simplified procedure for cyclic structural analysis [NASA-TP-2243] p 484 N84-20878

The cyclic behaviour of a powder Ni-base superalloy - aircraft engines [PNR-90182] p 550 N84-22743

Mode 2 fatigue crack growth specimen development [NASA-TM-83722] p 809 N84-29248

CYLINDERS

Supersonic flow past a plate and a cylinder in the case of injection from a lateral surface p 171 A84-19003

Reynolds number effect on the aerodynamic characteristics of an ogive-cylinder at high angles of attack [AIAA PAPER 84-2176] p 746 A84-41341

Flow past a cylinder in the presence of a jet in its wake p 839 A84-45712

A method for the experimental investigation of plane and axisymmetric nonswirling flows by means of a cylindrical pressure head over a wide range of Mach numbers p 958 A84-47058

CYLINDRICAL BODIES

Transonic flow calculations using a flux vector splitting method for the Euler equations [AIAA PAPER 84-0090] p 158 A84-17875

Interaction between a turbulent planar plate boundary layer and a planar cylinder wake p 264 A84-20843

The icing of an unheated, nonrotating cylinder. I - A simulation model p 389 A84-23647

Transient ablation of blunt bodies at angles of attack p 716 A84-36555

Interference effects between spherically blunted cylinders at $M = 2.5$ and 1.5 [AIAA PAPER 84-2098] p 750 A84-42349

Measurement of convective heat transfer to solid cylinders inside ventilated shrouds [AIAA PAPER 84-1725] p 921 A84-46129

Re-examination of the maximum normalized vortex-induced side force - for aerodynamic design p 964 A84-49503

Heat transfer distributions around nominal ice accretion shapes formed on a cylinder in the NASA Lewis icing research tunnel [NASA-TM-83557] p 243 N84-14463

Wind tunnel tests on a nonaxisymmetric projectile shape at Mach numbers 2.5 to 6.0 [AD-A135784] p 337 N84-18177

Fluid flows on a rigid cylinder in turbulent crossflow [DE84-006364] p 623 N84-25012

Low cost thermal protection system processing [AD-D011142] p 915 N84-32434

Application of stiffened cylinder analysis to ATP interior noise studies [NASA-CR-172384] p 942 N84-33147

CYLINDRICAL CHAMBERS

Vortex motion in axisymmetric piston-cylinder configurations p 474 A84-27137

A comparison between the limiting theoretical characteristics of supersonic gas ejectors with isobaric and cylindrical mixing chambers p 959 A84-47074

Unstable interaction between an underexpanded supersonic jet and a cylindrical cavity p 959 A84-47075

CYLINDRICAL SHELLS

Nondestructive experimental method for determining critical loads of shell structures under external pressure p 379 A84-23906

Response of long shallow cylindrical panels to radial line loads [AIAA PAPER 84-0954] p 555 A84-31660

Singular propagation behavior of cracks in stiffened cylindrical shells p 558 A84-32624

Aeroelastic optimization of axisymmetric circular cylindrical shells for supersonic flow p 619 A84-34722

Large deformation behavior of long shallow cylindrical composite panels [NASA-CR-173286] p 560 N84-22975

Theoretical and experimental results of dynamic behavior of periodically stiffened cylindrical shell p 690 N84-27731

CYPRUS

A new Air Traffic Control system for Cyprus p 425 A84-28141

DAMAGE

Improved acrylic systems for rapid runway repair [AD-A130389] p 73 N84-10103

Ultraviolet curable resin system for rapid runway repair [AD-A130364] p 73 N84-10104

The effects of weather on rapid runway repair, volume 2 [AD-A130350] p 73 N84-10105

The significance of defects and damage in composite structures p 75 N84-10219

Defect occurrences in the manufacture of large CFC structures and work associated with defects, damage and repair of CFC components p 76 N84-10223

Statistical approach to damage tolerance assessment [SNIAS-832-111-112] p 596 N84-24575

Battle damage repair of birdstrike resistant laminated transparencies [AD-P003185] p 684 N84-26598

Civil aircraft windscreen damage due to birdstrikes [AD-P003214] p 673 N84-26627

USAF aircraft windshield/canopy bird strikes [AD-P003215] p 673 N84-26628

Evaluation of selected commercial construction equipment for bomb damage repair [AD-A140907] p 707 N84-26714

Bomb damage repair: Precast slab design [AD-A141687] p 793 N84-28819

Evaluation of the pavement condition index for use on porous friction surfaces [AD-A144521] p 994 N84-34453

DAMAGE ASSESSMENT

The application of ferrography to the condition monitoring of gas turbines p 57 A84-10353

Procedure for working up a case of structural damage p 380 A84-24427

Damage tolerance in aerospace components; Colloquium on Steels and Special Alloys in Aeronautics, 10th, Le Bourget, Seine-Saint-Denis, France, June 1983, Proceedings p 473 A84-29959

The damage tolerance design philosophy - for aircraft p 437 A84-29960

Metallurgical aspects of metallic materials and damage tolerance in accessory gearboxes p 482 A84-29961

Lightning and composite materials p 852 A84-44950

Description and analysis of PACAM 5 (Piloted Air Combat Analysis Model) as a tactical decision aid with a user's guide for operation at NPS [AD-A136793] p 393 N84-20313

A study of pump cavitation damage - space shuttle main engine high pressure oxidizer turbopump [NASA-CR-170992] p 483 N84-20783

A simulation model to evaluate aircraft survivability and target damage during offensive counterair operations [AD-A141324] p 689 N84-27728

Cost/risk analysis for disk retirement, volume 1 [AD-A141978] p 784 N84-29881

DAMPERS

Experimental analysis of damper behavior of squeeze film dampers for gas turbine engines [ASME PAPER 84-GT-8] p 1000 A84-46879

DAMPERS (VALVES)

Experimental study of uncentralized squeeze film dampers [NASA-CR-168317] p 388 N84-19927

DAMPING

Prediction of stiffness and damping coefficients for centrifugal compressor labyrinth seals [ASME PAPER 84-GT-86] p 1002 A84-46928

Dual clearance squeeze film damper [NASA-CASE-LEW-13506-1] p 535 N84-22562

Preliminary evaluation of waveguide vibration absorbers [AD-A140743] p 727 N84-27070

DAST PROGRAM

Eigenspace design of an active flutter suppression system [AIAA PAPER 84-1867] p 894 A84-43425

DATA ACQUISITION

Applications of inertial systems as flight test sensors [AIAA PAPER 83-2738] p 56 A84-12330

Evolution in flight test techniques - Application at Aeritalia [AIAA PAPER 83-2744] p 49 A84-12335

The impact of cross-rate interference on the acquisition and track modes of Loran-C receivers p 39 A84-12434

A distributed computer system for control, data acquisition and processing in a blowdown wind tunnel p 367 A84-25212

High-speed data-acquisition system for aerodynamics experiments p 466 A84-27950

Automated data system for helicopter structural fatigue testing p 544 A84-32443

CF6-80 condition monitoring - The engine manufacturer's involvement in data acquisition and analysis [AIAA PAPER 84-1412] p 697 A84-36976

Data-measuring systems for flight testing of fixed wing and rotary wing aircraft - Russian book p 775 A84-40134

Possibilities of the SOFEM system from the viewpoint of data generation p 813 A84-41652

The CEMS (Comprehensive Engine Management System) IV OAP (Oil Analysis Program) algorithm [AD-A131055] p 60 N84-10072

Low temperature behavior of fuels in simulated aircraft tanks [AD-A130267] p 76 N84-10336

Data acquisition for stall/spin flight research p 67 N84-11111

Incident reporting: Its role in aviation safety and the acquisition of human error data p 184 N84-15081

The analysis of records of parameters: An indispensable tool in oversight and in operations control p 184 N84-15082

[AIAA PAPER 84-0088] p 241 A84-17871

Computational requirements for efficient engine installation

[AIAA PAPER 84-0120] p 196 A84-17893

Aerodynamic design of high contraction ratio, subsonic wind tunnel inlets

[AIAA PAPER 84-0416] p 167 A84-18078

Thin turbomachinery blade design using a finite-volume method

[AIAA PAPER 84-0438] p 217 A84-18093

Multidimensional turbulent combustion - Analysis, applications and limitations

[AIAA PAPER 84-0477] p 296 A84-18891

A strain-gage aerodynamic balance - TENSOMETERS

p 306 A84-22325

Kevlar parachute design and performance

[AIAA PAPER 84-0810] p 416 A84-26574

Aircraft design philosophy

p 430 A84-27896

The design of high-efficiency turbomachinery and gas turbines - Book

p 478 A84-28822

Aircraft tires - Some design aspects

p 431 A84-29400

The scientific approach and cockpit design - They are compatible

[SAE PAPER 831466] p 432 A84-29499

The aerodynamic design of the Airbus A300-600

[DGLR PAPER 83-123] p 436 A84-29683

An advanced maintenance recorder

p 531 A84-31309

Analytical design and assurance of digital flight control system structure

p 541 A84-32711

Design and performance of a new low turbulence wind tunnel at Bristol University

p 544 A84-32792

Analysis and design considerations of hard limiters for LF and VLF navaid receivers

p 675 A84-36914

Internal flow field calculations for annular combustion configurations

[AIAA PAPER 84-1168] p 697 A84-37627

Aspects of the aerodynamic design of a thin supercritical, forward swept wing for a combat aircraft

p 654 A84-38414

Computational aerodynamics and artificial intelligence

[AIAA PAPER 84-1531] p 733 A84-39306

Flight service evaluation of composite helicopter components

p 864 A84-42750

Validation of design methods and data by flight test

p 869 A84-44947

UHS1 - An efficient three dimensional shape optimal design program

p 935 A84-45017

A computer augmented procedure for commercial aircraft Preliminary design and optimization

p 873 A84-45031

Aircraft structural design - Russian book

p 874 A84-46047

A combined direct/inverse three-dimensional transonic wing design method for vector computers

[AIAA PAPER 84-2156] p 843 A84-46102

Optimum design of rotor blades for vibration reduction in forward flight

p 878 A84-46379

The inverse design of internally cooled turbine blades

[ASME PAPER 84-GT-7] p 950 A84-46878

Design of highly loaded blade profiles using an iterative inverse-direct computational procedure

[ASME PAPER 84-GT-22] p 950 A84-46887

Axial compressor stator aerodynamics

[ASME PAPER 84-GT-90] p 953 A84-46932

An advanced facility for the analysis of gas turbine exhausts

[ASME PAPER 84-GT-85] p 992 A84-46936

Flow in a centrifugal fan impeller at off-design conditions

[ASME PAPER 84-GT-182] p 1005 A84-46983

A simple method for solving three-dimensional inverse problems of turbomachine flow and the annular constraint condition

[ASME PAPER 84-GT-198] p 954 A84-46994

An experimental determination of the optimum outlet-inlet rotor blade height ratio for radial inward-flow microturbines

p 986 A84-47559

Redesigning fuselage compartments by the special contour method

p 973 A84-47580

The theory for optimal lifting surfaces - Russian book

p 961 A84-47622

Wind tunnel models - A designer's tool

p 992 A84-49370

A new aircraft design tool - Computational fluid dynamics

p 963 A84-49389

Performance and robustness aspects of digital control systems

p 67 A84-10098

Aeroelastic design considerations in the development of helicopters

p 52 A84-11126

Quang 5 attack aircraft of the PRC

[AD-A131058] p 53 N84-11161

Energy efficient engine: Flight propulsion system, preliminary analysis and design update

[NASA-CR-167980] p 61 N84-11170

Safety report: General aviation crashworthiness project, phase 1

[PB83-917004] p 110 N84-12142

Optimization of engine power offtake by secondary power system design

p 131 N84-12177

Analytical design of a liquid hydrogen fueled turbofan-ranjet engine for flight Mach numbers zero to five

p 133 N84-12187

Airborne Intelligent Display (AID) phase 1 software development

[ATC-123] p 127 N84-13181

Transonic flow over an isolated profile and through a cascade of blade. Phenomenological analysis

p 175 N84-14118

Tactical requirements impact on avionics/weapon system design

p 211 N84-15036

Operational readiness and its impact on fighter avionics system design

p 211 N84-15037

A practical approach to the design of a new avionic system

p 213 N84-15058

SP-100 program: Space reactor system and subsystem investigations

[DE84-003217] p 323 N84-18045

A wind tunnel investigation to determine dominant forebody strake design characteristics for an F-15 equipped with conformal fuel tanks

[AD-A136912] p 340 N84-19292

AVRADCOM research helicopter vibration

p 353 N84-19887

Implications of control technology on aircraft design

p 461 N84-20573

Algorithms for output feedback, multiple-model, and decentralized control problems

p 462 N84-20583

Development of the parachute recovery system for the LBRV-2 reentry vehicle

[DE84-001540] p 414 N84-21518

Contingency power concepts for helicopter turboshaft engine

[NASA-TM-83679] p 539 N84-23648

Design and analysis of Coordinated Bank-To-Turn (CBTT) autopilots for Bank-To-Turn (BT) missiles

[AD-A140103] p 613 N84-24698

Special Course on V/STOL Aerodynamics

[AGARD-R-710] p 573 N84-25625

Aero/thermodynamic and acoustic considerations in the design of test-beds for turbojets and turbofans

p 612 N84-25725

Determination of the stable operating conditions of an axial flow compressor

p 626 N84-25971

Overview of HUD (Head-Up Display) optical designs

[AD-P003157] p 735 N84-26588

Aerodynamic design using numerical optimization

[NASA-TM-85550] p 662 N84-26661

Design study for a low density wind tunnel

[INPE-3072-TDL/160] p 706 N84-26707

Advanced aerodynamics. Selected NASA research

[NASA-CP-2208] p 638 N84-27660

EET theoretical design techniques

p 687 N84-27668

Two-dimensional aerodynamic characteristics of an airfoil designed for two

[NASA-TP-1965] p 668 N84-27694

Development situation for guiding systems

p 705 N84-27747

Advanced application of the printed circuit board testability design and rating system

[AD-A141147] p 728 N84-27989

Implementation and performance of algorithms on a vector calculator

[SNIAS-832-111-104] p 734 N84-28519

Configuration design studies and wind tunnel tests of an energy efficient transport with a high-aspect-ratio supercritical wing

[NASA-CR-3524] p 740 N84-28727

Results of design studies and wind tunnel tests of high-aspect-ratio supercritical wings for an energy efficient transport

[NASA-CR-159332] p 754 N84-28735

Study of aerodynamic technology for single-cruise engine V/STOL fighter/attack aircraft

[NASA-CR-166271] p 754 N84-28737

Computer program documentation for a subcritical wing design code using higher order far-field drag minimization

[NASA-CR-3457] p 755 N84-28740

A preliminary design study on an acoustic muffler for the laminar flow transition research apparatus

[NASA-CR-172374] p 756 N84-28748

Aerospace engineering design by systematic decomposition and multilevel optimization

[NASA-TM-85823] p 772 N84-28775

Development of Integrated Programs for Aerospace-vehicle Design (IPAD). IPAD user requirements: Implementation (first-level IPAD)

[NASA-CR-162713] p 772 N84-28776

Design of incident field B-dot sensor for the nose boom of NASA F-106B aircraft

[AD-A141765] p 776 N84-28787

The initial mechanical design of hot gas turbine blading using limited information

[PNR-90183] p 808 N84-29234

Acoustic design criteria and validation

p 817 N84-29663

Noise reduction experience at Hughes Helicopter, Inc.

p 817 N84-29666

NASA/Army supported noise source/noise reduction programs at Langley

p 817 N84-29669

Software modifications to the Demonstration Advanced Avionics Systems (DAAS)

[NASA-TM-85942] p 862 N84-31105

Wing design for minimum drag with practical constraints

p 878 N84-31109

Achieving the benefits of modular avionics design

[AD-P003562] p 884 N84-31167

Application of TOS/AMS to TDRS E and F

[NASA-CR-171124] p 910 N84-31225

Flight service evaluation of two aluminum-brazed titanium spoilers

[NASA-CR-172371] p 915 N84-31343

Positive displacement compounding of a heavy duty diesel engine

[NASA-CR-168286] p 926 N84-31641

Fault tolerant software modules for SIFT

[NASA-CR-165874] p 937 N84-31955

Energy efficient engine component development and integration program

[NASA-CR-173884] p 894 N84-32389

A high energy stage for the National Space Transportation System

[NASA-TM-83795] p 912 N84-32411

DESIGN TO COST

Effect of aircraft performance requirements on engine trades

[AIAA PAPER 84-1258] p 680 A84-37638

Development of modular air data computer family for minimum cost of ownership

p 882 A84-45047

Engine affordability - aircraft engines

[PNR-90178] p 536 N84-22574

DESTRUCTIVE TESTS

Ballistic testing of composite materials

p 913 A84-43893

DETECTION

Detection of cavities under concrete pavement

[AD-A131851] p 142 N84-12331

Sensor failure detection for jet engines using analytical redundancy

[NASA-TM-83695] p 606 N84-24585

DETECTORS

Flow improvements in the NASA Langley 4- by 7-meter tunnel circuit

[AIAA PAPER 84-0603] p 330 A84-24191

Flow improvements in the circuit of the Langley 4- by 7-meter tunnel

[NASA-TM-85682] p 177 N84-15117

DETERIORATION

Long term evaluation of the effects of shale oil produced JP-4 on aircraft construction materials

[AD-A131665] p 123 N84-12161

Safety recommendations A-84-1 through -3

p 588 N84-25673

DETONABLE GAS MIXTURES

Motion of solid bodies in combustible gas mixtures

p 477 A84-28385

DETONATION WAVES

Weak spherical shock-wave transitions of N-waves in air with vibrational excitation

p 379 A84-23871

 Command flight path display, phase 1 and 2 [AD-A140870] p 707 N84-26711
 Command flight path display, phase 1 and 2. Appendices A - E [AD-A140871] p 707 N84-26712
 Alternative voice switching and control system display panel format simulation and evaluation [NASA-CR-173644] p 725 N84-26973
 Evaluation of HiMAT aircraft landing approach lateral control gearing using simulation and a visual display [NASA-TM-84916] p 704 N84-27743
 Simulator evaluation of a remotely piloted vehicle lateral landing task using a visual display [NASA-TM-85903] p 791 N84-29885
 A data acquisition and real-time display system for testing a jet engine compressor [AD-A142696] p 811 N84-30301
 A route generator concept for aircraft onboard fault monitoring [NASA-TM-86264] p 862 N84-31104
 Aircraft lifter [NASA-CASE-LAR-12518-1] p 887 N84-32383
 A dual digital to video converter and color video insetter for avionics symbology and messages [AD-A143772] p 979 N84-33408
 Comparison of color versus black-and-white visual displays as indicated by bombing and landing performance in the 2B35 TA-4J flight simulator [AD-A144674] p 994 N84-34455

DISSIPATION

The relationship between electrical conductivity and temperature of aviation turbine fuels containing static dissipator additives [AD-A135751] p 375 N84-18421
 Warm fog dissipation using large volume water sprays [NASA-CASE-MFS-25962-1] p 908 N84-32398

DISTANCE

The feasibility, practicality and utility of P-3 inflight refueling [AD-A143419] p 881 N84-32382

DISTANCE MEASURING EQUIPMENT

DME/P - The new international standard p 39 A84-12431
 Recognition of measurement errors in DME by estimation of impulse parameters p 284 A84-22598
 System considerations for the new DME/P international standard - precision Distance Measuring Equipment [AD-P003577] p 425 A84-27944

Second generation Vortac equipment p 519 A84-32327

New family of Tacan and DME equipment p 520 A84-32331

Further development of the DPS technique for precision DME - Double Pulse Shaping p 520 A84-32334

RF subsystems for precision DME p 520 A84-32335

Off-shore helicopter radio navigation using DME-based positioning system p 521 A84-32337

Precision distance measuring equipment for the microwave landing system p 521 A84-32340

An application of DME for measuring real time field performance p 868 A84-44481

A new concept of an integrated navigation, communication, and surveillance system based on the standard DME p 860 A84-45064

Precision DME - Distance measurement in the MLS p 970 A84-48124

Evaluation of radio navigation systems and their configuration with respect to minimum cost [DFVLR-FB-83-32] p 347 N84-19329

Airborne real time multisensor navigation [AD-B079957] p 428 N84-21534

Development, set up and testing of a measuring system for components of the Derived Azimuth System (DAS) [BMFT-FB-W-84-005] p 766 N84-28773

DISTILLATION

Turbine engine lubricant reclamation [AD-A135926] p 375 N84-18410

DISTORTION

Research on aero-thermodynamic distortion induced structural dynamic response of multi-stage compressor blading [AD-A133853] p 219 N84-14151

Test-engine and inlet performance of an aircraft used for investigating flight effects on fan noise [NASA-TP-2254] p 495 N84-21277

Fluid dynamic aspects of turbine engine testing p 538 N84-23586

Investigation of the behavior of axial compressor stages with steady state inlet distortions [DFVLR-FB-83-39] p 607 N84-24590

Introduction to unsteady flow in turbomachines p 625 N84-25962

Response of a small-turboshaft-engine compression system to inlet temperature distortion [NASA-TM-83765] p 988 N84-33414

Method for dynamically recording distortion in a transparency [AD-D011209] p 1011 N84-34707

DISTRIBUTED PARAMETER SYSTEMS

Optimum design in distributed parameter systems p 722 A84-39738

Distributed parameter system theory of autopilot design of slender vehicle p 704 A84-39740

A fault-tolerant distributed computer network design and analysis for an integrated flight control system p 137 N84-12189

DISTRIBUTED PROCESSING

Distributed asynchronous microprocessor architectures in fault tolerant integrated flight systems [AIAA PAPER 83-2342] p 54 A84-10017

DERD-MC - A modular, distributed-processing ATC system p 37 A84-12187

A distributed, real time, flight test system [AIAA PAPER 83-2732] p 71 A84-12325

A distributed microprocessor system architecture for implementing maintenance trainers with 3-D simulation p 249 A84-16615

Distributed mini/microprocessor architecture for avionics systems maintenance trainers p 250 A84-16616

Distributed avionics processing using ADA p 250 A84-16647

A distributed computer system for control, data acquisition and processing in a blowdown wind tunnel p 367 A84-25212

Distributed estimation in the MIT/LL DSN testbed - Distributed Sensor Networks p 345 A84-25462

Fault tolerant flight control avionics integration using MIL-STD-1553B p 456 A84-26744

Distributed processing in modern navigation systems p 425 A84-27942

Joint University Program for Air Transportation Research, 1982 [NASA-CP-2285] p 4 N84-11099

Distributed processing and fiber optic communications in air data measurements p 43 N84-11110

Distributed avionic computers [AD-A142140] p 814 N84-29494

Options and opportunities for standards: A NATO/AGARD viewpoint [AD-P003577] p 925 N84-31182

DITCHING (LANDING)

Development of helicopter underwater escape training for aircrew and passengers p 23 A84-10720

Survival after helicopter ditching - A technical guide for policy-makers p 278 A84-20079

A review of UK registered helicopter ditchings in the North Sea p 672 A84-39709

Study on transport airplane unplanned water contact [AD-A142092] p 761 N84-28764

DIVERGENCE

Divergence boundary prediction from random responses - NAL's method - aeroelastic instability boundary estimation for subcritical divergence cantilever wing model test p 619 A84-34463

Divergence of forward swept wings p 682 A84-38424

Refined methods of aeroelastic analysis and optimization - swept wings, propeller theory, and subsonic flutter [NASA-CR-173967] p 1010 N84-33835

DO-28 AIRCRAFT

Aerodynamic improvements in wing and propeller design as exemplified by the Do 28 TNT p 11 A84-10564

The design of control forces and their adaptation in a flight test, taking into account the example of the DO 228 p 120 A84-15414

DOCUMENT STORAGE

Weapons file [AD-A142508] p 774 N84-29867

DOCUMENTATION

Universal documentation system handbook. Supplement 2: Procedures for the electronic processing of level 1, 2 and 3 test requirements and support information [AD-A141850] p 796 N84-28886

Flight systems raster graphics software reference manual [ARL-SYS-TM-72] p 938 N84-33072

DOMESTIC SATELLITE COMMUNICATIONS SYSTEMS

Oscar satellites, amateur radio in space p 995 A84-48416

DOORS

Mach 0.6 to 3.0 flows over rectangular cavities [AD-A134579] p 272 N84-16153

DOPPLER EFFECT

Optimization of fringe-type laser anemometers for turbine engine component testing [AIAA PAPER 84-1459] p 804 A84-40248

Doppler lidar signal and turbulence study [NASA-CR-170976] p 318 N84-17574

Optimization of fringe-type laser anemometers for turbine engine component testing [NASA-TM-83658] p 623 N84-25019

DOPPLER NAVIGATION

Evaluation of the ionospheric refraction correction algorithm for single-frequency Doppler navigation using TRANET-II data p 38 A84-12429

Strapdown inertial navigation systems for helicopters p 283 A84-19618

Improvement of the accuracy of Doppler direction finders for general aviation by spectral signal analysis - German thesis p 590 A84-35694

Evaluation of installation of Lightweight Doppler Navigation System (LDNS) in Iroquois UH-1H aircraft [AD-A137815] p 427 N84-20510

Emulation of a voice interactive Doppler navigation set [AD-A140204] p 593 N84-25687

Satellite Doppler point positioning using the Navy Navigation Satellite System p 766 N84-29281

Final results of Doppler point positioning at several timekeeping laboratories in Europe p 766 N84-29282

AN/APN-128 Lightweight Doppler Navigation System (LDNS) case study report (IDA/OSD R and M (Institute for Defense Analyses/Office of the Secretary of Defense Reliability and Maintainability) study [AD-A142072] p 766 N84-29860

DOPPLER RADAR

Sacrifices in radar clutter suppression due to compromises in implementation of digital Doppler filters
p 30 A84-10760

The Federal Aviation Administration weather radar research and development program
p 81 A84-10818
A novel 35-GHz 3-D radar for flight assistance
p 34 A84-10833

Mirage 2000 avionics in series production
p 425 A84-28046

Programmable millimeter wave (MMW) radars for gun fire control
p 426 A84-28445

Performance evaluation of the adaptive MTI canceller for extended clutter, ACEC
p 554 A84-30517

Design and testing of an MTD subsystem for air traffic control radars
p 763 A84-40379

Radar detection of birds hazardous to aircraft
p 859 A84-44747

Doppler polarisation spectral resolution of radar signals
p 860 A84-45627

Microburst wind structure and evaluation of Doppler radar for airport wind shear detection
p 1012 A84-46821

Doppler weather radar applications to terminal and enroute air traffic control
p 731 A84-28324

Comparison of airborne turbulence-indicating doppler radar systems with ground-based doppler radar systems [AD-A141474]
p 807 A84-29043

Doppler observation campaign in the Ivory Coast: Reconnaissance, measuring, interpretation and experience
p 766 A84-29289

Radar cross section measurements of wingtip vortices
p 1012 A84-33934

Evaluation of airborne lidar wind measurements
p 1013 A84-34865

DORNIER AIRCRAFT

Testing structural integrity and service life
p 706 A84-38618

The Dornier Flight Test Centre
p 706 A84-38619

DOSAGE

Exploration of dose-response techniques with some applications to a simulation problem [AD-A138029]
p 492 A84-22252

DOWNLINKING

Fundamentals of mode S parity coding [DOT/FAA/PM-83/6]
p 483 A84-20736

DOWNWASH

A method for computing the kernel of the downwash integral equation for arbitrary complex frequencies [AIAA PAPER 84-0983]
p 506 A84-31754

Calculation of trailing vortex sheet and downwash field behind a sweptback wing
p 842 A84-46007

A universal 3-dimensional wall pressure correction method for closed rectangular subsonic wind tunnel test sections (displacement, downwash, streamline curvature) [ESA-TT-800]
p 545 A84-22588

DRAG

Aeroelastic considerations in preliminary design of a military combat aircraft
p 53 A84-11132

Transonic flow over an isolated profile and through a cascade of blade. Phenomenological analysis
p 175 A84-14118

Airfoil interaction with impinging vortex [NASA-TP-2273]
p 335 A84-18159

Numerical analysis of a variable camber rotor blade as a lift control device [NASA-CR-173452]
p 439 A84-21538

An experimental and theoretical analysis of the aerodynamic characteristics of a biplane-winglet configuration [NASA-TM-85815]
p 772 A84-28779

DRAG CHUTES

Parachuting in night conditions [FOA-C-59010-H1]
p 675 A84-27708

Parachute descent from altitude 5000 to 7000 meters [FOA-C-59008-H1]
p 757 A84-28758

DRAG DEVICES

Direct force control
p 65 A84-10090

DRAG MEASUREMENT

Sidewall boundary layer corrections in subsonic, two-dimensional airfoil/hydrofoil testing [AIAA PAPER 84-1366]
p 620 A84-35195

A method for measuring skin friction drag on a flat plate in contaminated gas flows
p 646 A84-37943

Comparative investigations on friction drag measuring techniques in experimental aerodynamics
p 832 A84-44972

Sidewall boundary layer corrections in subsonic, 2-dimensional airfoil-hydrofoil testing [AD-A144002]
p 966 A84-33391

Determination of external store drag
p 976 A84-34397

DRAG REDUCTION

An analytical study of the induced drag of canard-wing-tail aircraft configurations with various levels of static stability
p 63 A84-11170

Cloud particle effects on laminar flow and instrumentation for their measurement aboard a NASA LFC aircraft [AIAA PAPER 83-2734]
p 56 A84-12327

An exploratory study of area-efficient vortex flap concepts
p 92 A84-14737

Minimum induced drag of wings with curved planform
p 153 A84-17415

Analytical and experimental studies on natural laminar flow nacelles [AIAA PAPER 84-0034]
p 156 A84-17839

Performance of large-eddy breakup devices at post-transitional Reynolds numbers [AIAA PAPER 84-0345]
p 241 A84-18037

Optimization and application of riblets for turbulent drag reduction [AIAA PAPER 84-0347]
p 166 A84-18039

Aerodynamics of the helicopter rear fuselage upswEEP
p 261 A84-19654

A nonlinear structural concept for drag-reducing compliant walls
p 329 A84-23365

Advancements in the aerodynamic integration of engine and airframe systems for subsonic aircraft
p 524 A84-31316

Supersonic flow of a gas past bodies of revolution in the presence of strong localized two-phase injection from the body surface
p 506 A84-32157

An advanced aerospike to minimize nose drag
p 573 A84-33849

Winglet effects on the flutter of twin-engine-transport type wing [AIAA PAPER 84-0905]
p 594 A84-34907

The aerodynamic optimization of wings in the subsonic speed range and the influence of the design of the wing tips — German thesis
p 639 A84-36992

Significant drag reduction results for twinpack turbofan nacelle installations using combination of wind tunnel force balance, flow visualization, and three dimensional computational methods [AIAA PAPER 84-1328]
p 680 A84-37646

Porosity effect on supercritical airfoil drag reduction by shock wave/boundary layer control [AIAA PAPER 84-1682]
p 653 A84-38054

Turbulent boundary-layer relaxation with application to skin-friction drag reduction
p 655 A84-38827

Induced drag reduction with wing tip mounted propellers [AIAA PAPER 84-2149]
p 769 A84-41329

Progress in natural laminar flow research [AIAA PAPER 84-2222]
p 807 A84-42617

DC-10-10 winglet flight test program management
p 866 A84-44452

Improving the efficiency of smaller transport aircraft
p 869 A84-44928

New drag reduction methods for transport aircraft
p 833 A84-44974

Aerodynamic investigation on an adaptive airfoil for a transonic transport aircraft
p 835 A84-45024

On optimum supersonic wings with subsonic leading edges
p 837 A84-45069

Design integration of laminar flow control for transport aircraft
p 874 A84-45964

Two dimensional turbulent boundary layers over rigid and moving swept wavy surfaces [AIAA PAPER 84-1530]
p 843 A84-46110

Double shock wave almost halves drag
p 846 A84-46476

An application of a gradient method to the minimization of the drag of slender wings in supersonic flow
p 958 A84-47064

Transonic configuration design
p 121 A84-12081

The effects of wing tip devices on the performance of the BAe Jetstream
p 103 A84-12130

Investigation to optimize the passive shock wave-boundary layer control for supercritical airfoil drag reduction [NASA-CR-173276]
p 269 A84-16135

Wave drag as the objective function in transonic fighter wing optimization [NASA-TP-2265]
p 272 A84-17127

Investigation of aerodynamics of non axisymmetric projectiles [AD-A139107]
p 517 A84-23609

International aviation (selected articles) [AD-A140895]
p 663 A84-26671

In-flight lift and drag measurements on a first generation jet transport equipped with winglets
p 667 A84-27689

Improving the efficiency of smaller transport aircraft [NASA-TM-85892]
p 772 A84-28780

Development and flight evaluation of an augmented stability active controls concept with a small tail [NASA-CR-173880]
p 903 A84-32395

DRAINAGE

Rubber removal from porous friction course [FAA-PM-83-31]
p 74 A84-11184

Analytical and experimental study of grooved pavement runoff [AD-A141021]
p 708 A84-27752

DRIFT (INSTRUMENTATION)

Dynamical analysis of a two-gimbal mass-unbalanced dynamically tuned gyroscope
p 806 A84-41785

DRILLING

Multi-small hole drilling by EDM — electrodischarge machining (EDM) [PNR-90184]
p 559 A84-22813

A review of advanced manufacturing technology — gas turbine components [PNR-90194]
p 559 A84-22815

DRIVES

All-electric accessory drive systems: Implications on engine design and performance
p 132 A84-12184

DRONE AIRCRAFT

AN/USD-501 and AN/USD-502 airborne surveillance drones
p 430 A84-27250

Self-destructing drone design costs challenge engineers
p 524 A84-31335

Nonconservative evaluation of uniform stability margins of multivariable feedback systems [AIAA PAPER 84-1939]
p 934 A84-43466

A multiloop system stability margin study using matrix singular values — for wing flutter suppression and drone lateral attitude control
p 935 A84-45606

Canada boosts RPV and drone investment
p 948 A84-49390

DROOPED AIRFOILS

Engineering analysis of drooped leading-edge wings near stall
p 575 A84-34468

DROP SIZE

The effect of the atmospheric droplet size distribution on aircraft ice accretion [AIAA PAPER 84-0108]
p 181 A84-17886

Producing a cryogenic gust in an Eiffel type atmospheric wind tunnel with short gust
p 545 A84-23569

Electrical spray modification with various fuels in a 156 combustor [AD-A139961]
p 616 A84-24824

DROP TESTS

Adaptation of a 15-ft-dia ribbon parachute and a 73-ft cross main recovery parachute for cargo delivery from high altitude [AIAA PAPER 84-0790]
p 415 A84-26559

Elastic behaviour of composite structures under low velocity impact
p 798 A84-42210

Crash performance of Al and fiber-reinforced-composite structural elements
p 760 A84-42567

Vertical drop test of a transport fuselage section located forward of the wing [NASA-TM-85679]
p 80 A84-10611

DROP TRANSFER

Water droplet trajectory computation around an air intake
p 744 A84-40890

DROPS (LIQUIDS)

Pre-existing seed particles and the onset of condensation in cryogenic wind tunnels [AIAA PAPER 84-0244]
p 231 A84-17972

Study of aerospace materials, coatings, adhesions and processes: Aircraft icing processes [AD-A139743]
p 583 A84-24557

Detailed fuel spray analysis techniques
p 622 A84-24747

Electrical spray modification with various fuels in a 156 combustor [AD-A139961]
p 616 A84-24824

Comparison of icing cloud instruments for 1982-1983 icing season flight program [NASA-TM-83569]
p 776 A84-29870

Organic azides as jet fuel additives: Synthesis of azides and micro-explosion characteristics of droplets
p 801 A84-29963

DROPSONDES

Investigation into the internal aerodynamic design and associated errors in a fast descent ducted sonde for the measurement of atmospheric pressure and temperature (AMPARS phase 2) [AD-A143189]
p 933 A84-32969

DRYING

Influence of the environment on the application and drying quality of organic paints — aircraft structures [SNIAS-832-551-102]
p 617 A84-25833

DUAL SPIN SPACECRAFT

Velocity estimation on a dual-spin spacecraft
p 795 A84-42386

DUAL THRUST NOZZLES

Jet trajectories and surface pressures induced on a body of revolution with various dual jet configurations
p 12 A84-11049

DUAL WING CONFIGURATIONS

A new bi-rotor helicopter configuration - Model development and performance predictions
[AIAA PAPER 84-0385] p 197 A84-18054
Benefits of dual wings over single wings for high-performance business airplanes p 291 A84-22172

Dual and single wing design integration-optimized for decalage angle, R(e), and M(cr)
[AIAA PAPER 84-2161] p 769 A84-41335

DUCT GEOMETRY

Contouring of two-dimensional and axisymmetric supersonic channels realizing discontinuous parameters at the outlet and flow leveling p 753 A84-42536

DUCTED FANS

Investigation of a silencer for the powerplant of a modern jet aircraft p 449 A84-28820

DUCTED FLOW

Multiple ducted streams with a periodic or a steady supersonic driver flow
[AIAA PAPER 84-0350] p 166 A84-18042
Comparison of experimental and computational compressible flow in a S-duct
[AIAA PAPER 84-0033] p 172 A84-19228
Investigation of mixing in a turbofan exhaust duct. I
Analysis and computational procedure p 329 A84-23361

Turbulent jet flow in a duct with a circulation zone p 381 A84-25583
Understanding and countering the swirl in S-ducts - Tests on the sensitivity of swirl to fences p 642 A84-37378
A calculation of internal flows in a rotating fluid with curved streamlines of relative motion p 721 A84-38871

LDV measurements of three-dimensional flow development in a curved rectangular duct with inlet shear profile p 657 A84-38898
A marching method for calculating viscous gas flows in ducts p 803 A84-39874

A horseshoe vortex in a duct
[ASME PAPER 84-GT-202] p 748 A84-41638
Pressure losses in gas flows in cylindrical ducts with friction and heating p 917 A84-43935

LDV measurements of three-dimensional flow development in a curved rectangular duct with inlet shear profile
[AIAA PAPER 84-1601] p 844 A84-46114
Simplified method for flow analysis and performance calculation through an axial compressor
[ASME PAPER 84-GT-250] p 957 A84-47026

Development of temperature-, velocity- and concentration-profiles in a curved combustor p 608 A84-24757
An experimental investigation of an underexpanded rectangular jet ejector p 964 A84-33374

DUCTED ROCKET ENGINES

Turbulent mixing and combustion of multi-phase reacting flows in ramjet and ducted rocket environment
[AD-A133802] p 219 N84-14152
Multi-ducted inlet combustor research and development
[AD-A135906] p 359 N84-18205

DUCTILITY

In situ indications of ductility evolution during high-temperature fatigue testing with and without hold times p 548 A84-30658

DUCTS

Design of an advanced composite outer duct for the F404 engine
[SAE PAPER 831550] p 452 A84-29468
Plane, rectangular, axisymmetric convergent channels p 842 A84-45738
Spinning mode acoustic radiation from the flight inlet
[NASA-CR-172273] p 255 N84-15896
Laser beam duct pressure controller system
[AD-D011102] p 929 N84-32811

DURABILITY

Flight service evaluation of Kevlar-49 epoxy composite panels in wide-bodies commercial transport aircraft
[NASA-CR-166065] p 75 N84-10188
USAF durability design handbook: Guidelines for the analysis and design of durable aircraft structures
[AD-A142424] p 774 N84-29866
Residual-strength tests of L-1011 vertical fin components after 10 and 20 years of simulated flight service p 801 N84-29970
Worldwide flight and ground-based exposure of composite materials p 802 N84-29971

DUST

Dusty hypersonic flow past thick wedges p 508 A84-32620

DUST COLLECTORS

Finite element analysis of a split-flow particle separator -- for helicopter gas turbine engine p 89 A84-13278

DYNAMIC CHARACTERISTICS

Rotor dynamical instability; Proceedings of the Applied Mechanics, Bioengineering, and Fluids Engineering Conference, Houston, TX, June 20-22, 1983 p 141 A84-13226

The dynamical behaviour of externally pressurized gas-lubricated unloaded porous journal bearings p 383 A84-26374

Design of helicopter rotor blades for optimum dynamic characteristics
[NASA-CR-175380] p 293 N84-17171
Cooperative pilot-optimal augmentation system synthesis for complex flight vehicles p 437 N84-20511

Helistat simulation studies
[NASA-CR-168567] p 460 N84-20564
A study of aeroelastic and structural dynamic effects in multi-rotor systems with application to hybrid heavy lift vehicles
[NASA-CR-173505] p 529 N84-23620

Flight mechanics test with a restricted flying aircraft model in a wind tunnel
[DFVLR-FB-84-13] p 669 N84-27701
Apparatus for and method of compensating dynamic unbalance
[NASA-CASE-GSC-12550-1] p 729 N84-28082

The aerodynamic admittance of model bridges
[NMI-R-176] p 729 N84-28105
The Shock and Vibration Digest, volume 16, no. 7
[AD-A143958] p 926 N84-31679

Interactive finite elements for general engine dynamics analysis p 927 N84-31698
Dynamics of angular movements of a solid supporting a rotating rotor with consideration of energy dissipation
[AD-A143349] p 931 N84-32881

DYNAMIC CONTROL
The dynamics of vehicles with two-channel guidance -- Russian book on flight vehicles p 62 A84-10486
Computer aided design of a control system for a hovercraft p 255 A84-19175

Numerical simulation of controlled flow tunnel for V/STOL testing
[AIAA PAPER 84-2152] p 791 A84-41330
Dynamic analysis of a two-gimbal mass-unbalanced dynamically tuned gyroscope p 806 A84-41785

Simulation of air cushion heave dynamics with vent valve relay control p 821 A84-42688
Dynamic control aspects of development of three shaft turboprop engine p 890 A84-45007
Practical aspects of digital implementation of control laws p 67 N84-10101

DYNAMIC LOADS
Steady-state response of vibrating systems to periodic pulse excitation p 917 A84-44650
Experimental and analytical investigation of active loads control for aircraft landing gear p 354 N84-18886

Static and dynamic structural-sensitivity derivative calculations in the finite-element-based Engineering Analysis Language (EAL) system
[NASA-TM-85743] p 485 N84-20880

DYNAMIC MODELS
Problems of invariance and stability in the dynamics of stratospheric observatories p 48 A84-12111
A dynamic model for aircraft poststall departure p 225 A84-17409

Multivariable frequency domain controller for magnetic suspension and balance systems -- for wind tunnel aircraft models p 232 A84-19138
Balloon dynamic launch forces
[AIAA PAPER 84-0818] p 429 A84-26582

A linear multivariable dynamical model of supersonic inlet-engine combination
[AIAA PAPER 84-1496] p 577 A84-35239
Development of empirical models on the basis of regression methods and their application in aviation p 813 A84-41658

Modeling and simulation techniques p 66 N84-10086
The vortex skeleton model for three-dimensional steady flows p 98 N84-12101
Crew station evaluation in a dynamic flight simulation facility p 232 N84-15069

Improved dynamic models for air combat analysis
[TAE-483] p 252 N84-15876
Mathematical modeling of the aerodynamic characteristics in flight dynamics
[NASA-TM-85880] p 274 N84-17141

Report by the Chairman of the Fluid Dynamics Panel p 485 N84-21499
Numerical simulation of the tip vortex off a low-aspect-ratio wing at transonic speed
[NASA-TM-85932] p 510 N84-22535

DYNAMIC PRESSURE
PAN AIR prediction of NASA Ames 12-foot pressure wind-tunnel interference on a fighter configuration
[AIAA PAPER 84-0219] p 173 A84-19243

Application of the small body pressure transducer
[AD-P002687] p 484 N84-20822
A computational method for predicting the effects of varying Reynolds number and dynamic pressure on flexible wings at transonic speeds p 412 N84-21508

DYNAMIC PROGRAMMING
Optimal TF/TA route planning using digital terrain elevation data -- terrain following/terrain avoidance p 423 A84-26761

DYNAMIC RESPONSE
Experimental stress analysis of a thin walled pressurized torus loaded by contact with a plane -- dynamic response of aircraft tires p 239 A84-17443
Motion-induced aerial forces for detached flow and their application to the study of structural response -- German thesis p 268 A84-22249

An experimental method for determining the dynamic contact law p 475 A84-27426
Analysis of the response of a multi-rotor-bearing system containing a transverse crack in a rotor
[ASME PAPER 83-DET-84] p 480 A84-29111

Analysis and calculation of vibration response induced by inflow distortion in the first-stage compressor blading of turbo-engine p 533 A84-31784
Dynamic response of shock waves in transonic diffuser and supersonic inlet - An analysis with the Navier-Stokes equations and adaptive grid p 650 A84-38004

Solution to the problem of the dynamic response of a wing by direct integration p 770 A84-41653
A new method of modal analysis - Multiple input by uncorrelated signals p 906 A84-45004

The prediction and analysis of the response of a turbojet engine to the blast wave p 891 A84-46015
Dynamic effects of controls p 65 N84-10088
Direct digital design via pole placement techniques p 67 N84-10099

Lateral runway approach guidance using Loran-C p 57 N84-11105
Alternate T-38 transparency development. Part 4: Parametric studies
[AD-A131904] p 122 N84-12159

Flight test and analyses of the B-1 structural mode control system at supersonic flight conditions
[NASA-CR-170405] p 138 N84-13197
Nonlinear oscillations of a fluttering panel in a transonic airstream
[AD-A133918] p 175 N84-14124

Electrofluidic angular rate sensor for ejection seat thrust vector control
[AD-A132333] p 185 N84-15137
Measurement of unsteady aerodynamic pressures
[DFVLR-MITT-83-08] p 272 N84-16155

Dynamic characteristics of a jet engine test facility air supply
[AD-A136910] p 372 N84-19385
Fracture, longevity (fatigue), dynamics, and aeroelasticity of composite structures
[AD-A137047] p 378 N84-19486

Testing for severe aerodynamically induced vibration environments p 342 N84-19905
Eigenspace design techniques for active flutter suppression p 462 N84-20581
Pilot modeling, modal analysis, and control of large flexible aircraft p 462 N84-20584

On the stability of flight vehicles in the low Reynolds number non-linear regime
[AD-A138379] p 465 N84-21559
Flutter and forced response of mistuned rotors using standing wave analysis
[NASA-CR-173555] p 608 N84-24586

Revisions to the PETROS 4 shell response code
[AD-A140268] p 628 N84-26059
Validation of the MAGNA (Materially and Geometrically Nonlinear Analysis) computer program for nonlinear finite element analysis of aircraft transparency bird impact
[AD-P003229] p 723 N84-26642

MAGNA (Materially and Geometrically Nonlinear Analysis) computer simulation of bird impact on the F-15 aircraft canopy
[AD-P003230] p 733 N84-26643
Flight mechanics test with a restricted flying aircraft model in a wind tunnel
[DFVLR-FB-84-13] p 669 N84-27701

Theoretical and experimental results of dynamic behavior of periodically stiffened cylindrical shell p 690 N84-27731
Evaluation of aerodynamic admittance of a model bridge oscillating with vertical motion
[NMI-R-175] p 729 N84-28104

The aerodynamic admittance of model bridges
[NMI-R-176] p 729 N84-28105
Current status of an organic Rankine cycle engine development program p 731 N84-28230

A model of rotor blade first natural flapping response for up to three/rev excitations [AD-A141725] p 773 N84-28782

Fuselage torsion of a CT4 aircraft [AD-A142753] p 879 N84-31114

DYNAMIC STABILITY

Analysis of gas turbine engine dynamic instabilities [AIAA PAPER 83-2694] p 59 A84-12307

Dynamic stability of flexible forward swept wing aircraft p 118 A84-14729

Free flight method in hypersonic impulse type tunnels for static and dynamic stability study p 369 A84-25996

Experimental determination of the input parameters to the parachute equations of motion [AIAA PAPER 84-0798] p 401 A84-26566

Predicting dynamic instability boundaries using lattice filters --- for wind tunnel flutter models [SAE PAPER 831432] p 468 A84-29630

An investigation of large amplitude wing-rock p 542 A84-32788

Dynamic stability analysis of hose/drogue refueling system p 683 A84-38902

The behavior of dynamic systems near the limits of the stability region (2nd revised and enlarged edition) --- Russian book p 1016 A84-48754

Experimental determination of gap flow-conditioned forces at turbine stages and their effect on the running stability of simple rotors [NASA-TM-77293] p 246 N84-15553

Hover test of a full-scale hingeless helicopter rotor: Aeroelastic stability, performance and loads data --- wind tunnel tests [NASA-TM-85892] p 350 N84-18190

Recent developments and future directions in dynamic stability research at NAE, Ottawa p 514 N84-23582

Flight data on liquid-filled shell for spin-up instabilities [AD-A139136] p 517 N84-23610

On the stick-free longitudinal dynamic stability of a general aviation aircraft equipped with an all-movable horizontal tail p 705 N84-27748

Boundary-layer linear stability theory p 1009 N84-33759

DYNAMIC STRUCTURAL ANALYSIS

Optimal frequency response modification by added passive structures --- for helicopter design p 46 A84-11037

Pre-flight transient dynamic analysis of B-52 carrying Space Shuttle solid rocket booster drop-test vehicle [AIAA PAPER 83-2698] p 117 A84-13725

Control of aeroelastic divergence p 135 A84-14728

Further application and development of strain pattern analysis p 311 A84-19632

Flutter analysis using nonlinear aerodynamic forces p 268 A84-22170

Structure model refinement using reanalysis techniques p 314 A84-22622

Frequency determination techniques for cantilevered plates with bending-torsion coupling p 378 A84-23368

Dynamic analysis of practical blades with shear center effect p 380 A84-24561

The coupled response of turbomachinery blading to aerodynamic excitations p 448 A84-26959

Methods of reference basis for identification of linear dynamic structures [AIAA PAPER 82-0769] p 474 A84-27148

Spring property of ball bearing p 475 A84-27455

NASTRAN forced vibration analysis of rotating cyclic structures [ASME PAPER 83-DET-20] p 480 A84-29103

Coupling technique of rotor-fuselage dynamic analysis [ASME PAPER 83-DET-25] p 431 A84-29107

Structures, Structural Dynamics and Materials Conference, 25th, Palm Springs, CA, May 14-16, 1984, Technical Papers, Part 1 p 554 A84-31826

An investigation into the probabilistic combination of quasi-static and random accelerations [AIAA PAPER 84-0908] p 555 A84-31646

Nonlinear response and failure characteristics of clamped internally pressurized graphite-epoxy cylindrical panels [AIAA PAPER 84-0955] p 555 A84-31680

Structures, Structural Dynamics and Materials Conference, 25th, Palm Springs, CA, May 14-16, 1984, and AIAA Dynamics Specialists Conference, Palm Springs, CA, May 17, 18, 1984, Technical Papers, Part 2 p 556 A84-31684

Evaluation of flutter impact for repaired T-38 stabilizers [AIAA PAPER 84-0904] p 524 A84-31691

Limit cycle oscillations of a nonlinear rotorcraft model [AIAA PAPER 84-0923] p 525 A84-31695

Equations of motion of an elastic flight vehicle utilizing static aeroelastic characteristics of the restrained vehicle [AIAA PAPER 84-0986] p 556 A84-31711

Analytical determination of real normal modes from measured complex responses [AIAA PAPER 84-0995] p 556 A84-31715

Structural and dynamic tailoring of hingeless/bearingless rotors [MBB-UD-404-83-OE] p 525 A84-32474

Estimation of vibrational stressed state for GTE blades under random vibrations p 619 A84-34133

Flap-lag damping of an elastic rotor blade with torsion and dynamic inflow in hover from symbolically generated equations [AIAA PAPER 84-0989] p 619 A84-34909

Evolution of test methods for structural vibrations p 716 A84-37149

The solution of large flutter problems on small computers p 717 A84-37379

Finite element analysis of natural, longitudinal vibrations of a deformable aeroplane with suspended masses p 680 A84-37948

Divergence of forward swept wings p 682 A84-38424

Limit cycle oscillations of a nonlinear rotorcraft model p 683 A84-38841

Finite element model adjustment using experimental vibration data [ONERA, TP NO. 1984-1] p 803 A84-39975

Structural dynamics of rotating bladed-disk assemblies coupled with flexible shaft motions p 889 A84-44645

Solution of the nonlinear dynamic problem of structural behaviour of a coupled model of an airplane wing with an aileron p 870 A84-44965

Optimization of hybrid laminated composite plates p 918 A84-45058

Predicting structural dynamic behavior using a combined experimental/analytical model --- for helicopter design p 878 A84-46378

An analysis of the natural vibrations of fuselage-type complex structures as systems with imposed constraints p 1007 A84-47579

Review of aircraft crash structural response research [AD-A131696] p 123 N84-12160

Vertical drop test of a transport fuselage center section including the wheel wells [NASA-TM-85706] p 142 N84-12531

Development of the basic methods needed to predict the aeroelastic behavior of helicopters p 142 N84-12811

Blade loss transient dynamics analysis with flexible bladed disk [NASA-CR-168176] p 134 N84-13193

Research on aero-thermodynamic distortion induced structural dynamic response of multi-stage compressor blading [AD-A133853] p 219 N84-14151

Wind tunnel tests on a model of a semisubmersible platform and comparison of the results with full-scale data [NLR-MP-82014-U] p 176 N84-15113

The Shock and Vibration Bulletin, Part 1: Welcome, keynote address, invited papers, pyrotechnic shock, and shock testing and analysis [AD-A134452] p 387 N84-18866

The influence of gyroscopic forces on the dynamic behavior and flutter of rotating blades [NASA-CR-175444] p 454 N84-20524

Survey of NASA research on crash dynamics [NASA-TP-2298] p 486 N84-21901

A study of aeroelastic and structural dynamic effects in multi-rotor systems with application to hybrid heavy lift vehicles [NASA-CR-173505] p 529 N84-23620

Lewis Research Center spin rig and its use in vibration analysis of rotating systems p 605 N84-24578

An investigation into the probabilistic combination of quasi-static and random accelerations [NASA-TM-82584] p 729 N84-28111

Advanced composite stabilizer for Boeing 737 aircraft [NASA-CR-157639] p 799 N84-28915

Structures and Dynamics Division research and technology plans for FY 1994 and accomplishments for FY 1982 [NASA-TM-85828] p 809 N84-29245

Durability methods development, volume 7 [AD-A142400] p 774 N84-29865

Active controls: A look at analytical methods and associated tools [NASA-TM-86269] p 927 N84-31684

Interactive finite elements for general engine dynamics analysis p 927 N84-31698

Experience with transonic unsteady aerodynamic calculations [NASA-TM-86278] p 849 N84-32353

Application of elastic wave scattering theory to the detection and characterization of flaws in structural materials [DE84-013729] p 930 N84-32852

An assembly language program for calculating random decrement signatures [AD-A143908] p 1015 N84-34195

Ground vibration test of F-16 airplane with initial decoupler pylon [NASA-TM-86259] p 978 N84-34439

DYNAMIC TESTS

Review of support interference in dynamic tests --- in wind tunnels p 138 A84-13572

Dynamic load measurements with delta wings undergoing self-induced roll oscillations p 225 A84-17404

An experimental method for determining the dynamic contact law p 475 A84-27426

Advances in the application of parameter identification analysis techniques to parachute aerodynamic test data [AIAA PAPER 84-0799] p 408 A84-29971

Automated data system for helicopter structural fatigue testing p 544 A84-32443

A dynamic approach to military avionics systems testing p 215 N84-15075

Wind Tunnels and Testing Techniques [AGARD-CP-348] p 503 N84-23564

DYNAMOMETERS

The application of air dynamometers for testing turbo-shaft gas turbine engines [ASME PAPER 84-GT-216] p 983 A84-47003

E

EARLY WARNING SYSTEMS

A British AEW radar system p 30 A84-10759

EARPHONES

Active sound reduction systems --- headsets [IZF-1983-8] p 496 N84-22371

EARTH ALBEDO

Multipath interference for in-flight antennas measurements p 188 A84-18240

EARTH OBSERVATIONS (FROM SPACE)

New results of airborne measurements with a sensitive, high resolution 90 GHz radiometer - First results for an equivalent 140 GHz system p 600 A84-36287

EARTH RESOURCES

Materials Substitution and Recycling [AGARD-CP-356] p 996 N84-33465

Measures for materials conservation in aero-engine construction p 989 N84-33468

EARTH SURFACE

Optimization of sounding signals for the measurement of distance to the earth's surface p 187 A84-17851

ECHO SOUNDING

Optimization of sounding signals for the measurement of distance to the earth's surface p 187 A84-17851

ECHO SUPPRESSORS

Suppression of the residue of ground clutter after the MTI p 424 A84-27818

Performance evaluation of the adaptive MTI canceller for extended clutter, ACEC p 554 A84-30517

Relative performance of a simple MTI canceller selection rule p 861 A84-45901

ECONOMIC ANALYSIS

An economic analysis of new transport technology (using equipment in air transport as an example) p 26 A84-11961

Analysis of the influence of the load factor in planning aircraft transport capacity p 342 A84-25192

Energy efficient engine: Flight propulsion system, preliminary analysis and design update [NASA-CR-167980] p 61 N84-11170

The Tracked Wing In Ground-Effect (TWIG) p 122 N84-12155

Deregulating the airlines: An economic analysis [PB83-250019] p 145 N84-14070

The 8th FAA Forecast Conference Proceedings [AD-A132648] p 149 N84-14114

Establishment and discontinuance criteria for airport traffic control towers [AD-A133461] p 189 N84-15141

Establishment and discontinuance criteria for precision landing systems [AD-A135606] p 345 N84-18185

Historical inflation program. A computer program generating historical inflation indices for Army aircraft: Revision [AD-A137670] p 398 N84-20474

P/M superalloys: A troubled adolescent? [NASA-TM-83623] p 713 N84-26785

National airspace review benefits and costs [FAA-AT-84-1] p 784 N84-28765

- The performance of civil airport pavement with lime-cement-flyash base course p 792 N84-28815
[FAA-PM-84-10]
Historical research and development inflation indices for Army fixed and rotor winged aircraft p 825 N84-31085
[AD-A142943]
Oversight on the Federal Aviation Administration fiscal year 1985 research, engineering and development budget request [GPO-34-924] p 945 N84-33302

ECONOMIC FACTORS

- Aircraft accident investigation - From an insurance perspective p 497 A84-27411
Acoustical design economic trade off for transport aircraft p 939 A84-45068
Airframe technology for aircraft energy efficiency --- economic factors [NASA-TM-85749] p 328 N84-18154
Economic cases of the Civil Aeronautics Board, Volume 101, April 1983 to May 1983 p 396 N84-19183
[PB84-127695]
Economic cases of the Civil Aeronautics Board, Volume 102, June 1983 to July 1983 p 396 N84-19184

The supplier: Constraints and prospects --- civil air transport p 343 N84-19311
Definitions of noise and noise pollution p 816 N84-29466
The changing airline industry: A status report through 1982 [GAO/RCED-83-179] p 761 N84-29858

ECONOMIC IMPACT

- Punitive damages in aviation cases - Solving the insurance coverage dilemma p 324 A84-20455
Economic impact of fuel properties on turbine powered business aircraft p 530 N84-23646

ECONOMICS

- Integrated Application of Active Controls (IAAC) technology to an advanced subsonic transport project: Final ACT configuration evaluation [NASA-CR-3519] p 689 N84-27723
Economic cases of the Civil Aeronautics Board, volume 104, October - November 1983 [PB84-209287] p 854 N84-32370

EDDY CURRENTS

- Trends in the development of eddy current equipment for aircraft maintenance p 716 A84-36600
JDF-1 small light-weight electric eddy current oscillator [AD-A137572] p 483 N84-20761

EDGE LOADING

- Experimental evaluation of the F-4 transparency support structure interface p 683 A84-38896

EDUCATION

- Advanced flight control instruction at the Air Force Test Pilot School p 221 A84-15996
The von Karman Institute for Fluid Dynamics - Teaching and research p 709 A84-39715
Changing pattern of aeronautical education in the UK p 737 A84-39719
Training aeronautical and astronautical engineers in France p 943 A84-43897
Handbook for parachute instructors --- Russian book p 968 A84-47349
The Shock and Vibration Digest, volume 16, no. 3 [AD-A139707] p 560 N84-22976
Dynamic spacecraft simulators in military space ground systems [AD-P002159] p 547 N84-23825
Single-pilot IFR flights and operations [SNIAS-832-210-103] p 630 N84-26374
Integrated Computer-Aided Manufacturing (ICAM) architecture, Part 3, Volume 8: Composite information model of 'Manufacture product' (MFG1) [AD-A143072] p 937 N84-31873
NASA Ames summary high school apprenticeship research program, 1983 research papers [NASA-TM-85931] p 946 N84-33365
Integrated Computer-Aided Manufacturing (ICAM) architecture, part 3, Volume 7: MFG01 glossary [AD-A144426] p 1015 N84-34891

EFFECTIVENESS

- The aerodynamics of aircraft control: A general survey in the context of active control technology p 65 N84-10084
Experimental methods to determine control effectiveness in wind tunnels p 65 N84-10087

EFFICIENCY

- Comparison between measured turbine stage performance and the predicted performance using quasi-3D flow and boundary layer analyses [AIAA PAPER 84-1299] p 696 A84-36972
An overview of NASA intermittent combustion engine research [AIAA PAPER 84-1393] p 777 A84-40244

- An analytical method to predict efficiency of aircraft gearboxes [AIAA PAPER 84-1500] p 888 A84-44180
Application of an optimization method to high performance propeller designs [AIAA PAPER 84-1203] p 888 A84-44181
A modified lifting line theory for wing-propeller interference [NASA-CR-173324] p 336 N84-18171
Use of adaptive walls in 2D tests [NASA-TM-77380] p 371 N84-19359
Comparison between measured turbine stage performance and the predicted performance using quasi-3D flow and boundary layer analyses [NASA-TM-83840] p 535 N84-22564
Analytical fuel property effects: Small combustors p 539 N84-23839

- An overview of NASA intermittent combustion engine research [NASA-TM-83668] p 606 N84-24583
An analytical method to predict efficiency of aircraft gearboxes [NASA-TM-83718] p 572 N84-25606
Application of an optimization method to high performance propeller designs [NASA-TM-83710] p 572 N84-25607
Wind tunnel investigations on thin supercritical airfoils in the high subsonic flow regime [ESA-TT-774] p 586 N84-25652
Unsteady Flow in Turbomachines, volume 1 [VKI-LS-1984-02-VOL-1] p 625 N84-25960
Evaluation of strategies to enhance departure sequencing [AD-A140710] p 677 N84-26689
Numerical optimization design of advanced transonic wing configurations [NASA-TM-85950] p 688 N84-27718
Energy efficient engine high-pressure turbine supersonic cascade technology report [NASA-CR-165587] p 701 N84-27739
An experimental and theoretical analysis of the aerodynamic characteristics of a biplane-winglet configuration [NASA-TM-85815] p 772 N84-28779
Fuel savings potential of the NASA Advanced Turboprop Program [NASA-TM-83736] p 783 N84-29878
Engineering research on positive displacement gas expanders, phase 1 [DE84-008977] p 811 N84-30310

EGRESS

- Pyrotechnic clear path egress system for the T-38 trainer aircraft [AD-P003184] p 672 N84-26597
Field repair of AH-16 helicopter window cutting assemblies [NASA-TM-85831] p 774 N84-29884

EIGENVALUES

- Applications of an analytic stall model to time-history and eigenvalue analysis of rotor blades p 262 A84-19743
A rapid approach for calculating the damped eigenvalues of a gas turbine on a minicomputer - Theory [ASME PAPER 83-DET-83] p 533 A84-31908
A flutter eigenvalue program based on the Newton-Raphson method p 721 A84-38846
Eigenmode analysis of unsteady one-dimensional Euler equations [NASA-CR-172217] p 18 N84-10022
Effect of blade structural parameters on helicopter vibrational characteristics [AD-A134547] p 293 N84-16174
Eigenspace design techniques for active flutter suppression p 462 N84-20581
Design of multivariable feedback control systems via spectral assignment using reduced-order models and reduced-order observers [NASA-CR-173448] p 734 N84-28537

EIGENVECTORS

- Flight control system synthesis using eigenstructure assignment p 788 A84-42314
Eigenspace design techniques for active flutter suppression p 462 N84-20581
Design of multivariable feedback control systems via spectral assignment using reduced-order models and reduced-order observers [NASA-CR-173448] p 734 N84-28537

EJECTION

- Crash Position Indicator/Crash Survival Flight Data Recorder (CPI/CSFDR): Ejectable versus nonejectable p 693 N84-26584

EJECTION INJURIES

- Unassisted through canopy ejection experience p 23 A84-10728
An investigation of the fatality rates for different canopy modes of ejection p 23 A84-10738

- Flail, tumble and windblast --- during ejection p 24 A84-10741
The production of aircrew fatalities in Navy ejection seat equipped aircraft p 24 A84-10743
Between ejection and injury p 24 A84-10747
The correlation and description of windflail injury mechanisms in the windblast environment p 25 A84-10748
Flight testing - On track p 906 A84-45161
Position and restraint system for aircrewman [AD-D011058] p 853 N84-32364

EJECTION SEATS

- Life support SPO improvements to the ACES II seat p 22 A84-10707
Ejection at 700 KEAS - The SAAB JA-37 Viggen ejection seat tests at Holloman Air Force Base p 45 A84-10709

History of aircraft escape system propulsion p 761 N84-29941
Propulsion in a life-saving role for ACES 2 p 762 N84-29942
The Stencel S4S ejection seat: A study in new pyrotechnic developments p 762 N84-29943
Crest: Crew escape technologies for the 1990's p 762 N84-29944
Annual meeting of the Pyrotechnics and Explosives Applications Section on the American Defense Preparedness Association [AD-A143157] p 915 N84-31406
Position and restraint system for aircrewman [AD-D011058] p 853 N84-32364
Self-deploying afterbody apparatus for an ejection seat [AD-D011205] p 969 N84-34433

EJECTORS

- A new bench for calibration of nacelles equipped for blowing turbines (TPS) and ejector trials [ONERA, TP NO. 1983-118] p 138 A84-13631
A simple viscous-inviscid aerodynamic analysis of two-dimensional ejectors [AIAA PAPER 84-0281] p 164 A84-17995
Multiple ducted streams with a periodic or a steady supersonic driver flow [AIAA PAPER 84-0350] p 166 A84-18042
Exhaust system for combat aircraft optimized for supersonic cruise p 574 A84-34172
Ejection launchers kick missiles away safely p 677 A84-36793

Supersonic STOVL ejector aircraft from a propulsion point of view
[AIAA PAPER 84-1401] p 778 A84-40246

Turbulence measurements in an ejector wing flow field
p 744 A84-40858

A one-dimensional theory for a supersonic gas ejector with an isobaric mixing chamber p 839 A84-45704

A feasibility study of open-type ejector thrust augmenters p 891 A84-45715

An optimum gas ejector with an isobaric mixing chamber p 840 A84-45724

The use of tandem ejector pumps in an intermittent blowdown tunnel
[ASME PAPER 84-GT-226] p 992 A84-47006

A comparison between the limiting theoretical characteristics of supersonic gas ejectors with isobaric and cylindrical mixing chambers p 959 A84-47074

Variable area ejector-diffuser model tests
[AD-A134843] p 302 N84-17182

Design and testing of scaled ejector-diffusers for jet engine test facility applications
[AD-A136745] p 371 N84-19364

New TPS calibration bench, and ejector tests — wind tunnel turbines and powered models p 546 N84-23594

High speed ejectors
[AD-A141562] p 701 N84-27741

Diffuser/ejector system for a very high vacuum environment
[NASA-CASE-MRS-25791-1] p 708 N84-27749

Thrust augmentation study of high performance ejectors
[AD-A142650] p 759 N84-29856

Axisymmetric thrust augmenting ejector with discrete primary air slot nozzles
[AD-D011129] p 893 N84-32388

An experimental investigation of an underexpanded rectangular jet ejector p 964 N84-33374

ELASTIC ANISOTROPY
The aeroelastic wing - Improved performance through use of anisotropic materials p 771 A84-42569

ELASTIC BARS
Oscillations of elastic airplane due to wind gust p 880 N84-32087

ELASTIC BENDING
The stability boundaries of rapid-rolling aircraft with fuselage elasticity considered p 138 A84-15252

ELASTIC BODIES
Equations of motion of an elastic flight vehicle utilizing static aeroelastic characteristics of the restrained vehicle
[AIAA PAPER 84-0988] p 556 A84-31711

Aerodynamic characteristics of pretensioned elastic membrane rectangular sailwings p 842 A84-45988

ELASTIC BUCKLING
The buckling of honeycomb sandwich circular rings p 922 A84-46190

ELASTIC DAMPING
Investigation of random vibrations of aircraft engine blades p 298 A84-22410

Active vibration control of a single mass rotor on flexible supports p 382 A84-26247

Design of integrally damped compressor vanes
[AIAA PAPER 84-0887] p 601 A84-34905

Flap-lag damping of an elastic rotor blade with torsion and dynamic inflow in hover from symbolically generated equations
[AIAA PAPER 84-0989] p 619 A84-34909

Prediction of the life of all-metal vibration isolators made of MR material p 1007 A84-47553

ELASTIC DEFORMATION
Load-dependent deformations of windtunnel models — for wing aeroelasticity
[AIAA PAPER 84-0589] p 348 A84-24180

Axisymmetric-parachute theory with a consideration of fabric deformability p 417 A84-28060

A strength analysis of a fan-shaped wing with an allowance made for temperature deformations and creep deformations p 523 A84-30424

Causes and prevention of structural materials failures in naval environments
[AD-A141560] p 800 N84-28972

ELASTIC MEDIA
Transonic flow of an elastic medium past a thin rigid body p 334 A84-26330

ELASTIC PLATES
Scattering of sound by an elastic plate with flow p 320 A84-21216

A nonlinear structural concept for drag-reducing compliant walls p 329 A84-23365

Effect of elastically suspended masses on stability of elastic panels in supersonic stream p 665 N84-26949

Strains in an elastic plate containing an interference-fit bolt near a free edge
[AR-003-012] p 811 N84-30333

ELASTIC PROPERTIES

The influence of different inflow models on the coupled flapping and torsion of helicopter rotor blades p 303 A84-19651

The boundary element method in an industrial environment p 564 A84-30701

Elastic behaviour of composite structures under low velocity impact p 798 A84-42210

The dynamics of parachute opening p 961 A84-47390

Load deflection characteristics of inflated structures
[NASA-CR-174585] p 86 N84-12028

Kinetic-elastic approach for time-dependent rheological data on slurry fuels and polymers
[AD-A141210] p 715 N84-27911

Strains in an elastic plate containing an interference-fit bolt near a free edge
[AR-003-012] p 811 N84-30333

ELASTIC WAVES
An investigation of new possibilities to simplify the standard supersonic area rule
[AD-A137018] p 341 N84-19297

Application of elastic wave scattering theory to the detection and characterization of flaws in structural materials
[DE84-013729] p 930 N84-32852

ELASTODYNAMICS
Motion-induced aerial forces for detached flow and their application to the study of structural response — German thesis p 268 A84-22249

Solution of the nonlinear dynamic problem of structural behaviour of a coupled model of an airplane wing with an aileron p 870 A84-44965

ELASTOHYDRODYNAMICS
Experimental observation of the dynamic behavior of noncontacting coned-face mechanical seals
[ASLE PREPRINT 83-LC-3B-1] p 479 A84-26990

ELASTOMERS
Numerical analysis and experimental verification of elastomeric bearings p 311 A84-19635

Design of integrally damped compressor vanes
[AIAA PAPER 84-0867] p 801 A84-34905

Solid state compressor
[AD-A140498] p 627 N84-26032

Protective linear materials for transparent plastics
[AD-P003204] p 712 N84-26617

Aircraft surface coatings
[NASA-CR-165928] p 772 N84-28778

ELASTOPLASTICITY
Estimation of deformation kinetics of GTE blades in conditions of low-frequency temperature and high-frequency mechanical loads p 717 A84-37369

ELECTRIC BATTERIES
Evaluation of aircraft battery charge, discharge, and analysis requirements for ground support equipment
[AD-A144243] p 1011 N84-34678

ELECTRIC CHARGE
Characteristics of the electrification of a metal body moving at a high velocity in an aerosol medium p 839 A84-45706

ELECTRIC CONDUCTORS
Polygonal plate modeling of realistic structures — for aircraft radar cross section calculation p 917 A84-43615

ELECTRIC CONNECTORS
General Purpose Bus Interface Unit (GPBIU) system test software design
[AD-A138005] p 447 N84-21543

MIL-STD-1760 development program
[AD-P003526] p 883 N84-31130

Aircraft-store Electrical Interconnection System (AEIS) functional requirements
[AD-P003527] p 923 N84-31131

Signal set standardization for the aircraft-store electrical interconnection system
[AD-P003528] p 924 N84-31132

Consideration of MIL-STD-1760, aircraft/store electrical interface standard on stores management system architectures
[AD-P003529] p 883 N84-31133

ELECTRIC CONTROL
Advanced electric power systems for all electric aircraft p 215 A84-16527

Feasibility study of an all electric fighter airplane p 193 A84-16529

Putting new all electric technology development to the test — electromechanical actuators for aircraft p 193 A84-16530

Airplane actuation trade study p 194 A84-16685

Multiplexing utilities in general aviation aircraft — using military-type aircraft utility systems management p 429 A84-26731

Electrically signalled flight-control for civil aircraft p 457 A84-28022

Electrically driven environmental control system p 679 A84-36912

Flying the Mirage 2000 by wire p 824 A84-44989

ELECTRIC CURRENT
Assessment methodology for the A-7E: Scale model coupling experiments
[DE84-003139] p 351 N84-18199

ELECTRIC DISCHARGES
EDM in the aircraft industry — Electrical Discharge Machining p 618 A84-33829

The development of the high energy surface discharge spark igniter
[ASME PAPER 84-GT-51] p 981 A84-46908

Multi-small hole drilling by EDM — electrodischarge machining (EDM)
[PNR-90184] p 559 N84-22813

ELECTRIC EQUIPMENT
Lightning testing of the Viggen aircraft p 199 A84-18534

Circuits and devices in aircraft electrical equipment systems — Russian book p 554 A84-30850

ELECTRIC EQUIPMENT TESTS
Electrical subsystems flight test handbook
[AD-A139783] p 598 N84-24576

ELECTRIC FUSES
Solid state power controller fuse development program
[AD-A142118] p 807 N84-29118

ELECTRIC GENERATORS
Advanced electrical power system technology for the all electric aircraft p 215 A84-16528

Brushless generation with cascaded doubly fed machines p 239 A84-16692

Aircraft electrical machines: A harmonic analysis of active zones — Russian book p 218 A84-18748

Aircraft Electric Secondary Power
[NASA-CP-2282] p 59 N84-10055

High-voltage (270 V) dc power-generating system for fighter aircraft p 79 N84-10057

Secondary electric power generation with minimum engine bleed p 79 N84-10059

Primary electric power generation systems for advanced-technology engines p 60 N84-10060

Installation of electric generators on turbine engines p 60 N84-10061

Permanent-magnet motors and generators for aircraft p 60 N84-10062

Cycloconverter on the all-electric airplane p 79 N84-10069

Super integrated power unit for fighter aircraft p 132 N84-12183

Implementing microprocessor technology in aircraft electrical power generating system control p 132 N84-12185

A mathematical model for the doubly-fed wound rotor generator, part 2
[NASA-TM-83581] p 317 N84-17479

Subatmospheric Brayton-cycle engine program review p 731 N84-28247

Constant speed drive with compensation using differential gears
[AD-D011156] p 1010 N84-33812

ELECTRIC MOTORS
Electrically compensated aircraft alternator drive p 216 A84-16535

Permanent-magnet motors and generators for aircraft p 60 N84-10062

Application of advanced materials to rotating machines p 60 N84-10063

ELECTRIC POTENTIAL
Flashover voltage reduction by proximate conductors — for aircraft protection against lightning strikes p 242 A84-18550

Subharmonic vibrations of rotor mounted in rolling bearings p 725 N84-26943

ELECTRIC POWER
Thermal problems in nickel cadmium aircraft batteries p 449 A84-28200

Implementing microprocessor technology in aircraft electrical power generating system control p 132 N84-12185

The 400 Hz generators evolution, effects on installation arrangements p 132 N84-12188

ELECTRIC POWER PLANTS
Industrial and marine engine derivatives: A spin-off from aviation — gas turbine engines
[PNR-90197] p 537 N84-22581

Using gas-turbine power stations with aircraft engines for power-and-heat generation
[AD-A142084] p 932 N84-31786

ELECTRIC POWER SUPPLIES
Advanced electric power systems for all electric aircraft p 215 A84-16527

Implementing microprocessor technology in aircraft electrical power generating system control p 216 A84-16536

EMBEDDING
Embedded information transfer technology assessment
[AD-A142649] p 925 N84-31518

EMERGENCIES
The national air-space system contingency plan p 22 A84-10416

In-flight rescue concept for combat helicopter crews-development and groundtests p 23 A84-10722

The production of aircrew fatalities in Navy ejection seat equipped aircraft p 24 A84-10743

A study of post-egress procedures and techniques conducted to increase aircrew survival following emergency escape over water p 24 A84-10745

Flight attendant training - How it influences the success or failure of emergency evacuations p 26 A84-11620

Air rescue service in the Federal Republic of Germany Requirements for the helicopter p 276 A84-19606

Situational emergency training - Experiences and implications p 759 A84-41074

EMERGENCY LIFE SUSTAINING SYSTEMS
CF-18 rigid seat survival kit (RSSK) - Global philosophy p 22 A84-10714

ENAMELS
A vibration damping treatment for high temperature gas turbine applications p 388 N84-19912

ENCLOSURES
Thermal characteristics of standardized Air Force avionic enclosures
[SAE PAPER 831103] p 479 A84-29038

ENERGY ABSORPTION
Crew survivable helicopter undercarriage
[AD-A137770] p 438 N84-20517

Preliminary evaluation of waveguide vibration absorbers
[AD-A140743] p 727 N84-27070

Design and development of an automatically controlled variable-load energy absorber
[AD-A142683] p 774 N84-29868

Impact dynamics research on composite transport structures p 802 N84-29975

Measurement of the absorption coefficient using the sound-intensity technique
[NASA-CR-173848] p 941 N84-32115

ENERGY CONSERVATION
Application of energy saving concepts of fighter/attack design p 119 N84-14738

A novel fuel conservation system approach for today's transport aircraft p 216 A84-16684

Electrically driven environmental control system p 679 A84-36912

Propfans - Fuel saving but ear splitting p 987 A84-49352

Unducted fan for tomorrow's subsonic propulsion p 987 A84-49354

Energy efficient engine: Flight propulsion system, preliminary analysis and design update
[NASA-CR-167980] p 61 N84-11170

Energy efficient engine fan component detailed design report
[NASA-CR-165466] p 701 N84-27737

US energy: Aviation perspective
[AD-A137766] p 715 N84-27910

Fuel conservative guidance concept for shipboard landing of powered-life aircraft
[NASA-TM-85971] p 902 N84-31215

ENERGY CONSUMPTION
Energy state revisited p 291 N84-16118

Research and development of energy-efficient appliance motor-compressors. Volume 4: Production demonstration and field test
[DE84-005083] p 386 N84-19611

Demonstration of the coast-down technique for determining train resistances
[NASA-CR-173468] p 413 N84-21515

Reynolds number effects on pressure loss and turbulence characteristics of four tube-bundle heat exchangers
[NASA-TM-85807] p 585 N84-25645

ENERGY CONVERSION
Thermal energy recovery in gas turbine engine test cells
[AD-A139457] p 564 N84-24009

ENERGY CONVERSION EFFICIENCY
The increase in efficiency of high temperature gas turbine plants with cooled turbines p 314 A84-22002

The effects of unbalanced flow on the thermal performance of collector arrays p 730 A84-37126

Evaluation of the energy efficiency of bird flight p 947 A84-47788

ENERGY DISSIPATION
The synthesis of an active flutter suppression law based on an energy criterion p 222 A84-16523

Possibilities of raising the efficiency of the compression process in a centrifugal compressor rotor p 297 A84-20869

Acoustic power dissipation on radiation through duct terminations - Experiments p 321 A84-21272

Energy losses in multirow jet cooling of the leading edge of turbine blades p 986 A84-47558

Application of advanced materials to rotating machines p 60 N84-10063

Dynamics of angular movements of a solid supporting a rotating rotor with consideration of energy dissipation
[AD-A143349] p 931 N84-32881

ENERGY DISTRIBUTION
Synthesis of an optimal on-board electric power distribution system for aircraft using computer-aided design p 986 A84-47564

A flutter optimization program for complete aircraft structural design p 68 N84-11134

Functional integration of vertical flight path and speed control using energy principles p 463 N84-20588

ENERGY LEVELS
Issues in calibrating infrared seekers at low energy levels p 474 A84-27180

ENERGY POLICY
Engineering research on positive displacement gas expanders, phase 1
[DE84-008977] p 811 N84-30310

ENERGY REQUIREMENTS
'Electric airplane' environmental control systems energy requirements p 678 A84-36911

Evaluation of a total energy-rate sensor on a transport airplane
[NASA-TP-2212] p 126 N84-12164

ENERGY STORAGE
The performance of man-powered aircraft p 502 A84-32789

ENERGY TECHNOLOGY
Brayton module development overview p 731 N84-28245

Near-term Brayton module status p 731 N84-28246

Subatmospheric Brayton-cycle engine program review p 731 N84-28247

ENERGY TRANSFER

[AIAA PAPER 84-1413] p 635 A84-36977
Improved accuracy magnetostrictive torque meter
[AIAA PAPER 84-1280] p 717 A84-37642
Surface layer activation technique for monitoring and in-situ wear measurement of turbine components
[AIAA PAPER 84-1410] p 698 A84-37652
Flying the lean machine Boeing 757
p 760 A84-41242
Performance monitoring on Gnome engines on Canadian Coast Guard air cushion vehicles
p 922 A84-46138
Engine reliability through bearing condition monitoring - aircraft engines
[PNR-90168] p 536 N84-22570
The development of military aircraft engine monitoring systems
p 691 N84-26570
Instrumentation for in-flight acoustic measurements in an engine intake
[NLR-MP-83060-U] p 820 N84-30898
- ENGINE NOISE**
Effects of boundary layer refraction and fuselage scattering on fuselage surface noise from advanced turboprop propellers
[AIAA PAPER 84-0249] p 253 A84-17976
A flight study of tone radiation patterns generated by inlet rods in a small turbofan engine
[AIAA PAPER 84-0499] p 253 A84-18132
Correction of fan noise for effects of forward flight
p 297 A84-21217
Separated flow noise of a flat plate at large attack angles
p 321 A84-21221
Tone generation by rotor-downstream strut interaction
p 298 A84-22174
A solution for aero-acoustic induced vibrations originating in a turbofan engine test cell
[AIAA PAPER 84-0594] p 365 A84-24185
Influence of a parabolic-velocity profile on the acoustic attenuation in a lined rectangular duct
p 494 A84-28149
Investigation of a silencer for the powerplant of a modern jet aircraft
p 449 A84-28820
The effect of forward flight on the noise and flow field of inverted profile jets
p 450 A84-29243
Specification, design, and test of aircraft engine isolators for reduced interior noise
p 601 A84-34455
Flight effects on fan noise with static and wind-tunnel comparisons
p 699 A84-37928
Design and flight test of a Kevlar acoustic liner
p 699 A84-37933
Vane stagger angle and camber effects in fan noise generation
p 779 A84-40833
Finite element-integral acoustic simulation of JT15D turbofan engine
p 816 A84-41132
Commercial aircraft noise
p 938 A84-45021
Turboshaft engine noise study
[ONERA, TP NO. 1984-96] p 891 A84-45036
Solution of the wave equation for open surfaces involving a line integral over the edge - for supersonic propeller noise prediction
p 940 A84-45684
Towards a better understanding of helicopter external noise
p 940 A84-46366
Experimental methods in compressor noise studies - jet engine tone noise
p 254 A84-15028
Study of noise-certification standards for aircraft engines. Volume 1: Noise-control technology for turbofan engines
[AD-A133386] p 221 N84-15157
Noise levels and data analyses for small prop-driven aircraft
[AD-A134598] p 293 N84-16175
Investigation of the acoustic characteristics of aircraft engines operating in a dry-cooled jet engine maintenance test facility
p 360 N84-19901
Study of noise-certification standards for aircraft engines. Volume 3: Selection and evaluation of engine-noise-certification concept
[AD-A137805] p 454 N84-20563
Study of stator-vane fluctuating pressures in a turbofan engine for static and flight tests
[NASA-TP-2217] p 496 N84-22363
Helicopter engine core noise
p 818 N84-29676
Rotorcraft noise prediction
p 818 N84-29677

Energy efficient engine component development and integration program
[NASA-CR-173884] p 894 N84-32389

Response of a small-turboshaft-engine compression system to inlet temperature distortion
[NASA-TM-83765] p 988 N84-33414

Identification of quasi-steady compressor characteristics from transient data
[NASA-CR-174685] p 989 N84-34444

ENGINEERING DRAWINGS
Some mathematical tools for a modeller's workbench
p 491 N84-22204

ENGINEERING MANAGEMENT
Avionics software management and control
p 488 N84-26714

State of the art: Design for noise I
p 619 N84-29682

ENGINES
Stirling engine - Availability criteria --- optimum temperature ratio for waste heat recovery systems or without recuperators
p 565 N84-30082

Current status of an organic Rankine cycle engine development program
p 731 N84-28230

Overview of advanced Stirling and gas turbine engine development programs and implications for solar thermal electrical applications
p 729 N84-28231

ENTHALPY
Methodological aspects of the testing of aerodynamic models with combustion in high-enthalpy blowdown wind tunnels
p 655 N84-38673

Shock shape over a sphere cone in hypersonic high enthalpy flow
p 657 N84-38852

Introduction to unsteady flow in turbomachines
p 625 N84-25962

ENTRAINMENT
Entrainment effects on impingement heat transfer. I
Measurements of heated jet velocity and temperature distributions, and recovery temperatures on target surface
[ASME PAPER 83-HT-8] p 479 N84-29078

Unsteady viscous transonic flow computations using LTRAN2-NLR code coupled with Green's lag-entrainment method
[NLR-MP-82052-U] p 338 N84-18181

ENTROPY
Transonic small disturbance calculations including entropy corrections
p 8 N84-10103

Shock fitting in conical supersonic full potential flows with entropy effects
[AIAA PAPER 84-0261] p 174 N84-19247

Entropy corrections to supersonic conical nonlinear potential flows
[AIAA PAPER 84-1683] p 659 N84-39318

The absorption of an entropy layer on a blunted cone in hypersonic flow of a viscous gas
p 839 N84-45703

Effect of an entropy layer on the propagation of unsteady perturbations in a boundary layer with self-induced pressure
p 961 N84-47482

Entropy condition satisfying approximations for the full potential equations of transonic flow
[NASA-TM-85751] p 410 N84-20485

ENTRY GUIDANCE (STS)
Shuttle Performance: Lessons Learned, part 2
[NASA-CP-2283-PT-2] p 75 N84-10144

ENVIRONMENT EFFECTS
Ground and inflight operational effects of APU's
p 132 N84-12182

The industry's materials: SNIAS and general conditions of its environment
[SNIAS-832-502-101] p 624 N84-25865

Ground and inflight operational effects of APU's
[VFW-30/83-O] p 609 N84-26438

Noise measurement flight test: Data-analyses
Aerospatiale SA-365N Dauphin 2 helicopter
[AD-A143229] p 842 N84-33151

The high altitude pollution program (1978 - 1982)
[AD-A144390] p 1012 N84-34800

ENVIRONMENT PROTECTION
Flight noise problems in general aviation
p 143 N84-15416

The Fifteenth Sir Richard Fairey Memorial Lecture - The quieter airport
p 258 N84-21228

Aircraft noise control - Progress and prospects
p 595 N84-34950

The effect of aircraft with noise certificates according to class ICAO Annex 16 on the determination of noise protection domains following the law on protection against aircraft noise
[MPIS-117/1983] p 1016 N84-34234

ENVIRONMENT SIMULATION
Aerodynamic balance for high altitude simulation chamber
p 368 N84-25217

The wiper abrasion and rain erosion resistance of transparent materials and coatings for aircraft glazing
[AD-P003227] p 713 N84-26640

ENVIRONMENT SIMULATORS
Radar electromagnetic environment simulation
p 32 N84-10791

Experimental and theoretical evaluation of a fast-rise-time, high current lightning indirect effects simulator
p 241 N84-18527

Weather radar simulator
p 466 N84-26787

ENVIRONMENTAL CONTROL
Trade-off considerations for Environmental Control System on board of helicopters
p 287 N84-19648

Heat-powered environmental control systems for fighter aircraft
[SAE PAPER 831104] p 430 N84-29039

Advanced aircraft electric system
p 695 N84-36905

'Electric airplane' environmental control systems energy requirements
p 678 N84-36911

Electrically driven environmental control system
p 679 N84-36912

System for the removal of airborne contaminants from aircraft environmental control systems
[AD-D011172] p 1008 N84-33615

ENVIRONMENTAL ENGINEERING
Studies of US universities' research equipment needs inconclusive
[AD-A141784] p 793 N84-28821

ENVIRONMENTAL LABORATORIES
Laboratory evaluation of lightning induced transients in aircraft electrical wiring
[ONERA, TP NO. 1984-51] p 874 N84-45192

ENVIRONMENTAL MONITORING
Noise monitoring in the vicinity of general aviation airports
p 252 N84-18260

Design of a flight track and aircraft noise monitoring system
p 939 N84-45050

Development of an environmental stress indicator for airborne avionics equipment
p 1000 N84-46724

ENVIRONMENTAL SURVEYS
Helicopter noise survey performed at Parker Center, Pasadena, and Anaheim, California, on February 10-14, 1983
[AD-A130962] p 83 N84-11887

Studies to improve environmental assessments of sonic booms produced during air combat maneuvering
[AD-A138254] p 496 N84-22368

Area equivalent method VISICALC (trade name). Users' guide
[AD-A141430] p 814 N84-29572

ENVIRONMENTAL TESTS
Helicopter flight testing in natural snow and ice
[AIAA PAPER 83-2786] p 108 N84-13387

Lightning tests of aircraft fuel tank details
p 199 N84-18535

The cyclic fracture toughness of pressed panels of D16chT and V95pcht2 alloys in liquid media
p 308 N84-19582

Environmental testing for civil certificate of composite propellers
p 358 N84-25598

Thermal characteristics of standardized Air Force avionic enclosures
[SAE PAPER 831103] p 479 N84-29038

Extraordinary benefits of combined environmental reliability testing (CERT) on digital electronic engine controls
[SAE PAPER 831480] p 451 N84-29458

Flight service evaluation of composite components on Bell 206L and Sikorsky S-76 helicopters
p 710 N84-36521

Effect of adverse environment on composites
p 797 N84-40913

Oxidation of CoCrAlY and Y-implanted CoCrAl alloys
p 788 N84-42659

Microstructural characterization of service exposed CoCrAlY overlay coating
p 788 N84-42663

Effects of service environment on the boron/epoxy skins of the F-15 horizontal stabilator
p 884 N84-42749

Weldbond production process technology
p 916 N84-42761

Fatigue crack growth and low cycle fatigue of two nickel base superalloys
[NASA-CR-174534] p 78 N84-10267

Aircraft transparency testing methodology and evaluation criteria. Part 2: Methodology development for improved durability
[AD-A131928] p 122 N84-12157

Aircraft transparency testing methodology and evaluation criteria. Part 1: Test methods and information analysis
[AD-A131927] p 122 N84-12158

Protective linear materials for transparent plastics
[AD-P003204] p 712 N84-26617

Aircraft transparency testing methodology
[AD-P003213] p 685 N84-26626

Natural weathering of selected organic matrix composites
[AD-A14091] p 997 N84-33527

EPOXY MATRIX COMPOSITES
Effect of moisture on static and fatigue behavior of aramid composites
p 374 N84-25193

On the optical assessment of the void content in composite materials
p 806 N84-42206

Kevlar epoxy substrate for interconnecting leadless chip carrier
p 912 N84-42776

EPOXY RESINS
Carbon fibre fabric repairs to metal aircraft structures
p 502 N84-32983

Void formation in adhesive bonds
p 912 N84-42765

Characterization of MY 720 IV --- Tetraglycidylated Methylene Diamine
p 912 N84-42778

Development of a stable epoxy resin system for composite repair
[AD-A135390] p 310 N84-17395

Journal of aeronautical materials (selected articles)
[AD-A140181] p 572 N84-25611

Fluorepoxy and fluoroacrylic transparencies
[AD-P003201] p 712 N84-26614

Process for improving mechanical properties of epoxy resins by addition of cobalt ions
[NASA-CASE-LAR-13230-1] p 999 N84-34571

EQUATIONS OF MOTION
Automatic generation of helicopter rotor aeroelastic equations of motion
p 287 N84-19653

Incorporation of wind shear terms into the governing equations of aircraft motion
[AIAA PAPER 84-0275] p 304 N84-21860

Experimental determination of the input parameters to the parachute equations of motion
[AIAA PAPER 84-0798] p 401 N84-26566

Equations of motion of an elastic flight vehicle utilizing static aeroelastic characteristics of the restrained vehicle
[AIAA PAPER 84-0986] p 556 N84-31711

EQUILIBRIUM EQUATIONS

- General equations of motion for an elastic wing and method of solution p 805 A84-40843
 Biturbation analysis of aircraft pitching motions near the stability boundary
 [NASA-TM-85881] p 274 N84-17137
 Flexible aircraft flying and ride qualities p 461 N84-20572
 Effect of injection into boundary layer on flow of supersonic stream past oscillating cone p 664 N84-26925
 Experimental determination of the inertia constants of an airplane or of a missile
 [NASA-TM-77767] p 965 N84-33381
 Periodic control of the individual-blade-control helicopter rotor
 [NASA-CR-166607] p 1012 N84-34771

EQUILIBRIUM EQUATIONS

- The structural modelling of rotating blades p 889 A84-44963
 The behavior of dynamic systems near the limits of the stability region (2nd revised and enlarged edition) — Russian book p 1016 A84-48754

EQUILIBRIUM FLOW

- Numerical modelling of shockwaves and other discontinuities p 640 A84-37058
 Development and evaluation of a performance modeling flight test approach based on quasi steady-state maneuvers
 [NASA-CR-170414] p 689 N84-27724

EQUIPMENT

- Evaluation of selected commercial construction equipment for bomb damage repair
 [AD-A140907] p 707 N84-26714

EQUIPMENT SPECIFICATIONS

- High pressure ratio testing with a nozzle driven ejector
 [AIAA PAPER 84-1488] p 705 A84-36986
 Upgraded aircraft accident recorder standards p 692 N84-26574
 Deficiencies of current flight data recorders in accidents investigation p 692 N84-26575

EROSION

- The development of the high energy surface discharge spark igniter
 [ASME PAPER 84-GT-51] p 981 A84-46908
 High temperature erosion study of metals used in turbomachinery
 [ASME PAPER 84-GT-168] p 1004 A84-46972
 Erosion of corrosion resistant coatings for jet engine compressors
 [NLR-MP-83010-U] p 455 N84-21550
 Development of improved LACV-30 propeller blade coatings for protection against sand and rain erosion and marine environment corrosion
 [AD-A132999] p 727 N84-27914

ERROR ANALYSIS

- A computer-aided study of errors in discrete representations of an airfoil profile p 91 A84-14255
 Monopulse receivers for ATC beacon radar - Analysis, comparison and selection criteria p 111 A84-14308
 Measurement set to evaluate primary ATC radar performance in the presence of moving clutter p 112 A84-14316
 Investigation of a Microwave Scanning Beam Landing System azimuth error source — in Space Shuttle autoland guidance p 113 A84-15647
 On the breakdown of the Crocco temperature-velocity relationship and the law of the wall in compressible two-dimensional turbulent boundary layers p 170 A84-18351
 Performance analysis of monopulse receivers for secondary surveillance radar p 344 A84-23260
 A terrain-aided navigation system p 344 A84-23909
 Rate of climb for light propeller powered airplanes p 429 A84-26960
 The probability of overlap in the vertical dimension — for analyzing navigation errors p 424 A84-27940
 Uncertainty methodology for in-flight thrust determination
 [SAE PAPER 831438] p 431 A84-29452
 Application of in-flight thrust determination uncertainty
 [SAE PAPER 831439] p 432 A84-29453
 Further development of the DPS technique for precision DME — Double Pulse Shaping p 520 A84-32334
 Grid-size reduction in flow calculations on infinite domains by higher-order far-field asymptotics in numerical boundary conditions p 742 A84-40074
 The loss of prescribed separation between aircraft - How does it occur? p 764 A84-41077
 A study of blockage errors — induced by probe placement in turbojet and turbine engine flow passages p 904 A84-43318
 A statistical analysis of gravity-induced errors in airborne inertial navigation
 [AIAA PAPER 84-1877] p 855 A84-43433

- Application of estimation techniques for the evaluation of sensor errors from flight tests with the experimental strapdown system of DFVLR p 861 A84-45951
 Common misconceptions in the calculation of transonic full potential flows p 955 A84-47000
 [ASME PAPER 84-GT-211] p 955 A84-47000
 Aircraft navigation technology and errors
 [GPO-26-859] p 115 N84-13170

 Physiological acceptability tests of the modified SJU-5/A ejection seat for the F-18 aircraft p 518 N84-23614
 [AD-A139416] p 518 N84-23614
 A test of electroluminescent panels for a helicopter emergency escape lighting system p 518 N84-23616
 [AD-A139478] p 518 N84-23616
 Aircrew Gliding Escape System (AGES) exploratory development investigation of aircrew emergency escape ram-air inflated, flexible wing p 588 N84-24565
 [AD-A139928] p 588 N84-24565
 Proposed crashworthiness requirements for the Australian Basic Trainer p 674 N84-26682
 [AD-A140850] p 674 N84-26682
 History of aircraft escape system propulsion p 761 N84-29941
 Propulsion in a life-saving role for ACES 2 p 762 N84-29942
 The Stencil S4S ejection seat: A study in new pyrotechnic developments p 762 N84-29943
 Crest: Crew escape technologies for the 1990's p 762 N84-29944
 Energy management for crew escape systems p 762 N84-29945

ESTERS

- Liquid chromatographic analysis of a formulated ester from a gas-turbine engine test
 [ASLE PREPRINT 83-LC-1A-1] p 472 A84-28995

ESTIMATES

- An approximate method of estimating the aerodynamic interference between two parallel bodies (normal force and side force)
 [NAL-TR-752] p 105 N84-13154
 General aviation pilot and aircraft activity survey
 [PB84-154301] p 503 N84-23602
 A study of helicopter gust response alleviation by automatic control
 [NASA-TM-85870] p 543 N84-23655

ESTIMATING

- New centroid algorithm based upon amplitude-angle signature — for tracking radar p 29 A84-10518
 Estimation of flight-mechanical motion characteristics with Kalman filters p 292 N84-16126
 Estimating thermal fatigue strength of prototype blades in gas turbine engine p 701 N84-26906

EULER EQUATIONS OF MOTION

- Application of a finite element algorithm to the solution of steady transonic Euler equations p 10 A84-10133
 Numerical solution of the Euler equations on body-conforming curvilinear grids p 13 A84-11590
 Numerical methods for three-dimensional inviscid flow computations p 15 A84-11857
 Computation of three-dimensional transonic inviscid flows on a wing by pseudo-unsteady resolution of the Euler equations
 [ONERA, TP NO. 1983-125] p 91 A84-13640

SUBJECT INDEX

Numerical solution of the Euler equations for flow past an airfoil in ground effect
[AIAA PAPER 84-0051] p 156 A84-17847

Transonic flow calculations using a flux vector splitting method for the Euler equations
[AIAA PAPER 84-0090] p 158 A84-17875

Multigrid solution of the Euler equations for aircraft configurations
[AIAA PAPER 84-0093] p 158 A84-17876

Free vortex flows - Recent encounters with an Euler code
[AIAA PAPER 84-0135] p 160 A84-17903

A natural formulation for numerical solution of the Euler equations
[AIAA PAPER 84-0163] p 241 A84-17922

A conservative treatment of zonal boundaries for Euler equation calculations
[AIAA PAPER 84-0164] p 161 A84-17923

An implicit LU scheme for the Euler equations applied to arbitrary cascades --- new method of factoring
[AIAA PAPER 84-0167] p 161 A84-17925

Comparison of full-potential and Euler solution algorithms for transonic flowfield computations
[AIAA PAPER 84-0118] p 173 A84-18234

Airfoil computation at high angles of attack, inviscid and viscous phenomena
[AIAA PAPER 84-0524] p 268 A84-21876

Design and implementation of a multigrid code for the Euler equations
p 380 A84-24726

Simulation of the fluctuating field of a forced jet
p 578 A84-35309

Euler solutions as limit of infinite Reynolds number for separation flows and flows with vortices
p 579 A84-35344

Numerical solution of the Euler equation for a compressible flow problem
p 579 A84-35354

Numerical predictions of internal flows using a diagonalized flux vector splitting algorithm
[AIAA PAPER 84-1246] p 580 A84-35653

A new finite-volume method for the Euler equations with applications to transonic flows
p 640 A84-37059

Transonic aerofoil calculations using the Euler equations
p 640 A84-37060

Efficient and accurate numerical solutions of the Euler and Navier-Stokes equations for turbomachinery applications
[AIAA PAPER 84-1300] p 643 A84-37644

A numerical computation for the inviscid supersonic flow around bent cone
p 645 A84-37904

Three-dimensional unsteady Euler equations solution using flux vector splitting
[AIAA PAPER 84-1552] p 647 A84-37968

Conservative streamline solution of steady-state Euler equations
[AIAA PAPER 84-1643] p 719 A84-38030

Spurious entropy production and very accurate solutions to the Euler equations
[AIAA PAPER 84-1644] p 651 A84-38031

Flow prediction for propfan configurations using Euler equations
[AIAA PAPER 84-1645] p 652 A84-38032

New implicit boundary procedures - Theory and applications
p 743 A84-40836

Design using Euler equations --- for two dimensional airfoils
[AIAA PAPER 84-2166] p 746 A84-41338

Flow simulations for nacelle-propeller configurations using Euler equations
[AIAA PAPER 84-2143] p 827 A84-44192

Euler solutions of transonic vortex flows around the Dillner wing - Compared and analyzed
[AIAA PAPER 84-2142] p 829 A84-44201

Numerical solutions of the Euler equations governing axisymmetric and three-dimensional transonic flow
p 832 A84-44959

Analysis on an implicit Euler solver --- for steady transonic flow computation
[ONERA, TP NO. 1984-62] p 838 A84-45203

Computer simulation of non-potential flows around wings
p 845 A84-46189

A three-dimensional Euler solver for turbomachinery blade rows
[ASME PAPER 84-GT-79] p 952 A84-46922

Eigenmode analysis of unsteady one-dimensional Euler equations
[NASA-CR-172217] p 18 A84-10022

Vortex flow simulations past wings using the Euler equations
p 101 A84-12118

Numerical solutions of the Euler equations simulating vortex flows around wings
p 101 A84-12120

Hot wire in low Reynolds number flow
p 324 A84-18087

Calculating C-grids with fine and embedded mesh regions
[CFDL-TR-83-7] p 319 A84-18090

Computational Fluid Dynamics, volume 2
[VKI-LS-1984-04-VOL-2] p 627 N84-25988

Implicit time dependent methods for the solution of the Euler equations. Part 2: Application to transonic flows
p 627 N84-25990

An analysis of rotor blade twist variables associated with different Euler sequences and pretwist treatments
[NASA-TM-84394] p 686 N84-26693

An efficient approximate factorization implicit scheme for the equations of gasdynamics
[NASA-TM-85957] p 814 N84-29556

Acceleration to a steady state for the Euler equations
[NASA-CR-172398] p 758 N84-29852

Flux-vector splitting and Runge-Kutta methods for the Euler equations
[NASA-CR-172415] p 937 N84-31993

Numerical solutions of acoustic wave propagation problems using Euler computations
[NASA-CR-172434] p 938 N84-33112

Transonic viscous-inviscid interaction using Euler and inverse boundary-layer equations
p 964 N84-33376

EULER-LAGRANGE EQUATION
A second-order Lagrangian-Eulerian method for computation of two-dimensional unsteady transonic flows
[ONERA, TP NO. 1983-126] p 91 A84-13641

EUROPE
A procedure for the European ATM service --- Air Traffic Flow Management
p 111 A84-14307

EUROPEAN AIRBUS
Realization of reduced stability in a modern transport aircraft by controlling the center of gravity
[DGLR PAPER 82-092] p 62 A84-10567

Flight vibration test analysis - Methods, theory and application
[AIAA PAPER 83-2752] p 50 A84-12340

Flight vibration testing with tip vane on Airbus A310
[AIAA PAPER 83-2753] p 50 A84-12341

Structural flight load testing pre and post flight analysis
[AIAA PAPER 83-2763] p 50 A84-12349

Development and test of the lightning protection system for the CFRP rudder on A310 aircraft
p 199 A84-18549

Future airliner flight decks - Harnessing the new technology
p 291 A84-22498

Access to maintenance data via AIDS - Future aspects of the expanded AIDS --- Aircraft Integrated Data System
[MBB-UT-17-83-OE] p 295 A84-22660

A310 slat and flap control system management and experience
p 455 A84-26724

A310 hydraulic power system
[SAE PAPER 831487] p 434 A84-29545

Passenger aircraft in the year 2000
p 679 A84-37027

Modification of wing design to increase lift for future Airbus derivatives (NEW)
[BMFT-FB-W-83-005] p 54 N84-11167

Ground and inflight operational effects of APU's
p 132 N84-12182

Connection of large Airbus components taking example of control surfaces junctions
[MBB-UT-07-82-OE] p 201 N84-14134

The aerospace industry in Germany: Today and tomorrow
p 399 N84-21501

The 310 airbus test in the ONERA wind tunnel: Flight-wind tunnel comparison
p 565 N84-23587

Projects and programs as a reflection of the performances of engineers in aircraft making by Hans-Wocke
[MBB-UT-24-83-O] p 572 N84-25608

The Airbus: The state-of-the-art today, and future developments
[MBB-UT-22-83-O] p 599 N84-26437

Ground and inflight operational effects of APU's
[VFW-30/83-O] p 609 N84-26438

Engine condition monitoring with aircraft integrated data systems on Lufthansa A310
p 691 N84-26571

First experience with ARINC 717 Aircraft Integrated Data Systems (AIDS) on Airbus 310 for maintenance support
p 692 N84-26572

Unsteady aerodynamics of moving control surfaces at the Airbus wing
[BMFT-FB-W-84-001] p 790 N84-28811

EVACUATING (TRANSPORTATION)
Study on transport airplane unplanned water contact
[AD-A142092] p 761 N84-28764

EVALUATION
Testing to user's requirements - AMRAAM IOT&E --- Advanced Medium Range Air-to-Air Missile Initial Operational Test and Evaluation
[AIAA PAPER 83-2684] p 48 A84-12303

An F-18 Hornet maintainability and reliability program
[SAE PAPER 831540] p 452 A84-29465

Evaluation of 3-D graphics software: A case study
p 492 N84-22222

EVAPORATION
A study of fuel evaporation in the precombustion chamber
p 357 A84-25564

EVASIVE ACTIONS
Horizontal variable-speed interception game solved by forced singular perturbation technique
p 540 A84-31225

Suboptimal missile evasion through a sensitivity analysis of proportional guidance to target evasion maneuvers
[AD-A136803] p 352 N84-19338

Near-optimal finite solutions to the 3 and 4 step discrete evasion games
[AD-A136811] p 393 N84-20314

EVOLUTION (DEVELOPMENT)
Evolution of the digital avionics bus
p 440 A84-26733

The evolution of secondary surveillance radar
p 519 A84-30520

The evolving revolutionary all-electric airplane
p 678 A84-36906

The development of airborne pulse Doppler radar
p 675 A84-36915

Aircraft design in Canada from Silver Dart to Challenger and Dash 8
p 947 A84-46807

From autopilot to strapdown - Electrotechnology in inertial guidance and control
p 1017 A84-47690

EXCHANGING
Rapid electrolyte exchange procedures for 22 AH nickel-cadmium calgard cells
[AD-A142004] p 809 N84-30178

EXCIMER LASERS
High-average-power excimer laser system
p 557 A84-32346

EXCITATION
Flapping-torsional response of helicopter rotor blades to turbulence excitation
p 878 N84-31110

EXHAUST DIFFUSERS
A new concept for exhaust diffusers of altitude test cells
[AIAA PAPER 84-0634] p 367 A84-24210

Design and testing of scaled ejector-diffusers for jet engine test facility applications
[AD-A136745] p 371 N84-19364

EXHAUST EMISSION
Combustor development for automotive gas turbines
p 78 A84-10499

Multi-fuel rotary engine for general aviation aircraft
[AIAA PAPER 83-1340] p 216 A84-16971

NASA advanced low emissions combustor program
[ASME PAPER 83-JPGC-GT-10] p 450 A84-28982

A comparison of techniques for measuring particulate emissions of a gas turbine engine
[ASME PAPER 83-JPGC-GT-14] p 450 A84-28983

Fuel effects on gas turbine combustion - Liner temperature, pattern factor and pollutant emissions
[AIAA PAPER 84-1491] p 604 A84-35235

Experimental investigation of the low NOx vortex airblast annular combustor
[AIAA PAPER 84-1170] p 695 A84-36952

Shear layer mixing for low emission gas turbine primary zones
[ASME PAPER 84-GT-13] p 980 A84-46883

Some practical aspects of staged premixed, low emissions combustion
[ASME PAPER 84-GT-88] p 981 A84-46930

NO(x) abatement via water injection in aircraft-derivative turbine engines
[ASME PAPER 84-GT-103] p 981 A84-46941

Turbine engine exhaust hydrocarbon analysis, tasks 1 and 2
[AD-A131522] p 61 N84-10074

The use of fuel additives to control plume opacity of turbine engine test cells
[AD-A130777] p 76 N84-10339

Clean catalytic combustor program
[NASA-CR-168323] p 220 N84-15151

Aircraft generation equipment emissions estimator (AGEEE)
[AD-A136829] p 390 N84-20031

Laboratory evaluation of novel particulate control concepts for jet engine test cells
[AD-A137641] p 468 N84-20603

Experimental investigation of the low NO/sub x vortex airblast annular combustor
[NASA-TM-83615] p 536 N84-22567

Emissions variability and traversing on production RB211 engines
[PNR-90176] p 536 N84-22573

The design and development of a low emissions Transply combustor for the civil Spey engine
[PNR-90198] p 537 N84-22582

The design and development of a low emissions transply combustor for the civil Spey engine
p 607 N84-24755

EXHAUST FLOW SIMULATION

- The wind tunnel simulation of propulsion jets and their modeling by congruent plumes including limits of applicability
 [AIAA PAPER 84-0232] p 231 A84-17962
 Comparison of full-scale engine and subscale model performance of a mixed flow exhaust system for an energy efficient engine (E3) propulsion system
 [AIAA PAPER 84-0283] p 217 A84-17997
 A solution for aero-acoustic induced vibrations originating in a turbofan engine test cell
 [AIAA PAPER 84-0594] p 365 A84-24185
 Aerodynamic balance for high altitude simulation chamber
 p 368 A84-25217
 Comparative study of the acoustic fields of air and helium jets at subsonic outflow speeds
 p 494 A84-28810

EXHAUST GASES

- Numerical computation of base flow for a missile in the presence of a centered jet
 [AIAA PAPER 84-0527] p 168 A84-18151
 Interaction region of a two-dimensional turbulent plane jet in still air
 p 171 A84-18359
 Theoretical and experimental study of infrared radiation from helicopters
 p 283 A84-19624
 Air-sampling inlet contamination by aircraft emissions on the NASA CV-990 aircraft
 [AIAA PAPER 84-0029] p 279 A84-21283
 An experimental study of the aerodynamic shielding of the air intake of a turbojet engine from the exhaust gases
 p 357 A84-25567
 A comparison of techniques for measuring particulate emissions of a gas turbine engine
 [ASME PAPER 83-JPGC-GT-14] p 450 A84-28983
 Thrust reverser exhaust plume reingestion model tests
 p 601 A84-34457
 Calculation of turbulent flow about missile afterbodies containing an exhaust jet
 [AIAA PAPER 84-1659] p 844 A84-46117
 An advanced facility for the analysis of gas turbine exhausts
 [ASME PAPER 84-GT-95] p 992 A84-46936
 The use of fuel additives to control plume opacity of turbine engine test cells
 [AD-A130777] p 76 A84-10339
 Dynamic gas temperature measurement system, volume 1
 [NASA-CR-168267-VOL-1] p 316 A84-16529
 Deposition of Na₂SO₄ from salt-seeded combustion gases of a high velocity burner rig
 [NASA-TM-83751] p 926 A84-31558
 Using gas-turbine power stations with aircraft engines for power-and-heat generation
 [AD-A142084] p 932 A84-31786
 The high altitude pollution program (1976 - 1982)
 [AD-A144390] p 1012 A84-34800

EXHAUST NOZZLES

- The density distribution of a supersonic jet issuing into a vacuum from a nozzle with a beveled exit section
 p 261 A84-19571
 Investigation of mixing in a turbofan exhaust duct. I
 Analysis and computational procedure
 p 329 A84-23361
 Multi-functional nozzle for advanced weapon systems
 [SAE PAPER 831426] p 452 A84-29528
 Exhaust system for combat aircraft optimized for supersonic cruise
 p 574 A84-34172
 Vectoring exhaust nozzle technology
 [AIAA PAPER 84-1175] p 694 A84-36829
 Aerodynamic performance of acoustically suppressed exhaust nozzles
 [AIAA PAPER 84-1173] p 696 A84-36954
 Axisymmetric approach and landing thrust reverser concepts Hot flow test results
 [AIAA PAPER 84-1176] p 696 A84-36955
 High pressure ratio testing with a nozzle driven ejector
 [AIAA PAPER 84-1488] p 705 A84-36986
 Velocity and temperature characteristics of two-stream, coplanar jet exhaust plumes
 [AIAA PAPER 84-2205] p 891 A84-46106
 Inverted velocity profile semi-annular nozzle jet exhaust noise experiments
 [NASA-TM-83525] p 144 A84-13924
 Apparatus and method for jet noise suppression
 [NASA-CASE-LAR-11903-2] p 254 A84-14873
 Fluid shielding of high-velocity jet noise
 [NASA-TP-2259] p 254 A84-15894
 Design and testing of scaled ejector-diffusers for jet engine test facility applications
 [AD-A136745] p 371 A84-19364
 Low frequency noise in a quiet, clean, general aviation turbofan engine
 [NASA-TM-83520] p 395 A84-20320
 Aircraft exhaust plume signature predictions for non-axisymmetric multiple engine installations
 p 537 A84-22627

- Velocity and temperature characteristics of two-stream, coplanar jet exhaust plumes
 [NASA-TM-83730] p 781 A84-28790
 Investigation of parameters influencing the deflection of a thick wall jet by a thin wall jet coflowing over a rounded corner
 [AD-A142773] p 848 A84-31099
 Axisymmetric thrust augmenting ejector with discrete primary air slot nozzles
 [AD-D011129] p 893 A84-32386
 Thrust Reverser/Exhaust nozzle assembly for a gas turbine engine
 [AD-D011101] p 894 A84-32392

EXHAUST SYSTEMS

- Investigations of transonic Ludwig tubes. II - Starting process in the case of a downstream valve
 p 466 A84-26949
 Exhaust system for combat aircraft optimized for supersonic cruise
 p 574 A84-34172
 Vectoring exhaust nozzle technology
 [AIAA PAPER 84-1175] p 694 A84-36829

EXHAUST VELOCITY

- Particle sizing in a fuel-rich ramjet combustor
 [AD-A135632] p 359 A84-18204

EXPERIMENT DESIGN

- Design and operation of a coordinated multisite test environment
 p 230 A84-16638
 Experimental design for calibration of wind tunnel balances
 p 367 A84-25215

EXPERT SYSTEMS

- Pilot support for mission flight planning using expert systems
 [SAE PAPER 831467] p 418 A84-29500
 Computational aerodynamics and artificial intelligence
 [AIAA PAPER 84-1531] p 733 A84-39306
 Integrated testing and maintenance technologies
 [AD-A138587] p 503 A84-22528
 Computational aerodynamics and artificial intelligence
 [NASA-TM-85994] p 847 A84-31089

EXPLODING WIRES

- An experimental and numerical study of weak spherical N-waves produced by exploding wires
 [UTIAS-TECH-NOTE-248] p 483 A84-20779

EXPLOSIONS

- Electrostatic safety with explosion suppressant foams
 [AD-A137503] p 343 A84-19314
 Aircraft accident report. Western Helicopters, Inc., Bell-UH-1B, N87701, Valencia, California July 23, 1982
 [PB84-910402] p 419 A84-20502
 Annual meeting of the Pyrotechnics and Explosives Applications Section on the American Defense Preparedness Association
 [AD-A143157] p 915 A84-31406

EXPLOSIVE DEVICES

- Annual meeting of the Pyrotechnics and Explosives Applications Section on the American Defense Preparedness Association
 [AD-A143157] p 915 A84-31406

EXTERNAL STORE SEPARATION

- Store separation at transonic speeds
 p 9 A84-10106
 The use of a panel method in the prediction of external store separation
 p 504 A84-30803
 Ejection launchers kick missiles away safely
 p 677 A84-36793
 Navy's advanced aircraft armament system program concept objectives
 p 202 A84-15045
 Aerodynamic characteristics of a Sparrow 3 missile model in the flow field of a generalized parent body at Mach 2.86
 [NASA-TM-85713] p 273 A84-17134
 Recent developments in store separation and grid survey techniques using the ARA Two-Sting Rig
 p 515 A84-23595
 A self-contained captive trajectory system for a blowdown wind tunnel
 p 546 A84-23596
 The accelerated light model technique of store separation as developed and used at British Aerospace, Brough
 p 528 A84-23597

EXTERNAL STORES

- Description and application of a stand-alone airborne aerodynamic data-recording system
 [AIAA PAPER 83-2757] p 56 A84-12344
 Low level delivery test program - Correlation of wind tunnel/sled track test separation results
 [AIAA PAPER 83-2761] p 72 A84-12347
 A simple method for the derivation of isolated and installed store loads
 p 267 A84-21796
 Wind tunnel correlation study of aerodynamic modeling for F/A-18 wing-store tip-missile flutter
 p 524 A84-30806
 Application of panel methods in external store load calculations
 p 646 A84-37940
 F-14 high angle of attack investigation with asymmetric thrust and external stores
 p 867 A84-44465

- The use of multipoles for calculating the aerodynamic interference between bodies of revolution
 p 829 A84-44509
 Influence of main design parameters on flutter behaviour for aircraft configurations with heavy concentrated masses
 p 68 A84-11122
 Fast flutter clearance by parameter variation
 p 68 A84-11135
 Computer generated pictorial stores management displays for fighter aircraft
 [AD-A131412] p 57 A84-11168
 External stores interference
 p 96 A84-12083
 Preliminary airworthiness evaluation of the UH-60A configured with the External Stores Support System (ESSS)
 [AD-A132964] p 201 A84-14139
 TAS: A Transonic Aircraft/Store flow field prediction code
 [NASA-CR-3721] p 177 A84-15114
 Stores weight and inertia system update: Cable attachment redesign, flexible length parameter calibration, data sheet revision
 [AD-A141087] p 773 A84-28781
 Active suppression of aeroelastic instabilities for forward swept wings
 [AD-A141739] p 773 A84-28783
 MIL-STD-1760 development program
 [AD-P003526] p 883 A84-31130
 Aircraft-store Electrical Interconnection System (AEIS) functional requirements
 [AD-P003527] p 923 A84-31131
 Signal set standardization for the aircraft-store electrical interconnection system
 [AD-P003528] p 924 A84-31132
 Consideration of MIL-STD-1760, aircraft/store electrical interface standard on stores management system architectures
 [AD-P003529] p 883 A84-31133
 Aircraft multiplexing system architecture and stores compatibility
 [AD-P003530] p 883 A84-31134
 Aircraft loading adapter for use with ordnance lift vehicle
 [AD-D011147] p 992 A84-33421
 Determination of external store drag
 p 976 A84-34397
 Flight test techniques used for proof of structural integrity of Tornado when carrying external stores
 p 977 A84-34413

EXTERNAL SURFACE CURRENTS

- Application of charging effects - Ranging of aircraft
 p 199 A84-18543

EXTERNALLY BLOWN FLAPS

- Circulation controlled STOL wing optimization
 p 268 A84-22173
 C-17 transport employs externally blown flap system
 p 683 A84-38465
 YC-15 EBF (Externally-Blown Flap) STOL (Short Takeoff and Landing) airplane fuselage and interior noise environment
 [AD-A131462] p 54 A84-11164

EXTRAPOLATION

- A navigation algorithm using measurement-based extrapolation
 p 189 A84-19345
 Analytic extrapolation to full-scale aircraft dynamics
 p 347 A84-24110
 Development of MCAERO wing design panel method with interactive graphics module
 [NAS 1.60:3775] p 529 A84-23623
 Triangular extrapolation
 [AD-A144660] p 1015 A84-35025

EXTREMUM VALUES

- Elements of the theory of a class of ill posed extremum problems -- for aerodynamic configuration and airfoil optimization
 p 732 A84-37227
 Extremum problem of a wing with maximum lift near a screen
 p 642 A84-37228
 Investigation of two extremal problems of quadrupole wing theory
 p 717 A84-37230

EXTRUDING

- Solid state compressor
 [AD-A140498] p 627 A84-26032
 Low cost thermal protection system processing
 [AD-D011142] p 915 A84-32434

F

F-106 AIRCRAFT

- Analysis of electromagnetic fields on an F-106B aircraft during lightning strikes
 p 198 A84-18519
 Lightning attachment patterns and flight conditions experienced by the NASA F-106B airplane from 1980 to 1983
 [AIAA PAPER 84-0466] p 183 A84-19255

- Effects of ventilation and panel properties on temperature rise from aircraft fires [DOT/FAA/CT-TN83/63] p 280 N84-16157

Integrated aircraft fuel tank inerting and compartment fire suppression system. Volume 2: Evaluation of nitrogen-enriched air as a fire suppressant [AD-A134883] p 281 N84-17157

Computer modeling of aircraft cabin fires [PB84-101153] p 282 N84-17162

Aircraft seat fire blocking layers. Effectiveness and benefits under various scenarios [AD-A140796] p 674 N84-26681

A research study of the assessment of escape impairment by irritant combustion gases in postcrash aircraft fires [FAA-CT-84-16] p 854 N84-32366

FITTINGS

Economic riveting: Different bore qualities, fittings, connection elements p 561 N84-23560

FIXED WINGS

GPS fixed wing FAA exploratory flight test p 114 N84-15654

The anelastic compliant rotor - An analytic and experimental investigation p 287 N84-19652

Tunnel display for four-dimensional fixed-wing aircraft approaches p 531 N84-32716

An approach to selecting gas turbine engine ratings for fixed wing airplanes [ASME PAPER 84-GT-163] p 973 N84-46967

Rotor systems research aircraft: Fixed-wing simulations results [NASA-TM-85863] p 124 N84-13176

Numerical studies of the deposition of material released from fixed and rotary wing aircraft p 410 N84-20491

Application of the small body pressure transducer [AD-P002687] p 484 N84-20822

FLAME DEFLECTORS

Velocity characteristics in the turbulent near wakes of confined axisymmetric bluff bodies p 403 N84-26883

FLAME HOLDERS

An experimental study of the thermal state of the walls of a combustion chamber with flame tubes under service conditions p 921 N84-45822

FLAME PROPAGATION

The survivability aspects of post crash fires p 26 N84-11618

Dynamic effects of combustion p 472 N84-29128

Flame radiation in gas turbine combustion chambers p 996 N84-49444

Flame radiation and liner heat transfer in a tubular-can combustor [NASA-TM-83538] p 133 N84-13188

Aerodynamic features of flames in premixed gases p 473 N84-20559

Wall effects on combustion in an engine [AD-A141418] p 782 N84-28796

FLAME RETARDANTS

New fireworthy composites for use in transportation vehicles p 472 N84-28873

Fire management-suppression system-concepts relating to aircraft cabin fire safety [FAA-CT-82-134] p 183 N84-14130

Fire-retardant decorative inks for aircraft interiors [NASA-TM-85876] p 376 N84-19475

Evaluation of an improved flame resistant aircraft window system [FAA-CT-83-10] p 674 N84-26680

Fire blocking systems for aircraft seat cushions [NASA-CASE-ARC-11423-1] p 968 N84-33394

FLAME TEMPERATURE

Effects of flame temperature and fuel composition on soot formation in gas turbine combustors p 298 N84-22747

FLAMMABILITY

Optimization of aircraft seat cushion fire blocking layers [NASA-TM-85430] p 28 N84-10037

Improved acrylic systems for rapid runway repair [AD-A130389] p 73 N84-10103

Antimisting fuel breakup and flammability [NASA-CR-174508] p 310 N84-16354

Evaluation of an improved flame resistant aircraft window system [FAA-CT-83-10] p 674 N84-26680

FLANGES

An analysis of the flanged joints of the stator of an aircraft gas turbine engine p 887 N84-43920

FLAPPING

On the adequacy of modeling dynamic inflow for helicopter flap-lag stability p 287 N84-19649

The influence of different inflow models on the coupled flapping and torsion of helicopter rotor blades p 303 N84-19651

Flap-lag damping of an elastic rotor blade with torsion and dynamic inflow in hover from symbolically generated equations [AIAA PAPER 84-0989] p 619 N84-34909

Aerodynamics of hovering p 664 N84-26923

A model of rotor blade first natural flapping response for up to three/rev excitations [AD-A141725] p 773 N84-28782

FLAPPING HINGES

New aspects on helicopter rotor dynamics p 287 N84-19650

FLAPS (CONTROL SURFACES)

The performance of a subsonic combat aircraft with transonic wing and maneuver flaps [DGLR PAPER 82-101] p 45 N84-10570

A310 slat and flap control system management and experience p 455 N84-26724

Unsteady aerodynamics of rapidly moving flaps and spoilers for the active-control reduction of gust and maneuver loads [DGLR PAPER 83-107] p 408 N84-29670

Design and experimental verification of the USB flap panel structure for NAL-STOL research aircraft p 594 N84-34451

Study of an asymmetric flap nozzle as a vector-thrust device [AIAA PAPER 84-1360] p 576 N84-35190

National Aerospace Laboratory News (Japan) [NASA-TM-76962] p 352 N84-19335

Pitch control of a satellite using stabilizing flaps [INPE-3185-PRE/550] p 910 N84-31246

Flow-field measurements on an airfoil with an oscillating trailing-edge using holographic interferometry [NASA-CR-166604] p 967 N84-34430

FLARED BODIES

An evaluation of a parabolized Navier-Stokes (PNS) code for cone-cylinder-flared configurations [AIAA PAPER 84-2116] p 751 N84-42361

FLAT PLATES

Nose shape effects on turbulence in the separated and reattached flow over blunt flat plates p 93 N84-14754

Experimental studies on two dimensional shock boundary layer interactions [AIAA PAPER 84-0099] p 159 N84-17881

The structure of a two-dimensional, supersonic, high Reynolds number turbulent wake p 170 N84-18352

Turbulent flow near the trailing edge of a plate at zero angle of attack p 260 N84-19553

Electro-impulse deicing - Structural dynamic studies, icing tunnel tests and applications [AIAA PAPER 84-0022] p 288 N84-19886

Periodic vortex shedding in the supersonic wake of a planar plate p 263 N84-20842

Interaction between a turbulent planar plate boundary layer and a planar cylinder wake p 264 N84-20843

An actuator disc analysis of unsteady supersonic cascade flow p 265 N84-21189

Separated flow noise of a flat plate at large attack angles p 321 N84-21221

Numerical solution of hypersonic flow near leading edge of flat plate p 329 N84-23903

Design of high-Reynolds-number flat-plate experiments in the NTF [AIAA PAPER 84-0588] p 368 N84-25726

A theoretical and experimental investigation of the bending-rolling process applied to sheets to form conical aircraft parts p 553 N84-30416

A method for measuring skin friction drag on a flat plate in contaminated gas flows p 646 N84-37943

Protuberance interference heating in high-speed flow [AIAA PAPER 84-1724] p 722 N84-39368

The flows over tapered flat plates normal to the stream p 660 N84-39720

Prandtl-Batchelor flow past a flat plate with a forward-facing flap [AD-A146324] p 749 N84-41808

Discrete frequency noise generated from a flat plate in parallel with a uniform oncoming flow p 938 N84-43693

Computational analyses of unsteady flow past airfoils with flapping and/or pitching motion p 16 N84-10013

Nonperiodic fluctuations induced by stationary surface waviness on a semi-infinite plate [AD-A130820] p 21 N84-11146

Interaction of unsteady spatial boundary layer with hypersonic flow near rapidly heated portion of surface p 513 N84-22794

Numerical aerodynamic analysis of a free falling autorotating plate [AD-A138900] p 517 N84-23612

Unsteady laminar boundary-layer calculations on oscillating configurations including backflow. Part 2: Airfoil in high-amplitude pitching motion. Dynamic stall [NASA-TM-84319-PT-2] p 581 N84-24537

Large deflection multimode response of clamped rectangular panels to acoustic excitation, volume 1 [AD-A139622] p 624 N84-25107

Three-dimensional unsteady viscous flow analysis over airfoil sections [NASA-CR-172368] p 808 N84-29152

Interference drag in a simulated wing-fuselage juncture [NASA-CR-3811] p 758 N84-29853

FLAT SURFACES

Supersonic nonstationary flow around flat and axisymmetric tapered bodies p 333 N84-25617

FLEXIBILITY

Effect of structural flexibility on the design of vibration-isolating mounts for aircraft engines [NASA-TM-85725] p 316 N84-16590

Vibration and flutter of mistuned bladed-disk assemblies [NASA-TM-83634] p 563 N84-23923

Multi-variate acceptance plans for flexible airport pavements p 906 N84-31220

FLEXIBLE BODIES

Three-dimensional testing in a flexible-wall wind tunnel [AIAA PAPER 84-0623] p 366 N84-24203

Samara type decelerators --- for submunitions [AIAA PAPER 84-0807] p 401 N84-26572

The influence of surface compliance on the production of sound by a turbulent boundary layer p 816 N84-41130

Structural dynamics of rotating bladed-disk assemblies coupled with flexible shaft motions p 889 N84-44645

A blade loss response spectrum for flexible rotor systems [ASME PAPER 84-GT-29] p 1001 N84-46893

The active magnetic bearing enables optimum damping of flexible rotor [ASME PAPER 84-GT-117] p 1003 N84-46951

Flight test and analyses of the B-1 structural mode control system at supersonic flight conditions [NASA-CR-170405] p 138 N84-13197

The 2-dimensional inextensible lifting membrane airfoil, theory and experiment [AD-A135251] p 275 N84-17147

Interactive aircraft flight control and aeroelastic stabilization [NASA-CR-173866] p 902 N84-31214

FLEXIBLE SPACECRAFT

A simulator to study dynamic interaction of the Space Shuttle on-orbit flight control system with deployed flexible payloads p 469 N84-26717

System definition study of deployable, non-metallic space structures [NASA-CR-171090] p 796 N84-28887

FLEXIBLE WINGS

Variable geometry airfoils using inflatable surfaces [AIAA PAPER 84-0072] p 157 N84-17860

Solar array power to weight performance of 1: to 10-kilowatt, flat-folded flexible wings p 547 N84-30146

The connected problem of flexible wing oscillations in a compressible flow p 641 N84-37070

AGES exploratory development investigation of aircrew emergency escape ram-air inflated flexible wing --- Aircrew Gliding Escape System (AGES) p 968 N84-47261

An evaluation of a mobile aerodynamic test facility for hang glider wings [COFA-8330] p 371 N84-19361

A computational method for predicting the effects of varying Reynolds number and dynamic pressure on flexible wings at transonic speeds p 412 N84-21508

Evaluation of a digital flight controller for a flexible-fighter aircraft [AD-A138269] p 464 N84-21558

Aircrew Gliding Escape System (AGES) exploratory development investigation of aircrew emergency escape ram-air inflated, flexible wing [AD-A139928] p 588 N84-24565

FLEXING

Oscillations of elastic airplane due to wind gust p 880 N84-32087

FLIGHT

X-29 flight-research program [NASA-TM-86025] p 292 N84-16168

FLIGHT ALTITUDE

Optimization of aircraft altitude and flight-path angle dynamics p 225 N84-17368

The probability of overlap in the vertical dimension --- for analyzing navigation errors p 424 N84-27940

Problems concerning the stability of a flight vehicle at a given altitude p 702 N84-37233

Estimating the pressure altitude of aircraft by radar p 690 N84-37796

Helistat simulation studies [NASA-CR-166567] p 460 N84-20564

System for indicating fuel-efficient aircraft altitude [NASA-CASE-NPO-15351-2] p 980 N84-34443

FLIGHT CHARACTERISTICS

Investigations of the flight characteristics of airliners with reduced static longitudinal stability [DGLR PAPER 82-091] p 62 N84-10566

Problems regarding flight characteristics in connection with a performance-optimum design of future combat aircraft
[DGLR PAPER 82-097] p 45 A84-10569

AD-1 oblique wing research aircraft pilot evaluation program
[AIAA PAPER 83-2509] p 45 A84-10573

Stratospheric hot-air balloon completes revolution around the globe p 1 A84-10621

Mission-specific effects on helicopter flight mechanics p 63 A84-11062

F-16XL flight test program overview
[AIAA PAPER 83-2730] p 48 A84-12324

Comment on "Low-order approaches to high-order systems Problems and promises" p 64 A84-12493

SUBJECT INDEX

An efficient approximate factorization implicit scheme for the equations of gasdynamics [NASA-TM-85957] p 814 N84-29556

FLOW GEOMETRY

Cellular patterns in poststall flow over unswept wings p 90 A84-13586
Calculation of the boundary layer of profiles for flows with laminar and turbulent zones p 92 A84-14264
Geometric characteristics of the separation of a turbulent boundary layer during the interaction with a normal shock in conical flows p 260 A84-19555
Instability of compressible boundary layers along curved walls with suction or cooling p 266 A84-21507
An evaluation of the effect of the circumferential inhomogeneity of the total pressure field of the inlet flow on the parameters of an axial-flow compressor p 332 A84-25565

Axial feedback in supersonic compressor stages with constant and variable impeller geometry [DGLR PAPER 83-151] p 408 A84-29688
Effects of pin shape and array orientation on heat transfer and pressure loss in pin fin arrays p 618 A84-33707

Orthogonal grid generation [AIAA PAPER 84-1248] p 622 A84-35654
An experimental and analytical study of flow through a supersonic open channel with contoured floor [AIAA PAPER 84-1179] p 643 A84-37629
Numerical simulation of the viscous flow fields over three-dimensional complicated geometries [AIAA PAPER 84-1550] p 647 A84-37967
A computational method for helicopter vortex wakes [AIAA PAPER 84-1554] p 648 A84-37969
Effects of Mach number on the development of a subsonic multiple jet [AIAA PAPER 84-1656] p 652 A84-38038
Design and test of two 8:1 pressure ratio single stage centrifugal compressors of different flow size p 699 A84-38482

Flow analysis in the exit plane of high turning angle turbine blades p 655 A84-38485
Shock shape over a sphere cone in hypersonic high enthalpy flow p 657 A84-38852
Numerical studies of motion of vortex filaments - Implementing the asymptotic analysis [AIAA PAPER 84-1542] p 658 A84-39313
An experimental investigation of the aerodynamic characteristics of bodies having square cross-section at transonic speeds [AIAA PAPER 84-2091] p 750 A84-42344

Plane, rectangular, axisymmetric convergent channels p 842 A84-45738
An optimization of subsonic axisymmetric transition channels --- in aircraft engines p 842 A84-45739
Effect of nonuniform geometries on flow distributions and heat transfer characteristics for arrays of impinging jets [ASME PAPER 84-GT-156] p 1004 A84-46963

A simple method for solving three-dimensional inverse problems of turbomachine flow and the annular constraint condition [ASME PAPER 84-GT-198] p 954 A84-46994
The effect of gasdynamic and geometrical parameters of flow in a stepped pipe on the base pressure p 960 A84-47100

Results of the test on ONERA calibration model M5 in NAL 2m x 2m Transonic Wind Tunnel [NAL-TR-774T] p 370 N84-18215
Conical flows with leading edge vortices p 623 N84-25013

FLOW MEASUREMENT

Measurements and calculations of a separating boundary-layer and the downstream wake p 5 A84-10084

Measurements of attached and separated turbulent flows in the trailing-edge regions of airfoils p 7 A84-10097
Analytical and experimental study of axisymmetric underexpanded jets p 11 A84-10504
Flow quality in wind tunnels; Meeting, Bremen, West Germany, September 9, 10, 1982, Reports p 69 A84-10551

Calibration of the test section flow in the German-Dutch wind tunnel p 70 A84-10552
Hot-wire anemometer measurements in large wind tunnels p 70 A84-10553
The DFVLR Goettingen high-pressure wind tunnel - Tunnel characteristics and flow quality p 70 A84-10555

Flow quality in the ETW rig p 70 A84-10556
Effects of wind tunnel turbulence on test results. I. Problematic, planned investigations, turbulence in level flow: Discussion issue p 70 A84-10558
Effect of wind tunnel turbulence on model test results. II Comparative tests in German 3-m wind tunnels p 70 A84-10559

Three-dimensional flowfield inside a low-speed axial flow compressor rotor p 90 A84-13574
Investigation of supersonic separated flow in a compression corner by laser Doppler anemometry p 94 A84-15080

Three-dimensional turbulent boundary-layer development on a fan rotor blade p 153 A84-17437
Experiments and computation on two-dimensional turbulent flow over a backward facing step --- for solid-fueled ramjets [AIAA PAPER 84-0013] p 155 A84-17832
Transonic airfoil and wing flowfield measurements [AIAA PAPER 84-0100] p 159 A84-17882

The influence of leading-edge load alleviation on supersonic wing design [AIAA PAPER 84-0138] p 160 A84-17906
The effect of a short region of concave curvature on a supersonic turbulent boundary layer [AIAA PAPER 84-0169] p 161 A84-17927

Computed and measured wall interference in a slotted transonic test section [AIAA PAPER 84-0243] p 163 A84-17971
The structure of a two-dimensional, supersonic, high Reynolds number turbulent wake p 170 A84-18352
Trailing vortices in homogeneous and density-stratified media p 262 A84-19952

Interaction between a turbulent planar plate boundary layer and a planar cylinder wake p 264 A84-20843
Acoustic power dissipation on radiation through duct terminations - Experiments p 321 A84-21272
Dynamic flow quality measurements in the Langley Low Turbulence Pressure Tunnel [AIAA PAPER 84-0621] p 366 A84-24201

ICIASF '83: International Congress on Instrumentation in Aerospace Simulation Facilities, Saint-Louis, Haut-Rhin, France, September 20, 1983, Record p 367 A84-25201

Application of laser anemometry to cryogenic wind tunnels p 388 A84-25226
A study of fuel evaporation in the precombustion chamber p 357 A84-25564
An experimental study of the aerodynamic shielding of the air intake of a turbojet engine from the exhaust gases p 357 A84-25567

Determination of total pressure losses in stepped annular diffusers with curved outer walls and a homogeneous inlet velocity field p 357 A84-25568
Investigations of transonic Ludwig tubes. II - Starting process in the case of a downstream valve p 466 A84-26949

Aerodynamic measurements about a rotating propeller with a laser velocimeter p 404 A84-26957
Experimental studies of the separated flow over a NASA GA(W)-1 airfoil p 405 A84-27144
International Symposium on Applications of Laser-Doppler Anemometry to Fluid Mechanics, Lisbon, Portugal, July 5-7, 1982, Proceedings p 477 A84-28701

Compact, pulsed LDA for airborne and windtunnel applications p 478 A84-28730
A comparison of turbulence intensity measurements using a laser velocimeter and a hot wire in a low speed jet flow p 478 A84-28741

Entrainment effects on impingement heat transfer. I. Measurements of heated jet velocity and temperature distributions, and recovery temperatures on target surface [ASME PAPER 83-HT-8] p 479 A84-29078

Velocity characteristics of the flow around disks and cones [ASME PAPER 83-WA/FE-15] p 504 A84-30629

Measurements of the flow from a high-speed compressor rotor using a dual probe digital sampling (DPDS) technique [ASME PAPER 83-GT-215] p 532 A84-31288
Experimental study of centrifugal impeller discharge flow in vaneless and vanned diffusers p 505 A84-31290

On the evaluation of Reynolds number and relative surface roughness effects on centrifugal compressor performance based on systematic experimental investigations [ASME PAPER 83-GT-118] p 533 A84-31291

Application of laser velocimetry to the study of the flow behind a spoiler [AAAF PAPER NT 83-21] p 508 A84-32489

A conditional-sampling study of the interaction of two turbulent wakes p 557 A84-32600
Hot-wire investigation of an unseparated shock-wave/turbulent boundary-layer interaction p 508 A84-32602

Two-dimensional wind-tunnel interference from measurements on two contours p 574 A84-34459
Experimental investigation of wall interference and two-dimensionality of the flow in a transonic airfoil wind tunnel p 576 A84-35017

Flow and heat transfer measurements along a cooled supersonic diffuser p 639 A84-36487

The application of surface hot film in aerodynamic testing p 718 A84-37909
Instantaneous flow field measurements of stalled regions on an oscillating airfoil [AIAA PAPER 84-1565] p 648 A84-37974

Measurements of the 3D turbulent flow behind a propeller in a shear flow [AIAA PAPER 84-1676] p 653 A84-38052

Laminar flow and transition on swept wings p 654 A84-38413
Turbulence measurements in a compressible reattaching shear layer p 656 A84-38830
Shock shape over a sphere cone in hypersonic high enthalpy flow p 657 A84-38852

LDV measurements of three-dimensional flow development in a curved rectangular duct with inlet shear profile p 657 A84-38898
A real-time interferometer technique for compressible flow research [AIAA PAPER 84-1600] p 722 A84-39309

Turbulence measurements in an ejector wing flow field p 744 A84-40858
The structure of turbulence in a supersonic shock-wave/boundary-layer interaction p 830 A84-44635

An experimental study of a supercritical trailing-edge flow [AIAA PAPER 84-2187] p 843 A84-46105
Optical measurements of soot size and number density in a spray-atomized, swirl-stabilized combustor [ASME PAPER 84-GT-153] p 995 A84-46962

Unsteady losses in transonic compressors [ASME PAPER 84-GT-183] p 954 A84-46984
An experimental study of the compressor rotor blade boundary layer [ASME PAPER 84-GT-183] p 954 A84-46991

Investigation of the three-dimensional flow field within a transonic fan rotor - Experiment and analysis [ASME PAPER 84-GT-200] p 955 A84-46995
Validation of flow coefficients measurement by laser velocimeter in straight-through labyrinth seal models with full size test rig results [ASME PAPER 84-GT-280] p 1006 A84-47040

Flow mechanism and experimental investigation of a rotating stall in transonic compressors [NASA-TM-77373] p 178 N84-15122
Calibration of air-data systems and flow direction sensors. AGARD Flight Test Techniques Series, volume 1 [AGARD-AG-300-VOL-1] p 248 N84-15530

Flow measurements in the stator row of a single-stage transonic axial-flow compressor with controlled diffusion stator blades p 302 N84-18209
Experimental determination of the relative flow at the tip of a transonic axial compressor rotor [AD-A137483] p 339 N84-19288

Evaluation of a flow direction probe and a pitot-static probe on the F-14 airplane at high angles of attack and sideslip [NASA-TM-84911] p 437 N84-20514
Application of laser velocimetry to unsteady flows in large scale high speed tunnels [NASA-CR-166575] p 412 N84-21511

A circulation meter for the measurement of discrete vortices [BU-300] p 582 N84-24551
Detailed flow measurements in casing boundary layer of 429-meter-per-second-tip-speed two-stage fan [NASA-TP-2052] p 782 N84-28795

Free jet feasibility study of a thermal acoustic shield concept for AST/VCE application: Single stream nozzles [NASA-CR-3756] p 816 N84-29661
Comparison of the full potential and Euler formulations for computing transonic airfoil flows [NASA-TM-85983] p 847 N84-31094

Sidewall boundary layer corrections in subsonic, 2-dimensional airfoil-hydrofoil testing [AD-A144002] p 966 N84-33391

FLOW RESISTANCE

Blockage in axial compressors p 748 A84-41643

FLOW STABILITY

Stability of shock waves attached to wedges and cones p 90 A84-13565
Numerical modeling of nonstationary supersonic jet flow over an obstacle p 152 A84-16913
Wavelike structures in elliptic jets [AIAA PAPER 84-0399] p 166 A84-18067

Instability of transonic nozzle flows [AIAA PAPER 84-0528] p 168 A84-18152
Aerofoil-vortex in a rotational and strained field p 267 A84-21700

A study of an underexpanded sonic jet issuing from a slot along a solid surface p 332 A84-25576

Flow visualization and interpretation of visualization data for deflected thrust V/STOL nozzles
[NASA-TM-83554] p 219 N84-14147

A study of helicopter rotor aerodynamics in ground-effect at low speeds
p 176 N84-15106

An experimental study of airfoil-spoiler aerodynamics
p 180 N84-15133

Application of holography to flow visualization
[NASA-TM-84325] p 316 N84-16530

Multi-ducted inlet combustor research and development
[AD-A135906] p 359 N84-18205

Flowfield measurements in a model scramjet combustion using laser-induced iodine fluorescence
[NASA-CR-175399] p 338 N84-19283

Determination of boundary layer transition and separation on double circular arc compressor blades in a large subsonic cascade
[AD-A137550] p 484 N84-20786

Report by the Chairman of the Fluid Dynamics Panel
p 485 N84-21499

Wind-tunnel investigation of an advanced general aviation canard configuration
[NASA-TM-85760] p 439 N84-21539

Measurement of fluid properties using rapid-double-exposure and time-average holographic interferometry
[NASA-TM-83630] p 485 N84-21849

An experimental and analytic study of the flow subsonic wind tunnel inlets
[AD-A138865] p 511 N84-22540

Experimental investigation of the internal flow field in STOL engine inlets
p 511 N84-22544

Film cooling on a gas turbine blade near the end wall
[AD-A138794] p 536 N84-22569

Visualisation of the vortex dominated flow around a delta wing-body combination using a water tunnel
[BAE-821/RES/6631] p 559 N84-22904

A flow visualisation study of tip vortex formation
[ARL-AERO-NOTE-421] p 515 N84-23603

Water-tunnel study of transition flow around circular cylinders
[NASA-TM-85879] p 516 N84-23606

Swirl at gas-intake inlet
[AD-A139472] p 563 N84-23861

Wake visualization
[BU-282] p 581 N84-24542

An aerodynamic study of combustion in the combustion chambers of turbomachines: Experimental and theoretical approaches
p 608 N84-24764

Natural laminar flow experiments on modern airplane surfaces
[NASA-TP-2256] p 662 N84-26660

Dilution jets in accelerated cross flows
[NASA-CR-174717] p 782 N84-28794

Experimental investigation of shock-cell noise reduction for single-stream nozzles in simulated flight, comprehensive data report. Volume 3: Shadowgraph photos and facility description
[NASA-CR-168234-VOL-3] p 942 N84-33150

Results of design studies and wind tunnel tests of an advanced high lift system for an Energy Efficient Transport
[NASA-CR-159389] p 976 N84-33403

FLOWMETERS
Measurements of the flow from a high-speed compressor rotor using a dual probe digital sampling (DPDS) technique
[ASME PAPER 83-GT-215] p 532 A84-31288

Calibration and use of an ONERA miniature five hole probe
[ONERA, TP NO. 1984-2] p 803 A84-39973

FLUID AMPLIFIERS
Fluidics: Basic components and applications
[AD-A134046] p 243 N84-14465

The effect of fluid inertia and viscoelasticity in squeeze-film damper bearings
[AD-A138054] p 486 N84-21880

FLUID BOUNDARIES
Laser Doppler velocimeter measurements in unsteady, separated, transonic diffuser flows
p 90 A84-13576

Magnetohydrodynamic flow past nonconducting wedge
p 736 N84-26931

FLUID DYNAMICS
International Symposium on Applications of Laser-Doppler Anemometry to Fluid Mechanics, Lisbon, Portugal, July 5-7, 1982, Proceedings
p 477 A84-28701

Advances in the application of parameter identification analysis techniques to parachute aerodynamic test data
[AIAA PAPER 84-0799] p 408 A84-29971

The von Karman Institute for Fluid Dynamics - Teaching and research
p 709 A84-39715

An experimental investigation of the aerodynamic characteristics of bodies having square cross-section at transonic speeds
[AIAA PAPER 84-2091] p 750 A84-42344

Aerodynamic design for overall vehicle performance
p 121 N84-12077

Waves on vortex cores and their relation to vortex breakdown
p 103 N84-12128

Numerical fluid dynamics
[AD-A135900] p 384 N84-18593

Roughness effects on compressor blade performance in cascade at high Reynolds number
[AD-A136896] p 386 N84-19755

Adaptive grid generation for numerical solution of partial differential equations
[AD-A136985] p 392 N84-20289

AGARD Highlights, March 1984
[AGARD-HIGHLIGHTS-84/1] p 399 N84-21498

Wind Tunnels and Testing Techniques
[AGARD-CP-348] p 503 N84-23564

A review and an update of the FDP Specialists Meeting (London) on Wall Interference in Wind Tunnels
p 513 N84-23570

Fluid dynamic aspects of turbine engine testing
p 538 N84-23586

Physical aspects of computing the flow of a viscous fluid
[NASA-TM-85893] p 516 N84-23605

INTFL-8401 computer tomography for interferometric aerodynamic measurements
[AD-A139591] p 517 N84-23611

AGARD bulletin: Meetings, publications, membership
[AGARD-BUL-84/1] p 569 N84-24527

V/STOL wind-tunnel testing
[NASA-TM-85936] p 571 N84-24528

The generation of higher levels of turbulence in the test section of the high speed cascade wind tunnel at Brunswick for simulation of turbomachinery conditions
[ESA-TT-815] p 586 N84-25654

Unsteady Flow in Turbomachines, volume 1
[VKI-LS-1984-02-VOL-1] p 625 N84-25960

Introduction to unsteady flow in turbomachines
p 625 N84-25962

Stability of pumps and compressors
p 625 N84-25963

Theory of rotating stall of multistage axial compressors
p 625 N84-25964

Immersion of disk in compressible fluid at angle to free surface
p 724 N84-26930

An analysis of wave interactions in swept-wing flows
[NASA-CR-173723] p 666 N84-27681

USSR report: Physics and mathematics
[JPRS-UPM-84-005] p 941 N84-32081

An integral equation for the solution of nonlinear wave equations
p 849 N84-32347

Sidewall boundary layer corrections in subsonic, 2-dimensional airfoil-hydrofoil testing
[AD-A144002] p 966 N84-33391

An experimental investigation of gas jets in confined swirling air flow
[NASA-CR-3832] p 988 N84-33412

FLUID FILMS
Experimental observation of the dynamic behavior of noncontacting coned-face mechanical seals
[ASLE PREPRINT 83-LC-3B-1] p 479 A84-28990

Unbalance response of a single mass rotor mounted on dissimilar hydrodynamic bearings
p 388 N84-19919

The Shock and Vibration Digest, volume 16, no. 7
[AD-A143958] p 926 N84-31679

FLUID FILTERS
Electrostatic charging test for aviation fuel filters
[AD-A136986] p 372 N84-19366

FLUID FLOW
Heating experiments for flowability improvement of near-freezing aviation fuel
p 470 A84-26955

A lifting surface theory in rotational flow
[NASA-CR-172233] p 17 N84-10017

Aerodynamics of Vortical Type Flows in Three Dimensions
[AGARD-CP-342] p 98 N84-12099

Vortex breakdown: A two-stage transition
p 102 N84-12124

A contribution to the problem of vortex breakdown
p 102 N84-12125

Numerical simulation of vortex breakdown by the vortex-filament method
p 103 N84-12126

A viscous-inviscid interactive procedure for rotational flow in cascades of two dimensional airfoils of arbitrary shape
[NASA-CR-174609] p 105 N84-13149

An application of the finite element method to the solution of low Reynolds number, incompressible flow around a Joukowski aerofoil, with emphasis on automatic generation of grids
[AD-A133008] p 176 N84-14127

Combustion Fundamentals Research
[NASA-CP-2309] p 454 N84-20525

A practical adaptive-grid method for complex fluid-flow problems
[NASA-TM-85989] p 755 N84-28745

FLUID INJECTION
Pre-existing seed particles and the onset of condensation in cryogenic wind tunnels
[AIAA PAPER 84-0244] p 231 A84-17972

Numerical simulation of unsteady supersonic injection into an incoming flow
p 172 A84-19005

Lateral jet injection into typical combustor flowfields
[AIAA PAPER 84-0374] p 242 A84-19251

Injection of a transverse sonic jet into a supersonic stream
p 329 A84-23745

Analytical study of the thermal and fluid mechanical evolution of a cooling film injected from a single line of inclined round holes
p 554 A84-31315

Injection into a turbulent boundary layer through different porous surfaces
p 715 A84-36499

Experiments in dilution jet mixing
p 1007 A84-48140

FLUID JETS
Supersonic flow past a plate and a cylinder in the case of injection from a lateral surface
p 171 A84-19003

Numerical simulation of unsteady supersonic injection into an incoming flow
p 172 A84-19005

New investigation of short wings with lateral jets
[NASA-TM-77347] p 178 N84-15124

FLUID MECHANICS
Annual review of fluid mechanics. Volume 16
p 314 A84-22576

The fluid mechanics of slender wing rock --- vortex shedding of delta configurations
p 504 A84-30805

Analytical study of the thermal and fluid mechanical evolution of a cooling film injected from a single line of inclined round holes
p 554 A84-31315

Swirl flows --- Book
p 717 A84-37298

The National Transonic Facility - A research perspective
[AIAA PAPER 84-2150] p 904 A84-44189

Special Course on Subsonic/Transonic Aerodynamic Interference for Aircraft
[AGARD-R-712] p 87 N84-12072

On the stability of an infinite swept attachment line boundary layer
[NASA-CR-172300] p 339 N84-19285

Validated Engineering Data Index, 1983 - 1984
p 485 N84-21758

Vortex generating flow passage design for increased film-cooling effectiveness and surface coverage --- aircraft engine blade cooling
[NASA-TM-83617] p 559 N84-22909

On the stability of flight vehicles in the low Reynolds number non-linear regime
[AD-A140008] p 583 N84-24561

Jet flowfields
p 583 N84-25631

USSR report: Engineering and equipment
[JPRS-UEQ-84-003] p 724 N84-26895

FLUID PRESSURE

Investigation of the three-dimensional flow field within a transonic fan rotor: Experiment and analysis
[NASA-TM-83739] p 850 N84-32357

FLUID PRESSURE

Pressure and velocity fields induced by vortex shedding in a turbulent wake p 406 A84-28147
Laminar-to-turbulent transition on a body of revolution with an extended favorable pressure gradient forebody p 720 A84-38368
Subsonic airfoils with a given pressure distribution p 830 A84-44626

FLUID ROTOR GYROSCOPES

Instabilities of a gyroscope produced by rapidly rotating, highly viscous liquids p 919 A84-45584

FLUID TRANSMISSION LINES

Dynamic characteristics of a jet engine test facility air supply
[AD-A136910] p 372 N84-18365

FLUID-SOLID INTERACTIONS

Discrete frequency noise generated from a flat plate in parallel with a uniform oncoming flow p 938 A84-43693
Prediction of stiffness and damping coefficients for centrifugal compressor labyrinth seals
[ASME PAPER 84-GT-86] p 1002 A84-46928
Recent studies at NASA-Langley of vortical flows interacting with neighboring surfaces p 100 N84-12109

FLUIDICS

Fluidics - A reliable alternative for aircraft control p 135 A84-13398
Backup control for variable cycle engine
[SAE PAPER 831475] p 450 A84-29454
Fluidics: Basic components and applications
[AD-A134046] p 243 N84-14465
Electrofluidic angular rate sensor for ejection seat thrust vector control
[AD-A133233] p 185 N84-15137

FLUORESCENCE

Flowfield measurements in a model scramjet combustion using laser-induced iodine fluorescence
[NASA-CR-175399] p 338 N84-19283

FLUOROPOLYMERS

Fluoropolymer and fluoroacrylic transparencies
[AD-P003201] p 712 N84-26614

FLUTTER

Excitation system for wind-tunnel unsteady tests on half-wing models p 139 A84-15859
Aeroelastic flutter and divergence of stiffness coupled, graphite/epoxy cantilevered plates p 239 A84-17410
Adaptive flutter suppression as a complement to LQG based aircraft control - Linear Quadratic Gaussian p 227 A84-18628
A method for the design of the controller for active flutter-suppression systems p 302 A84-19594
Active suppression of aeroelastic instabilities on a forward-swept wing p 360 A84-24106
Active flutter control using discrete optimal constrained dynamic compensators p 361 A84-25528
Wind tunnel correlation study of aerodynamic modeling for F/A-18 wing-store tip-missile flutter p 524 A84-30806

Rotating aerodynamic exciter
[AAAF PAPER NT 83-22] p 526 A84-32490
Optimal control applied to aircraft flutter suppression p 541 A84-32713

Measurements of self-excited rotor-blade vibrations using optical displacements
[ASME PAPER 83-GT-132] p 618 A84-33702
Winglet effects on the flutter of twin-engine-transport type wing
[AIAA PAPER 84-0905] p 594 A84-34907
Estimator synthesis for flutter control using positivity of transfer matrices p 703 A84-38884
Testing of a stall flutter suppression system for helicopter rotors using individual-blade-control p 785 A84-42277
Control of forward swept wing configurations dominated by flight-dynamic/aeroelastic interactions
[AIAA PAPER 84-1866] p 894 A84-43424

Eigenspace design of an active flutter suppression system
[AIAA PAPER 84-1867] p 894 A84-43425
New simplified ways to understand the interaction between aircraft structure and active control systems
[AIAA PAPER 84-1868] p 894 A84-43426

Design of a flutter mode controller using positive real feedback
[AIAA PAPER 84-1869] p 895 A84-43427
Control law synthesis for active flutter suppression based on the modal cost analysis
[AIAA PAPER 84-1931] p 895 A84-43460

Divergence/flutter suppression system for a forward swept-wing configuration with wing-mounted stores p 901 A84-45967

Influence of main design parameters on flutter behaviour for aircraft configurations with heavy concentrated masses p 68 N84-11122

The development of FAST-FLOW (a program for flutter optimization to satisfy multiple flutter requirements) p 68 N84-11124

Aeroelastic considerations in preliminary design of a military combat aircraft p 53 N84-11132
Preliminary design of aircraft using structural optimization methods p 53 N84-11133

A flutter optimization program for complete aircraft structural design p 68 N84-11134
Fast flutter clearance by parameter variation p 68 N84-11135

Development and flight test of an active flutter suppression system for the F-4F with stores. Part 3. Flight demonstration of the active flutter suppression system
[AD-A131972] p 137 N84-12191

NASTRAN flutter analysis of advanced turbopropellers
[NASA-CR-167926] p 219 N84-14148
Suppression of interference flutter by composite tailoring p 228 N84-14155

Measurement of unsteady aerodynamic pressures
[DFVLR-MITT-83-08] p 272 N84-16155
Optimal mistuning for enhanced aeroelastic stability of transonic fans
[NASA-CR-173179] p 299 N84-16180

Flutter of swept fan blades
[NASA-TM-83547] p 316 N84-16587
Formulation of blade-flutter spectral analyses in stationary reference frame p 454 N84-20562

Experiences with the design and implementation of flutter suppression systems p 463 N84-20593
Recent developments in the measurement of time-dependent pressures p 515 N84-23601

Vibration and flutter of mistuned bladed-disk assemblies p 563 N84-23923
[NASA-TM-83634] p 563 N84-23923

An aeroelastician's perspective of wind tunnel and flight experiences with active control of structural response and stability
[NASA-TM-85761] p 563 N84-23924

Active suppression of aeroelastic instabilities for forward swept wings p 584 N84-25638
Unsteady Flow in Turbomachines, volume 2 p 626 N84-25965

Friction damping of flutter in gas turbine engines p 700 N84-26701
[VKI-LS-1984-02-VOL-2] p 626 N84-25965

STABCAR: A program for finding characteristic root systems having transcendental stability matrices
[NASA-TP-2165] p 733 N84-27461

KC-135 Winglet Program Review p 667 N84-27686
[NASA-CP-2211] p 667 N84-27686

KC-135A winglet flight flutter program p 668 N84-27692
Aerodynamic instability of cable-stayed bridges: Theoretical experimental study of stall flutter p 669 N84-27700

Integrated Application of Active Controls (IAAC) technology to an advanced subsonic transport project: Wing platform study and final configuration selection
[NASA-CR-3468] p 688 N84-27720

Control theory of partial differential equations
[AD-A140945] p 734 N84-28541
Active suppression of aeroelastic instabilities for forward swept wings
[AD-A141739] p 773 N84-28783

Design of a candidate flutter suppression control law for DAST ARW-2
[NASA-TM-86257] p 790 N84-29883

Application of advanced parameter identification methods for flight flutter data analysis with comparisons to current techniques p 990 N84-34401
Active suppression of aeroelastic instabilities on a forward swept wing using a linear optimal regulator
[AD-A144561] p 978 N84-34442

FLUTTER ANALYSIS
Unified aeroelastic flutter theory for very low aspect ratio panels p 77 A84-10142

Time-marching transonic flutter solutions including angle-of-attack effects p 78 A84-11038
Experiences in the use of composite material for a wing skin p 46 A84-11040

Dynamic stability of flexible forward swept wing aircraft p 118 A84-14729
The synthesis of an active flutter suppression law based on an energy criterion p 222 A84-16523

An electromagnetic vibrator for use in flutter testing
[AIAA PAPER 84-0086] p 241 A84-17871
Application of the local circulation method to the flutter analysis of rotary wings p 311 A84-19642

Application of an analytic stall model to dynamic analysis of rotor blades p 262 A84-19665
An actuator disc analysis of unsteady supersonic cascade flow p 265 A84-21189

Flutter analysis using nonlinear aerodynamic forces p 268 A84-22170
Airfoil shape and thickness effects on transonic airloads and flutter p 347 A84-24107

Adaptive control algorithm for flutter suppression p 361 A84-25509
An engineering approximation of supersonic flutter for overall missile configuration p 382 A84-25999

Predicting dynamic instability boundaries using lattice filters - for wind tunnel flutter models
[SAE PAPER 831432] p 468 A84-29630
Constructional possibilities for minimizing dangerous flutter in gliders and light aircraft
[DGLR PAPER 83-111] p 460 A84-29674

Evaluation of flutter impact for repaired T-38 stabilizers
[AIAA PAPER 84-0904] p 524 A84-31691
A unified flutter analysis for composite aircraft wings
[AIAA PAPER 84-0906] p 556 A84-31692

Aeroelastic behavior of straight and forward swept graphite/epoxy wings
[AIAA PAPER 84-0903] p 556 A84-31749
Divergence boundary prediction from random responses - NAL's method - aeroelastic instability boundary estimation for subcritical divergence cantilever wing model test p 619 A84-34463

Thermoelastic limit cycling of zippered cross section spacecraft booms
[AIAA PAPER 84-1065] p 613 A84-34915
Linear problem of a vibrator oscillating harmonically at supercritical frequencies in a subsonic boundary layer p 579 A84-35497

Flutter analysis of advanced turbopropellers p 715 A84-36492
The solution of large flutter problems on small computers p 717 A84-37379

A flutter eigenvalue program based on the Newton-Raphson method p 721 A84-38846
Structural optimization of an aircraft design with consideration of aeroelastic flutter stability p 768 A84-40891

A study of unsteady pressures near the tip of a transonic fan in unstalled supersonic flutter p 780 A84-42420
Twin mode analysis of aeroengine fan vibration and flutter for use in design studies p 780 A84-42421

DC-10-10 winglet flight test program management p 866 A84-44452
Flight flutter test methodology at Grumman p 867 A84-44463

Effects of viscosity on transonic-aerodynamic and aeroelastic characteristics of oscillating airfoils p 830 A84-44513
Recent developments in the F-16 flutter suppression with active control program
[AIAA PAPER 83-0995] p 897 A84-44515

Flutter characteristics of high aspect ratio tailless aircraft p 869 A84-44518
Prevention of forward swept wing aeroelastic instabilities with active controls p 898 A84-44977

A practical method for predicting transonic wing flutter phenomena p 834 A84-45008
Flutter calculation on a supercritical wing in the transonic range - Comparison theory-experiment
[ONERA, TP NO. 1984-108] p 872 A84-45010

Measuring the flutter of plane model with dynamic shadow moire topography p 919 A84-45517
A multiloop system stability margin study using matrix singular values - for wing flutter suppression and drone lateral attitude control p 935 A84-45606

Determination of aerodynamic loads in supersonic flow for the analysis of aircraft flutter at low Strouhal numbers p 921 A84-45742
An experimental study of the flutter of a controlled stabilizer with nonlinearities in the control mechanism during the electromechanical modeling of aerodynamic forces p 874 A84-45743

Some recent advances in the understanding and prediction of turbomachine subsonic stall flutter
[ASME PAPER 84-GT-151] p 1003 A84-46961
Aerodynamically excited vibrations of a part-span shrouded fan
[ASME PAPER 84-GT-172] p 1004 A84-46975

An analysis of the natural vibrations of fuselage-type complex structures as systems with imposed constraints p 1007 A84-47579
A method for the construction of a flutter model wing having given influence coefficients p 1008 A84-49545

Aerospatial'es approach to the study of flutter at the design stage of the project p 67 N84-11118
Estimated analysis of the aeroelastic behavior of tail rotors p 52 N84-11129

Aeroelasticity and optimization at the design stage p 53 N84-11131

Frequency HOPPING p 112 A84-14313

Automatic detectors for frequency-agile radar p 34 A84-10832

Frequency RESPONSE p 34 A84-10832

Frequency-domain identification of XV-15 tilt-rotor aircraft dynamics [AIAA PAPER 83-2695] p 116 A84-13378

Wind shear estimation by frequency-shaped optimal estimator p 391 A84-25452

Multiple input estimation of frequency response functions Excitation considerations [ASME PAPER 83-DET-73] p 480 A84-29109

SUBJECT INDEX

A method for computing the kernel of the downwash integral equation for arbitrary complex frequencies [AIAA PAPER 84-0983] p 506 A84-31754

FREQUENCY STABILITY
Precision oscillators and their role and performance in navigation systems p 40 A84-12456

FRICTION
Friction and wear behavior of aluminum and composite airplane skins [NASA-TP-2262] p 294 A84-17175

FRICTION DRAG
A method for measuring skin friction drag on a flat plate in contaminated gas flows p 646 A84-37943
Comparative investigations on friction drag measuring techniques in experimental aerodynamics p 832 A84-44972

FRICTION REDUCTION
Rubber removal from porous friction course [FAA-PM-83-31] p 74 A84-11184

FRONTS (METEOROLOGY)
Investigation of the detectability and lifetime of gust fronts and other weather hazards to aircraft [AD-A141552] p 812 A84-29404

FROST
Revised procedure for pavement design under seasonal frost conditions [AD-A134480] p 315 A84-16384

FROZEN EQUILIBRIUM FLOW
Weak nonlinear shock waves in steady two-dimensional flow of a non-equilibrium gas along a curved wall p 504 A84-31117

FRUITS
Improved air shipment of fruit reported this year p 27 A84-10005

FUEL COMBUSTION
Synthetic fuel character effects on a rich-lean gas turbine combustor p 309 A84-22594
Effects of flame temperature and fuel composition on soot formation in gas turbine combustors p 298 A84-22747
NASA/General Electric Broad-Specification Fuels Combustion Technology Program - Phase I p 355 A84-24033
Correlation of gas turbine combustor efficiency p 355 A84-24042
NASA advanced low emissions combustor program [ASME PAPER 83-JPGC-GT-10] p 450 A84-28982
Recovery of burner acoustic source structure from far-field sound spectra p 566 A84-32609
Fuel effects on gas turbine combustion - Liner temperature, pattern factor and pollutant emissions [AIAA PAPER 84-1491] p 604 A84-35235
Determination of the heat of combustion of reactive fuels by a calculation method p 614 A84-35761
Gas turbine combustion --- Book p 699 A84-38721
A review of internal combustion engine combustion chamber process studies at NASA Lewis Research Center [AIAA PAPER 84-1316] p 804 A84-40242
Fuel effects on gas turbine combustion - Ignition, stability, and combustion efficiency [ASME PAPER 84-GT-87] p 981 A84-46929
Correlations of soot formation in turbojet engines and in laboratory flames p 995 A84-46945
A gas turbine combustor test facility for fuel composition investigations [AD-A132479] p 140 A84-13201
Broad specification fuels combustion technology program [NASA-CR-168179] p 237 A84-15283
Advanced Gas Turbine (AGT) technology development [NASA-CR-168235] p 246 A84-15554
Atomization and combustion performance of antimisting kerosene and jet fuel [NASA-CR-174507] p 309 A84-16353
Aviation-fuel property effects on combustion [NASA-CR-168334] p 310 A84-17407
The NASA broad specification fuels combustion technology program at Pratt and Whitney p 551 A84-23640
Combustion Problems in Turbine Engines [AGARD-CP-353] p 614 A84-24732
Combustor technology for broadened-properties fuels p 615 A84-24736
Fuel character effects on performance of small gas turbine combustion systems p 607 A84-24738
U.S. Army alternative gas-turbine fuels research: MERADCOM p 615 A84-24739
Electrical spray modification with various fuels in a 156 combustor [AD-A139961] p 616 A84-24824

Application of energy saving concepts of fighter/attack design p 119 A84-14738
Fuel-and-lubricant chemistry in civil aviation: Handbook --- In Russian p 236 A84-18506
Altitude/path-angle transitions in fuel-optimal problems for transport aircraft p 349 A84-25486
A study of altitude and flight path angle dynamics for a singularly perturbed fuel optimization problem p 349 A84-25507
A study of fuel evaporation in the precombustion chamber p 357 A84-25564
Turbo-prop engine propulsion for the 1990's p 448 A84-26953
The drive for Aircraft Energy Efficiency p 435 A84-29569
Proposed arrangement to improve turbo-prop efficiency p 532 A84-30808
Induced drag reduction with wing tip mounted propellers [AIAA PAPER 84-2149] p 769 A84-41329
Effects of aircraft and flight parameters on energy-efficient profile descents in time-based metered traffic [AIAA PAPER 84-1915] p 864 A84-43452
Civil turbofan technology to the year 2000 p 887 A84-43809
Climb speed and rating optimisation p 874 A84-45045
Design integration of laminar flow control for transport aircraft p 874 A84-45984
AGT101 advanced gas turbine technology update [ASME PAPER 84-GT-166] p 982 A84-46970
A new generation T56 turbo-prop engine [ASME PAPER 84-GT-210] p 983 A84-46999
The effect of the injection of water into the cooling air on the fuel economy of gas turbine engines during operation with the afterburner on p 986 A84-47570
Poor quality aircraft exterior surfaces cause greater fuel expenditures p 3 A84-11095
Range and endurance of jet-engined airplanes at constant altitude [REPT-83-A1-SER-A] p 124 A84-13175
A gas turbine combustor test facility for fuel composition investigations [AD-A132479] p 140 A84-13201
Fuel economy in aviation [NASA-SP-462] p 204 A84-15144
High altitude aerodynamic platform concept evaluation and prototype engine testing [NASA-TM-58256] p 299 A84-16182
Airframe technology for aircraft energy efficiency --- economic factors [NASA-TM-85749] p 328 A84-18154
Wingtip vortex propeller [NASA-CASE-LAR-13019-1] p 411 A84-20495
Application of fuel/time minimization techniques to route planning and trajectory optimization p 427 A84-20578
Fuel efficient engines for large transport --- aircraft [PNR-90196] p 537 A84-22580
General aviation pilot and aircraft activity survey [PB84-154301] p 503 A84-23602
Trends of jet fuel demand and properties p 551 A84-23631
Performance derivation of turbojets and turbofans from tests in sea-level test cells p 608 A84-25728
Study of effects of fuel properties in turbine-powered business aircraft [NASA-CR-174627] p 617 A84-25854
Delco performance management system flight test evaluation p 692 A84-26579
Performance validation of Sperry Flight Management Systems (FMS) p 693 A84-26580
Effects of aircraft and flight parameters on energy-efficient profile descents in time-based metered traffic [NASA-CR-172338] p 676 A84-26685
KC-135 Winglet Program Review [NASA-CP-2211] p 667 A84-27686

KC-135 winglet program overview p 667 A84-27687
Measurements of the fuel mileage of a KC-135 aircraft with and without winglets p 687 A84-27690
Application of selected advanced technologies to high performance, single-engine, business airplanes [NASA-CR-172361] p 688 A84-27719
User's manual for a fuel-conservative descent planning algorithm implemented on a small programmable calculator [NASA-TM-86275] p 776 A84-29871
Energy efficient engine program contributions to aircraft fuel conservation [NASA-TM-83741] p 783 A84-29876
Fuel conservative guidance concept for shipboard landing of powered-life aircraft [NASA-TM-85971] p 902 A84-31215
Development and flight evaluation of an augmented stability active controls concept with a small tail [NASA-CR-173880] p 903 A84-32395
Swedish research in high-temperature ceramics, superalloys p 916 A84-33142

FUEL CONTAMINATION
Fuel contamination - More to it than a little water p 672 A84-39711
Microbial deterioration of hydrocarbon fuels from oil shale, coal and petroleum. III: Inhibition of fungi by fuels from coal [AD-A137177] p 377 A84-19596
Degradation of jet fuel hydrocarbons by aquatic microbial communities [AD-A139791] p 616 A84-24822

FUEL CONTROL
A novel fuel conservation system approach for today's transport aircraft p 216 A84-16684
Fuel control systems for hydrogen-fueled automotive combustion engines - A prognosis p 314 A84-22721
Electronic fuel controls for executive jet aircraft [SAE PAPER 831478] p 451 A84-29457
Ground based testing without wind tunnels p 598 A84-25634

FUEL CORROSION
Case study of corrosion failure of an aluminide coating in a gas turbine p 799 A84-42664
Thiocarbamide derivatives of 2,6-di-tert-butylphenol as jet fuel stabilizers p 913 A84-43544
Corrosion and corrosion prevention in gas turbines [NLR-MP-82048-U] p 359 A84-19355

FUEL FLOW
Determination of the static performance of a Cuyuna cc model UL-430RR engine [NASA-CR-175354] p 299 A84-16179

FUEL FLOW REGULATORS
A review of UK developments in aircraft fuel management systems p 55 A84-11171

FUEL GAGES
A review of UK developments in aircraft fuel management systems p 55 A84-11171

FUEL INJECTION
Design of a reverse-flow combustion chamber for small gas turbines [ONERA, TP NO. 1983-129] p 128 A84-15074
A study of power characteristics and flow parameters in the channel of models with combustion p 534 A84-32159
Some practical aspects of staged premixed, low emissions combustion [ASME PAPER 84-GT-88] p 981 A84-46930
The effect of oxygen concentration on ignition of fuel spray in low pressure air flow [ASME PAPER 84-GT-147] p 982 A84-46958
Experimental study of the operating characteristics of premixing-prevaporizing fuel/air mixing passages [NASA-CR-168279] p 218 A84-14143
Electrical spray modification with various fuels in a 156 combustor [AD-A139961] p 616 A84-24824

FUEL PRODUCTION
Fuels of the future p 797 A84-40613
Assessment of Alternative Aircraft Fuels [NASA-CP-2307] p 538 A84-23630
Trends of jet fuel demand and properties p 551 A84-23631
The effect of property changes on jet fuel producibility and cost p 551 A84-23632

FUEL PUMPS
Weibull/Weibayes analysis of hydraulic pump malfunction data [SAE PAPER 831542] p 481 A84-29467
Hydrodynamic modeling of transient processes in the feed system of aircraft engines during pump acceleration to normal speed p 994 A84-47561

FUEL SPRAYS
Effects of viscosity and surface tension on a jet plume in supersonic crossflow p 405 A84-27128

FUEL SYSTEMS

Oscillations of elastic airplane due to wind gust p 880 N84-32087

Fuselage and nozzle pressure distributions of a 1/12-scale F-15 propulsion model at transonic speeds. Effect of fuselage modifications and nozzle variables [NASA-TP-2333] p 850 N84-32354

Helicopter anti-torque system using strakes [NASA-CASE-LAR-13233-1] p 975 N84-33400

G

GALILEO PROBE

Transonic wind-tunnel investigation of the Galileo Probe parachute configuration [AIAA PAPER 84-0823] p 402 A84-26586

GALILEO PROJECT

Constrained maneuver strategies for Project Galileo [AIAA PAPER 84-2026] p 909 A84-44219

A high energy stage for the National Space Transportation System [NASA-TM-83795] p 912 N84-32411

GAME THEORY

Horizontal variable-speed interception game solved by forced singular perturbation technique p 540 A84-31225

Use of air combat simulation for calculation of combat allowances [AIAA PAPER 84-2127] p 814 A84-42368

Evaluation of singularly perturbed pursuit-evasion games p 835 A84-44940

Improved dynamic models for air combat analysis [TAE-483] p 252 N84-15876

Dynamics and control of forward swept wing aircraft [NASA-CR-175369] p 294 N84-17172

Near-optimal finite solutions to the 3 and 4 step discrete evasion games [AD-A136811] p 393 N84-20314

A formulation and analysis of combat games [NASA-TM-85927] p 542 N84-22585

GAMMA FUNCTION

A method for determining if unequal shape parameters are necessary in a bivariate gamma distribution p 392 N84-20306

Analysis of wind gust data p 393 N84-20308

GAS ANALYSIS

An advanced facility for the analysis of gas turbine exhausts [ASME PAPER 84-GT-95] p 992 A84-46936

A diagnostic technique for improving combustor performance p 783 N84-28800

GAS BEARINGS

The dynamical behaviour of externally pressurized gas-lubricated unloaded porous journal bearings p 383 A84-26374

Stability of a rigid rotor supported by externally pressurized gas journal bearings with a circular slot restrictor p 558 A84-32765

Feasibility analysis of a spiral groove ring seal for counter-rotating shafts p 921 A84-45965

Improved compliant hydrodynamic fluid journal bearing [NASA-CASE-LEW-13670-1] p 560 N84-22959

GAS COMPOSITION

Combustion gas properties of various fuels of interest to gas turbine engines [NASA-TM-83682] p 606 N84-24584

GAS COOLING

Effect of new blade cooling system with minimized gas temperature dilution on gas turbine performance [ASME PAPER 84-GT-89] p 1002 A84-46931

GAS DYNAMICS

Isolation of discontinuities in computations of one-dimensional unsteady gas flows p 12 A84-11352

Two types of swirling gas flows p 93 A84-14929

Gas and wave dynamics --- Russian book p 171 A84-18749

Analysis of the starting process in a supersonic nozzle in a pulsed wind tunnel p 172 A84-19007

A study of the gas dynamics of a model with combustion The optimal thermal gasdynamic design of gas turbine engines on the basis of the characteristics of part prototypes. II p 532 A84-30415

The effect of gasdynamic and geometrical parameters of flow in a stepped pipe on the base pressure p 960 A84-47100

Flow characteristics of a vibrationally relaxing gas in nozzles with a region of constant cross section in the throat area p 981 A84-47484

Gas flow and heat transfer in zones of shock wave-boundary layer interaction --- Russian book p 981 A84-47631

Assessment of real gas effects on the prediction of the aerodynamics of high velocity Army shells [AD-A134739] p 276 N84-17150

Mach number and density effects in the mixing of supersonic jets p 512 N84-22628

More precise numerical simulation of transonic flow through passages in turbomachines p 512 N84-22786

An efficient approximate factorization implicit scheme for the equations of gasdynamics [NASA-TM-85957] p 814 N84-29556

GAS EXPANSION

A study of stresses on the surface of a plane obstacle in an underexpanded jet of a rarefied gas p 95 A84-15763

Engineering research on positive displacement gas expanders, phase 1 [DE84-008977] p 811 N84-30310

GAS EXPLOSIONS

Motion of solid bodies in combustible gas mixtures p 477 A84-28385

GAS FLOW

On flows with vibrational relaxation behind an attached shock wave p 403 A84-26844

Ignition of small particles behind shock waves p 471 A84-28378

Dusty hypersonic flow past thick wedges p 508 A84-32620

Numerical solution of the problem of supersonic flow past wings of arbitrary form with a detached shock wave p 579 A84-35351

An assessment of numerical solutions of the compressible Navier-Stokes equations [AIAA PAPER 84-1549] p 719 A84-37966

Low speed closed circuit high pressure tunnel for gas flow spark gap studies [AIAA PAPER 84-1596] p 705 A84-37995

Air Force Academy Aeronautics Digest - Fall/Winter 1982 [AD-A135073] p 275 N84-17145

Producing a cryogenic gust in an Eiffel type atmospheric wind tunnel with short gust p 545 N84-23569

GAS GENERATORS

Supercritical shafting for advanced model 250-C34 engine [AIAA PAPER 84-1501] p 697 A84-36987

Aircraft fuel tank inerting system [AD-A141863] p 773 N84-28785

GAS GUNS

Effects of gun gas ingestion on engine performance p 888 A84-44456

GAS HEATING

The fracture of the binding rings of a reinforced cylindrical shell cyclically heated by internal gas flow p 887 A84-43921

GAS INJECTION

Supersonic flow over a rearward facing step with transverse nonreacting hydrogen injection p 90 A84-13578

Transonic shock interaction with a tangentially-injected turbulent boundary layer [AIAA PAPER 84-0094] p 159 A84-17877

Supersonic flow past a plate and a cylinder in the case of injection from a lateral surface p 171 A84-19003

Hypersonic flow of a viscous gas at the surface of a blunt cone with strong injection near the blunt section p 264 A84-21133

Film cooling effectiveness on a turbine blade p 355 A84-23915

Hypersonic interactions with surface mass transfer. I - Steady flow. II - Unsteady flow p 405 A84-27126

An analysis of flow characteristics for the case of uniform injection of a homogeneous gas at the rear of a body p 506 A84-32156

Supersonic flow of a gas past bodies of revolution in the presence of strong localized two-phase injection from the body surface p 506 A84-32157

Variation of the parameters of a supersonic flow with transverse injection p 753 A84-42542

The interaction between an unsteady boundary layer and a supersonic flow under conditions of strong slot injection p 839 A84-45713

GAS IONIZATION

Measurement of air ionization behind intense shock waves p 254 A84-18662

GAS JETS

Variation of the parameters of a supersonic flow with transverse injection p 753 A84-42542

An optimum gas ejector with an isobaric mixing chamber p 840 A84-45724

An experimental investigation of gas jets in confined swirling air flow [NASA-CR-3832] p 888 N84-33412

GAS MIXTURES

The effect of hydrodynamics on the thermal diffusion process of gas mixture separation p 716 A84-37077

A one-dimensional theory for a supersonic gas ejector with an isobaric mixing chamber p 839 A84-45704

GAS PATH ANALYSIS

Aerothermodynamic gas path analysis for health diagnostics of combustion gas turbines p 240 A84-17545

Applicability limits for linear models describing the gas path dynamics of aircraft engines p 358 A84-25582

A study of the efficiency of algorithms for the gas-air path diagnostics of gas turbine engines on the basis of thermogasdynamic parameters p 985 A84-47552

GAS SPECTROSCOPY

Airborne tunable diode laser system for trace gas measurements p 881 A84-43305

GAS TEMPERATURE

Dynamic gas temperature measurement system, volume 1 [NASA-CR-168267-VOL-1] p 316 N84-16529

Development of temperature-, velocity- and concentration-profiles in a curved combustor p 608 N84-24757

GAS TUNGSTEN ARC WELDING

Precision buildup method draws a bead on condemned jet engine parts p 804 A84-40682

GAS TURBINE ENGINES

The application of ferrography to the condition monitoring of gas turbines p 57 A84-10353

Combustor development for automotive gas turbines' p 78 A84-10489

Ferrographic and spectrometer oil analysis from a failed gas turbine engine p 78 A84-11273

Sound-absorbing composite structures for gas-turbine engines p 58 A84-11347

Analysis of gas turbine engine dynamic instabilities [AIAA PAPER 83-2694] p 59 A84-12307

Finite element analysis of a split-flow particle separator --- for helicopter gas turbine engine p 89 A84-13278

The present and the future of aircraft engines --- Russian book p 128 A84-13429

Fifty years of experience in the service of the propulsion of tomorrow's aircraft p 128 A84-13644

A study of the vibrations of the blower rotors of gas-turbine engines during changes in the conditions at the engine inlet p 128 A84-13958

A probability study of the fatigue life of the compressor blades of gas-turbine engines p 216 A84-16964

Vehicle test results for the Garrett GT601 gas turbine engine p 240 A84-17544

Fault-inspection of aircraft gas turbine engines according to thermogasdynamic parameters p 217 A84-17675

Ceramic composite liner material for gas turbine combustors [AIAA PAPER 84-0363] p 236 A84-18044

The use of tests of goodness of fit during an analysis of fatigue data — for gas turbine blades p 218 A84-19179

Multidimensional turbulent combustion - Analysis, applications and limitations [AIAA PAPER 84-0477] p 296 A84-19891

High energy igniters - The development of materials suitable for continuous ignition p 296 A84-20108

The care and feeding of gas turbines p 298 A84-21889

The increase in efficiency of high temperature gas turbine plants with cooled turbines p 314 A84-22002

A unit for AGTE shaft strength testing under cyclic torque and axial thrust loading p 298 A84-22415

Synthetic fuel character effects on a rich-lean gas turbine combustor p 309 A84-22594

Simplified analytical procedures for representing material cyclic response — for high temperature gas turbine engine analysis p 298 A84-22877

Ceramic components for the AGT 100 engine p 315 A84-22878

Aero engine development - The next generation p 355 A84-23849

NASA/General Electric Broad-Specification Fuels Combustion Technology Program - Phase I p 355 A84-24033

Strength, quality, and lifetime in the case of hot engine components p 380 A84-24714

On the development of plasma-sprayed thermal barrier coatings — for gas turbine engine metals p 374 A84-25019

Systems for the automatic recording and processing of test results for gas turbine engines p 356 A84-25179

Correcting the impression of a die for molding blade blanks for gas turbine engines p 381 A84-25559

A study of fuel evaporation in the precombustion chamber p 357 A84-25564

Improving the parameters of a gas turbine engine by injecting water into the air that cools the turbine p 357 A84-25569

The effect of the setting angle of jet-cooling nozzles on the temperature and stressed state of a turbine disk p 357 A84-25572

Generalizing test results for the nozzle rings of inward-flow microturbines using the method of regression analysis p 358 A84-25578

An approach to the design of a surge protection device for the compressor of a gas turbine engine p 358 A84-25580

Applicability limits for linear models describing the gas path dynamics of aircraft engines p 358 A84-25582

Fuels for testing aircraft gas turbine engines p 374 A84-25591

The development of an ODS turbine blade alloy (INCONEL alloy MA 6000) for use in small gas turbine engines — Oxide Dispersion Strengthened p 470 A84-28326

An INCOLOY alloy MA 956 combustor component for a Westinghouse Canada Inc. industrial gas turbine p 476 A84-28327

Forging and fabrication of ODS alloys p 471 A84-28336

Oxide dispersion strengthened materials in advanced gas turbine engines - Inconel alloy MA 754 vanes p 471 A84-28338

The theory of aircraft engines: The theory of rotating machines — Russian book p 449 A84-28699

Thrust Reverser/Exhaust nozzle assembly for a gas turbine engine

[AD-D011101] p 894 N84-32392

GAS-SOLID INTERACTIONS

An exact solution for the problem of the interaction of a wedge moving at supersonic velocity with the interface of two gases

p 264 A84-21121

The effect of surface temperature on coefficients of energy and momentum exchange

p 406 A84-28284

Aerodynamic calculation on the basis of the first three terms of the Rice series for the single reflection of rarefied-gas atoms from a rough surface

p 406 A84-28286

Motion of solid bodies in combustible gas mixtures

p 477 A84-28385

GAS-SOLID INTERFACES

Local viscous chemically nonequilibrium flows

p 752 A84-42533

GASDYNAMIC LASERS

High-average-power exciplex laser system

p 557 A84-32346

GASES

Exact solution to problem of interaction between wedge moving at supersonic velocity and interface of two gaseous media

p 512 N84-22790

GAU-1 AIRFOIL

Airfoil optimization

[AIAA PAPER 84-0053] p 157 A84-17849

Experimental studies of the separated flow over a NASA GA(W)-1 airfoil

p 405 A84-27144

GEARS

Kinematic precision of gear trains

[ASME PAPER 82-WA/DE-34] p 238 A84-15951

Health monitoring of helicopter gearboxes

p 257 A84-19631

Metallurgical aspects of metallic materials and damage tolerance in accessory gearboxes

p 482 A84-29961

Advanced gearbox health monitoring techniques

p 531 A84-31310

Evaluation of single and counter rotation gearboxes for propulsion systems

[AIAA PAPER 84-1195] p 604 A84-35651

Advanced propfan drive system characteristics and technology needs

[AIAA PAPER 84-1194] p 696 A84-36957

Advanced gearboxes for a modern single rotation turboprop engine

[AIAA PAPER 84-1197] p 698 A84-37633

Power reduction gear development for Lycoming T53 turboprop engines

[AIAA PAPER 84-1382] p 698 A84-37650

An analytical method to predict efficiency of aircraft gearboxes

[AIAA PAPER 84-1500] p 888 A84-44180

Development of large rotorcraft transmissions

p 892 A84-46354

Status of understanding for gear materials

p 623 N84-25061

An analytical method to predict efficiency of aircraft gearboxes

[NASA-TM-83716] p 572 N84-25606

Summary of drive-train component technology in helicopters

[NASA-TM-83726] p 810 N84-30294

Constant speed drive with compensation using differential gears

[AD-D011156] p 1010 N84-33812

GENERAL AVIATION AIRCRAFT

Analysis of an airplane windshield anti-icing system using hot air

p 46 A84-11047

Use of general aviation aircraft as an advanced system test bed

[AIAA PAPER 83-2742] p 49 A84-12334

Development of satellite position location system for aircraft and boat distress beacons

p 38 A84-12427

The design and measured performance of an experimental GPS navigation receiver for general aviation

p 38 A84-12428

A proposed electronic horizontal situation indicator for use in general-aviation aircraft

p 40 A84-12449

Problems and development trends in general aviation; Symposium, Friedrichshafen, West Germany, March 24, 25, 1983, Reports

[DGLR BERICHT 83-01] p 85 A84-15408

Aerodynamic canard/wing parametric analysis for general aviation applications

[AIAA PAPER 84-0560] p 169 A84-18164

Use of a discontinuous wing leading-edge modification to enhance spin resistance for general aviation airplanes

[AIAA PAPER 84-0559] p 227 A84-19261

Propeller tone bursts

p 320 A84-21213

Benefits of dual wings over single wings for high-performance business airplanes

p 291 A84-22172

Aerodynamic design optimization trim analysis of canard conventional configurations

p 347 A84-24104

Flight evaluation results from the general-aviation advanced avionics system program

p 440 A84-26732

Making the digital cockpit operational in general aviation aircraft

p 440 A84-26734

Aircraft accident investigation procedures in the U.S.A.

p 497 A84-27415

Aircraft accident enquiries - Whose interest prevails?

p 497 A84-27417

All about stalls and spins — Book

p 457 A84-29001

Electronic fuel controls for executive jet aircraft

[SAE PAPER 831478] p 451 A84-29457

Flight test results for an experimental GPS C/A-code receiver in a general aviation aircraft

p 522 A84-33025

Design of a high-performance rotary stratified-charge research aircraft engine

[AIAA PAPER 84-1395] p 603 A84-35204

Australian airspace management

p 571 A84-35377

Weight comparison of divergence-free tailored metal and composite forward swept wings for an executive aircraft

p 682 A84-38422

General Aviation Technology Conference, Hampton, VA, July 10-12, 1984, Technical Papers

p 637 A84-39276

Wing design for spin resistance

[AIAA PAPER 84-2223] p 684 A84-39278

Performance of two load-limiting subfloor concepts in full-scale general aviation airplane crash tests

[AIAA PAPER 84-2225] p 684 A84-39279

Application of speech recognition and synthesis in the general aviation cockpit

[AIAA PAPER 84-2239] p 676 A84-39282

Sidestick controllers for general aviation aircraft - A feasibility study

[AIAA PAPER 84-2242] p 703 A84-39285

Dual and single wing design integration-optimized for decalage angle, R(e), and M(cr)

[AIAA PAPER 84-2161] p 769 A84-41335

On the aerodynamic optimization of mini-RPV and small GA aircraft

[AIAA PAPER 84-2163] p 769 A84-41336

Natural laminar flow flight experiments on a swept-wing business jet

[AIAA PAPER 84-2189] p 746 A84-41344

An evaluation and force gradient determination of mechanically linked reversible sidestick controllers for General Aviation aircraft
[AIAA PAPER 84-1916] p 897 A84-43488

Advanced airfoil design for general aviation propellers
p 829 A84-44506

Gyros in business aircraft p 971 A84-49357

Crashworthiness: An illustrated commentary on occupant survival in general aviation accidents
[AD-A130198] p 28 N84-10038

Flight evaluation results from the general-aviation advanced avionics system program
[NASA-TM-84397] p 42 N84-10042

Single pilot IFR accident data analysis
p 109 N84-12031

Study to determine the IFR operational profile and problems to the general aviation pilot
p 109 N84-12032

Analysis of general aviation single-pilot IFR incident data obtained from the NASA Aviation Safety Reporting System
p 109 N84-12033

Flight test validation of a design procedure for digital autopilots
p 136 N84-12036

Pilot controls and SPIRF flight
p 136 N84-12038

NASA Demonstration Advanced Avionics System (DAAS)
p 125 N84-12048

An overview of the demonstration advanced avionics system guest pilot evaluation conducted at Ames Research Center
p 126 N84-12049

An experimental investigation of separated three dimensional flow on general aviation twin-engine aircraft
p 96 N84-12087

A study of wing-body aerodynamic interference of a light twin aircraft utilizing a panel method potential flow program
p 104 N84-12134

Safety report: General aviation crashworthiness project, phase 1
[PB83-917004] p 110 N84-12142

Census of US civil aircraft
[PB83-252460] p 88 N84-13147

FAA (Federal Aviation Administration) statistical handbook of aviation: Calendar year 1982
[PB84-127323] p 260 N84-17124

A brief review of aircraft controls research opportunities in the general aviation field
p 463 N84-20595

Instrument landing system critical area studies
[AD-A138228] p 428 N84-21530

General aviation pilot and aircraft activity survey
[PB84-154301] p 503 N84-23602

General aviation TCAS (Traffic Alert and Collision Avoidance System) avionics (GATCAS)
[AD-A139145] p 523 N84-23618

Application of near-term technology to a Mach 2.0 variable-sweep-wing, supersonic-cruise executive jet
[NASA-CR-172321] p 529 N84-23621

A comparison of measured take-off and flyover sound levels for several general aviation propeller-driven aircraft
[AD-A139901] p 631 N84-25429

Competitive assessment of the U.S. Civil aircraft industry
[PB84-154913] p 632 N84-25525

Rotary balance data for a typical single-engine general aviation design for an angle-of-attack range of 20 to 90 deg. 3: Influence of control deflection on predicted model D spin modes
[NASA-CR-3248] p 584 N84-25641

Annual review of aircraft accident data: US general aviation, 1980
[PB84-182914] p 588 N84-25672

CONUS (Continental United States) Omega/VLF data collection: Flight test
[AD-A140252] p 593 N84-25688

Renovation of the Helice
[SNIAS-832-111-109] p 598 N84-25703

Civil aircraft windshield damage due to birdstrikes
[AD-P003214] p 673 N84-26627

Natural laminar flow experiments on modern airplane surfaces
[NASA-TP-2256] p 662 N84-26660

Cleared for the visual approach: Human factor problems in air carrier operations
[NASA-CR-166573] p 674 N84-26679

On the stick-free longitudinal dynamic stability of a general aviation aircraft equipped with an all-movable horizontal tail
p 705 N84-27748

Experimental study of noise transmission into a general aviation aircraft
[NASA-CR-172357] p 820 N84-30888

Development of 2 underseat energy absorbers for application to crashworthy passenger seats for general aviation aircraft
[NASA-CR-158927] p 854 N84-32367

GEODETIC ACCURACY

Models for combining single channel NAVSTAR/GPS with dead reckoning for marine positioning
p 188 A84-18317

GEODETIC SATELLITES

Satellite Doppler point positioning using the Navy Navigation Satellite System
p 766 N84-29281

GEODETIC SURVEYS

Offshore positioning with an integrated GPS/inertial navigation system
p 188 A84-18318

GEOGRAPHY

Astronautics and aeronautics, 1976. A chronology
[NASA-SP-4021] p 633 N84-25602

GEOMETRIC DILUTION OF PRECISION

A satellite selection method and accuracy for the Global Positioning System
p 856 A84-44149

GEOMETRICAL THEORY OF DIFFRACTION

Radiation patterns of an antenna mounted on the mid-section of an ellipsoid
[AD-A133203] p 244 N84-15385

GEOMETRY

Interactive graphics for quick-geometry modeling
p 491 N84-22202

Computer graphics in aerodynamic analysis
p 492 N84-22206

Present capabilities and future requirements for computer-aided geometric modeling in the design and manufacture of gas turbine
p 492 N84-22219

Stator blade row geometry modification influence on two-stage, axial-flow compressor aerodynamic performance
[AD-A141793] p 782 N84-26797

Triangular extrapolation
[AD-A144660] p 1015 N84-35025

GEOTECHNICAL FABRICS

Mechanistic methodology for airport pavement design with engineering fabrics. Volume 1: Theoretical and experimental base
[DOT/FAA/PM-84-9.1] p 993 N84-34450

GIMBALS

Dynamical analysis of a two-gimbal mass-unbalanced dynamically tuned gyroscope
p 806 A84-41785

A time domain analysis of a rigid two-bladed fully gimbaled helicopter rotor with circulation control
[AD-A136947] p 340 N84-19296

Passive line-of-sight stabilization for an infrared sensor
[AD-A143305] p 929 N84-32792

GLASS

Windshield weight reduction through the use of high strength glass and polyurethane interlayers
[AD-P003186] p 684 N84-26599

An industry test program for interlayer equivalency
[AD-P003200] p 723 N84-26613

GLASS FIBER REINFORCED PLASTICS

Fiber composite structures for military helicopters
p 48 A84-11056

Sound-absorbing composite structures for gas-turbine engines
p 58 A84-11347

The rise and change in airborne GRP
p 85 A84-13805

Industrial manufacture of light aircraft by a fiber composite construction method
p 86 A84-15412

Local charge distribution and development on insulating surfaces -- of fiber reinforced plastics and aluminum used for aircraft parts
p 236 A84-18542

Flashover voltage reduction by proximate conductors -- for aircraft protection against lightning strikes
p 242 A84-18550

Connecting elements for glass fiber-reinforced plastics structures - Mechanical connections for highly-stressed structures made of fiber-reinforced plastics
p 314 A84-22475

Elastic behaviour of composite structures under low velocity impact
p 798 A84-42210

Journal of aeronautical materials (selected articles)
[AD-A140181] p 572 N84-25611

Growth rotor blades: Production development, construction and test
[NASA-TM-77479] p 781 N84-28793

GLASS FIBERS

Fire resistant films for aircraft applications
p 140 A84-13375

GLAZES

Results of an experimental program investigating the effects of simulated ice on the performance of the NACA 63A15 airfoil with flap
[NASA-CR-168288] p 271 N84-16145

GLIDE LANDINGS

Flight-test of the glide-slope track and flare-control laws for an automatic landing system for a powered-lift STOL airplane
[NASA-TP-2128] p 138 N84-13198

GLIDE PATHS

Precision timing in commercial flight - A way to increase efficiency through onboard and ground-based aids
[DGLR PAPER 82-095] p 29 A84-10568

A look at the 'Eagle' parachute - An interesting unique personnel parachute of the 1940's
p 24 A84-10744

A technique for determining the glide ratio of gliding parachutes using space positioning data
[AIAA PAPER 84-0792] p 415 A84-26560

Optimizing the F-14A DLC/APC system for improved glideslope performance
p 867 A84-44467

Instrument landing system critical area studies
[AD-A138228] p 428 N84-21530

Simulation of a cockpit-display concept for executing a wake-vortex avoidance procedure
[NASA-TP-2300] p 447 N84-21542

GLIDERS

Fatal gliding accidents in the United Kingdom - 1960-1980
p 26 A84-12067

The design of high-performance gliders
p 120 A84-15408

FL500 - High altitude soaring project: 'Soaring steps into the space age'
p 180 A84-16162

Service life of sailplanes made of CFRP
p 288 A84-19678

Modification to an accident
p 278 A84-20087

Constructional possibilities for minimizing dangerous flutter in gliders and light aircraft
[DGLR PAPER 83-111] p 460 A84-29674

Toward static stability in gliders and light aircraft
[DGLR PAPER 83-112] p 460 A84-29675

Automatic camber flap adjustment in gliders
[DGLR PAPER 83-113] p 436 A84-29676

Performance evaluation of a glider with constant span width and variable aspect ratio
[DGLR PAPER 83-114] p 436 A84-29677

Remarkable L/D achieved by short-span tailless sailplane. II
p 506 A84-31806

25 000 airplanes, helicopters and gliders for 40 years of the Polish People's Republic
p 636 A84-38714

Flight characteristics of a manned, low-speed, controlled deep stall vehicle
[AIAA PAPER 84-2074] p 786 A84-42330

Full-scale studies of the boundary layer structure
p 1012 A84-47099

World and United States aviation and space records, as of June 1, 1983
p 3 N84-10009

Limited performance and flying qualities validation of the SGM 2-37 powered sailplane
[AD-A131445] p 54 N84-11165

Wind tunnel investigations of glider fuselages with different waistings and wing arrangements
p 177 N84-15116

Wind tunnel tests on an outer wing segment of the ASW-19X sailplane
[VTH-LR-369] p 342 N84-19305

Kasprzyk airfoil. The first wind-tunnel tests
[NASA-TM-77757] p 965 N84-33380

GLIDING

Optimal trajectories for maximum endurance gliding in a horizontal plane -- air to air missile flight
p 348 A84-24996

Lecture notes on the principles and practice of airplane performance prediction. Part 2: Point-performance in steady symmetric and unsymmetric flight
[VTH-LR-385-VOL-2] p 353 N84-19346

GLOBAL AIR SAMPLING PROGRAM

Simultaneous cabin and ambient ozone measurements on two Boeing 747 airplanes. Volume 2: January to October 1978
[NASA-TM-81733] p 498 N84-22488

Climatology of ozone at altitudes from 19,000 to 59,000 feet based on combined GASP and ozonesonde data
[NASA-TP-2303] p 933 N84-31865

GASP cloud- and particle-encounter statistics and their application to LPC aircraft studies. Volume 1: Analysis and conclusions
[NASA-TM-85835-VOL-1] p 1013 N84-34828

GLOBAL POSITIONING SYSTEM

NAVSTAR - Global positioning system - Ten years later (Invited Paper)
p 35 A84-10870

Civil GPS from a future perspective (Invited Paper)
p 36 A84-10871

Radionavigation system integrity and reliability
p 36 A84-10874

PLANS '82 - Position Location and Navigation Symposium, Atlantic City, NJ, December 6-9, 1982, Record
p 38 A84-12426

The design and measured performance of an experimental GPS navigation receiver for general aviation
p 38 A84-12428

Differential-GPS - A new approach
p 39 A84-12430

GPS/SSN integration
p 41 A84-12458

GPS fixed wing FAA exploratory flight test
p 114 A84-15654

Models for combining single channel NAVSTAR/GPS with dead reckoning for marine positioning
p 188 A84-18317

Offshore positioning with an integrated GPS/inertial navigation system
p 188 A84-18318

 Helicopter engine core noise p 818 N84-29676
 Rotorcraft noise prediction p 818 N84-29677
 Field repair of AH-16 helicopter window cutting assemblies [NASA-TM-85831] p 774 N84-29864
 Worldwide flight and ground-based exposure of composite materials p 802 N84-29971
 The influence of a wind tunnel on helicopter rotational noise: Formulation of analysis [NASA-TM-85982] p 820 N84-30887
 Development and application of an analysis of axisymmetric body effects on helicopter rotor aerodynamics using modified slender body theory [NASA-TM-85934] p 847 N84-31090
 Flapping-torsional response of helicopter rotor blades to turbulence excitation p 878 N84-31110
 Advanced system for testing new helicopter transmissions p 880 N84-31120
 Concepts for LHX avionics [AD-P003575] p 885 N84-31180
 Reliability analysis of an ultra-reliable fault tolerant control system [NASA-CR-166594] p 903 N84-31219
 An integral equation for the solution of nonlinear wave equations p 849 N84-32347
 Noise measurement flight test: Data-analyses Aerospaciale SA-365N Dauphin 2 helicopter [AD-A143229] p 942 N84-33151
 Analysis of benefits realized from multiyear contracting for the Black Hawk helicopter [AD-A143485] p 945 N84-33254
 Refinement and evaluation of helicopter real-time self-adaptive active vibration controller algorithms [NASA-CR-3821] p 964 N84-33378
 Helicopter anti-torque system using strakes [NASA-CASE-LAR-13233-1] p 975 N84-33400
 Hover test of a full-scale hingeless rotor [NASA-TM-85990] p 975 N84-33401
 Flight operation manual for the Mi-8 helicopter [AD-A143860] p 976 N84-33407
 An analysis of three approaches to the helicopter preliminary design problem [AD-A144315] p 978 N84-34440
 Periodic control of the individual-blade-control helicopter rotor [NASA-CR-166607] p 1012 N84-34771
HELIPORTS
 Helicopter noise survey performed at Parker Center, Pasadena, and Anaheim, California, on February 10-14, 1983 [AD-A130962] p 83 N84-11887
HELMET MOUNTED DISPLAYS
 Visual aids for future helicopters p 210 A84-18375
 HH-60D helmet mounted display formats - A pilot's view and a human factors view [SAE PAPER 831446] p 445 A84-29489
 Information processing using helmet mounted displays and voice interactive systems [SAE PAPER 831448] p 445 A84-29490
 Visually coupled systems as simulation devices p 906 A84-45968
 The effects of character stroke width on the visibility of a head-coupled display [AD-A132046] p 127 N84-13183
 Fiber optic helmet mounted display: A cost effective approach to full visual flight simulation [AD-P003482] p 886 N84-32249

HELMETS

HELMETS

Manufacturing Methods and Technology (MM and T) specifications for miniature cathode ray tube
[AD-A132797] p 243 N84-14439

HEURISTIC METHODS

Multi-variate acceptance plans for flexible airport pavements p 906 N84-31220

HIERARCHIES

Aerospace engineering design by systematic decomposition and multilevel optimization
[NASA-TM-85823] p 772 N84-28775

HIGH ACCELERATION

The high acceleration cockpit (HAC) - A technology base overview
[AD-A145439] p 770 A84-41697

HIGH ALTITUDE

FL500 - High altitude soaring project: 'Soaring steps into the space age' p 180 A84-16162
Adaptation of a 15-ft-dia ribbon parachute and a 73-ft cross main recovery parachute for cargo delivery from high altitude
[AIAA PAPER 84-0790] p 415 A84-26559

High altitude aerodynamic platform concept evaluation and prototype engine testing
[NASA-TM-58256] p 299 N84-16182

Structural sizing of a solar powered aircraft
[NASA-CR-172313] p 598 N84-25702

The NESDIS-SEL Lear aircraft instruments and data recording system
[NOAA-TR-NESDIS-9] p 693 N84-26698

Parachute descent from altitude 5000 to 7000 meters
[FOA-C-59008-H1] p 757 N84-28756

Improving the efficiency of smaller transport aircraft
[NASA-TM-55992] p 772 N84-28780

Nighttime observations of thunderstorm electrical activity from a high altitude airplane
[NASA-TM-84455] p 926 N84-31597

Investigation of the external flow analysis for density measurements at high altitude - shuttle upper atmosphere mass spectrometer experiment
[NASA-CR-173881] p 849 N84-32352

HIGH ALTITUDE BALLOONS

Aerodynamic Decelerator and Balloon Technology Conference, 8th, Hyannis, MA, April 2-4, 1984, Technical Papers p 414 A84-26551

High wind balloon material test and launch concept description
[AIAA PAPER 84-0789] p 415 A84-26558

Microgravity system by using stratospheric balloons
[AD-A138396] p 331 A84-24893

Development of relay balloon system p 670 A84-38289

Balloon activities in Indonesia p 670 A84-38290

Using the STD bus for encoder/decoder systems aboard a high-altitude balloon platform p 970 A84-46670

HIGH ALTITUDE ENVIRONMENTS

Aerodynamic balance for high altitude simulation chamber p 368 A84-25217

HIGH ALTITUDE PRESSURE

Analysis of the effect of oxygen addition on minimum ignition energy p 373 A84-24057

HIGH ALTITUDE TESTS

A new concept for exhaust diffusers of altitude test cells
[AIAA PAPER 84-0634] p 367 A84-24210

HIGH ASPECT RATIO

Transonic oblique-wing flow computation p 331 A84-24893

Aspects of forward swept wing research at the University of Bristol p 681 A84-38410

Subsonic investigations on configurations with forward- and aft-swept wings of high aspect ratio p 871 A84-44998

A study of flow past straight and swept wings of high aspect ratios at transonic speeds p 957 A84-47052

Aeroelastic tailoring of high-aspect-ratio composite wings in the transonic regime p 52 N84-11119

Results of design studies and wind tunnel tests of an advanced high lift system for an Energy Efficient Transport
[NASA-CR-159389] p 976 N84-33403

HIGH CURRENT

Experimental and theoretical evaluation of a fast-rise-time, high current lightning indirect effects simulator p 241 A84-18527

HIGH FREQUENCIES

HF ground-air communications are still alive and well p 37 A84-12188

High frequency green function for aerodynamic noise in moving media. I - General theory. II - Noise from a spreading jet p 321 A84-21273

HIGH GRAVITY ENVIRONMENTS

Flight dynamics of rotorcraft in steep high-g turns p 225 A84-17402

HIGH LEVEL LANGUAGES

The use of high order languages in digital flight control systems p 489 A84-26725

JOVIAL language control procedures with a view toward Ada (Trademark) p 936 N84-31126

Application of JOVIAL (J-73) to digital flight controls
[AD-P003522] p 901 N84-31129

Proceedings of the 2nd AFSC (Air Force Systems Command) Avionics Standardization Conference, Volume 5: Tutorial: MIL-STD-1589 JOVIAL (J-73) high order language p 886 N84-31203

Proceedings of the 2nd AFSC (Air Force Systems Command) Avionics Standardization Conference, Volume 8: Tutorial: MIL-STD-1815 Ada high order language
[AD-A142783] p 886 N84-31206

HIGH POWER LASERS

High-average-power exciplex laser system p 557 A84-32346

HIGH PRESSURE

Thermal analysis of a high-pressure compressor rotor of an aero-engine - Venting as a means for life improvement p 893 A84-46502

Emission FTIR analyses of thin microscopic patches of jet fuel residue deposited on heated metal surface
[NASA-CR-168331] p 311 N84-17410

Investigation of the effects of pressure gradient, temperature and wall temperature ratio on the stagnation point heat transfer for circular cylinders and gas turbine vanes p 539 N84-23649

Energy efficient engine high-pressure turbine supersonic cascade technology report
[NASA-CR-165567] p 701 N84-27739

Energy efficient engine high-pressure turbine detailed design report
[NASA-CR-165608] p 781 N84-28768

HIGH PRESSURE OXYGEN

Explosion and fire hazards in an oil-oxygen system - of an airplane
[FOA-C-20507-D1] p 282 N84-17159

HIGH RESOLUTION

High resolution color raster graphics generator for Advanced Display and Control Systems (ADACS) p 142 A84-15649

Single-pass fine-resolution SAR autofocus p 186 A84-16586

Synthetic aperture radar simulation
[AD-P003474] p 927 N84-32246

HIGH REYNOLDS NUMBER

Global PNS solutions for subsonic strong interaction flow over a cone-cylinder-boattail configuration - Parallelized Navier-Stokes p 92 A84-14690

Second order composite velocity solution for large Reynolds number flows
[AIAA PAPER 84-0172] p 162 A84-17930

Status of office induced pressure error studies
[AIAA PAPER 84-0245] p 163 A84-17973

The structure of a two-dimensional, supersonic, high Reynolds number turbulent wake p 170 A84-18352

Two recent extensions of the vortex method
[AIAA PAPER 84-0343] p 174 A84-19249

Cryogenic wind-tunnel model technology development activities at the NASA Langley Research Center
[AIAA PAPER 84-0586] p 384 A84-24178

Numerical study of incompressible slightly viscous flow past blunt bodies and airfoils
[AD-A138396] p 331 A84-24893

Design of high-Reynolds-number flat-plate experiments in the NTF p 368 A84-25726

The spectrum of spatial correlations of turbulent pressure pulsations at a wall at high Reynolds numbers p 407 A84-28808

Structure of a high-Reynolds-number turbulent wake in supersonic flow p 749 A84-41806

Cryogenic wind tunnels for high Reynolds number testing p 904 A84-42900

The effect of the Reynolds number and the position of the transition point on transonic nonseparated flow past a body of revolution p 958 A84-47062

Asymptotic theory of flow around the sharp corners of a rigid body profile p 959 A84-47072

Operational experience with the National Transonic Facility p 545 N84-23565

The European Transonic Windtunnel (ETW) p 545 N84-23566

The 310 airbus test in the ONERA wind tunnel: Flight-wind tunnel comparison p 565 N84-23587

The boundary layer on compressor cascade blades
[NASA-CR-173514] p 623 N84-25001

Description and validation of the two dimensional test setup for multiple airfoils in the pressurized wind tunnel HST
[NLR-TR-83031-U] p 795 N84-28892

SUBJECT INDEX

HIGH SPEED

USB applied to high-speed aircraft - upper surface blowing p 595 A84-35024

Protuberance interference heating in high-speed flow
[AIAA PAPER 84-1724] p 722 A84-39368

Aeroelastic considerations in the design of high speed rotors p 52 N84-11128

Douglas Aircraft Company Advanced Concept Ejection Seat (ACES 2), revision c
[AD-A133628] p 183 N84-14131

Some comments on the hazards associated with manoeuvring flight in severe turbulence at high speed and low altitude p 228 N84-15089

Computer programs for helicopter high speed flight analysis
[AD-A136376] p 350 N84-18191

High speed ejectors
[AD-A141562] p 701 N84-27741

High-speed noise of helicopter rotors p 818 N84-29673

High speed interferometric method for density field investigation in a boundary layer behind the shock wave p 919 A84-45491

A triangulation technique for obtaining deflections of aircraft transparencies during bird impact testing
[AD-P003220] p 723 N84-26633

HIGH STRENGTH

Windshield weight reduction through the use of high strength glass and polyurethane interlayers.
[AD-P003186] p 684 N84-26599

Development of lightweight commercial aircraft windshields with new high strength glasses
[AD-P003190] p 685 N84-26603

HIGH STRENGTH ALLOYS

Superplastic forming of structural alloys: Proceedings of the Symposium, San Diego, CA, June 21-24, 1982 p 549 A84-32676

Statistical and vibratory fatigue limit characteristics of aluminum cast alloys p 561 N84-23558

T-38 student windshield birdproofing efforts utilizing metal and composite materials for aft arch reinforcement
[AD-P003189] p 672 N84-26602

The use of novel processing procedures for improving the overall fatigue resistance of high strength aluminum alloys
[AD-A141107] p 800 N84-28966

HIGH STRENGTH STEELS

In situ indications of ductility evolution during high-temperature fatigue testing with and without hold times p 548 A84-30658

Surface cracking of quenched and tempered steel by shear instability - Cause of premature fatigue cracks in helicopter main rotor spindle lugs? p 914 A84-46339

Causes and prevention of structural materials failures in naval environments
[AD-A141560] p 800 N84-28972

HIGH TEMPERATURE

Composite casting/bonding construction of an air-cooled, high temperature radial turbine wheel
[SAE PAPER 831519] p 480 A84-29462

Application of laser anemometry in turbine engine research
[NASA-TM-83513] p 81 N84-11456

Emission FTIR analyses of thin microscopic patches of jet fuel residue deposited on heated metal surface
[NASA-CR-168331] p 311 N84-17410

Elevated temperature biaxial fatigue
[NASA-CR-173473] p 486 N84-21905

Status of new aerothermodynamic analysis tool for high-temperature resistant transparencies
[AD-P003238] p 724 N84-26649

Development of sintered Si3N4 for high performance thermomechanical applications
[AD-A140795] p 713 N84-26807

Effects of long-time elevated temperature exposures on hot-isostatically-pressed power-metallurgy Udimet 700 alloys with reduced cobalt contents
[NASA-TM-83632] p 799 N84-28917

Improved high temperature resistant matrix resins
[NASA-CR-168210] p 800 N84-28995

Behavior of Ni-Cr-Si coating alloys in Na2SO4, V2O5 and mixed salt hot corrosion p 915 N84-31383

High temperature electronics technology
[AD-A143571] p 928 N84-32714

HIGH TEMPERATURE ENVIRONMENTS

Polyimides for service at 700 F p 233 A84-17155

Silicon carbide, a high temperature semiconductor p 253 A84-17823

HIGH TEMPERATURE GASES

Heat transfer in high-temperature gas turbines p 128 A84-12792

A dividing layer in high-temperature flows p 312 A84-21137

- The increase in efficiency of high temperature gas turbine plants with cooled turbines p 314 A84-22002
Hot gas APU starter for advanced aircraft applications p 131 N84-12178
Fluid shielding of high-velocity jet noise [NASA-TP-2259] p 254 N84-15894
- HIGH TEMPERATURE LUBRICANTS**
Overview of liquid lubricants for advanced aircraft [NASA-TM-83529] p 77 N84-11296
- HIGH TEMPERATURE TESTS**
The effect of the microstructure on slow crack propagation and the mechanical properties of hot-pressed silicon nitride between room temperature and 1500 C --- German thesis p 308 A84-22237
Strength, quality, and lifetime in the case of hot engine components p 380 A84-24714
In situ indications of ductility evolution during high-temperature fatigue testing with and without hold times p 548 A84-30658
Viscoplastic fatigue in a superalloy at elevated temperatures considering a zero mean stress p 548 A84-31654
Hot isostatic pressing for the repair of hot section turbine parts p 710 A84-38808
High temperature erosion study of metals used in turbomachinery [ASME PAPER 84-GT-168] p 1004 A84-46972
Effect of creep in titanium alloy Ti-6Al-4V at elevated temperature on aircraft design and flight test [NASA-TM-86033] p 385 N84-18685
- HIGH VOLTAGES**
HV power supply manufacturing improvement --- High Voltage design featuring increased MTBF and decreased life cycle cost for airborne applications p 216 A84-16537
High-voltage (270 V) dc power-generating system for fighter aircraft p 79 N84-10057
Three-phase, high-voltage, high-frequency distributed bus system for advanced aircraft p 79 N84-10058
- HIGHLY MANEUVERABLE AIRCRAFT**
Evaluation of HiMAT aircraft landing approach lateral control gearing using simulation and a visual display [NASA-TM-84916] p 704 N84-27743
Air data position-error calibration using state reconstruction techniques [NASA-TM-86029] p 887 N84-32384
- HIGHWAYS**
USSR report: Transportation [JPRS-UTR-84-004] p 503 N84-23551
USSR report: Transportation [JPRS-UTR-84-016] p 638 N84-26652
USSR report: Transportation [JPRS-UTR-84-024] p 879 N84-31119
USSR report: Transportation [JPRS-UTR-84-026] p 948 N84-33368
- HILBERT SPACE**
Control theory of partial differential equations [AD-A140945] p 734 N84-28541
- HILSCH TUBES**
Acoustic streaming as a mechanism of the Ranque-Hilsch effect p 96 N84-12088
- HINGES**
Vibration damping for a hinged-blade helicopter rotor p 288 A84-19698
On the design of horizontal axis two-bladed hinged wind turbines p 730 A84-37127
Determination of optimum fin planform and airfoil section for minimizing fin hinge moment [AD-A134523] p 272 N84-16151
Preliminary method for estimating hinge moments of all-movable controls [AD-A139726] p 611 N84-24597
- HISTORIES**
Studies in the history and theory of the development of aviation and rocket and space science and technology. Number 2 --- Russian p 325 A84-21574
History and evolution of competitive body flight [AIAA PAPER 84-0830] p 397 A84-26589
DO-178 - Its history and purpose --- of digital avionics software development p 488 A84-26711
History benefits next-generation fighter design p 528 A84-32691
Aircraft design in Canada from Silver Dart to Challenger and Dash 8 p 847 A84-46807
Oscar satellites, amateur radio in space p 995 A84-48416
A balloon design for 9000 pounds at 90,000 feet: Recommendations based on heavy-load balloon history [AD-A131987] p 97 N84-12093
The Prandtl Hergesell project of a National Research Establishment for Aeronautics [DFVLR-MITT-83-10] p 260 N84-17123
Aircraft over Steinberg (West Germany) [REPT-5/1982] p 345 N84-19316
AGARD highlights [AGARD-HIGHLIGHTS-83/1] p 399 N84-21493
- Rotary wing aerodynamically generated noise p 817 N84-29668
Some aerodynamic discoveries and related NASA/NASA research programs following World War 2 [NASA-TM-86258] p 741 N84-29847
Boundary-layer linear stability theory p 1009 N84-33759
- HODOGRAPHS**
High-lift airfoil design from the hodograph method [AD-A142752] p 848 N84-31098
Shock-free transonic airfoil design by a hodograph method p 963 A84-49086
- HOLE DISTRIBUTION (MECHANICS)**
Optimum estimation for accuracy of distance between mounting holes for aircraft equipment by Kalman filtering theory p 82 A84-12040
Analytical study of the thermal and fluid mechanical evolution of a cooling film injected from a single line of inclined round holes p 554 A84-31315
Effects of variations in coldworking repair procedures on flaw growth and structural life [AD-A141966] p 812 N84-30336
- HOLE GEOMETRY (MECHANICS)**
Strain-energy-release rate analysis of delamination around an open hole in composite laminates [AIAA PAPER 84-0961] p 556 A84-31681
The application of cold worked holes (in aircraft structures) [NLR-TR-81120-U] p 561 N84-22990
Analysis of symmetric reinforcement of quasi-isotropic graphite-epoxy plates with a circular cutout under uniaxial tensile loading [AD-A139998] p 614 N84-24715
Design of mechanical joints in composites p 727 N84-27038
Strains in an elastic plate containing an interference-fit bolt near a free edge [AR-003-012] p 811 N84-30333
- HOLES**
The use of adhesive-bonded rivets to lessen the reductions in fatigue life caused by rivet holes [ARL-STRUC-REPT-399] p 999 N84-34617
- HOLOGRAPHIC INTERFEROMETRY**
Holographic vibration measurement of a rotating fluttering fan p 313 A84-21511
Laser holographic interferometry for an unsteady airfoil undergoing dynamic stall p 474 A84-27136
Industrial and commercial applications of holography; Proceedings of the Meeting, San Diego, CA, August 24, 25, 1982 p 475 A84-27992
Nd:YAG holographic interferometer for aerodynamic research p 476 A84-26000
Experimental determination of the natural modes of swept-wing models using laser holographic interferometry p 619 A84-35022
The use of image derotated holographic interferometry in studying the resonant response of gas turbine engine bladed-disk p 808 A84-42406
Application of pulsed laser holography to nondestructive testing of aircraft structures p 919 A84-45497
La Recherche Aérospatiale, Biomonthly Bulletin, no. 1982-4, 209/July-August 1982 p 88 N84-13141
INTEL-8401 computer tomography for interferometric aerodynamic measurements [AD-A139591] p 517 N84-23611
Flow-field measurements on an airfoil with an oscillating trailing-edge using holographic interferometry [NASA-CR-166604] p 967 N84-34430
- HOLOGRAPHY**
Industrial and commercial applications of holography; Proceedings of the Meeting, San Diego, CA, August 24, 25, 1982 p 475 A84-27992
Industrial applications of holographic testing p 476 A84-27997
The use of holographic head-up display of flight path symbology in varying weather conditions [SAE PAPER 831445] p 445 A84-29488
A holographic head-up display for low visibility landing operations [SAE PAPER 831451] p 445 A84-29492
Measurement of fluid properties using rapid-double-exposure and time-average holographic interferometry [AIAA PAPER 84-1461] p 620 A84-35223
Holographic measurements and theoretical predictions of the unsteady flow in a transonic annular cascade [ASME PAPER 84-GT-174] p 953 A84-46976
Holographic head-up display gives military transport pilots see-through accuracy p 979 A84-49388
Application of holography to flow visualization [NASA-TM-84325] p 316 N84-16530
- Measurement of fluid properties using rapid-double-exposure and time-average holographic interferometry [NASA-TM-83630] p 485 N84-21849
- HOMING**
Maximum-information guidance for homing missiles [AIAA PAPER 84-1887] p 855 A84-43439
The aircraft infrared measurements guide [AD-A132598] p 254 N84-14905
- HOMING DEVICES**
Data processing techniques for imaging air to air guidance systems p 343 A84-23248
Is there a future for infra-red missile systems? p 591 A84-36229
- HOMOGENEOUS TURBULENCE**
Noise intensity and spectrum in a turbulent boundary layer on a flat plate p 494 A84-28806
La Recherche Aérospatiale, Biomonthly Bulletin, no. 1982-4, 209/July-August 1982 p 88 N84-13141
[ESA-TT-781]
- HONEYCOMB CORES**
The buckling of honeycomb sandwich circular rings p 922 A84-46190
- HONEYCOMB STRUCTURES**
Effects of ventilation and panel properties on temperature rise from aircraft fires [DOT/FAA/CT-TN83/63] p 280 N84-16157
A comparison of experimental and theoretical results for leakage, pressure distribution, and rotodynamic coefficients for annular gas seals [NASA-CR-174000] p 1011 N84-34765
- HORIZON SCANNERS**
Automated measurements of atmospheric visibility p 78 A84-12196
- HORIZONTAL FLIGHT**
The effect of forward flight on the noise and flow field of inverted profile jets p 450 A84-29243
Lecture notes on the principles and practice of airplane performance prediction. Part 2: Point-performance in steady symmetric and unsymmetric flight [VTH-LR-385-VOL-2] p 353 N84-19346
V/STOL maneuverability and control [NASA-TM-85939] p 542 N84-22584
V/STOL maneuverability and control p 611 N84-25632
- HORIZONTAL ORIENTATION**
A proposed electronic horizontal situation indicator for use in general-aviation aircraft p 40 A84-12449
Optimal trajectories for maximum endurance gliding in a horizontal plane --- air to air missile flight p 348 A84-24996
Time controlled descent guidance algorithm for simulation of advanced ATC systems [NASA-TM-84373] p 42 N84-10043
- HORIZONTAL SPACECRAFT LANDING**
Investigation of a Microwave Scanning Beam Landing System azimuth error source --- in Space Shuttle autoland guidance p 113 A84-15647
- HORIZONTAL TAIL SURFACES**
Experimental study of hinge moment in the subsonic and transonic speed range p 348 A84-25176
A mathematical model for performance comparisons of different types of tail units p 361 A84-25191
Validation of design methods and data by flight test p 869 A84-44947
The influence of V/STOL on wing design and tailplane design p 597 N84-25627
- HORSEPOWER**
Computer program for preliminary helicopter design [AD-A136026] p 351 N84-18197
- HOT CORROSION**
Hot corrosion testing of oxide dispersion strengthened nickel base alloys p 471 A84-28334
High-temperature protective coatings; Proceedings of the Symposium, Atlanta, GA, March 7, 8, 1983 p 788 A84-42651
Evaluation of the high temperature corrosion resistance of some commercial coatings and new duplex coatings for gas turbines p 798 A84-42662
Microstructural characterization of service exposed CoCrAlY overlay coating p 798 A84-42663
Degradation mechanisms of ceramic thermal barrier coatings in corrosive environments p 799 A84-42668
Corrosion and corrosion control in gas turbines. II - The turbine section [ASME PAPER 84-GT-256] p 984 A84-47029
A long-term field test of advanced gas turbine airfoil coatings under a severe industrial environment [ASME PAPER 84-GT-277] p 996 A84-47039
Corrosion and corrosion prevention in gas turbines [NLR-MP-82048-U] p 359 N84-19355
Hot corrosion in aircraft engines [DFVLR-MITT-84-04] p 702 N84-27742
Chemical mechanisms and reaction rates for the initiation of hot corrosion of IN-738 [NASA-TP-2319] p 799 N84-28958

Deposition of Na₂SO₄ from salt-seeded combustion gases of a high velocity burner rig
[NASA-TM-83751] p 926 N84-31558

HOT PRESSING

Progress on hot isostatic pressing of titanium p 233 A84-17133

Hot isostatic pressing of aluminum castings p 235 A84-17195

Production of near net shapes by hot isostatic pressing of superalloy powder p 549 A84-32855

Hot isostatic pressing for the repair of hot section turbine parts p 710 A84-38808

Additionally compressed titanium fine cast components p 551 N84-23559

HOT SURFACES

Evaluation of thermal-oxidative stability of aviation oils on the OP-100 device p 374 A84-25589

HOT WORKING

A review of advanced manufacturing technology — gas turbine components
[PNR-90194] p 559 N84-22815

HOT-FILM ANEMOMETERS

The application of surface hot film in aerodynamic testing p 718 A84-37909

HOT-WIRE ANEMOMETERS

Hot-wire anemometer measurements in large wind tunnels p 70 A84-10553

The structure of the large eddies in fully developed turbulent shear flows. II - The plane wake p 266 A84-21393

Flying hot-wire anemometry p 378 A84-23229

Aerodynamic disturbances of hot-wire probes and directional sensitivity p 382 A84-25802

High-speed data-acquisition system for aerodynamics experiments p 466 A84-27950

Hot-wire investigation of an unseparated shock-wave/turbulent boundary-layer interaction p 508 A84-32602

Instabilities in trailing vortices: Flow visualization using hot-wire anemometry p 99 N84-12103

HOT-WIRE FLOWMETERS

A comparison of turbulence intensity measurements using a laser velocimeter and a hot wire in a low speed jet flow p 478 A84-28741

Unsteady hot-X-wire measurements in a schematic air intake [AAAF PAPER NT 83-17] p 507 A84-32485

HOUSINGS

Advanced high-power generator for airborne applications [AD-A133290] p 244 N84-15398

HOVERCRAFT GROUND EFFECT MACHINES

Hovercraft heave stability p 1017 A84-46810

Design of a remotely controlled hovercraft vehicle for spill reconnaissance [PB84-124064] p 305 N84-17187

HOVERING

Vortex and momentum theories for hovering rotors p 10 A84-10144

Noise and performance characteristics of a model scale X-wing rotor system in hover [AIAA PAPER 84-0337] p 197 A84-18030

A lifting line theory for curved helicopter blades in hovering and axial flight p 261 A84-19655

Advanced rotor analysis methods for the aerodynamics of vortex/blade interactions in hover p 261 A84-19657

Flap-lag damping of an elastic rotor blade with torsion and dynamic inflow in hover from symbolically generated equations [AIAA PAPER 84-0989] p 619 A84-34909

Black Hawk hover infrared suppressor subsystem p 767 A84-40788

Pilot modeling and control augmentation for the XV-15 in in-ground-effect hover [AIAA PAPER 84-1892] p 895 A84-43442

Experimental study of main rotor/tail rotor/airframe interaction in hover p 875 A84-46327

Considerations in the estimation of full-scale rotor performance from model rotor test data p 875 A84-46329

V/STOL (Vertical/Short Takeoff and Landing) low speed and transition equivalent systems analysis [AD-A131955] p 122 N84-12156

Documentation of ice shapes on the main rotor of a UH-1H helicopter in hover [NASA-CR-168332] p 274 N84-17139

Hover test of a full-scale hingeless helicopter rotor: Aeroelastic stability, performance and loads data — wind tunnel tests [NASA-TM-85892] p 350 N84-18190

Navier-Stokes calculations for the vortex of a rotor in hover [NASA-TM-85894] p 581 N84-24540

A numerical analysis for blade tip loadings on a thick bladed hovering helicopter rotor p 661 N84-26658

Aerodynamics of hovering p 664 N84-26923

The investigation of a variable camber blade lift control for helicopter rotor systems [NASA-CR-3503] p 668 N84-27695

Evaluation of UH-1H hover performance degradation caused by rotor icing [AD-A141252] p 689 N84-27727

Hover test of a full-scale hingeless rotor [NASA-TM-85990] p 975 N84-33401

HOVERING STABILITY

Unsteady aerodynamics in time and frequency domains for finite time arbitrary motion of rotary wings in hover and forward flight [AIAA PAPER 84-0988] p 525 A84-31713

Hovercraft heave stability p 1017 A84-46810

HUBS

Effects of compressor hub treatment on stator stall and pressure rise p 699 A84-37930

Application of fracture mechanics to hub-arms of helicopter p 808 A84-41780

Application of a quasi-3D inviscid flow and boundary layer analysis to the hub-shroud contouring of a radial turbine [AIAA PAPER 84-1297] p 827 A84-44177

Experimental research on helicopter fuselage and rotor hub wake turbulence p 846 A84-46384

Application of a quasi-3D inviscid flow and boundary layer analysis to the hub-shroud contouring of a radial turbine [NASA-TM-83669] p 585 N84-25647

HULLS (STRUCTURES)

Aerodynamic forces on an airship hull in atmospheric turbulence [UTIAS-277] p 516 N84-23604

HUMAN BEHAVIOR

Fear of flying - Impact on the U.S. air travel industry p 183 A84-18807

The role of aircraft recorders in human performance investigations [SAE PAPER 831414] p 418 A84-29479

HUMAN CENTRIFUGES

Crew station evaluation in a dynamic flight simulation facility p 232 N84-15069

- Hydraulic generation of auxiliary power for the Mirage 2000 aircraft p 131 N84-12176
- Hydraulic subsystems flight test handbook [AD-A132633] p 201 N84-14137
- Experimental and analytical investigation of active loads control for aircraft landing gear p 354 N84-19888
- Tubing and cable cutting tool [NASA-CASE-LAR-12786-1] p 729 N84-28085
- Design and development of an automatically controlled variable-load energy absorber [AD-A142683] p 774 N84-29868

HYDRAULIC JETS

- Rapid runway repair program subtask 1.07 - rapid concrete cutting [AD-A131771] p 139 N84-12195
- Warm fog dissipation using large volume water sprays [NASA-CASE-MFS-25962-1] p 908 N84-32398

HYDRAULIC TEST TUNNELS

- Multi-ducted inlet combustor research and development [AD-A135906] p 359 N84-18205

HYDRAZINES

- Hydrazine APU starter development [AD-A131575] p 62 N84-11175

HYDROCARBON COMBUSTION

- Simple method for analysis of benzo(a)pyrene in exhaust particles from jet engine by high-performance liquid chromatography using extrulut extraction p 710 A84-38500
- Explosion and fire hazards in an oil-oxygen system -- of an airplane [FOA-C-20507-D1] p 282 N84-17159

HYDROCARBON FUELS

- Determination of the heat of combustion of reactive fuels by a calculation method p 614 A84-35761
- Alternative fuels use in a vehicular gas turbine p 615 N84-24741

HYDROCARBONS

- Turbine engine exhaust hydrocarbon analysis, tasks 1 and 2 [AD-A131522] p 61 N84-10074
- A statistical examination of the effect of composition on the freezing points of hydro-carbon mixtures [AD-A131000] p 77 N84-11321
- Influence of fuel chemical properties on gas turbine combustors p 538 N84-23634
- Degradation of jet fuel hydrocarbons by aquatic microbial communities [AD-A139791] p 616 N84-24822
- Development of accelerated fuel-engine qualification procedures [AD-A143845] p 976 N84-33406

HYDRODYNAMIC COEFFICIENTS

- Laminar-to-turbulent transition on a body of revolution with an extended favorable pressure gradient forebody p 720 A84-38368

HYDRODYNAMIC EQUATIONS

- The investigation of engines feed systems dynamic characteristics by hydrodynamic modelling method p 709 A84-38151
- A combined method for solving the direct problem of the hydrodynamics of the airfoil cascades of turbomachines p 1007 A84-48000

HYDRODYNAMICS

- Two-dimensional hydrodynamic characteristics of a bluff symmetrical fairing section p 830 A84-44629
- Atomization of liquid sheets in high pressure airflow [NASA-TM-83731] p 810 N84-30223

HYDROELASTICITY

- La Recherche Aérospatiale bimonthly bulletin, number 1983-3, 214/May-June [ESA-TT-822] p 322 N84-18014

HYDROFOILS

- Profile drag from laser-Doppler velocimeter measurement p 575 A84-34467
- Sidewall boundary layer corrections in subsonic, two-dimensional airfoil/hydrofoil testing [AIAA PAPER 84-1366] p 620 A84-35195
- Sidewall boundary layer corrections in subsonic, 2-dimensional airfoil-hydrofoil testing [AD-A144002] p 966 N84-33391

HYDROGEN EMBRITTLEMENT

- Development of fatigue and crack propagation design and analysis methodology in a corrosive environment for typical mechanically-fastened joints. Volume 2: State-of-the-art assessment [AD-A136415] p 385 N84-18692

HYDROGEN ENGINES

- Supersonic flow over a rearward facing step with transverse nonreacting hydrogen injection p 90 A84-13578
- Fuel control systems for hydrogen-fueled automotive combustion engines - A prognosis p 314 A84-22721
- A study of power characteristics and flow parameters in the channel of models with combustion p 534 A84-32159

HYDROGEN FUELS

- An assessment of the safety of hydrogen-fueled aircraft p 25 A84-11043
- Fuel control systems for hydrogen-fueled automotive combustion engines - A prognosis p 314 A84-22721
- Aerodynamic characteristics, including effect of body shape, of a Mach 6 aircraft concept [NASA-TP-2235] p 107 N84-13164
- Analysis of a topping-cycle, aircraft, gas-turbine-engine system which uses cryogenic fuel [NASA-TP-2294] p 455 N84-21549

HYDROGEN MASERS

- Precision oscillators and their role and performance in navigation systems p 40 A84-12456

HYDROGEN OXYGEN ENGINES

- Development of a supersonic turbine stage for the HM60 engine -- to improve Ariane Launch Vehicle performance [AIAA PAPER 84-1484] p 709 A84-36984

HYDROGEN OXYGEN FUEL CELLS

- Design of long-endurance unmanned airplanes incorporating solar and fuel cell propulsion [AIAA PAPER 84-1430] p 595 A84-35215

HYDROGRAPHY

- The use of satellite and aircraft SAR to detect and chart hazards to navigation [AD-A141658] p 812 N84-29296

HYDROLYSIS

- Interactions between F-111 fuselage fuel tank sealants. Part 1: Characterisation of polyester sealants and their hydrolytic degradation products [MRL-R-657-PT-1] p 617 N84-25828

HYDROMECHANICS

- Backup control for variable cycle engine [SAE PAPER 831475] p 450 A84-29454
- The 400-Hz aircraft power-generation systems: Advancing the baseline p 79 N84-10056
- The 400 Hz generators evolution, effects on installation arrangements p 132 N84-12186

HYDROMETEOROLOGY

- Clouds and flight safety -- Russian book p 587 A84-33525

HYDROPLANING

- High speed braking of an aircraft tire on grooved wet surfaces p 870 A84-44969
- Modified reflex-percussive grooves for runways [AD-A143569] p 909 N84-32400

HYGRAL PROPERTIES

- Effect of moisture on static and fatigue behavior of aramid composites p 374 A84-25193

HYGROSCOPICITY

- Environmental and high strain rate effects on composites for engine applications p 236 A84-17444

HYPERBARIC CHAMBERS

- Evaluation of a carbon dioxide scrubber in a 2-lock recompression chamber [AD-A141052] p 793 N84-28816
- Hyperbaric chamber equipment: A consolidated equipment list from selected multiple hyperbaric facilities [AD-A141702] p 793 N84-28820

HYPERBOLIC DIFFERENTIAL EQUATIONS

- Explicit second order splitting schemes for solving hyperbolic nonlinear problems: Theory and application to transonic flow [ESA-TT-768] p 252 N84-15855

HYPERSONIC AIRCRAFT

- Design study of a dual-cycle turbofan-ranjet engine for a hypersonic aircraft [AIAA PAPER 83-2484] p 58 A84-10572
- Certain problems of three-dimensional hypersonic flow p 152 A84-16918
- Analytical comparison of two wing structures for Mach 5 cruise airplanes p 429 A84-26958
- The shape of things to come p 974 A84-48553
- Aerodynamic characteristics, including effect of body shape, of a Mach 6 aircraft concept [NASA-TP-2235] p 107 N84-13164
- Development of a thermal and structural model for a NASTRAN finite-element analysis of a hypersonic wing test structure p 661 N84-26656

HYPERSONIC BOUNDARY LAYER

- Theory of similarity and the profile of the mean density distribution of hypersonic boundary layer p 645 A84-37906

- Radiative and convective heat transfer interactions in the three-dimensional compressible hypersonic turbulent layer on a sharp cone at an angle of attack p 744 A84-41165

- Studies of boundary layer transition and surface roughness effects in hypersonic flow [AD-A140803] p 662 N84-26670

HYPERSONIC FLOW

- Computation of flow past a hypersonic cruiser p 5 A84-10080
- A limiting case of a hypersonic flow of an ideal gas past a thin tapered airfoil p 92 A84-14273
- Hypersonic flow past a planar body in the regime of intense radiative heat transfer p 93 A84-14887
- Certain problems of three-dimensional hypersonic flow p 152 A84-16918
- Laminar boundary layer stability experiments on a cone at Mach 8. II - Blunt cone [AIAA PAPER 84-0006] p 172 A84-19227
- Hypersonic nonequilibrium gas flow past a low-aspect-ratio wing p 260 A84-19562
- Theory of hypersonic three-dimensional flow around a slender wing of arbitrary aspect ratio by an unsteady stream of relaxing gas p 264 A84-21120
- Three-dimensional hypersonic flow of a radiating gas past a wing p 264 A84-21131
- Hypersonic flow of a viscous gas at the surface of a blunt cone with strong injection near the blunt section p 264 A84-21133
- Viscous hypersonic flow over complex bodies at high angles of attack [AIAA PAPER 84-0015] p 265 A84-21279
- An evaluation of some collision models used for Monte Carlo calculations of diatomic rarefied hypersonic flows p 266 A84-21381
- Numerical solution of hypersonic flow near leading edge of flat plate p 329 A84-23903

SUBJECT INDEX

E-2C Passive detection system (PDS) nose radome anti-icing demonstration test program p 868 A84-44480

Progress toward the development of an aircraft icing analysis capability [NASA-TM-83562] p 410 N84-20490

First stage of equipment for aircraft Do 28 of DFVLR as a research aircraft for icing and first research results [DFVLR-FB-83-40] p 596 N84-24571

Measurement of local convective heat transfer coefficients of four ice accretion shapes [NASA-CR-174680] p 585 N84-25646

Aerospatiale's experience on helicopter flight in icing conditions [SNIAS-832-210-107] p 599 N84-25707

IDEAL FLUIDS

On the theory of thin airfoils in nonequilibrium ideal fluids p 403 A84-26591

Numerical fluid dynamics [AD-A135900] p 384 N84-18593

IDEAL GAS

Aerodynamic forces arising in the blade passages of turbomachine impellers p 16 A84-12172

A limiting case of a hypersonic flow of an ideal gas past a thin tapered airfoil p 92 A84-14273

An exact solution for the problem of the interaction of a wedge moving at supersonic velocity with the interface of two gases p 264 A84-21121

Computational models of the interaction between vortices and the permeable boundary of a subsonic flow region p 267 A84-21732

A numerical determination of the characteristics of supersonic air intakes on the basis of calculations of conical flows of an ideal gas p 842 A84-45744

IDENTIFYING

Integrated CNI (Communication Navigation and Identification) avionics and future standardization [AD-P003580] p 685 N84-31185

IFF SYSTEMS (IDENTIFICATION)

The full scale development of US Navy DTDMA JTIDS integrated communication - Navigation-identification terminals - Distributed Time Division Multiple Access Joint Tactical Information Distribution System p 39 A84-12441

Secondary radar systems p 111 A84-14300

System reconfiguration for functional fault tolerance in ICNIA - Integrated Communication Navigation and Identification Avionics terminal p 421 A84-26740

Integration of ICNIA into advanced high performance fighter aircraft p 214 N84-15059

F-15 AN/APG-63 radar case study report IDA/OSD R and M (Institute for Defense Analyses/Office of the Secretary of Defense Reliability and Maintainability) study [AD-A142071] p 777 N84-29873

IGNITERS

High energy igniters - The development of materials suitable for continuous ignition p 296 A84-20108

Combustion jet ignition p 133 N84-12188

IGNITION

Ignition of small particles behind shock waves p 471 A84-28378

The effect of oxygen concentration on ignition of fuel spray in low pressure air flow [ASME PAPER 84-GT-147] p 982 A84-46958

Combustion jet ignition p 133 N84-12188

Preliminary flight evaluation of F100 engine model derivative airstart capability in an F-15 airplane [NASA-TM-86031] p 781 N84-28792

IGNITION LIMITS

Analysis of the effect of oxygen addition on minimum ignition energy p 373 A84-24057

Preliminary correlation of fuel effects on ignitability for gas turbine engines [ASME PAPER 83-JPGC-GT-8] p 450 A84-28981

Combustor performance with alternative fuels p 692 A84-46412

IGNITION SYSTEMS

Experimental and theoretical study of combustion jet ignition [NASA-CR-168139] p 59 N84-10054

IL-62 AIRCRAFT

Analysis of the effectiveness of various diagnosis procedures for the assessment of the technical condition of the NK-9-4 engines p 356 A84-24750

Upgraded Yakutsk airport opens to IL-62 service p 72 N84-10006

ILLINOIS

Airport noise and land use compatibility at downstate Illinois airports [PB84-177377] p 708 N84-26716

ILLUMINATING

Which solution for the low-intensity lighting of aircraft? p 445 A84-28047

IMAGE CONVERTERS

A dual digital to video converter for avionics symbology and messages [AD-A138383] p 448 N84-21547

A dual digital to video converter and color video inserter for avionics symbology and messages [AD-A143772] p 979 N84-33408

IMAGE ENHANCEMENT

Two-dimensional spatial filtering for terrain correlation enhancement [AIAA PAPER 84-1884] p 855 A84-43437

IMAGE PROCESSING

The use of a multi-level quantiser in plot extraction - surveillance radar clutter processing p 35 A84-10839

Performance analysis of a target detection system using infrared imagery p 425 A84-27946

Digital scan conversion - for airborne radar display p 600 A84-36259

Image processing as an aid to navigation systems p 854 A84-43368

The IRIS workstation - Integrated Raster Imaging System p 1014 A84-46694

APC-102 imaging radar digital image quality study [NASA-CR-171738] p 317 N84-17435

Wake visualization [BU-282] p 581 N84-24542

Image generator architectures and features [AD-P003449] p 907 N84-32226

Photodigitizing procedures [AD-A143589] p 929 N84-32793

Array processor utilization in the computation of real-time images [ARL-SYS-TM-73] p 938 N84-33058

Autonomous surveillance in the visual spectral region p 1016 N84-34786

IMAGE RECONSTRUCTION

Experimental determination of the natural modes of swept-wing models using laser holographic interferometry p 619 A84-35022

IMAGE ROTATION

An inverse solution for component positioning using homogeneous coordinate transformations p 732 A84-37942

IMAGES

A laser image generation system for helicopter Nap-Of-the-Earth (NOE) flight training [AD-P003481] p 928 N84-32248

IMAGING TECHNIQUES

Millimeter wave radiometry p 477 A84-28446

Three-dimensional digitization of real world objects [SAE PAPER 831521] p 426 A84-29513

Investigation of transition from laminar to turbulent boundary layer flow by means of a thermal imaging system p 581 A84-36460

IMPACT

A triangulation technique for obtaining deflections of aircraft transparencies during bird impact testing [AD-P003220] p 723 N84-26633

IMPACT DAMAGE

Damage tolerant design demonstration - of transport aircraft for full scale wing boxes [AIAA PAPER 84-0847] p 555 A84-31628

Analytical and experimental investigation of bird impact on fan and compressor blading p 699 A84-37937

Certification problems for composite airplane structures p 824 A84-44975

Influence of adiabatic shear bands on the fatigue strength of a titanium alloy p 914 A84-46513

Comparison of toughened composite laminates using NASA standard damage tolerance tests p 802 N84-29972

IMPACT LOADS

Response of long shallow cylindrical panels to radial line loads [AIAA PAPER 84-0954] p 555 A84-31660

Elastic behaviour of composite structures under low velocity impact p 798 A84-42210

Vertical drop test of a transport fuselage center section including the wheel wells [NASA-TM-85706] p 142 N84-12531

Validation of the MAGNA (Materially and Geometrically Nonlinear Analysis) computer program for nonlinear finite element analysis of aircraft transparency bird impact [AD-P003229] p 723 N84-26642

MAGNA (Materially and Geometrically Nonlinear Analysis) computer simulation of bird impact on the F-15 aircraft canopy [AD-P003230] p 733 N84-26643

Parametric studies of the T-38 student windshield using the finite element of code MAGNA (Materially and Geometrically Nonlinear Analysis) [AD-P003232] p 723 N84-26645

Current problems and progress in transparency impact analysis [AD-P003233] p 724 N84-26646

IMPELLERS

Theoretical evaluation of the structural performance of Swedish fighter aircraft windshields subjected to bird impact [AD-P003235] p 673 N84-26648

IMPACT PREDICTION

A fixed-beam multilateration radar system for weapon impact scoring p 30 A84-10772

IMPACT RESISTANCE

An experimental method for determining the dynamic contact law p 475 A84-27426

New fireworthy composites for use in transportation vehicles p 472 A84-28873

Development of a bird impact resistant T-38 instructor's windshield p 975 A84-49579

Army helicopter crashworthiness p 184 N84-15090

Degradation of the bird impact resistance of polycarbonate [AD-P003193] p 711 N84-26606

Service-life induced failure of bird impact resistant windshields [AD-P003195] p 672 N84-26608

Current problems and progress in transparency impact analysis [AD-P003233] p 724 N84-26646

IMPACT STRENGTH

Experimental evaluation of the F-4 transparency support structure interface p 683 A84-38896

Composite materials response under low-velocity impact p 797 A84-40374

Effects of surface flaws on impact resistance of uncoated polycarbonate [AD-A141364] p 800 N84-28998

An approach for estimating the impact of carbon-reinforced plastic p 999 N84-34515

IMPACT TESTING MACHINES

A survey of biodynamic test devices and methods [AD-A142467] p 795 N84-29894

IMPACT TESTS

Performance of two load-limiting subfloor concepts in full-scale general aviation airplane crash tests [AIAA PAPER 84-2225] p 684 A84-39279

Composite materials response under low-velocity impact p 797 A84-40374

Crash performance of Al and fiber-reinforced-composite structural elements p 760 A84-42567

Ballistic testing of composite materials p 913 A84-43893

Aircraft transparency testing methodology and evaluation criteria. Part 2: Methodology development for improved durability [AD-A131928] p 122 N84-12157

Aircraft transparency testing methodology and evaluation criteria. Part 1: Test methods and information analysis [AD-A131927] p 122 N84-12158

Alternate T-38 transparency development. Part 4: Parametric studies [AD-A131904] p 122 N84-12159

Flightline thermal environment testing of F-111 transparencies [AD-A131642] p 123 N84-12163

New aircraft windshield applications using ion exchange glass [AD-P003187] p 711 N84-26600

T-38 student windshield birdproofing efforts utilizing metal and composite materials for aft arch reinforcement [AD-P003189] p 672 N84-26602

Investigations concerning improvements of the SAAB 37 windshield birdstrike resistance [AD-P003217] p 673 N84-26630

IMPACT TOLERANCES

Concepts for improving the damage tolerance of composite compression panels - aircraft structures [NASA-TM-85748] p 384 N84-18678

IMPAIRMENT

Statistical review of alcohol-involved aviation accidents [NTSB-SS-84-03] p 589 N84-25681

IMPEDANCE MATCHING

Coupling technique of rotor-fuselage dynamic analysis [ASME PAPER 83-DET-25] p 431 A84-29107

IMPELLERS

Aerodynamic forces arising in the blade passages of turbomachine impellers p 16 A84-12172

Axial feedback in supersonic compressor stages with constant and variable impeller geometry [DGLR PAPER 83-151] p 408 A84-29688

Experimental study of centrifugal impeller discharge flow in vaneless and vanned diffusers p 505 A84-31290

Vibration of impellers. V - Measurement of resonant vibratory stresses of an impeller and pressure distribution due to aerodynamic excitation p 558 A84-32764

Problems of failure analysis, taking into account the example of a destroyed axial-flow compressor p 722 A84-39498

T-700 blisk/impeller cutter life improvement program p 923 A84-46346

Performance characteristics of shrouded and unshrouded impellers of a centrifugal compressor [ASME PAPER 84-GT-46] p 1001 A84-46905

Flow in the inducer of a centrifugal compressor measured with a laser velocimeter [ASME PAPER 84-GT-74] p 1002 A84-46919

Flow in a centrifugal fan impeller at off-design conditions [ASME PAPER 84-GT-182] p 1005 A84-46983

An improved method for the prediction of centrifugal compressor rotational-tone noise [DE84-013345] p 930 N84-32842

IMPROVEMENT

Introduction to the airport improvement program [AD-A144558] p 994 N84-34454

IMPULSES

Model helicopter rotor high-speed impulsive noise: Measured acoustics and blade pressures [NASA-TM-85850] p 17 N84-10020

Helicopter impulsive noise: Theoretical and experimental status [NASA-TM-84390] p 394 N84-19050

IN-FLIGHT MONITORING

Analysis of gas turbine engine dynamic instabilities [AIAA PAPER 83-2694] p 59 A84-12307

Flight evaluation results for a digital electronic engine control in an F-15 airplane [AIAA PAPER 83-2703] p 59 A84-12310

Instrumentation for in-flight acoustic measurements in an engine intake [AIAA PAPER 83-2733] p 56 A84-12326

Thrust modeling - A simplified in-flight thrust and airflow prediction technique for flight test performance measurements [AIAA PAPER 83-2751] p 49 A84-12339

In-flight acoustic emission monitoring of a wing attachment component p 189 A84-15935

Effect of crack presence on in-flight airframe noises in a wing attachment component p 189 A84-15936

Feasibility of using longitudinal acceleration (Nx) for monitoring takeoff and stopping performance from the cockpit p 192 A84-16166

B-1B central integrated test system optimization p 209 A84-16608

Instrumentation and data processing for AFTI/F-16 flight testing p 194 A84-16690

Lockheed Airborne Data System advances test technology p 210 A84-16698

A flight study of tone radiation patterns generated by inlet rods in a small turbofan engine [AIAA PAPER 84-0499] p 253 A84-18132

In-flight measurement of engine power effects on the lift and drag characteristics of a high performance business jet [AIAA PAPER 84-0563] p 198 A84-18166

Multipath interference for in-flight antennas measurements p 188 A84-18240

VISTA - A modest proposal for a new fighter in-flight simulator [AIAA PAPER 84-0520] p 232 A84-19256

A performance monitoring system for helicopters p 295 A84-19614

Access to maintenance data via AIDS - Future aspects of the expanded AIDS - Aircraft Integrated Data System [MBB-UT-17-83-OE] p 295 A84-22860

Operational flight software techniques for on-aircraft testing and maintenance p 489 A84-26769

Compact, pulsed LDA for airborne and windtunnel applications p 478 A84-28730

Uncertainty methodology for in-flight thrust determination [SAE PAPER 831438] p 431 A84-29452

Application of in-flight thrust determination uncertainty [SAE PAPER 831439] p 432 A84-29453

Design of automated monitoring systems for on-board flight equipment - Russian book p 564 A84-30972

Rotating aerodynamic exciter [AAAF PAPER NT 83-22] p 526 A84-32490

United Kingdom military engine monitoring experience [AIAA PAPER 84-1409] p 603 A84-35207

Evaluation of benefits of the A-10/TF34 Turbine Engine Monitoring System Squadron Integration Program [AIAA PAPER 84-1414] p 603 A84-35208

Development of the Engine Condition Monitoring System for the HH-65A helicopter [AIAA PAPER 84-1411] p 605 A84-35666

B-1B - Designing for supportability p 677 A84-36796

CF6-80, condition monitoring - The engine manufacturer's involvement in data acquisition and analysis [AIAA PAPER 84-1412] p 697 A84-36976

Acoustic emission due to crack growth, crack face rubbing and structural noise in the CC-130 Hercules aircraft p 804 A84-40678

A comparison of fixed-base and in-flight longitudinal handling qualities simulations [AIAA PAPER 84-2104] p 788 A84-42375

Instrument failure detection and isolation in a system with variable plant parameters [AIAA PAPER 84-1856] p 934 A84-43420

An in flight investigation of pitch rate flight control systems and application of frequency domain and time domain predictive criteria [AIAA PAPER 84-1897] p 896 A84-43482

Direct measurement of in-flight thrust for aircraft engines p 889 A84-44457

An in-flight investigation of pilot-induced oscillation suppression filters during the fighter approach and landing task p 897 A84-44471

Operational aircraft performance evaluation - An approach to testing using a Head-Up Display system p 882 A84-44472

The theoretical bases of methods for the in-flight determination of the flight characteristics of aircraft: Application of similarity theory - Russian book p 874 A84-46050

Heat transfer in the nose section of axisymmetric objects under conditions of nonseparated and separated flows p 845 A84-46237

Experimental methods in flight for the measurement of control characteristics p 66 N84-10091

Safety recommendation A-84-7 p 588 N84-25674

Intelligent flight data recorder: A contribution to on-condition maintenance and optimization of operation p 691 N84-26568

Engine condition monitoring with aircraft integrated data systems on Lufthansa A310 p 691 N84-26571

First experience with ARINC 717 Aircraft Integrated Data Systems (AIDS) on Airbus 310 for maintenance support p 692 N84-26572

Failure Identification Module (FIM) for digital control systems - avionics p 692 N84-26573

Analysing redundant flight path data on two Airbus A-300 aircraft p 692 N84-26577

Performance validation of Sperry Flight Management Systems (FMS) p 693 N84-26580

Flight testing and real time data processing for development and integration of weapon systems p 877 N84-34415

INCIDENCE

Vane stagger angle and camber effects in fan noise generation p 779 A84-40833

An analytical method to calculate the flow field about blunt bodies of revolution at incidence in supersonic free stream flow [CSIR-NAIST-82/72] p 106 N84-13156

INCLUSIONS

The nature and origin of refractory inclusions in the Allende meteorite p 945 N84-33318

INCOHERENT SCATTERING

Optical gas temperature measurement in gas turbines [PNR-90174] p 536 N84-22572

INCOMPRESSIBLE BOUNDARY LAYER

Calculation of boundary layers and separation on a spheroid at incidence p 9 A84-10109

Separation jump and sudden stall over an ellipsoidal wing at incidence p 830 A84-44647

INCOMPRESSIBLE FLOW

A direct method for the solution of unsteady two-dimensional incompressible Navier-Stokes equations p 5 A84-10078

Global solution procedures for incompressible laminar flow with strong pressure interaction and separation p 5 A84-10079

Sail theory p 152 A84-16928

Prediction of vortex lift on interacting delta wings in incompressible flow [AIAA PAPER 84-0136] p 160 A84-17904

An incompressible Navier-Stokes flow solver in three-dimensional curvilinear coordinate systems using primitive variables [AIAA PAPER 84-0253] p 163 A84-17977

On the method of pseudo compressibility for numerically solving incompressible flows [AIAA PAPER 84-0252] p 262 A84-19889

Numerical prediction of deployment, initial fill, and inflation of parachute canopies [AIAA PAPER 84-0787] p 400 A84-26557

The unsteady wake behind slender lifting bodies in incompressible flow p 403 A84-26590

Modelling of an airfoil empirical flow field below and through dynamic stall p 576 A84-34832

An approximate analytical solution of incompressible potential flow around a circular cylinder between two parallel flat plates p 576 A84-35023

On the use of several compact methods for the study of unsteady incompressible viscous flow for outer problems. II p 620 A84-35327

A composite velocity procedure for the incompressible Navier-Stokes equations p 620 A84-35341

Boundary-layer calculations in the inverse mode for incompressible flows over infinite swept wings p 638 A84-36476

Prediction of vortex lift on interacting delta wings in incompressible flow p 646 A84-37927

A vectorized solution for incompressible flow [AIAA PAPER 84-1534] p 718 A84-37956

Compressor cascade optimization based on inverse boundary layer method and inverse cascade method. I - An inverse cascade method for incompressible two-dimensional potential flow p 653 A84-38081

The incompressible flow at the stagnation point of slender bodies p 752 A84-42478

Vortex-fitted potential solution compared with vortex-captured Euler solution for delta wing with leading-edge vortex separation [AIAA PAPER 84-2144] p 829 A84-44200

Vortex stability and breakdown - Survey and extension p 830 A84-44627

Hall effects on MHD free-convection flow past an accelerated vertical porous plate p 939 A84-45292

A numerical solution to the problem of flow past a plate with a jet flap of finite width for various Bernoulli numbers p 840 A84-45728

An analysis of flow past axisymmetric intakes at low velocities p 841 A84-45731

Fundamental studies on vortex flows p 949 A84-46763

On the theory of a two-shell parachute p 960 A84-47097

A combined method for solving the direct problem of the hydrodynamics of the airfoil cascades of turbomachines p 1007 A84-48000

An automatic adaptive numerical method for lifting surface theories p 962 A84-48132

Application of a new Navier-Stokes solver to three-dimensional jet flows p 963 A84-49113

The use of an adaptive grid in a solution of the Navier-Stokes equations for incompressible flow p 20 N84-11139

Stability of a pair of stationary vortices in the leeward side of a cylinder in a potential flowfield [AD-A131917] p 98 N84-12095

Computational vortex flow aerodynamics p 101 N84-12117

Simulation of turbulent flows with a point vortex method p 101 N84-12119

Steady and unsteady flow models for airfoils with spoiler p 104 N84-12136

Numerical modeling of turbulent flow in a channel [NASA-CR-168278] p 133 N84-13189

An application of the finite element method to the solution of low Reynolds number, incompressible flow around a Joukowski aerofoil, with emphasis on automatic generation of grids [AD-A133008] p 176 N84-14127

The linear vortex distribution using the alternative approach [NAIST-82/80] p 269 N84-16133

A modified, lifting line theory for wing-propeller interference [NASA-CR-173324] p 336 N84-18171

Reattachment of a three-dimensional, incompressible jet to an adjacent axisymmetric inclined surface [AD-A136288] p 383 N84-18584

Rotordynamic forces developed by labyrinth seals [AD-A136217] p 384 N84-18599

Calculation of the flow over a stalled airfoil p 509 N84-22531

Computation of viscous flows over airfoils, including separation, with a coupling approach [NASA-TM-77079] p 516 N84-23607

Unsteady laminar boundary-layer calculations on oscillating configurations including backflow. Part 2: Airfoil in high-amplitude pitching motion. Dynamic stall [NASA-TM-84319-PT-2] p 581 N84-24537

Compendium of US incompressible flow facilities [AD-A143550] p 993 N84-33424

Description and prediction of transition in two-dimensional, incompressible flow p 1009 N84-33758

INCOMPRESSIBLE FLUIDS

An asymptotic solution to the problem concerning flow of a viscous fluid near the axis of a vortex sheet p 404 A84-27056

INCONEL (TRADEMARK)

INFRARED RADAR

INFRARED RADAR

A CW CO₂ laser rangefinder/velocimeter using heterodyne detection p 591 A84-36232

INFRARED RADIATION

Theoretical and experimental study of infrared radiation from helicopters p 283 A84-19624

Black Hawk hover infrared suppressor subsystem p 767 A84-40788

Aircraft exhaust plume signature predictions for non-axisymmetric multiple engine installations p 537 N84-22627

INFRARED RADIOMETERS

Airborne infrared low level wind shear predictor [AIAA PAPER 84-0356] p 210 A84-18043

Wide dynamic range forward looking infrared set (WDRF) p 444 A84-27188

Airborne infrared low-altitude wind shear detection test p 979 A84-49091

INFRARED SCANNERS

Incorporating geometric and radiative effects into infrared scanning computer analysis p 469 A84-28641

Infra-red surveillance techniques for guided weapon systems p 622 A84-38288

INFRARED SIGNATURES

Theoretical and experimental study of infrared radiation from helicopters p 283 A84-19624

Helicopter infrared signature and countermeasure evaluation p 283 A84-19629

Three-dimensional target signature modeling p 856 A84-43887

INFRARED SPECTROPHOTOMETERS

FTIR analysis of aviation fuel deposits [NASA-TM-83773] p 998 N84-33608

INFRARED SPECTROSCOPY

Airborne far-infrared and submillimeter spectroscopy p 499 A84-29259

INFRARED SUPPRESSION

Aero-thermo activities for the development of a 'passive infrared suppressor' for helicopter use p 286 A84-19625

INFRARED TRACKING

The aircraft infrared measurements guide [AD-A132598] p 254 N84-14905

INGESTION (ENGINES)

Effects of water ingestion into jet engine [AIAA PAPER 84-0542] p 297 A84-21880

Thrust reverser exhaust plume reingestion model tests p 601 A84-34457

FOD (Foreign Object Damage) generation by aircraft tires — probability of engine ingestion and airfield surface movements [AD-A133319] p 205 N84-15148

Vortex lifted stone ingestion: The influence of stone diameter [BAE-KRS-N-GEN-276] p 673 N84-26676

INGOTS

Engineering property comparisons of Powder Metallurgy (PM) alloy X7901-T7E89 and Ingot Metallurgy (IM) alloy forgings [NLR-MEMO-SM-83-050-U] p 998 N84-33583

INHOMOGENEITY

An experimental investigation of gas jets in confined swirling air flow [NASA-CR-3832] p 988 N84-33412

INJECTION MOLDING

GTE sintered silicon nitride — for advanced heat engines [ASME PAPER 84-GT-228] p 996 A84-47008

Progress in net shape fabrication of alpha sic turbine components [ASME PAPER 84-GT-273] p 1006 A84-47036

INJURIES

Design and development of an automatically controlled variable-load energy absorber [AD-A142683] p 774 N84-29868

INKS

Fire-retardant decorative inks for aircraft interiors [NASA-TM-85876] p 378 N84-19475

INLET AIRFRAME CONFIGURATIONS

Review of inlet-airframe integration using Navier-Stokes computational fluid dynamics [AIAA PAPER 84-0119] p 160 A84-17892

Three-dimensional flow analysis of turboprop inlet and nacelle configurations [AIAA PAPER 84-0193] p 162 A84-17943

Experience in engine face, non-steady, flow measurements through a side and bottom engine air inlet duct p 538 N84-23600

INLET FLOW

Investigation of tangential blowing applied to a subsonic V/STOL inlet p 12 A84-11042

Buzz in axisymmetric supersonic inlet and its control p 16 A84-12042

Inlet flow distortion in turbomachinery - Comparison of theory and experiment in a transonic fan stage p 90 A84-13592

Mixed finite difference computation of external and internal transonic flow field of inlets p 150 A84-15914

Numerical investigation of unsteady inlet flow fields [AIAA PAPER 84-0031] p 156 A84-17838

Review of inlet-airframe integration using Navier-Stokes computational fluid dynamics [AIAA PAPER 84-0119] p 160 A84-17892

The application of a second generation low-order panel method - program 'Vasero' - to powerplant installation studies [AIAA PAPER 84-0122] p 196 A84-17895

Aerodynamic design of high contraction ratio, subsonic wind tunnel inlets [AIAA PAPER 84-0416] p 167 A84-18078

One-dimensional unsteady modeling of supersonic inlet unstart/restart [AIAA PAPER 84-0439] p 168 A84-18094

A flight study of tone radiation patterns generated by inlet rods in a small turbofan engine [AIAA PAPER 84-0499] p 253 A84-18132

Numerical simulation of unsteady supersonic injection into an incoming flow p 172 A84-19005

Calculation of transonic inlet flows p 263 A84-20839

Experimental determination of the boundary layer at air-sample inlet positions on the NASA CV 990 aircraft [AIAA PAPER 84-0028] p 265 A84-21282

Three-dimensional viscous design methodology for advanced technology aircraft supersonic inlet systems [AIAA PAPER 84-0194] p 265 A84-21290

An investigation of the flow in turbine cascades with off-design inlet angles. The pulsation characteristics of the flow p 268 A84-22001

An experimental study of high contraction ratio, subsonic wind tunnel inlets [AIAA PAPER 84-0618] p 368 A84-24199

An evaluation of the effect of the circumferential inhomogeneity of the total pressure field of the inlet flow on the parameters of an axial-flow compressor p 332 A84-25565

Determination of total pressure losses in stepped annular diffusers with curved outer walls and a homogeneous inlet velocity field p 357 A84-25568

Two-dimensional wake characteristics of inlet vanes for open-circuit wind tunnels [AIAA PAPER 84-0604] p 369 A84-25729

Numerical simulation of two-dimensional inlet flowfields p 404 A84-26954

Forced oscillation experiments in supercritical diffuser flows p 405 A84-27130

Analysis and calculation of vibration response induced by inflow distortion in the first-stage compressor blading of turbo-engine p 533 A84-31784

A study on the between-stage flow pattern of an axial-flow compressor with inlet distortion - Calculation method for and experimental research on inlet distortion transmission p 578 A84-35018

Numerical simulation of flow through inlets/diffusers with terminal shocks [AIAA PAPER 84-1382] p 577 A84-35192

Steady and unsteady distorted inlet flow simulation for engine ground tests [AIAA PAPER 84-1490] p 577 A84-35234

Performance prediction of high-inlet-blockage diffusers p 638 A84-36477

Tests of wall blowing concepts for diffuser boundary layer control [AIAA PAPER 84-1276] p 642 A84-37217

Response of an axial compressor to distorted inlet flow [ONERA, TP NO. 1984-13] p 717 A84-37532

Dynamic response of shock waves in transonic diffuser and supersonic inlet - An analysis with the Navier-Stokes equations and adaptive grid [AIAA PAPER 84-1609] p 650 A84-38004

Effects of small-scale, high intensity inlet turbulence on flow in a two-dimensional diffuser p 654 A84-38360

Three-dimensional flow simulations for supersonic mixed-compression inlets at incidence. p 655 A84-38828

LDV measurements of three-dimensional flow development in a curved rectangular duct with inlet shear profile p 657 A84-38898

Efficiency of a top-mounted inlet system at transonic/supersonic speeds p 833 A84-44980

Inlet distortion and compressor behaviour p 838 A84-45037

Theoretical analysis of diffuser performance with axial flow and swirling flow p 836 A84-45039

Experimental studies on subcritical intake flows p 838 A84-45040

A study of the spatial flow and aerodynamic characteristics of two-dimensional intakes with various inlet shapes and lateral surface dimensions p 842 A84-45745

Rotating stall caused by pressure surface flow separation on centrifugal fan blades [ASME PAPER 84-GT-35] p 951 A84-46899

Further data on the performance of a rectangular diffuser in distorted inlet flows p 952 A84-46911

Flow in the inducer of a centrifugal compressor measured with a laser velocimeter [ASME PAPER 84-GT-74] p 1002 A84-46919

Inlet boundary layer effects in an axial compressor rotor. I Blade-to-blade effects [ASME PAPER 84-GT-84] p 953 A84-46926

Inlet boundary layer effects in an axial compressor rotor. II - Throughflow effects [ASME PAPER 84-GT-85] p 953 A84-46927

A design approach for a practical turbojet engine combustor diffuser system [ASME PAPER 84-GT-104] p 981 A84-46942

Surface static pressures in an inlet vortex flow field [ASME PAPER 84-GT-201] p 955 A84-46996

Mass flow limitation of supersonic blade rows due to leading edge blockage [ASME PAPER 84-GT-233] p 956 A84-47013

Numerical simulation of near-critical and unsteady, subcritical inlet flow p 962 A84-48131

A computer program for the calculation of three-dimensional transonic nacelle/inlet flowfields [NASA-CR-166528] p 106 N84-13159

Three-dimensional viscous design methodology for advanced technology aircraft supersonic inlet systems [NASA-TM-83558] p 134 N84-13190

Inlet flow field investigation. Part 1: Transonic flow field survey [NASA-CR-172239] p 178 N84-15123

Broad specification fuels combustion technology program [NASA-CR-168179] p 237 N84-15283

Theoretical and experimental engine-inlet flow fields for fighter forebodies [NASA-TP-2270] p 273 N84-17132

Multi-ducted inlet combustor research and development [AD-A135906] p 359 N84-18205

Inlet flowfield investigation. Part 2: Computation of the flow about a supercruise forebody at supersonic speeds [NASA-CR-172315] p 413 N84-21516

An experimental and analytic study of the flow subsonic wind tunnel inlets [AD-A138885] p 511 N84-22540

Numerical analysis of an unsteady shock in an inlet diffuser p 512 N84-22688

Turbulent diffuser flow studies related to the design of the ETW diffuser p 562 N84-23572

Disturbances from ventilated tunnel walls in aerofoil testing p 514 N84-23573

Experience in engine face, non-steady, flow measurements through a side and bottom engine air inlet duct p 538 N84-23600

V/STOL model fan stage rig design report [NASA-CR-174688] p 538 N84-23629

Introduction to unsteady flow in turbomachines p 625 N84-25962

High speed ejectors [AD-A141562] p 701 N84-27741

INLET NOZZLES

Turbulent diffuser flow studies related to the design of the ETW diffuser p 562 N84-23572

INLET PRESSURE

Effect of a shear layer on stability of an axisymmetric external compression air intake p 330 A84-23908

Improved statistical analysis method for prediction of maximum inlet distortion [AIAA PAPER 84-1274] p 639 A84-36968

Theoretical and experimental determination of the transfer function of a compressor [ASME PAPER 84-GT-283] p 985 A84-47042

Interaction between a pseudo-shock and an obstacle p 959 A84-47073

V/STOL model fan stage rig design report [NASA-CR-174688] p 538 N84-23629

INLET TEMPERATURE

Effect of new blade cooling system with minimized gas temperature dilution on gas turbine performance [ASME PAPER 84-GT-89] p 1002 A84-46931

INPUT/OUTPUT ROUTINES

Aerodynamic heating computations for projectiles. Volume 3: BRL interactive plotting program (BRUNPLOT) [AD-A143254] p 850 N84-32361

INSECTS

The role of airfoil geometry in minimizing the effect of insect contamination of laminar flow sections
[AIAA PAPER 84-2170] p 828 A84-44199
A fundamental approach to the sticking of insect residues to aircraft wings
[NASA-CR-173721] p 688 N84-27717

INSPECTION

Near real-time automated inspection and evaluation system (AIES) --- of graphite structures in aircraft
p 477 A84-28501
Advanced gearbox health monitoring techniques
p 531 A84-31310
Development and applications of fast-sensitive magnetic rubber inspection formulations p 720 A84-38111
The Integrated Blade Inspection System (IBIS) - Program review and status p 922 A84-46345
Preventive maintenance intervals for components of the F-15/F100 aircraft engine
[AD-A135637] p 328 N84-18156
Swedish Air Force maintenance programme for aged transparent enclosures for jet trainer and jet fighter aircraft
[AD-P003208] p 637 N84-26621
Safety study: Airport certification and operations
[PB84-917002] p 760 N84-28761
Notice for airmen, part 2. Index of approved aeronautical engineering operations and of independent inspectors according to paragraph 33 of test procedures for aeronautical appliances
[NFL-II-39/84] p 948 N84-34395

INSTALLING

Making the digital cockpit operational in general aviation aircraft p 440 A84-26734
F3 standardization - Does it work? --- form-fit-function for avionics p 444 A84-26806
Installation of electric generators on turbine engines
p 60 N84-10061
Proposed MIL-STD for avionics installation interfaces
[AD-P003578] p 885 N84-31183

INSTRUCTORS

Flight simulator instructor stations - Controlling the training problem p 71 A84-11920
Handbook for parachute instructors --- Russian book p 968 A84-47349
Device 2E6 (ACMS) Air Combat Maneuvering Simulator instructor console review
[AD-A138972] p 544 N84-22587
Concurrency of design criteria: A key to trainer readiness
[AD-P003454] p 907 N84-32231

INSTRUMENT APPROACH

New ICAO obstacle clearance requirements p 278 A84-20077
Tunnel display for four-dimensional fixed-wing aircraft approaches p 531 A84-32716
Automatic helical rotorcraft descent and landing using a microwave landing system p 860 A84-45576
Aircraft accident report: Eastern Air Lines, Inc., Boeing 727-225, N8838E, Raleigh, North Carolina, November 12, 1975
[PB83-910406] p 419 N84-20500

INSTRUMENT COMPENSATION

Real time gyro error compensation in strapdown systems p 861 A84-45952

INSTRUMENT ERRORS

DME/P - The new international standard p 39 A84-12431
Precision oscillators and their role and performance in navigation systems p 40 A84-12456
Recognition of measurement errors in DME by estimation of impulse parameters p 284 A84-22598
System considerations for the new DME/P international standard --- precision Distance Measuring Equipment
p 425 A84-27944
New digital-RF technology aids airborne weather radar
p 519 A84-31167
Further development of the DPS technique for precision DME --- Double Pulse Shaping p 520 A84-32334
Precision distance measuring equipment for the microwave landing system p 521 A84-32340
An on-line realization for precise wind vector measurements on board the DO 28 research aircraft
p 932 A84-45065
The effect of gyro random walk on the navigation performance of a strapdown inertial navigator
p 861 A84-45932
Application of estimation techniques for the evaluation of sensor errors from flight tests with the experimental strapdown system of DFVLR p 861 A84-45951
Real time gyro error compensation in strapdown systems p 861 A84-45952
GPS/INS integration for range instrumentation p 969 A84-46642
The accuracy of altimetric surfaces p 1012 A84-46814

Flight tests for a strapdown system (MSS): The results of a special flight test
[ESA-TT-818] p 115 N84-12153
CONUS Loran-C error budget: Flight test
[AD-A139871] p 592 N84-24568

INSTRUMENT FLIGHT RULES

Control and display requirements for single pilot IFR
[AIAA PAPER 84-2240] p 691 A84-39283
Ground-simulation investigation of VTOL instrument flight rules airworthiness criteria
[AIAA PAPER 84-2105] p 760 A84-42353
Benign IMC p 852 A84-44739
Controls, Displays, and Information Transfer for General Aviation IFR Operations
[NASA-CP-2279] p 86 N84-12029
Single pilot IFR program overview and status p 86 N84-12030
Single pilot IFR accident data analysis p 109 N84-12031
Study to determine the IFR operational profile and problems to the general aviation pilot p 109 N84-12032

Analysis of general aviation single-pilot IFR incident data obtained from the NASA Aviation Safety Reporting System p 109 N84-12033
A summary and integration of research concerning single pilot IFR operational problems p 109 N84-12034
General aviation single pilot IFR autopilot study p 136 N84-12035
Flight test validation of a design procedure for digital autopilots p 136 N84-12036
A simulator evaluation of an automatic terminal approach system p 114 N84-12037
Pilot controls and SPIRF flight p 136 N84-12038
Advanced symbology for general aviation approach to landing displays p 125 N84-12039
Aircraft accident report - A. E. Staley Manufacturing Company, Inc., Canadair Challenger CL-600, N805C, Hailey, Idaho, January 3, 1983
[PB83-910405] p 110 N84-13169
Evaluation of the effects of lateral and longitudinal aperiodic modes on helicopter instrument flight handling qualities p 201 N84-14135
Conceptual design and simulator implementation of an automatic terminal approach system
[NASA-TM-85867] p 305 N84-16215
Single-pilot IFR flights and operations
[SNIAS-832-210-103] p 630 N84-26374
FAA (Federal Aviation Administration) air traffic activity FY 1983
[AD-A142493] p 766 N84-29861

INSTRUMENT LANDING SYSTEMS

Investigation of a Microwave Scanning Beam Landing System azimuth error source --- in Space Shuttle autoland guidance p 113 A84-15647
System 4000 navigation aids p 520 A84-32329
Hardware and software structures for System 4000 navigation aids p 520 A84-32330
Simulator evaluation of a remotely piloted vehicle lateral landing task using a visual display
[AIAA PAPER 84-2095] p 771 A84-42348
A simulator evaluation of a rate-enhanced instrument landing system display p 125 N84-12042
A comparison of two position estimate algorithms that use ILS localizer and DME information. Simulation and flight test results
[NASA-TP-2281] p 285 N84-17165
Engineering and technical services to improve reliability and maintainability of instrument landing system components
[DOT/FAA/PM-84/7] p 427 N84-20503
Instrument landing system critical area studies
[AD-A138228] p 428 N84-21530
Evaluation of instrument landing system DDM (Difference in Depth of Modulation) calibration accuracies
[AD-A138301] p 428 N84-21533

INSTRUMENT ORIENTATION

Orientation and calibration of three-dimensional tachometer with aid of available angle data p 725 N84-26954

INSTRUMENT PACKAGES

Instrumentation and analysis of airborne pulse-Doppler radar trials p 30 A84-10773

INSTRUMENTS

ICIASF '83; International Congress on Instrumentation in Aerospace Simulation Facilities, Saint-Louis, Haut-Rhin, France, September 20, 1983, Record p 367 A84-25201

INSULATED STRUCTURES

Local charge distribution and development on insulating surfaces --- of fiber reinforced plastics and aluminum used for aircraft parts p 236 A84-18542

INTAKE SYSTEMS

An experimental study of high contraction ratio, subsonic wind tunnel inlets
[AIAA PAPER 84-0618] p 366 A84-24199
Analytical study of blowing boundary-layer control for subsonic V/STOL inlets
[NASA-TM-83576] p 270 N84-16141
An experimental and analytic study of the flow subsonic wind tunnel inlets
[AD-A138665] p 511 N84-22540
Air Force Academy Aeronautics Digest
[AD-A142399] p 741 N84-29849

INTEGRAL EQUATIONS

Note on the box method and the linear segment method in the integral equation of thin aerfoil theory p 151 A84-16830
Finite element method applied to solving the transonic integral equations of three dimensional thin wings p 333 A84-25862
Integral equations for lifting surfaces in unsteady flow p 334 A84-26368
Some new results for the integro-differential equation of jet-flap theory p 504 A84-30918
A method for computing the kernel of the downwash integral equation for arbitrary complex frequencies
[AIAA PAPER 84-0983] p 506 A84-31754
A new aerodynamic integral equation based on an acoustic formula in the time domain p 830 A84-44649
A lifting surface theory in rotational flow
[NASA-CR-172233] p 17 N84-10017
Numerical simulation of stalling flows by an integral equation method p 301 N84-16199
Computing the three dimensional boundary layer in a compressor p 301 N84-16200
Transonic viscous-inviscid interaction using Euler and inverse boundary-layer equations p 964 A84-33376

INTEGRATED CIRCUITS

A small integrated J band altimeter p 600 A84-36261

INTEGRATED ENERGY SYSTEMS

Super integrated power unit for fighter aircraft p 132 N84-12183
Integrated Computer-Aided Manufacturing (ICAM) architecture. Part 3, Volume 6: Composite information model of 'Manufacture product' (MFG1)
[AD-A143072] p 937 N84-31973

INTEGRITY

AGARD Highlights, March 1984
[AGARD-HIGHLIGHTS-84/1] p 399 N84-21498
An introduction to the avionics integrity program
[AD-P003565] p 884 N84-31170

INTELLIGENCE

The SCOUT system - A real time intelligence and surveillance system p 870 A84-44957
The feasibility, practicality and utility of P-3 inflight refueling
[AD-A143419] p 881 N84-32382

INTELLIGIBILITY

Voice communication and positive pressure breathing in noise
[AD-A141303] p 728 N84-27965
Narrowband (LPC-10) vocoder performance under combined effects of random bit errors and jet aircraft cabin noise
[AD-A141333] p 728 N84-27967

INTERACTIONAL AERODYNAMICS

Symposium on Numerical and Physical Aspects of Aerodynamic Flows, 2nd, California State University, Long Beach, CA, January 17-20, 1983, Proceedings p 4 A84-10076
The interaction between a steady laminar boundary layer and an oscillating flap - The condensed problem p 5 A84-10082
Numerical viscid-inviscid interaction in steady and unsteady flows
[ONERA, TP NO. 1983-8] p 6 A84-10087
Prediction of subsonic separation bubbles on airfoils by viscous-inviscid interaction p 7 A84-10094
Global PNS solutions for subsonic strong interaction flow over a cone-cylinder-boattail configuration --- Parabolized Navier-Stokes p 92 A84-14690
Method for calculating the aerodynamic characteristics of bodies on the basis of invariant relations of the theory of local interaction p 93 A84-14939
A comparison with theory of peak to peak sound level for a model helicopter rotor generating blade slap at low tip speeds p 94 A84-15201
A study of stresses on the surface of a plane obstacle in an underexpanded jet of a rarefied gas p 95 A84-15763
Computation of three-dimensional viscous flows on transonic wings by boundary layer-inviscid flow interaction p 95 A84-15854
The construction of models for supersonic jet flows p 152 A84-16910

- Numerical modeling of nonstationary supersonic jet flow over an obstacle p 152 A84-16913
- The modeling of stalled flows in the shock layer of obstacles in nonuniform flow p 152 A84-16916
- Effects of Mach number on upstream influence in sharp fin-induced shock wave turbulent boundary layer interaction [AIAA PAPER 84-0095] p 159 A84-17878
- Prediction of vortex lift on interacting delta wings in incompressible flow [AIAA PAPER 84-0138] p 160 A84-17904
- Subsonic/transonic prediction capabilities for nozzle/afterbody configurations [AIAA PAPER 84-0192] p 162 A84-17942
- A method for prediction of jet-induced loads on thrust-reversing aircraft [AIAA PAPER 84-0222] p 196 A84-17954
- Viscous/inviscid interaction analysis of separated trailing-edge flows [AIAA PAPER 84-0266] p 164 A84-17985
- Aerodynamics of aircraft after body - Numerical simulation [AIAA PAPER 84-0284] p 164 A84-17998
- A method for modeling finite-core vortices in wake-flow calculations [AIAA PAPER 84-0417] p 167 A84-18079
- The turbulent wake behind an axisymmetric body and its interaction with the external turbulence p 170 A84-18358
- Supersonic flow past a plate and a cylinder in the case of injection from a lateral surface p 171 A84-19003
- Flowfield scaling of a swept compression corner interaction A comparison of experiment and computation [AIAA PAPER 84-0096] p 173 A84-19232
- Pressure field induced on an airfoil by an unsteady flow p 261 A84-19623
- Advanced rotor analysis methods for the aerodynamics of vortex/blade interactions in hover p 261 A84-19657
- Disturbance of a planar turbulent wake by a compression shock p 263 A84-20841
- Interaction between a turbulent planar plate boundary layer and a planar cylinder wake p 264 A84-20843
- An exact solution for the problem of the interaction of a wedge moving at supersonic velocity with the interface of two gases p 264 A84-21121
- Numerical simulation of the interaction of a vortex with stationary airfoil in transonic flow [AIAA PAPER 84-0254] p 265 A84-21294
- Simulation of blunt-fin-induced shock wave and turbulent boundary-layer interaction [AIAA PAPER 84-0457] p 266 A84-21301
- Cylindrical and conical flow regimes of three-dimensional shock/boundary-layer interactions p 266 A84-21505
- Pulsations in the interaction of a supersonic jet with a cavity p 333 A84-25615
- The interaction between a boundary layer and supersonic flow around a body during a rapid local increase in the surface temperature of the body p 404 A84-27057
- Allowance for the effect of the finiteness of Mach numbers on regime coefficients in the theory of local interaction p 406 A84-28294
- Characteristics of the interaction of a supersonic jet above the critical pressure with a finite obstacle p 406 A84-28387
- Profile noise in turbulent flow p 495 A84-28812
- Comparison of model helicopter rotor primary and secondary blade/vortex interaction blade slip p 566 A84-30809
- An analysis of flow characteristics for the case of uniform injection of a homogeneous gas at the rear of a body p 506 A84-32156
- The method of successive approximations in calculating the interaction of a supersonic gas flow with a laminar boundary layer in the presence of a separation zone p 507 A84-32158
- Viscous-inviscid interactions on axisymmetric bodies of revolution in supersonic flow p 508 A84-32599
- A conditional-sampling study of the interaction of two turbulent wakes p 557 A84-32600
- Supersonic separated flow past a cylindrical obstacle on a flat plate p 508 A84-32606
- Computation of transonic flow around airfoils with trailing edge and shock/boundary layer interactions p 574 A84-34454
- Development of a fast response JI control system guided by analytical transient response computer modeling - Jet Interaction [AIAA PAPER 84-1252] p 708 A84-36965
- A study of wall turbulence in jet flow past an obstacle p 641 A84-37081
- Numerical treatment of the viscous interaction problem for blown transonic airfoils p 644 A84-37682

Airfoil computation at high angles of attack, inviscid and viscous phenomena [AIAA PAPER 84-0524] p 268 A84-21876
Design and implementation of a multigrid code for the Euler equations p 380 A84-24728
Numerical and approximate methods for computing steady inviscid supersonic flow over non-symmetrical body with angle of side slip p 334 A84-25993
The boundary layer induced by a convected two-dimensional vortex p 403 A84-26876
An analysis of flow characteristics for the case of uniform injection of a homogeneous gas at the rear of a body p 508 A84-32156
Viscous-inviscid interactions on axisymmetric bodies of revolution in supersonic flow p 508 A84-32599
Analysis of separated boundary-layer flows p 578 A84-35311
Computation of inviscid transonic internal flow p 578 A84-35317
Euler solutions as limit of infinite Reynolds number for separation flows and flows with vortices p 579 A84-35344
Numerical solution of the problem of supersonic flow past wings of arbitrary form with a detached shock wave p 579 A84-35351
Conservative calculations of non-isentropic transonic flows [AIAA PAPER 84-1182] p 643 A84-37630
A numerical computation for the inviscid supersonic flow around bent cone p 645 A84-37904
The engineering numerical technique for the determination of the inviscid flow field and heating rate on ballistic re-entry vehicles p 645 A84-37907
A survey of modern research in hypersonic aerodynamics [AIAA PAPER 84-1578] p 649 A84-37983
Efficient methods for predicting compressible inviscid flows [AIAA PAPER 84-1648] p 719 A84-38034
Analysis of inviscid and viscous flows in cascades with an explicit multiple-grid algorithm [AIAA PAPER 84-1663] p 652 A84-38043
Certain exact solutions to problems concerning flow past a profile near a rectilinear boundary (quasi-theoretical profiles) p 742 A84-39997
Supersonic conical separation due to shock vorticity p 743 A84-40830
New implicit boundary procedures - Theory and applications p 743 A84-40836
Inviscid transonic flow characteristics of sharp-edged rectangular wings [AIAA PAPER 84-2147] p 745 A84-41327

Analysis of stalled multi-element airfoils
[AIAA PAPER 84-2196] p 747 A84-41348

Viscous-inviscid simulation of upper surface blown configurations
[AIAA PAPER 84-2200] p 747 A84-41349

Prandtl-Batchelor flow past a flat plate with a forward-facing flap
[AD-A146324] p 749 A84-41808

Inviscid multiple zone calculations for supersonic tactical missiles
[AIAA PAPER 84-2099] p 752 A84-42374

Application of a quasi-3D inviscid flow and boundary layer analysis to the hub-shroud contouring of a radial turbine
[AIAA PAPER 84-1297] p 827 A84-44177

Vortex-fitted potential solution compared with vortex-captured Euler solution for delta wing with leading-edge vortex separation
[AIAA PAPER 84-2144] p 829 A84-44200

The prediction of separated flow using a viscous-inviscid interaction method p 832 A84-44962

Propellers in compressible flow p 834 A84-45005

Indicial aerodynamic coefficients for trapezoidal wings p 834 A84-45009

Multicomponent calculations of the aerodynamic characteristics of aircraft after-bodies p 837 A84-45053

A sub-domain approach for the computation of compressible inviscid flows
[ONERA, TP NO. 1984-61] p 919 A84-45202

Characteristics of flow past an air intake with a sharp cowl edge at Mach less than 1 p 839 A84-45705

Calculation of inviscid transonic flow past a wing-fuselage combination p 840 A84-45720

Computation of transonic flows in and about turbine cascades with viscous effects
[ASME PAPER 84-GT-18] p 950 A84-46885

Calculation of the three-dimensional, steady, inviscid flow in a transonic axial turbine stage
[ASME PAPER 84-GT-76] p 952 A84-46920

Flow in a centrifugal fan impeller at off-design conditions
[ASME PAPER 84-GT-182] p 1005 A84-46983

A theoretical model for rotating stall in the vaneless diffuser of a centrifugal compressor
[ASME PAPER 84-GT-204] p 955 A84-46997

Computation of secondary flows in an axial flow compressor including inviscid and viscous flow computation
[ASME PAPER 84-GT-244] p 957 A84-47021

Stability of a pair of stationary vortices in the leeward side of a cylinder in a potential flowfield
[AD-A131917] p 98 A84-12095

A viscous-inviscid interactive procedure for rotational flow in cascades of two dimensional airfoils of arbitrary shape
[NASA-CR-174609] p 105 A84-13149

Viscous Effects in Turbomachines
[AGARD-CP-351] p 300 A84-16188

Application of an inviscid-viscous interaction method to transonic compressor cascades p 300 A84-16190

A viscous inviscid interaction procedure for two dimensional cascades p 300 A84-16191

A modified lifting line theory for wing-propeller interference
[NASA-CR-173324] p 336 A84-18171

Entropy condition satisfying approximations for the full potential equations of transonic flow
[NASA-TM-85751] p 410 A84-20485

Progress toward the development of an aircraft icing analysis capability
[NASA-TM-83562] p 410 A84-20490

Design of single component airfoils using an inverse boundary element method
[REPT-83-A2-SER-A] p 413 A84-21512

Analysis of inviscid and viscous flows in cascades with an explicit multiple-grid algorithm
[NASA-TM-83636] p 502 A84-22527

Calculation of the flow over a stalled airfoil p 509 A84-22531

ALESEP: A computer program for the analysis of airfoil leading edge separation bubbles
[NASA-CR-172310] p 510 A84-22537

Computation of viscous flows over airfoils, including separation, with a coupling approach
[NASA-TM-77079] p 516 A84-23607

An algorithm for the prediction of unsteady potential flow about an arbitrary aerofoil
[GU-AERO-8306] p 582 A84-24553

Application of a quasi-3D inviscid flow and boundary layer analysis to the hub-shroud contouring of a radial turbine
[NASA-TM-83669] p 585 A84-25647

A theoretical analysis of the aerodynamic and structural forces associated with a ribbon parachute canopy in steady descent p 587 A84-25671

A quasi-simultaneous calculation method for strongly interacting viscous flow around an infinite swept wing
[NLR-MP-83001-U] p 663 A84-26672

Theoretical modelling of three-dimensional vortex flows in aerodynamics
[AD-A134966] p 726 A84-27007

Simulation of transonic separated airfoil flow by finite difference viscous-inviscid interaction
[NASA-TM-85980] p 850 A84-32358

Unsteady viscous-inviscid interaction procedures for transonic airfoil flows
[AD-A143764] p 966 A84-33390

IODINE
Flowfield measurements in a model scramjet combustion using laser-induced iodine fluorescence
[NASA-CR-175399] p 338 A84-19283

ION IMPLANTATION
The use of novel processing procedures for improving the overall fatigue resistance of high strength aluminum alloys
[AD-A141107] p 800 A84-28966

IONIZATION
Three-dimensional nonequilibrium viscous shock-layer flows over complex reentry vehicles p 511 A84-22543

IONOSPHERIC PROPAGATION
Evaluation of the ionospheric refraction correction algorithm for single-frequency Doppler navigation using TRANET-II data p 38 A84-12429

IPAD
Development of Integrated Programs for Aerospace-vehicle Design (IPAD). IPAD user requirements: Implementation (first-level IPAD)
[NASA-CR-182713] p 772 A84-28776

IRON
Regulation of mechanical characteristic of iron-powder electromagnetic brake p 925 A84-31444

IRON ALLOYS
Status of understanding for gear materials p 623 A84-25061

Aircraft landing dynamics facility carriage weld test program
[NASA-TM-85802] p 930 A84-32827

IRRADIATION
Effects of temperature and pressure on the photochemical reactivity of a representative aviation fuel p 797 A84-40250

ISENTROPIC PROCESSES
Two types of swirling gas flows p 93 A84-14929

ISOSTATIC PRESSURE
Progress on hot isostatic pressing of titanium p 233 A84-17133

Hot isostatic pressing of aluminum castings p 235 A84-17195

ISOTROPIC TURBULENCE
A spatial model of wind shear and turbulence for flight simulation
[NASA-TP-2313] p 564 A84-24044

ISOTROPY
Refined methods of aeroelastic analysis and optimization — swept wings, propeller theory, and subsonic flutter
[NASA-CR-173967] p 1010 A84-33835

ITERATION
An inverse coupling algorithm for modelling a shock wave-boundary layer interaction p 154 A84-17596

A lifting surface computer code with jet-in-crossflow interference effects. Volume 1: Theoretical description
[NASA-CR-186524] p 271 A84-16147

Use of adaptive walls in 2D tests
[NASA-TM-77380] p 371 A84-19359

A short note on recent advances in the adaptive wall technique for 3D-model tests at the TU-Berlin p 514 A84-23571

A numerical analysis for blade tip loadings on a thick bladed hovering helicopter rotor p 661 A84-26658

Method of calculating strong viscous interaction at delta wing p 664 A84-26918

Flux-vector splitting and Runge-Kutta methods for the Euler equations
[NASA-CR-172415] p 937 A84-31993

Multiple grid methods for equations of the second kind with applications in fluid mechanics
[MATH-CENTRE-TRACTS-163] p 937 A84-32018

ITERATIVE SOLUTION
Wind tunnel wall corrections deduced by iterating from measured wall static pressure p 138 A84-13573

A new method of boundary layer correction in the design of supersonic wind tunnel nozzle
[AIAA PAPER 84-0171] p 162 A84-17929

The stream-line iteration method for computing the two-dimensional transonic flow in orthogonal stream-line coordinates p 334 A84-25990

An iterative procedure for three-dimensional transonic wing design by the integral equation method
[AIAA PAPER 84-2155] p 745 A84-41332

A general iterative method to design Karman-Trefftz and Joukowski airfoils p 826 A84-43339

Design of highly loaded blade profiles using an iterative inverse-direct computational procedure
[ASME PAPER 84-GT-22] p 950 A84-46887

Specification for a Program for an Interactive Aeroelastic Solution (PIAS)
[NASA-CR-172200] p 105 A84-13153

Multigrid methods for boundary integral equations
[NLR-MP-82059-U] p 392 A84-19011

J

JAGUAR AIRCRAFT
The fly-by-wire Jaguar p 193 A84-16169

Fly-by-wire Jaguar p 457 A84-28020

Fly-by-wire British style p 989 A84-48517

Certification experience of the Jaguar fly-by-wire demonstrator aircraft integrated flight control system p 229 A84-15095

JAMMERS
Airborne Self Protection Jammer - ASPJ/ALQ-165 p 592 A84-36266

Expendable jammers prove indispensable p 970 A84-49194

JAMMING
Generic tracking radar simulator p 32 A84-10789

Tracking radar electronic counter-countermeasures against inverse gain jammers p 34 A84-10830

Automatic detectors for frequency-agile radar p 34 A84-10832

Airborne radar jamming system p 426 A84-28826

Simulation study of an airborne antenna beamforming algorithm using orthogonal perturbation sequences p 764 A84-42380

Radio frequency distribution assembly
[AD-A143575] p 928 A84-32658

JAPAN
Aircraft accident investigation procedures in Japan p 417 A84-27410

National Aerospace Laboratory, 1982 p 792 A84-28813

Flight service evaluation of two aluminum-brazed titanium spoilers
[NASA-CR-172371] p 915 A84-31343

JET AIRCRAFT
The M.C.A.-method, a flight test technique to determine thrust of jet aircraft in flight — Mass Consumption-Acceleration
[AIAA PAPER 83-2749] p 49 A84-12337

Aerodynamics of aircraft after body - Numerical simulation
[AIAA PAPER 84-0284] p 164 A84-17998

A large-scale investigation of V/STOL ground effects
[AIAA PAPER 84-0336] p 166 A84-18029

In-flight measurement of engine power effects on the lift and drag characteristics of a high performance business jet
[AIAA PAPER 84-0563] p 198 A84-18166

Beyond V1 - The dangers of high speed aborted take-offs p 278 A84-20081

Fast jet aircrew safety - A challenge to industry p 278 A84-20106

An example of innovation - Large American jet transports — historical overview
[ASME PAPER 83-WA/TS-4] p 532 A84-30651

Twin engine commercial operations p 672 A84-39710

An-32 transportation aircraft, USSR
[AD-A131013] p 51 A84-10050

Acta Aeronautica et Astronautica Sinica (selected articles)
[AD-A137150] p 399 A84-20475

Application of near-term technology to a Mach 2.0 variable-sweep-wing, supersonic-cruise executive jet
[NASA-CR-172321] p 529 A84-23621

Requirements, applications, and results of strapdown inertial technology to commercial airplanes p 593 A84-25695

Windshield problems on UK operated transport sized jet aircraft 1976 to 1982
[AD-P003228] p 686 A84-26641

Minimum-fuel, 3-dimensional flightpath guidance of transfer jets
[NASA-TP-2326] p 903 A84-32394

JET AIRCRAFT NOISE
Effects of airplane flight speed on the turbulence and noise generation in jets p 144 A84-15858

The stability of an elliptic jet
[AIAA PAPER 84-0068] p 157 A84-17857

Shear layer development in an annular jet
[AIAA PAPER 84-0400] p 166 A84-18068

Controlled suppression or amplification of turbulent jet noise

An investigation of the interaction between multiple dilution jets and combustion products p 616 N84-24758
Dilution jets in accelerated cross flows [NASA-CR-174717] p 782 N84-28794
Real jet effects on dual jets in a crossflow [NASA-CR-173817] p 808 N84-29161
A theoretical and experimental study of turbulent nonevaporating sprays [NASA-CR-174668] p 783 N84-29877
Investigation of parameters influencing the deflection of a thick wall jet by a thin wall jet coflowing over a rounded corner [AD-A142773] p 848 N84-31099
Control of jet flowfield dynamics [AD-A143631] p 1009 N84-33750
- JET IMPINGEMENT**
The construction of models for supersonic jet flows p 152 N84-16910
Characteristics of the interaction of a supersonic jet above the critical pressure with a finite obstacle p 406 N84-28367
Entrainment effects on impingement heat transfer. I. Measurements of heated jet velocity and temperature distributions, and recovery temperatures on target surface [ASME PAPER 83-HT-8] p 479 N84-29078
A study of wall turbulence in jet flow past an obstacle p 641 N84-37081
Numerical solutions for flow and heat transfer of a plane turbulent oblique impinging jet p 804 N84-40667
Effect of nonuniform geometries on flow distributions and heat transfer characteristics for arrays of impinging jets [ASME PAPER 84-GT-156] p 1004 N84-46963
Impingement starting and power boosting of small gas turbines [ASME PAPER 84-GT-188] p 982 N84-46987
Energy losses in multirow jet cooling of the leading edge of turbine blades p 986 N84-47558
Forces caused by the radial out-flow between parallel disks p 1008 N84-49190
Numerical modeling of normal turbulent plane jet impingement on solid wall p 1008 N84-49440
Reattachment of a three-dimensional, incompressible jet to an adjacent axisymmetric inclined surface [AD-A136288] p 383 N84-18584
- JET MIXING FLOW**
Jet trajectories and surface pressures induced on a body of revolution with various dual jet configurations p 12 N84-11049
Interaction region of a two-dimensional turbulent plane jet in still air p 171 N84-18359
Conditions of the mixing of transverse CO₂ jets with a supersonic nitrogen flow in a nozzle p 171 N84-18996
Selecting exhaust mixers for turbofan engines p 358 N84-25579
Investigation of mixing in a turbofan exhaust duct. II. Computer code application and verification p 448 N84-27140
The effect of initial outflow conditions on the aeroacoustic characteristics of a jet p 494 N84-28805
Analytical study of the thermal and fluid mechanical evolution of a cooling film injected from a single line of inclined round holes p 554 N84-31315
Preliminary investigation of a two-zone swirl flow combustor [AIAA PAPER 84-1169] p 695 N84-36951
A study of wall turbulence in jet flow past an obstacle p 641 N84-37081
Parabolized Navier-Stokes analysis of three-dimensional supersonic and subsonic jet mixing problems [AIAA PAPER 84-1525] p 646 N84-37951

An analytical model for the vorticity associated with a transverse jet p 652 A84-38042
 [AIAA PAPER 84-1662]
 Interactive phenomena in supersonic jet mixing problems. I Phenomenology and numerical modeling techniques p 656 A84-38832
 Jet, wake and wall jet similarity solutions using a k-epsilon turbulence model p 659 A84-39319
 [AIAA PAPER 84-1523]
 A one-dimensional theory for a supersonic gas ejector with an isobaric mixing chamber p 839 A84-45704
 An optimum gas ejector with an isobaric mixing chamber p 840 A84-45724
 The interaction of wall jets with incoming flow and with each other on a plane p 860 A84-47090
 Interactive phenomena in supersonic jet mixing problems. II Numerical studies p 962 A84-48135
 Experiments in dilution jet mixing p 1007 A84-48140
 Investigation of axisymmetric confined turbulent jet mixing in the near region with adverse pressure gradient p 104 A84-13148
 Preliminary investigation of a two-zone swirl flow combustor p 535 A84-22565
 [NASA-TM-83637]
 Mixing of swirling flows and behavior of wet flows [AD-A138697] p 559 A84-22915
 An investigation of the interaction between multiple dilution jets and combustion products p 616 A84-24758
 Effects of simulated flight on the structure and noise of underexpanded jets p 631 A84-25422
 [NASA-TP-2308]
 Multi-length scale turbulence models [AD-A140527] p 627 A84-25997
 Dilution jet mixing program p 700 A84-26702
 [NASA-CR-174624]
 Interaction of jet discharged from container, and opposing supersonic stream of rarefied gas p 664 A84-26917
 High speed ejectors p 701 A84-27741
 [AD-A141562]
 Dilution jets in accelerated cross flows [NASA-CR-174717] p 782 A84-28794
JET NOZZLES
 Supersonic jet screech tone cancellation p 82 A84-10136
 The stability of an elliptic jet p 157 A84-17857
 [AIAA PAPER 84-0068]
 Design of a supersonic Coanda jet nozzle p 165 A84-18026
 [AIAA PAPER 84-0333]
 The effect of the setting angle of jet-cooling nozzles on the temperature and stressed state of a turbine disk p 357 A84-25572
 A study of an underexpanded sonic jet issuing from a slot along a solid surface p 332 A84-25576
 On the propagation of sound in nozzles of strongly varying cross-section p 839 A84-45034
JET PROPULSION
 The wind tunnel simulation of propulsion jets and their modeling by congruent plumes including limits of applicability p 231 A84-17962
 [AIAA PAPER 84-0232]
 Advances in aerospace propulsion; Proceedings of the Aerospace Congress and Exposition, Long Beach, CA, October 3-6, 1983 p 450 A84-29451
 A design approach to integrated flight and propulsion control p 458 A84-29459
 [SAE PAPER 831482]
 The flying wing reconsidered p 683 A84-38486
 Numerical simulation of axisymmetric, base flow on tactical missiles with propulsive jet p 658 A84-39307
 [AIAA PAPER 84-1658]
 Propulsion control technology p 455 A84-20600
 Advanced prediction technique for the low speed aerodynamics of V/STOL aircraft. Volume 1: Technical discussion p 662 A84-26662
 [NASA-CR-166442-VOL-1]
 Advanced prediction technique for the low speed aerodynamics of V/STOL aircraft. Volume 2: User's manual p 662 A84-26663
 [NASA-CR-166442-VOL-2]
JET STREAMS (METEOROLOGY)
 Performance of a quantitative jet stream turbulence forecasting technique - The Specific CAT Risk (SCATR) index p 248 A84-17990
 [AIAA PAPER 84-0271]
JET THRUST
 Thrust modeling - A simplified in-flight thrust and airflow prediction technique for flight test performance measurements p 49 A84-12339
 [AIAA PAPER 83-2751]
 Progress towards a theory of jet-flap thrust recovery p 575 A84-34695
 Ground based testing without wind tunnels p 598 A84-25634

Aerodynamics of V/STOL aircraft: Performance assessment p 584 A84-25635
 Notes on special flight aspects, such as STO, ski-jump and ODM p 598 A84-25637
JETSTREAM AIRCRAFT
 The effects of wing tip devices on the performance of the BAe Jetstream p 103 A84-12130
JETTISON SYSTEMS
 Crash Position Indicator/Crash Survivable Flight Data Recorder ejectable versus nonejectable p 127 A84-13184
 [AD-A132329]
 The accelerated light model technique of store separation as developed and used at British Aerospace, Brough p 528 A84-23597
JOINTS (JUNCTIONS)
 Experimental study of the behavior of 3D-turbulent boundary layer in a simplified wing/body junction [AIAA PAPER 84-1529] p 647 A84-37954
 An approximate calculation of stress intensity factors in the joints of aircraft structures p 920 A84-45710
 Flow past wing-body junctions p 843 A84-46023
 The use of interference-fit bolts or bushes and hole cold expansion for increasing the fatigue life of thick-section aluminium alloy bolted joints p 384 A84-18676
 [AR-002-973]
 Optimized bolted joint p 484 A84-20859
 [NASA-CASE-LAR-13250-1]
 Economic riveting: Different bore qualities, fittings, connection elements p 561 A84-23560
 A rear engine without joints and pillows [MBB-UD-383-83-O] p 628 A84-26441
 Design of mechanical joints in composites p 727 A84-27038
 Mechanistic methodology for airport pavement design with engineering fabrics. Volume 1: Theoretical and experimental base [DOT/FAA/PM-84-9.1] p 993 A84-34450
JOUKOWSKI TRANSFORMATION
 Numerical study of incompressible slightly viscous flow past blunt bodies and airfoils p 331 A84-24737
 [AD-A138396]
 A general iterative method to design Karman-Trefftz and Joukowski airfoils p 826 A84-43339
JOURNAL BEARINGS
 The dynamical behaviour of externally pressurized gas-lubricated unloaded porous journal bearings p 383 A84-26374
 Stability of a rigid rotor supported by externally pressurized gas journal bearings with a circular slot restrictor p 558 A84-32765
 Improved compliant hydrodynamic fluid journal bearing [NASA-CASE-LEW-13670-1] p 560 A84-22959
 The Shock and Vibration Digest, volume 16, no. 7 [AD-A143958] p 926 A84-31679
JP-4 JET FUEL
 Decision recommendation board (DRB) report. Transition of shale JP-4 to the operational validation phase [AD-A144504] p 999 A84-34633
JP-5 JET FUEL
 Alternative fuel deposit formation p 615 A84-24735
 Liquid and solid phase compositions in a partially frozen JP-5 fuel low in n-alkanes p 916 A84-32553
 [AD-A143390]

K

KALMAN FILTERS
 A Kalman approach to improve angular resolution in search radars p 33 A84-10812
 Optimum estimation for accuracy of distance between mounting holes for aircraft equipment by Kalman filtering theory p 82 A84-12040
 A Kalman filter application for position estimation of an airborne relay vehicle in the precision location strike system p 208 A84-16564
 Kalman filter applications in highly maneuverable, intelligent target tracking p 238 A84-16579
 VLF data for aircraft navigation based on an extended Kalman filter design p 188 A84-18627
 A navigation algorithm using measurement-based extrapolation p 189 A84-19345
 A terrain-aided navigation system p 344 A84-23909
 Implementation of failure-detection systems with adaptive observers p 392 A84-25540
 Algorithm for the tracking of a maneuvering target in the case of measurement uncertainty p 425 A84-28061
 Target acceleration modeling for tactical missile guidance p 521 A84-32709
 Instrument failure detection and isolation in a system with variable plant parameters p 934 A84-43420
 [AIAA PAPER 84-1856]

Lectures of a Flight Mechanics Conference -- conferences
 [DFVLR-MITT-83-05] p 259 A84-16120
 Estimation of flight-mechanical motion characteristics with Kalman filters p 292 A84-16126
 Simulation and analysis of differential global positioning system for civil helicopter operations p 345 A84-19317
 [NASA-CR-166534]
 Advances in Strapdown Inertial Systems [AGARD-LS-133] p 593 A84-25691
 Development, set up and testing of a measuring system for components of the Derived Azimuth System (DAS) [BMFT-FB-W-84-005] p 766 A84-28773
 Sensor noise and Kalman filter for aided inertial navigation system [AD-A143360] p 863 A84-32372
 Air data position-error calibration using state reconstruction techniques p 887 A84-32384
 [NASA-TM-86029]
 Reference systems for the evaluation of dead-reckoning navigation equipment p 972 A84-34406
KARMAN VORTEX STREET
 Breakdown phenomenon of the Karman vortex street due to the natural convection p 719 A84-37964
 [AIAA PAPER 84-1547]
KELVIN-HELMHOLTZ INSTABILITY
 Feedback in separated flows over symmetric airfoils [NASA-TM-83758] p 847 A84-31091
KERNEL FUNCTIONS
 A method for computing the kernel of the downwash integral equation for arbitrary complex frequencies [AIAA PAPER 84-0983] p 506 A84-31754
 Generalization of the subsonic kernel function in the s-plane, with applications to flutter analysis [NASA-TP-2292] p 409 A84-20480
KEROSENE
 Anticling fuel additives and their effect on the properties of aviation kerosene p 308 A84-22326
 Feasibility of a full-scale degrader for antimisting kerosene p 548 A84-30807
 An assessment of the use of antimisting fuel in turbofan engines [NASA-CR-168081] p 76 A84-10332
 The relationship between electrical conductivity and temperature of aviation turbine fuels containing static dissipator additives [AD-A135751] p 375 A84-18421
 The effect of property changes on jet fuel producibility and cost p 551 A84-23632
KEVLAR (TRADEMARK)
 Effect of moisture on static and fatigue behavior of aramid composites p 374 A84-25193
 Kevlar parachute design and performance [AIAA PAPER 84-0810] p 416 A84-26574
 Flight service evaluation of composite components on Bell 206L and Sikorsky S-76 helicopters p 710 A84-36521
 Flight service evaluation of composite helicopter components p 864 A84-42750
 Kevlar epoxy substrate for interconnecting leadless chip carrier p 912 A84-42776
 Flight service evaluation of Kevlar-49 epoxy composite panels in wide-bodies commercial transport aircraft [NASA-CR-166065] p 75 A84-10188
 Preliminary results of the effects of sewing, packing and parachute deployment on material strength [DE84-006464] p 511 A84-22541
 Flight service evaluation of Kevlar-49 epoxy composite panels in wide-bodied commercial transport aircraft [NASA-CR-172344] p 914 A84-31287
KINEMATIC EQUATIONS
 A kinematic approach to unsteady viscous flows. p 833 A84-44983
KINEMATICS
 Kinematic precision of gear trains [ASME PAPER 82-WA/DE-34] p 238 A84-15951
 Aircraft hazard assessment from a clear-air radar and meteorological tower study of gravity wave events -- effect on airspace [PB83-257139] p 249 A84-14650
 Kinematics: influence functions and field quantities for disturbance propagation from moving disturbance sources [NASA-TM-77410] p 410 A84-20489
 Design and analysis of Coordinated Bank-To-Turn (CBTT) autopilots for Bank-To-Turn (BTT) missiles [AD-A140103] p 613 A84-24698
KINETIC ENERGY
 Nonlinear helicopter stability p 303 A84-19639
 Proposed arrangement to improve turboprop efficiency p 532 A84-30808
 Application of the kinetic energy calculation as an aid in mode identification p 388 A84-19888
 Energetics of vortex ring formation [AD-A138795] p 511 A84-22539

KINETIC EQUATIONS

KINETIC EQUATIONS

- A procedure for estimating the parameters of the kinetic equation of crack growth p 141 A84-13957
Airfoil heat transfer calculation using a low Reynolds number version of a two-equation turbulence model [ASME PAPER 84-GT-261] p 1005 A84-47032

KINETIC THEORY

- Kinetic-elastic approach for time-dependent rheological data on slurry fuels and polymers [AD-A141210] p 715 N84-27911

KINETICS

- Investigation of thermal coking rates of Air Force jet fuels [AD-A144421] p 999 N84-34631

KNUDSEN FLOW

- Flow and heat transfer around a heated circular cylinder in a rarefied gas p 554 A84-31119

KUTTA-JOUKOWSKI CONDITION

- Lifting aerofoil calculation using the boundary element method p 12 A84-11174
A source-equality Kutta condition for panel methods p 744 A84-40846
Aerodynamic sound due to a point source near a half-plane p 940 A84-46013

L

L-1011 AIRCRAFT

- The digital flight control and active control systems on the L-1011 p 456 A84-26745
Allowable response delay for large aircraft [AIAA PAPER 84-1917] p 895 A84-43453
Development of the L-1011 four-dimensional flight management system p 345 N84-18183
L-1011 testing with relaxed static stability p 463 N84-20591
Development of an advanced composite aileron for the L-1011 transport aircraft [NASA-CR-3517] p 714 N84-27836
Development and flight evaluation of an augmented stability active controls concept with a small horizontal tail [NASA-CR-165951] p 789 N84-28805
Residual-strength tests of L-1011 vertical fin components after 10 and 20 years of simulated flight service p 801 N84-29970
Flight service evaluation of Kevlar-49 epoxy composite panels in wide-bodied commercial transport aircraft [NASA-CR-172344] p 914 N84-31287
Development and flight evaluation of an augmented stability active controls concept with a small tail [NASA-CR-173880] p 903 N84-32395

LABORATORY EQUIPMENT

- X-ray wear metal monitor [AD-A131251] p 61 N84-10078
Studies of US universities' research equipment needs inconclusive [AD-A141784] p 793 N84-28821

LABYRINTH SEALS

- Prediction of stiffness and damping coefficients for centrifugal compressor labyrinth seals [ASME PAPER 84-GT-88] p 1002 A84-46928
Aeroelastic instabilities in labyrinth air seal systems [ASME PAPER 84-GT-169] p 1004 A84-46973
Validation of flow coefficients measurement by laser velocimeter in straight-through labyrinth seal models with full size test rig results [ASME PAPER 84-GT-280] p 1006 A84-47040

LAGRANGIAN EQUILIBRIUM POINTS

- Vibrational stabilization of the Lagrange top p 816 A84-42553

LAMINAR BOUNDARY LAYER

- The interaction between a steady laminar boundary layer and an oscillating flap - The condensed problem p 5 A84-10082
The boundary layer on an axisymmetric body with and without spin p 9 A84-10128
Cloud particle effects on laminar flow and instrumentation for their measurement aboard a NASA LFC aircraft [AIAA PAPER 83-2734] p 56 A84-12327
Calculation of the boundary layer of profiles for flows with laminar and turbulent zones p 92 A84-14264
Supersonic compressive ramp without laminar boundary-layer separation p 153 A84-17429
Laminar boundary layer stability experiments on a cone at Mach 8. II - Blunt cone [AIAA PAPER 84-0006] p 172 A84-19227
The calculation of the laminar boundary layer on a wing-like ellipsoid with incidence p 263 A84-20840
Technology developments for laminar boundary layer control on subsonic transport aircraft p 432 A84-29473
Fresh attack on laminar flow p 407 A84-29577

The method of successive approximations in calculating the interaction of a supersonic gas flow with a laminar boundary layer in the presence of a separation zone p 507 A84-32158

Viscous-inviscid interactions on axisymmetric bodies of revolution in supersonic flow p 508 A84-32599
Technology developments for laminar boundary layer control on subsonic transport aircraft p 527 A84-33137

Friction and heat transfer in laminar and turbulent boundary layers in the case of nonuniform supersonic flow past axisymmetric bodies p 580 A84-35730
Hybrid approach to steady transonic normal-shock compressible laminar boundary-layer interactions over airfoils [AIAA PAPER 84-1561] p 648 A84-37973
Laminar flow and transition on swept wings p 654 A84-38413

Numerical solution of Space Shuttle Orbiter flow field including real gas effects [AIAA PAPER 84-1747] p 659 A84-39367
Effects of nozzle design parameters on the extent of quiet test flow at Mach 3.5 p 742 A84-40025
Determination of the parameters of a boundary layer on a rotating axisymmetric cone p 752 A84-42526
Separation jump and sudden stall over an ellipsoidal wing at incidence p 830 A84-44647
The effect of gas compressibility on the characteristics of flow in the vicinity of the separation point of a laminar boundary layer p 841 A84-45738
Design integration of laminar flow control for transport aircraft p 874 A84-45964
Heat transfer in a laminar boundary layer of an absorbing, emitting, and scattering medium on a permeable plate p 922 A84-46236

A flight test of laminar flow control leading-edge systems [NASA-TM-85712] p 149 N84-14110
Interacting boundary-layer solutions for laminar separated flow past airfoils [NASA-CR-172287] p 270 N84-16140
Three dimensional/boundary layer interaction: Laminar and turbulent behaviour [AD-A137060] p 386 N84-19765
Interaction of aerodynamic noise with laminar boundary layers in supersonic wind tunnels [NASA-CR-3621] p 483 N84-20781
Natural laminar flow experiments on modern airplane surfaces [NASA-TP-2256] p 662 N84-26660
Aerodynamic design of the contoured wind-tunnel liner for the NASA supercritical, laminar-flow-control, swept-wing experiment [NASA-TP-2335] p 964 N84-33377
Laminar flow control - viscous simulation p 1010 N84-33764

LAMINAR FLOW

- Observations and implications of natural laminar flow on practical airplane surfaces p 92 A84-14727
Profile design for wings and propellers p 95 A84-15411
Analytical and experimental studies on natural laminar flow nacelles [AIAA PAPER 84-0034] p 156 A84-17639
A modified Trefftz method for fluid flow p 382 A84-25886
Fresh attack on laminar flow p 407 A84-29577
Supersonic separated flow past a cylindrical obstacle on a flat plate p 508 A84-32606
Numerical analysis of separated laminar viscous-gas flows in the case of supersonic flow past bodies with leading spikes p 580 A84-35735
Laminar interaction processes at variable-geometry wings in supersonic flow p 644 A84-37751
An assessment of numerical solutions of the compressible Navier-Stokes equations [AIAA PAPER 84-1549] p 719 A84-37966
A calculation of internal flows in a rotating fluid with curved streamlines of relative motion p 721 A84-38671
Natural laminar flow flight experiments on a swept-wing business jet [AIAA PAPER 84-2189] p 746 A84-41344
Progress in natural laminar flow research [AIAA PAPER 84-2222] p 807 A84-42617
The role of airfoil geometry in minimizing the effect of insect contamination of laminar flow sections [AIAA PAPER 84-2170] p 828 A84-44199
Flow past wing-body junctions p 843 A84-46023
Laminar separation from airfoils beyond trailing-edge stall [AIAA PAPER 84-1612] p 844 A84-46115
A simple method for solving three-dimensional inverse problems of turbomachine flow and the annular constraint condition [ASME PAPER 84-GT-198] p 954 A84-46994

SUBJECT INDEX

- Prediction of flow in rotating disc systems using the k-epsilon turbulence model [ASME PAPER 84-GT-229] p 956 A84-47009
The theory of transonic flow of a viscous gas past a corner p 958 A84-47063
Full-scale studies of the boundary layer structure p 1012 A84-47099
Goertler instability of compressible boundary layers p 962 A84-48127
Transonic airfoil development p 95 N84-12076
Predicting the onset of turbulence in the presence of a pressure gradient [AD-A136980] p 386 N84-19760
Design of single component airfoils using an inverse boundary element method [REPT-83-A2-SER-A] p 413 N84-21512
Energetics of vortex ring formation [AD-A138795] p 511 N84-22539
Transonic flow around protruding corner with free streamline p 513 N84-22796
Natural laminar flow experiments on modern airplane surfaces [NASA-TP-2256] p 662 N84-26660
Solution of 3-dimensional time-dependent viscous flows. Part 3: Application to turbulent and unsteady flows [NASA-CR-168565-PT-3] p 726 N84-27003
F-111 TACT natural laminar flow glove flight results p 687 N84-27662
Recent modifications and calibration of the Langley low-turbulence pressure tunnel [NASA-TP-2328] p 665 N84-27675
A preliminary design study on an acoustic muffler for the laminar flow transition research apparatus [NASA-CR-172374] p 756 N84-28748
Special Course on Stability and Transition of Laminar Flow [AGARD-R-709] p 1009 N84-33757
Laminar flow control - viscous simulation p 1010 N84-33764
- LAMINAR FLOW AIRFOILS**
Global solution procedures for incompressible laminar flow with strong pressure interaction and separation p 5 A84-10079
Geometries for roughness shapes in laminar flow [NASA-CASE-LAR-13255-1] p 97 N84-12092
Design of single component airfoils using an inverse boundary element method [REPT-83-A2-SER-A] p 413 N84-21512
- LAMINAR HEAT TRANSFER**
Heat transfer in a laminar boundary layer of an absorbing, emitting, and scattering medium on a permeable plate p 922 A84-46236
- LAMINAR WAKES**
Computational probing of hypersonic laminar wakes [AIAA PAPER 84-1579] p 660 A84-39424
Unsteady wake measurements of an oscillating flap at transonic speeds [AIAA PAPER 84-1563] p 844 A84-46112
- LAMINATES**
Basic failure mechanisms of laminated composites and related aircraft design implications p 75 A84-10453
Flight simulation behaviour of aramid reinforced aluminum laminates (ARALL) p 232 A84-16337
Preliminary evaluation of large area bonding processes for repair of graphite/polyimide composites p 235 A84-17202
Static and fatigue post-buckled behavior of composite shear panels in the ACAP design - Advanced Composite Airframe Program p 716 A84-38525
Optimization of hybrid laminated composite plates p 918 A84-45058
Recognizing defects in carbon-fiber reinforced plastics [NASA-TM-76947] p 204 N84-15143
Effects of JP-4 fuel on Graphite/Epoxy composites [AD-A135416] p 310 N84-17296
Large deformation behavior of long shallow cylindrical composite panels [NASA-CR-173288] p 560 N84-22975
The use of Arall in fuselage skins p 596 N84-24572
Service-life induced failure of bird impact resistant windshields [AD-P003195] p 672 N84-26608
Comparison of toughened composite laminates using NASA standard damage tolerance tests p 802 N84-29972
Impact dynamics research on composite transport structures p 802 N84-29975
Nonlinear Structural Analysis [NASA-CP-2297] p 827 N84-31688
Nonlinear analysis for high-temperature composites: Turbine blades/vanes p 827 N84-31699
Refined methods of aeroelastic analysis and optimization - swept wings, propeller theory, and subsonic flutter [NASA-CR-173967] p 1010 N84-33835

SUBJECT INDEX

LAND USE

- Airport noise and land use compatibility at downstate Illinois airports [PB84-177377] p 708 N84-26716
Community reaction to impulsive noise: A 10-year research summary [AD-A141762] p 812 N84-29369

LANDING

- An in-flight investigation of pilot-induced oscillation suppression filters during the fighter approach and landing task p 897 A84-44471
Simulator evaluation of a remotely piloted vehicle lateral landing task using a visual display [NASA-TM-85903] p 791 N84-29885

LANDING AIDS

- In-flight short field landing investigations on a combat aircraft with thrust reverser [AIAA PAPER 83-2693] p 48 A84-12306
Precision landing guidance for advanced V/STOL [AIAA PAPER 84-0338] p 188 A84-18031
Antenna systems at civil aviation airports — Russian book p 284 A84-21571
Design and flight testing of a digital landing approach autopilot p 361 A84-25487
Tether guides helicopter to landing on tossing ship p 419 A84-29571

- Axisymmetric approach and landing thrust reversers for single engine fighters

- [AIAA PAPER 84-1214] p 604 A84-35652
Ground-to-air facilities p 857 A84-44728
Ruggedized military ATC display requirements — The U.S. Marine Corps solution p 859 A84-44746
Marine Air Traffic Control And Landing System (MATCALS) investigation [AD-A130309] p 42 N84-10045

- Standard Engineering Installation Package. Ground control approach radar systems and radome(S) [AD-A130726] p 79 N84-10430

- Advanced symbology for general aviation approach to landing displays p 125 N84-12039

- Evaluation and analysis of experience reports concerning wind shear problems [DFVLR-FB-83-19] p 280 N84-16159

- Marking and lighting of unpaved runways — in-service testing [AD-A140958] p 708 N84-27751

- Airport safety technology: Washington National Airport [GPO-34-406] p 993 N84-33423

LANDING GEAR

- Cockpit CRT display tyre pressure indicating system p 56 A84-11625

- Pre-flight transient dynamic analysis of B-52 carrying Space Shuttle solid rocket booster drop-test vehicle [AIAA PAPER 83-2698] p 117 A84-13725

- The motion of the landing skis of aircraft along the ground. II - The take-off run p 118 A84-14254

- Selection of efficient landing gear arrangements for heavy aircraft based on concrete runways p 118 A84-14267

- A reconsideration of the tail-wheel in an actively controlled, undercarriage management system p 290 A84-21798

- A determination of the parameters of cup-shaped landing gear p 523 A84-30431

- Active landing gear smooths the ride p 526 A84-32689

- Aircraft arresting systems — Russian book p 705 A84-37521

- Manufacturing procedures and their relation to failures in landing gear components p 804 A84-40804

- Analysis of a semi-levered suspension landing gear with some parametric study p 974 A84-49187

- Computer program for preliminary helicopter design [AD-A136026] p 351 N84-18197

- Experimental and analytical investigation of active loads control for aircraft landing gear p 354 N84-19886

- Safety recommendation: Cessna Model 402C airplane, September 5, 1983, Tampa International Airport, Tampa, Florida p 589 N84-25680

- Validation of an Active Gear, Flexible Aircraft Take-off and Landing analysis (AGFATL) [NASA-TP-2353] p 880 N84-32378

LANDING LOADS

- Experimental stress analysis of a thin walled pressurized torus loaded by contact with a plane — dynamic response of aircraft tires p 239 A84-17443

- Aircraft tires — Some design aspects p 431 A84-29400

LANDING SIMULATION

- Ship motion pattern directed VTOL letdown guidance p 344 A84-25453

- The Shuttle Mission Simulator computer generated imagery p 795 A84-40604

- Simulator evaluation of a remotely piloted vehicle lateral landing task using a visual display [AIAA PAPER 84-2095] p 771 A84-42348

- Ground-simulation investigation of VTOL instrument flight rules airworthiness criteria [AIAA PAPER 84-2105] p 760 A84-42353

- VTOL shipboard letdown guidance system analysis [NASA-CR-166519] p 611 N84-25716

LAP JOINTS

- Some effects of alloying elements on the performance of bonded aluminum alloy joints p 470 A84-26625

- The study of graphite/epoxy repair variables using a double lap shear specimen p 710 A84-38889

- On improving the fatigue performance of a double-shear lap joint [VFW-29/83-O] p 628 N84-26431

LARGE SCALE INTEGRATION

- MIL-STD-1553B Marconi LSI chip set in a remote terminal application [AD-P003538] p 924 N84-31142

- Third generation MIL-STD-1553B LSI chip set [AD-P003542] p 924 N84-31146

LARGE SPACE STRUCTURES

- System definition study of deployable, non-metallic space structures [NASA-CR-171090] p 796 N84-28887

- An integrated, optimization-based approach to the design and control of large space structures [AD-A141856] p 796 N84-28896

- Structures and Dynamics Division research and technology plans for FY 1984 and accomplishments for FY 1982 [NASA-TM-85828] p 809 N84-29245

LASER ANEMOMETERS

- Application of laser anemometry in turbine engine research p 315 A84-22872

- Application of laser anemometry to cryogenic wind tunnels p 368 A84-25226

- International Symposium on Applications of Laser-Doppler Anemometry to Fluid Mechanics, Lisbon, Portugal, July 5-7, 1982, Proceedings p 477 A84-28701

- A comparison of turbulence intensity measurements using a laser velocimeter and a hot wire in a low speed jet flow p 478 A84-28741

- Infra-red laser velocimetry p 600 A84-36299

- Optimization of fringe-type laser anemometers for turbine engine component testing [AIAA PAPER 84-1459] p 804 A84-40248

- Base flow measurements in a transonic cascade using a laser transit anemometer p 744 A84-40862

- Application of laser anemometry in turbine engine research [NASA-TM-83513] p 81 N84-11456

- Investigation of flow phenomena in a transonic fan rotor using laser anemometry [NASA-TM-83555] p 274 N84-17143

- Optimization of fringe-type laser anemometers for turbine engine component testing [NASA-TM-83658] p 623 N84-25019

- Investigation of the three-dimensional flow field within a transonic fan rotor: Experiment and analysis [NASA-TM-83739] p 850 N84-32357

LASER APPLICATIONS

- Application of laser inertial technology to commercial airplanes p 424 A84-26801

- Laser accelerometers in aerial gravimetry systems p 775 A84-40869

- Application of pulsed laser holography to nondestructive testing of aircraft structures p 819 A84-45497

- A laser velocimeter system for large-scale aerodynamic testing [NASA-TM-84393] p 270 N84-16144

- Transactions of the Japan Society for Aeronautical and Space Sciences, vol. 26, no. 73, November 1983 [ISSN-0549-3811] p 315 N84-16374
